## 关于本书

本书介绍了生活在海洋深处的奇妙生物。

文本类型： 报告  
主题： 动物、海洋  
学科： 科学

## 阅读前

- 和孩子一起看一看这本书的封面，谈一谈封面上的生物看上去有多么奇妙！问孩子：Have you ever seen one of these creatures before? Where do you think it lives?  
(答案：It's a squid which lives deep in the ocean.)
- 和孩子一起读一读封底的内容介绍，让孩子说一说书中可能会讲到哪些奇怪的生物。
- 和孩子一起读一读这本书的目录，让孩子说一说书中讲到的所有奇怪生物的名称。  
问孩子：Which name is your favourite?

## 阅读中

- 如果孩子在阅读的过程中不知道某个单词如何发音，教师或家长可以帮助孩子进行拼读，比如，可以帮助孩子把单词拆分为几个音。单词中如果包含不符合拼读规则的音，教师或家长也要给予指导。如果有必要，可以告诉孩子整个单词的发音。
- 本书中不符合拼读规则的单词：giant, stomach, waste, see-through。
- 书中标粗体的单词是孩子阅读过程中可能难以理解的单词，这些单词的解释请参考当页注释。

### 找一找

食骨蠕虫！它没有嘴，也没有胃……怎么吃东西呢？

# It's Weird Down in the Deep Ocean

Down in the deep ocean  
there is no sunlight, only  
darkness. No plants grow.  
Finding food is hard.

In this weird  
place, only the  
weirdest animals  
can stay alive.

# Black Devil Fish

Look at this black devil fish. Its giant mouth is weird but it's useful.

