What is recycling?

Recycling is making something new from something that has already been used.

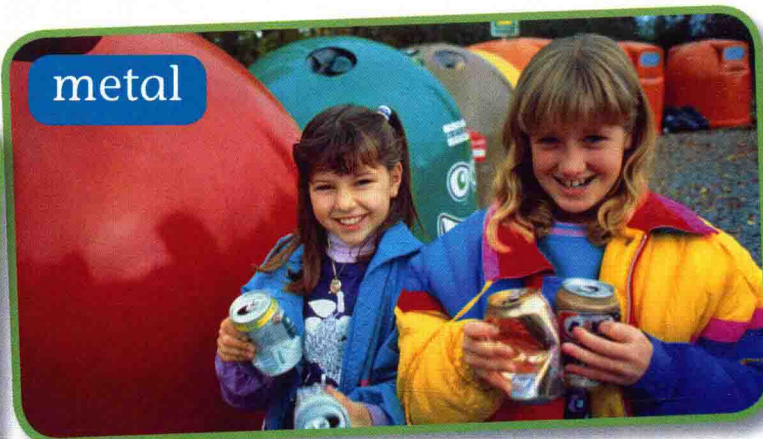

Instead of throwing things away we can collect and **recycle** them to make new things.

What can we recycle?

We can **recycle glass, metal, plastic and paper.**

Let's look at **plastic**. We use it every day.
Only some kinds of **plastic** are easy to **recycle**.
Some **plastic** is hard to **recycle**.

easy to recycle

hard to recycle

How do we recycle plastic?

First we collect the **plastic**.

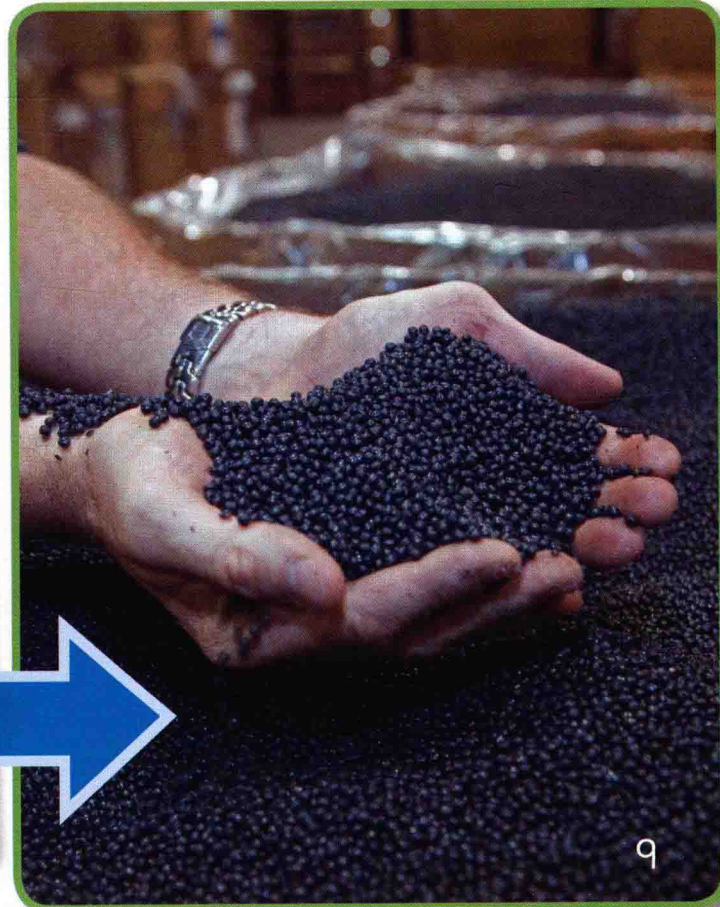

It is sorted into different kinds.

Then it is cut into small bits and washed.

After it has been washed, the **plastic** is melted and made into pellets. Now the old **plastic** can be used again.

New things we can make

We can make many things out of **recycled plastic**.

clothes

furniture

toys

Why is it good to recycle?

Too much rubbish is bad for the **planet**.

What can we do? We can **reduce** how much we use. We can **reuse** things. And we can **recycle**.

How plastic is recycled

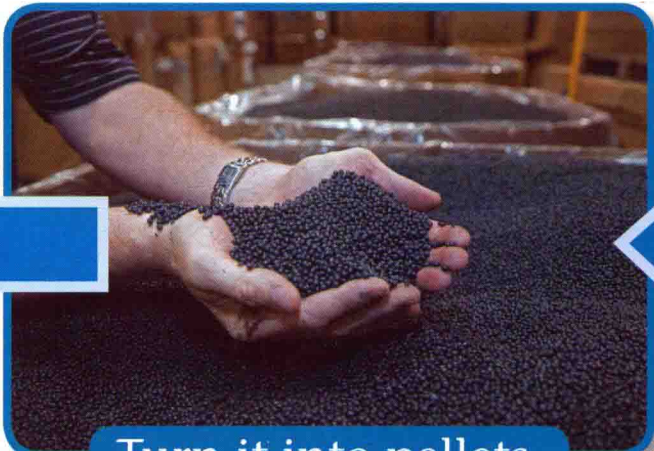

Put it in the recycling bin.

Collect the plastic.

Make something new
from the pellets.

Turn it into pellets.
