## Abstract

Based on relevant data collected from functional departments including People's Standing Congress Committee of Legal Affairs of Guizhou Province, People's High Court of Guizhou Province, People's Procuratorate of Guizhou Province, Legislative Affairs Office, Justice Department and Public Security Department of Guizhou government, this report is concentrated on the major initiatives of the development of the rule by law and the law-based governance in Guizhou Province. By analyzing the important, difficult and hot issues with a full reflection of the progress in promoting the rule by law in 2014 and predicting future development of the rule by law in Guizhou Province, this report proposes some suggestions.

This report claims that the idea of rule by law has been firmly established and the responsibility of social governance to promote the rule by law has been fully taken by party committees and governments at all levels in Guizhou since 2014. By the logic of rule by law, progress has been made in building Guizhou under the rule of law. Based on scientific, democratic and legal ruling, building law-ruled Guizhou has been considered as a major task involving scientific development. As an example of governing for the people, building Guizhou under the rule of law has been treated as the focus of party committees and has been listed in economic development program. Great progress has been made in fields of local legislation, administrative government by law, judicial adjudication, procuratorial work and judicial administration.

Aiming at the current obvious contradictions and problems faced by building law-ruled Guizhou and combining the new task and new request proposed for building a law-ruled country and law-ruled Guizhou by the Eighteen Session of the Fourth Plenary Session of the Communist Party of China and the Eleventh Session of the Fifth Plenary Session of the Guizhou Provincial Party Committee, this

report presents some suggestions on how to further promote the rule by law. First, uphold and improve the leadership of the Party, enhance the institutionalization of leadership pattern, encourage the public to attend the process of building law-ruled Guizhou and increase transparency during the process of building law-ruled Guizhou. Second, strengthen and improve legislative work, improve local laws and regulations, and give a full play to the leading role of legislation. At the same time, take full use of legislative autonomy in a flexible way and enhance the economic and social development in national autonomous areas. Third, in order to address problem related to law-ruled administration, we should promote the publicity and education about the idea and method of rule by law, improve the institutional building of law-ruled administration, promote the reform of administrative system, integrate and optimize dispute mediation mechanism, improve the examination system and its results of law-ruled administration, and increase the level of law-ruled governance. Fourth, develop a firm attitude toward the idea of rule by law, plan and promote the build of safe Guizhou. When it comes to the problems during the build of safe Guizhou, we should study and address them by making good use of the method of rule by law, incorporate the build of safe Guizhou into the orbit of rule by law, and make a great effort to build safe Guizhou. Fifth, make a great effort to promote the innovation in institutional building in the field of ecological construction. By playing a leading and exploratory role, we will make great progress and gather great experience in building law-ruled ecological civilization.