lights up to attract **prey**

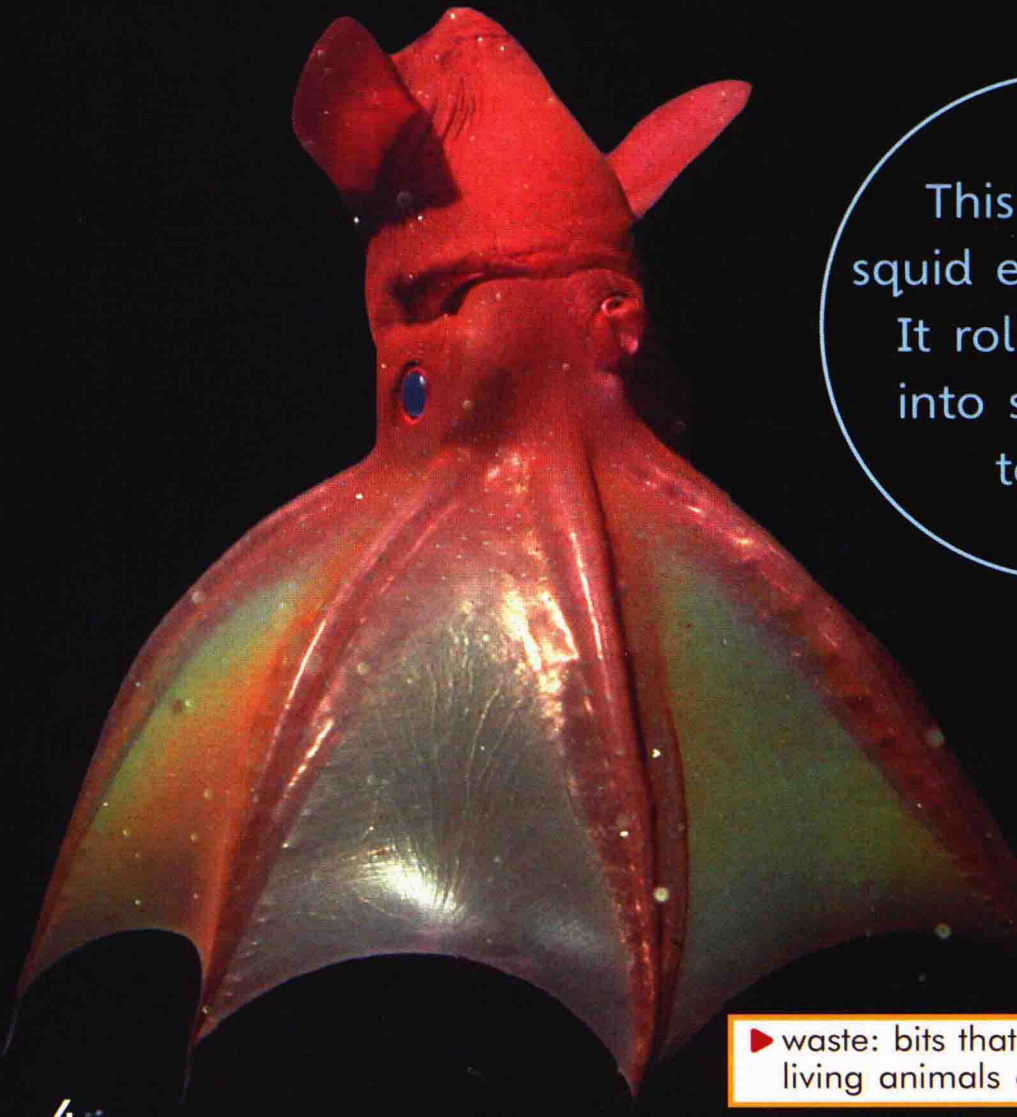

- ▶ prey: animals that are hunted and eaten by other animals
- ▶ stomach: the part of the body that food goes to

The black devil fish can stretch its mouth and **stomach**. It can swallow things bigger than itself.

# Vampire Squid

The food is weird down here.

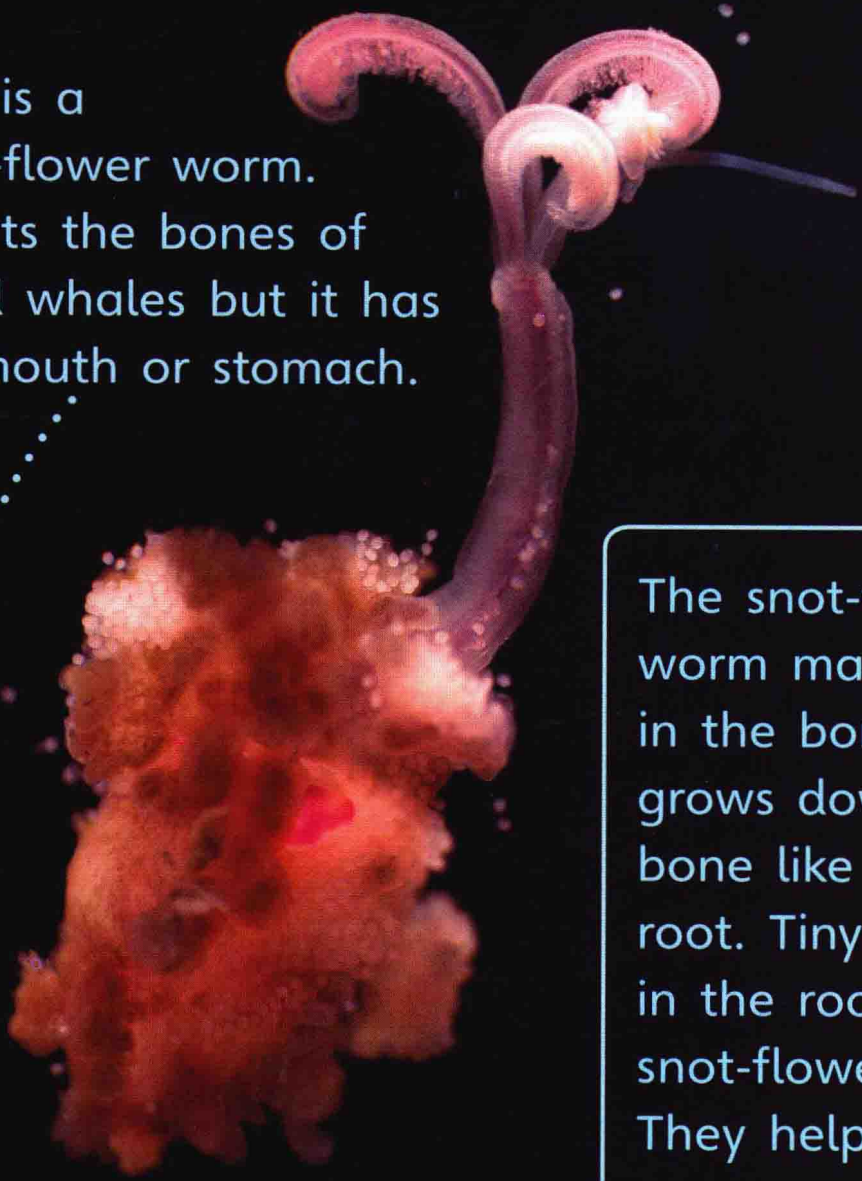

This vampire squid eats **waste**. It rolls its food into slimy balls to eat.

► waste: bits that are left over from living animals and dead animals

# Snot-flower Worm

This is a  
snot-flower worm.  
It eats the bones of  
dead whales but it has  
no mouth or stomach.

The snot-flower  
worm makes a hole  
in the bone. Then it  
grows down into the  
bone like a weird  
root. Tiny bugs live  
in the root of the  
snot-flower worm.  
They help it to eat.

