Qingjiang Changyang Man National Geopark

Application leadership:

Supervisor: Wang Xinzhu

Vice supervisor: Ma Shangyun, Li Jinfa, Li Xuefeng, Wang Gongping, Li Lunhua, Li Yunda, Zhang Wuxian

Member: Lin Aihua, Wang Xiaofeng, Liu Chunyang, Tian Guoliang, Qin Wannou, Li Shuping, Mao Xinghua, Qin Yuanzhou, Hu Shichun, Wang Xiaolin, Li Yongqing, Qin Yong, Tang Jijie, Li Meng, Dai Yong

Application Office:

Director: Qin Wannou

Vice Director: Xiong Yongshu, Qin Yuanzhou

Organization undertaking the project:

Yichang Institute of Geology and Mineral Resources

Project leaders: Wang Xiaofeng, Chen Xiaohong

Project Members: Wan Yongquan, Meng Fansong, Wan Chuanshang, Li Xubing, Li Zhong, Cheng Long, Zhang Miao

Folk Song as Running Water as the Qingjiang River

Editor in chief: Wan Yongquan, Ma Shangyun, Wang Xiaofeng

Photographer: Wan Yongquan

Writer: Wan Yongquan et al.

Translator: Cheng Long, Liu An, Wang Xiaofeng

Corrector: Wang Xiaofeng

Execution: Wan Yongquan

Auditor: Wang Xiaofeng

致谢:

本画册是在中共长阳县委、长阳县政府、发改委、财政局、国土资源局、建设局、旅游局、统计局、文体局、环保局和宜昌市国土资源局及宜昌地质矿产研究所等单位支持与帮助下完成, 在此一并致谢!

Acknowledgements

These authors are indebted to the County committee, government of the Changyang County and their relative units, to the Department of Land and Resources of Yichang City, as well as to the Yichang Institute of Geology and Mineral Resources for their assistance and cooperation on the album.

Contents

I	峰林峡谷 Peak forest and valley	17
II	喀斯特溶洞 Karst caves	45
III	湖泊岛屿 Lakes and islands	59
IV	碧水飞瀑 Green water and flying waterfall	67
V	岩石与地层 Rocks & Strata	77
VI	长阳人 Changyang Man	95
VII	巴文化 Ba Culture	103
VIII	清江风情 Qingjiang Amorous Feelings	113
IX	公园图集 Geopark Album of Pictures	126

这是一块美丽而又神奇的土地，她孕育了19万年前人类远古祖先——长阳人；
 这里有一条古老的河流——清江，她用欢快的波涛，唤起了四千年前土家族的始祖——巴人，从洞穴中走出；

她用日月奔流的河水，哺育了土家儿女的成长；

地质作用的鬼斧神工又在她的怀抱中留下了丰富的地质遗迹，形成了美丽而又多样的地质公园。

在清江长阳人地质公园中，地质遗迹与300里“清江画廊”的旅游景观完美地结合在一起，园中的古冰川遗迹，完整的新元古代至古生代地层序列，古人类、古蕨类植物、古鲎甲鱼等30多个门类的动植物化石，以及峡谷、峰丛、岩溶地貌，等等，与灿烂的土家族文化互相辉映，形成了一个天然的地质博物馆。

参观清江长阳人地质公园，就像阅读一本记载地球历史的教科书，她向人们叙述着隐生宙以来地球的演化历史，叙述着长阳乃至我国南方曾经发生过的多次沧海桑田变化和生物多样性事件。从她那连绵起伏，拔地晴空的峰峦峭壁；那穿越千山万壑，常年碧波荡漾，清澈如镜的河流小溪；那如诗如画，幽静恬宜的峡谷；那银河倒挂，凌空飞渡的瀑布；那形态万千，精妙绝伦的喀斯特溶洞；还有那河流阶地和层状地貌，无不使人领悟到地球的奥秘，体验到地球演化的历史，感受到大自然的神奇和恩赐，见证到生物对环境变化的响应，从而进一步懂得人类与环境和谐发展的重要。

This is a beautiful and magical land, who has given birth to the Changyang Man – ancient human ancestors 190 thousand years ago.

Here has an ancient river – the Qingjiang River. She used her joyful wave to arouse the Ba people – the founder of the Tujia national minority 4000 years ago – to emerge from the caves.

She used the sun and the moon racing current of the river, nurtured the growth of the Tujia sons and daughters home soil.

The magical geological role left a great deal of geological relics which formed a fantastic and diverse geopark, in her embrace.

In the Qingjiang Changyang Man National Geopark, the geological vestiges are well integrated into the tourist attractions of 150km "Qingjiang Gallery". These geological vestiges here, include the paleo-anthropoids relics, ancient glacial deposits, the well-exposed stratigraphic sequences ranging from Neoproterozoic to Paleozoic with more than 30 kinds of fossil plants and animals, such as the earliest Pteridophyta (Archaeopteris), antiarchilepis, together with the deep gorges and various karsts geomorphology, for example, mountain peak cluster, peak forests and caves etc.. They form a natural geological museum, shining with the splendid Tujia Nationality culture.

The Qingjiang – Changyang Man National Geopark, as if a textbook, recorded crustal evolution history of the Changyang area, even of the south China. It describes to people that the principal alternations of ocean with land and that related biological diversity have ever taken place in these region since Phanerozoic. These fantastic scenes, comprising the peaks and cliffs of interrupted rolling and towering into the cloud, the limpid streams, running across mountains and gullies all the time, the valleys, looking like poem and picture, the waterfalls, like inverted hanging galaxy flying across the sky, the exquisite karst caves and the river terraces and stepped landforms shown in the park, will make people to comprehend Earth's mystery, and to experience Earth evolution history, and to feel the mystery and gift from nature, and to witness the biological response to environmental variation, and thus further to know how important human being and environment should develop in harmony.

清江，一条古老、美丽而又神奇的河。

The Qingjiang River, an ancient, magical and beautiful river.
