北京 BEIJING

A dark blue night sky filled with white stars. In the foreground, a green and yellow striped hill rises from the bottom left. On top of the hill stands a light-colored camel facing left, with a small figure in a long coat and hat standing beside it, holding its lead. The scene is set against a dark, textured background.

We have always looked up
at the Moon and wanted
to get there.

First, we had to go up into
space, but things kept going
wrong.

At last we sent a **rocket** into
space. It had a **satellite** on it.

the satellite in space

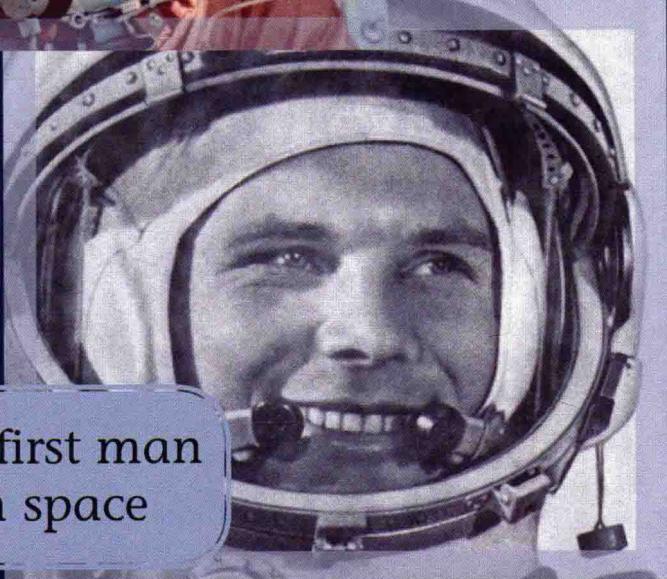

This dog went into space.

Next we sent animals into **space**.

After that, we sent the first man
and the first woman into **space**.

the first man
in space

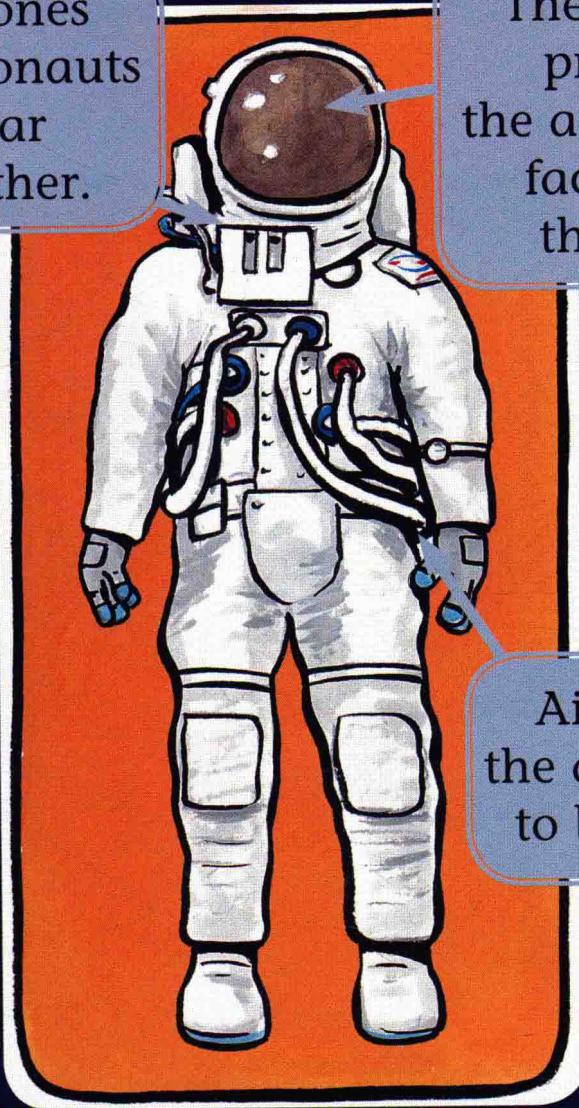

**Space travellers are
called astronauts.**

Ear phones
help astronauts
to hear
each other.

The helmet
protects
the astronaut's
face from
the Sun.

Air helps
the astronaut
to breathe.

Astronauts have to wear
a spacesuit.

In **space** everything seems
to float.

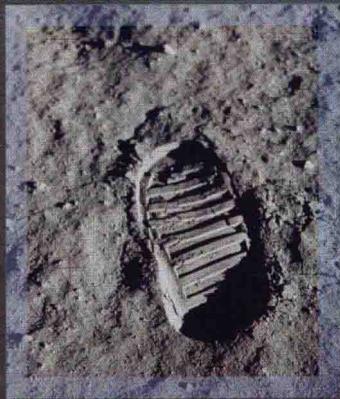

Astronauts eat special food and drink from special cups. They don't want their dinner to float away.

At last **astronauts** landed on the Moon and began to explore.

This man walked on the Moon.

There is no wind on the Moon,
so their footprints are still there.
