Pathology of the Lung

H. Spencer
St. Thomas's Hospital Medical School, London

Third Edition Volume 2

PATHOLOGY OF THE LUNG

(Excluding Pulmonary Tuberculosis)

Third Edition

IN TWO VOLUMES

H. SPENCER

M.D.(Lond.), Ph.D., F.R.C.S.Eng., F.R.C.P., F.R.C.Path.

Professor of Morbid Anatomy in the University of London at St. Thomas's Hospital Medical School and Honorary Consultant Pathologist to St. Thomas's Hospital, London

With a Foreword by

AVERILL A. LIEBOW, M.D.

Formerly Professor of Pathology, Yale University School of Medicine, and Emeritus Chairman and Professor of Pathology, University of California, San Diego, La Jolla, California

Spencer, Herbert, 1915–
Pathology of the lung. 3rd Edition
Bibliography: p.
Includes index.
1. Lungs—Diseases. I. Title. [DNLM: 1. Lung diseases. WF600 S745p]
RC756.S65 1976 616.2'4'07 76–11763
ISBN 0-08-021021-X

Exclusive distribution in North and South American continents granted to W. B. Saunders Company, Philadelphia and Toronto

Printed in Northern Ireland at the Universities Press (Belfast) Ltd.

Contents

Volume 1

PREFACE TO THE THIRD EDITION xiii

FOREWORD xv

1. Embryology of the Lung **1**

Intrauterine Development 1
Extrauterine Air-passage Growth 8
Development of the Pulmonary Vessels 11

2. The Anatomy of the Lung **15**

General 15
Gross Anatomy 16
Microscopical Anatomy of the Air Passages 21
The Pulmonary Vascular System 48
The Pulmonary and Bronchial Venous System 58
The Pulmonary Nervous Supply 63
Anatomical Differences between the Adult and the Neonatal Lung 69
Visceral Pleura 69

3. Congenital Abnormalities of the Lung, Pulmonary Vessels and Lymphatics **71**

Primary Agenesis (Aplasia) and Hypoplasia of the Lung 71
Accessory Bronchi, Accessory Lungs and Sequestrated Lungs 75
Lung Cysts 87
Congenital Cysts 89
Congenital Abnormalities of the Pulmonary Artery 95
Congenital Abnormalities of the Pulmonary Veins 102
Congenital Pulmonary Lymphangiectasis 110
Congenital Tracheobronchomegaly 113

4. Diseases of the Bronchial Tree **115**

Acute Bronchitis (Large Bronchi) 115
Acute Bronchiolitis 116
Chronic Bronchitis and Bronchiolitis 118
Bronchiectasis, Pathogenesis 130
Infective Bronchiectasis 133
Collapse (Atelectatic) Bronchiectasis 142
Congenital Bronchiectasis 143

5. The Bacterial Pneumonias 151

Pneumococcal Pneumonia (Lobar Pneumonia) 153
Pneumococcal Bronchopneumonia 159
Staphylococcal Pneumonia 159
Streptococcus pyogenes (β-Haemolytic Streptococcal) Pneumonia 166
Klebsiella Pneumonia 168
Aspiration Pneumonia 170
Haemophilus influenzae Pneumonic 173
Pseudomonas and B. proteus Pneumonia 176
Fulminating Interstitial Pneumonia in Infancy (Cot Deaths) 177
Neonatal Pneumonia 178
Plague Pneumonia 180
Anthrax Pneumonia 182
Tularaemic Pneumonia 186
Pneumonia in Brucellosis 190
E. coli Pneumonia 190
Meningococcal Pneumonia 190
Salmonella Pneumonia 191

6. Pneumonias due to Rickettsiae, Bedsoniae, Viruses and Mycoplasma 193

Rickettsial Pneumonias 193
Q Fever 193
Psittacosis (Ornithosis) 196
Virus and Mycoplasma Pneumonias, General Features 201
Influenzal Pneumonitis 203
Measles and Giant-cell Pneumonia 207
Cytomegalovirus Pneumonitis 214
Adenovirus Infections in the Lung 219
Varicella (Chicken Pox) Pneumonia 221
Other Virus Diseases of the Lung 224
Mycoplasma Pneumonia 226
Whooping-cough (Pertussis) Pneumonia 232

7. Chronic Infective Pneumonias 235

General Reaction of the Lung to Chronic Pneumonitis 235
Pulmonary Botryomycosis 240
Pulmonary Atypical Mycobacteriosis 241
Pulmonary Syphilis 245
Syphilitic Pulmonary Arteritis 248
Pulmonary Actinomycosis 249
Pulmonary Nocardiosis 252
Glanders and Melioidosis 256

8. The Pulmonary Mycotic Diseases 263

Mucormycosis 265
Coccidioidomycosis 266
Aspergillosis 275
North American Blastomycosis 284
Paracoccidioidomycosis 288
Cryptococcosis 295
Histoplasmosis 297

此为试读，需要完整PDF请访问：www.ertongbook.com

Moniliasis 306
Sporotrichosis 310
Geotrichosis 312
Adiaspiromycosis 312
Allescheriasis 313