# Loosejaw

It is hard to see in the deep, dark ocean so this weird loosejaw has its own lights.

Lights glow around the loosejaw's eyes, helping it to hunt for food.

light

# Sea Cucumber

If this sea cucumber is attacked, bits of its skin tear off. They start glowing.

mouth

Then the sea cucumber can slip away safely into the darkness.

# Bristle Worm

Without its weird **bristles**, this bristle worm would be cooked alive.

- bristles: hairs that are stiff and short
- seabed: the bottom of the sea

It lives next to cracks in the **seabed**. Very hot water and gas come out of the cracks. The bristles keep this worm safe.

bristles

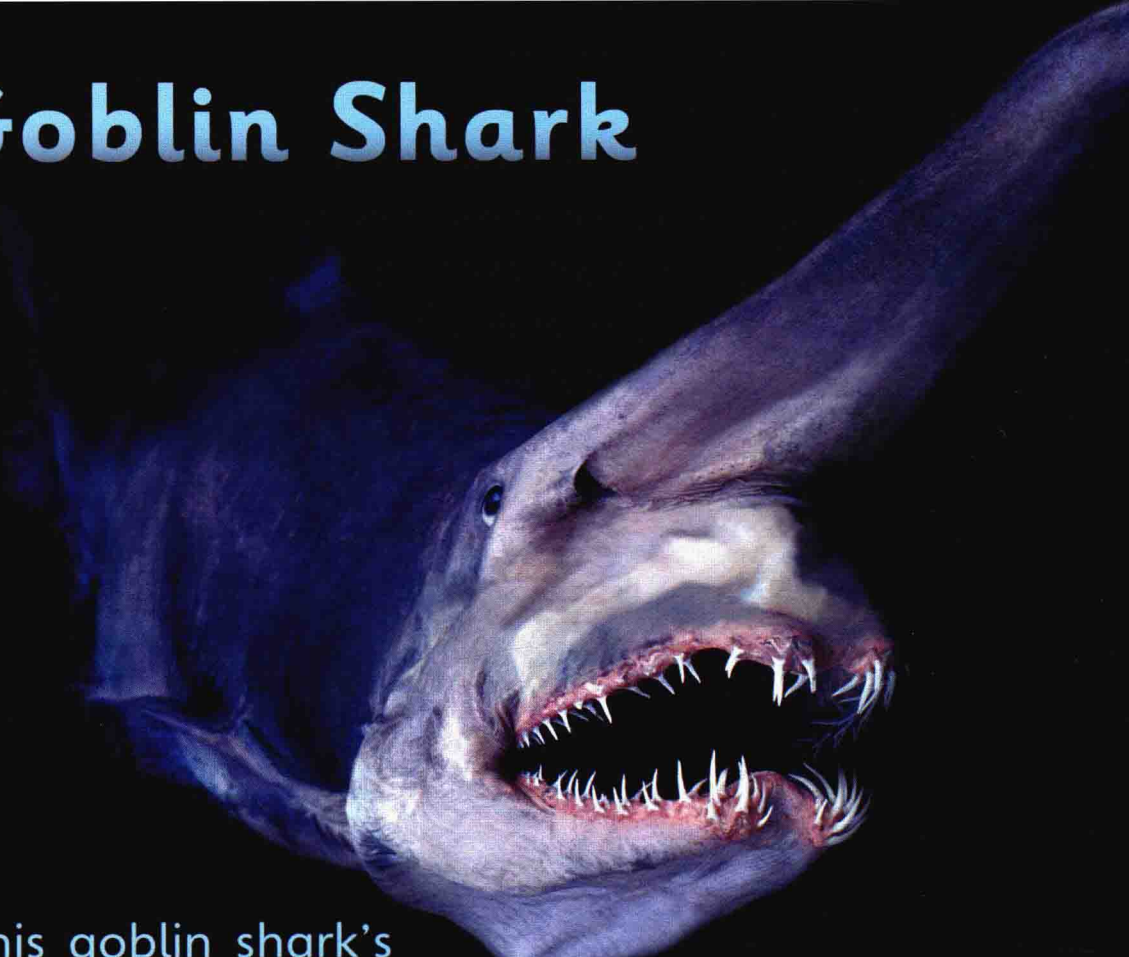

# Yeti Crab

This yeti crab has  
no eyes.

It finds  
food by feeling  
about with  
its strange,  
hairy claws.

# Goblin Shark

This goblin shark's nose is weird but it's useful. The shark can smell and feel when other animals are nearby. In the darkness, the goblin shark uses its nose to find other animals to eat.

When the goblin shark finds something good to eat, it swallows it whole.