9. Lung Abscesses **317**

Inhalational Lung Abscess 317
Lung Abscesses due to Bronchial Obstruction 322
Synpneumonic Lung Abscesses 323
Pyaemic Lung Abscesses and Septic Infarcts 326
Traumatic Lung Abscesses 326
Transpleural Spread of Infection 326
Lung Abscesses in Infected Hydatid Cysts 326

10. Pulmonary Parasitic Diseases **327**

Amoebic Lung Abscesses 328
Pneumocystis Pneumonia 331
Toxoplasmosis of the Lung 336
Pulmonary Kala-azar 340
Pulmonary Schistosomiasis 341
Paragonimiasis 348
Pulmonary Opisthorciasis 351
Hydatid Disease of the Lung 351
Pulmonary Strongyloidosis 358
Hookworm Diseases (Pulmonary Manifestations) 360
Pulmonary Ascariasis 360
Pulmonary Filariasis 363
Pulmonary Dirofilariasis 365
Pulmonary Pentastomiasis 367
Pulmonary Acariasis 370

11. The Pneumoconioses and Other Occupational Lung Diseases **371**

Pneumoconioses 371
General Features 371
Silicosis 379
Coal-worker's Pneumoconiosis 395
Carbon-electrode-maker's Pneumoconiosis 411
Anthracosis 411
Graphite Lung 411
Talcosis 412
Siderotic Lung Disease 416
Haematite-miner's Lung 416
Silver-polisher's Lung 423
Asbestosis 423
Kaolin Pneumoconiosis 431
Aluminium Lung 432
Fuller's Earth Lung 433
Barium Lung (Baritosis) 435
Fibre-glass Lung 436
Hard-metal Lung Disease 437
Titanium Lung 437
Stannosis 438

Vegetable-dust Diseases 438
General Features 438
Farmer's Lung 440
Bagassosis 443
Byssinosis 445
Capsicum Lung 449
Maple-bark-stripper's Lung 449
Mushroom-picker's Lung 449
Sequoiosis 450
Pigeon-breeder's and Budgerigar-fancier's Lung 450
Pituitary Snuff Lung 452
Occupational Lung Diseases due to Fumes and Fine Dust 452
General Features 452
Bauxite Lung 453
Beryllium Pneumonitis 454
Arc-welder's Lung 460
Cadmium Pneumonitis 460
Mercury Pneumonitis 461

12. Radiation Injuries to the Lung and Lipoid Pneumonia 463

Radiation Fibrosis of the Lung 463
Inhalation Lipoid Pneumonia including Liquid Paraffin Granuloma 468
Kerosene Inhalation 477

13. Collapse, Bronchial Obstruction and Its Sequelae, Shock Lung and Foreign Bodies in the Lung 479

Collapse of the Lung 479
Neonatal Collapse (Atelectasis) including Hyaline Membrane Disease in the Neonate 484
Obstructive Pneumonitis (Chronic Absorption Collapse) 494
Chronic Pneumonitis of Cholesterol Type 496
Foreign Bodies 501
Collapse due to Lymphadenitis (Middle Lobe Syndrome) 502
Bronchopulmonary Lithiasis 503
Shock Lung 503

14. Emphysema 505

Pathogenesis 507
Varieties of Emphysema 513
Interstitial Emphysema 539
Apical Lung Scars 541

Volume 2

15. Pulmonary Thrombosis, Fibrin Thrombosis, Pulmonary Embolism and Infarction 543

Pulmonary Thrombosis 543
Fibrin Thrombosis of Pulmonary Vessels 545
Pulmonary Embolism 547
Emboli of Extravascular Origin 552
General Features 552
Fat Emboli 554

Air Embolism 555
Bone-marrow Emboli 557
Amniotic Fluid Embolus 558
Trophoblast Emboli 559
Decidual Emboli 561
Brain Emboli 561
Liver Emboli 564
Fatty-tissue Emboli 564
Bile Thromboemboli 564
Cotton-fibre Emboli 565
Parasitic Emboli 565
Vegetation Embolus 566
Emboli in Drug Addict's Lungs 566
Cardiac Catheter Embolus 568
Mercury Embolism 568
Pulmonary Infarction 569

16. Chronic Pulmonary Hypertension **579**

General Features and Physiology of the Pulmonary Circulation 579
Chronic Pulmonary Hypertension 586
Primary (Idiopathic) Pulmonary Hypertension 603
Hyperkinetic Pulmonary Hypertension 607
Chronic Pulmonary Hypertension due to Living at High Altitude 612
Chronic Passive Pulmonary Hypertension (Post-capillary Resistance Group) 615
Chronic Left Ventricular Failure 616
Mitral Stenosis 616
Rare Causes of Chronic Passive Pulmonary Hypertension 631
Chronic Pulmonary Hypertension due to Primary Mechanical Obstruction of the Pulmonary Arteries 639
Chronic Pulmonary Hypertension of Uncertain or Ill-understood Causation 647
Aneurysms of the Pulmonary Artery 648

17. Pulmonary Oedema and Its Complications and the Effects of Some Toxic Gases and Substances on the Lung **651**

Pulmonary Oedema 651
Acute Pulmonary Oedema due to Chemical Agents 660
Paraquat Lung 662
"Uraemic" Lung (Fibrinous Pulmonary Oedema) 665
Alveolar Lipo-proteinosis (Alveolar Proteinosis) 669
Adult Hyaline Membranes 673

18. Degenerative and Metabolic Disorders of the Lungs **675**

Amyloidosis of the Lung 675
Pulmonary Corpora Amylacea 680
Pulmonary Alveolar Microlithiasis 681
Alveolar Calcification in the Lung 685
Pulmonary Ossification 688
The Pulmonary Lipoidoses 690
von Gierke's Disease 693
Cystine Storage Disease (Lignac–Fanconi Disease) 693

19. Pulmonary Diseases of Uncertain Aetiology **697**

Rheumatic Pneumonitis 697
Bronchial Asthma 700
Chronic Asthma 704

Eosinophilic Pneumonia and the Pathergic Angeitides 705
Eosinophilic Pneumonia and Bronchocentric Granulomatosis 706
Pulmonary Allergic Granulomas 712
Generalized (Classical) Wegener's Granulomatosis 713
Localized Wegener's Granulomatosis 721
Sarcoidal Angeitis 722
Lymphomatoid Granulomatosis 723
Goodpasture's Syndrome 727
Idiopathic Interstitial Fibrosis of the Lung (IIFL) 728
Lung Changes in Progressive Systemic Sclerosis (PSC) 741
Pulmonary Changes in Rheumatoid Disease 746
Pulmonary Changes in Diffuse Lupus Erythematosus and Dermatomyositis 754
Pulmonary Changes in Sjogren's Syndrome 754
Idiopathic Pulmonary Haemosiderosis 754
Relapsing Polychondritis 759
Pulmonary Sarcoidosis 761
Desquamative Interstitial Pneumonia (DIP) 768
Malakoplakia of Lung 772

20. Carcinoma of the Lung **773**

Incidence Rates 773
Aetiological Factors 776
Atypical Hyperplasias and Pre-carcinomatous Conditions in the Lung 788
General Features and Histological Varieties of Lung Cancer 799
The Spread of Lung Cancer 840
Cytological and Other Laboratory Procedures in the Diagnosis of Lung Cancer 854

21. Rare Pulmonary Tumours **861**

Bronchial Carcinoid 861
Benign "Clear-cell" Tumour of Lung 873
Neurofibroma and Neurogenic Sarcoma of Lung 874
Myoblastoma of the Bronchus 877
Malignant Melanoma of the Bronchus 879
Pulmonary Chemodectomas 882
Papilloma of the Bronchus 884
Bronchial Cystadenoma and Mucoepidermoid Adenoma 887
Bronchial Cylindroma (Adenoid Cystic Carcinoma) 891
Chondroma of the Bronchus 892
Lipomas of Bronchus and Lung 892
Pulmonary Fibroma and Myxoma 894
Pulmonary Fibroleiomyomas 895
Pulmonary Sarcoma 897
Pulmonary Rhabdomyosarcomas 905
Intravascular and Sclerosing Bronchiolo-alveolar Tumour (IVSBAT) 907
Pulmonary Angioma 908
Pulmonary Haemangiopericytoma 916
Benign Local Pleural Fibroma 920
Malignant Pleural Tumours 923
Endometriosis of Pleura and Lung 927
Plasma Cell Granuloma of the Lung 928
Sclerosing Angioma of the Lung (Sclerosing Granuloma) 933

22. Pulmonary Reticuloses 937

Pulmonary Lymphoid Hyperplasia 937
Hodgkin's Disease 938
Pre-lymphomatous States including Pseudo-lymphoma, Lymphocytic Interstitial Pneumonia (LIP) and Waldenström's Macroglobulinaemia 941
Pulmonary Lymphomas (Lymphosarcoma and Reticulum (Histiocytic) Cell Sarcoma) 947
Plasmacytoma of the Lung 951
Leukaemic Lung 953
Lung Reactions to Cytotoxic (Radiomimetic) Drugs used in Leukaemia 955
Giant Intrathoracic Lymph Nodes 958
Histiocytosis X Disease (Histiocytic Reticuloses) 959

23. Hamartomas, Blastoma and Teratoma of the Lung 973

Pulmonary Hamartoma and Blastoma (Embryoma) 973
Local Pulmonary Hamartomas 973
Congenital Adenomatoid Malformation of the Lung 976
Pulmonary Fibroleiomyomatous Hamartomatous Disorders 981
A Single or Multiple Focal Overgrowth of Myomatous Tissue 981
Pulmonary Lymphangioleiomyomatosis 982
Tuberose Sclerosis 985
Pulmonary Changes in Generalized Neurofibromatosis 988
Pulmonary Blastoma (Embryoma) 989
Intrapulmonary Teratomas 990

24. Secondary Tumours in the Lung 999

AN APPENDIX OF TECHNICAL METHODS USED IN THE STUDY OF LUNG PATHOLOGY 1011
