定 價 / 70.00 圓

中

國由於生態條件多樣，園藝植物資源十分豐富，栽培歷史悠久，在國際上享有“世界園林之母”的美譽，因對世界園藝事業的發展，起過重要作用，因此備受各國人民的青睞。新中國成立之後，政府十分重視中國園藝事業，特別是1978年以後，園藝事業得到長足的發展，取得了十分可喜的成績。

中國園藝產業主要包括果樹、蔬菜、瓜類、觀賞園藝（含花卉、插花藝術、盆景藝術、造園等），近幾年都發展較快。如1997年全國果樹栽培總面積達864.95萬公頃，果品總產量5089萬噸；蔬菜播種面積為1129萬公頃，總產量3.038萬億噸，保護地栽培面積為86.6萬公頃；西瓜栽培面積為120萬公頃，甜瓜栽培面積為23萬公頃；花卉栽培面積為8.6萬公頃。隨着園藝產業的發展，園藝產品大大豐富，滿足了市場各方面的需求，并有部分產品出口國外，園藝產業的經濟效益大幅度增加。

此外，園藝方面的科學研究和教育事業也迅速得到發展，在中國農業科學院下屬的有二個果樹、一個柑橘、一個蔬菜花卉專業研究所，面向全國。各省農業科學院（所）大都設有果樹、蔬菜研究所（室），部分省農業科學院設有花卉研究所（室），部分大中城市園林系統設有園林科學研究所等，從事這些方面的科學研究及技術推廣工作。在全國高等農業院校中，大都設有果樹、蔬菜專業（系）；在部分農業院校中設有觀賞園藝專業（系），部分林業院校設有園林專業（系），在部分建築院校設有風景園林規劃、設計專業（系），

分別為國家培養了大批園藝方面的專門人才。

近幾年來在園藝科學技術方面的研究和推廣工作也大大加強。主要開展了園藝植物種質資源的調查、收集、研究、保存、利用等研究；園藝植物引種和育種，種苗繁殖技術的研究；園藝植物栽培技術，設施栽培管理及反季節栽培技術的研究；園藝植物有關

方面的生理、生化、遺傳特性，各種理化因素處理的研究；園藝植物病、蟲、草害發展、侵染規律及防治技術研究；園藝植物產品采後處理、貯藏、保鮮的研究；園藝植物的區劃和發展規劃的研究；園藝植物生物技術及分子生物學的研究；以及插花藝術、盆景藝術、造園藝術等方面的創作和研究等等，都取得了大量的成果，推動了園藝科學事業的發展和生產水平的提高。

在中國園藝事業雖有非常悠久的歷史，但對園藝科學技術廣泛研究的時間還是比較短的，需要進一步提高科學技術和生產水平。因此在加強我們自身工作的同時，需要加強國際交流，學習和引進國外先進的科學技術。另外，世紀之交，中國舉辦'99昆明世界園藝博覽會，這是一次很好地展示建國以來我們在園藝方面所取得的成就和學習各國先進的科學技術和經驗的機會。為此，我們選擇了部份具有中國特色的園藝方面的圖片，匯編此畫冊，以增進大家對中國園藝事業的了解，也作為對舉辦'99昆明世界園藝博覽會盛會的一點貢獻。

中國園藝學會副理事長 李樹德

1999年3月

China is rich in natural resources of horticultural crops. She has a long history in the cultivation of horticultural crops. China has always enjoyed the reputation of being a "China Mother of Gardens" in the world. It has played an important role in the development of horticulture. After the founding of new China, the central government paid much attention to the development of horticultural industry. Especially since 1978, horticulture has made rapid progress in its development.

Horticulture in China consists of pomology, vegetable crops, melons and ornamental horticulture (flowers, flower arrangement art, penjing art and landscape architecture etc.), is developing rapidly. In 1997, total growing area of fruit trees in China reached 8.647 million hectares with total output of 50.89 million tons; total sown area of vegetable crops amounted to 1,129 million hectares with total production of 303.8 million tons, the protected culture acreage was 0.866 million hectares, water melon 1.2 million hectares, muskmelon 0.23 million hectares and flower 86,000 hectares. Along with the development of horticultural industry, ample supply of horticultural produce has met the needs of market and a part of the product has been exported to foreign countries. The economic benefit of horticultural industry is increasing greatly.

In addition, the scientific research and education in horticulture are rapidly developing. In China there are two national pomology research institutes, one citrus institute and one national institute of vegetables and flowers all under the administration of the Chinese Academy of Agricultural Sciences. The rest are provincial. Each of the provincial academies of agricultural sciences has either institute or department of pomology and vegetables. In big or medium-sized cities landscape research institutes are established to do specialized research and extension. Each of agricultural universities or colleges has either a department of ornamental horticulture or a specialty and each forestry universities or colleges has a specialty of landscape and there are departments or specialties of landscape and gardening planning and design under the administration of architecture universities or colleges. These

universities have trained a large number of students.

In recent years, a large number of scientific achievements has been obtained in the exploration, collection, characterization, conservation and utilization of germplasm resources of horticultural crops, introduction and breeding, seed and seedling multiplication, culture techniques, protected culture management techniques and off-season culture, physiology, biochemistry, genetic characters, different physical and chemical treatment, disease, insect pests and weed occurrence, infestation law and their control techniques, postharvest treatment, storage and fresh-keeping research, regionalization and development planning of horticultural crops, biotechnology and molecular biology research on horticultural crops, flower arrangement art, penjing art, landscape architecture art etc. It has greatly promoted the development of both research and production.

China only started the scientific research on horticulture in recent years although it has a long history in horticulture. Therefore it needs to take further steps to improve the research and production level. We should strengthen the collaborative relations with institutions in foreign countries in order to study and introduce advanced science and technology while we are doing our own work. In addition, when the 20th century is changing into 21st century, the '99 International Horticultural Exposition, is going to be

held in Kunming, China. This is a good opportunity to show the progresses made in the past 50 years and learn the advanced science and technology and experiences in other countries. For this reason, we have selected the photos with Chinese characteristics to compile the picture album for your better understanding of horticulture in China. It can be regarded as a kind of contributions to the grand '99 International Horticultural Exposition Kunming, China.

Li Shude

Vice President Chinese Society for Horticultural Science

March 1999

目 次 Contents

果 樹 Pomology	(1)
落葉果樹 Deciduous fruit trees	(2)
秦冠 Qinguan apple (<i>Malus pumila</i> Mill cv.)	
華冠 Huaguan apple (<i>Malus pumila</i> Mill cv.)	
褐梨 Dusky pear (<i>Pyrus phaeocarpa</i> Rehd.)	
古梨樹 Old pear tree (<i>Pyrus phaeocarpa</i> Rehd.)	
山楂 Hawthorn (<i>Crataegus pinnatifida</i> Bge.)	
李光杏 Liguang apricot (<i>Prunus armeniaca</i> L.)	
大紅甜櫻桃 Dahong sweet cherry (<i>Prunus avium</i> L.)	
肥城桃 Feicheng peach (<i>Prunus persica</i> (L.) Balsde.)	
磨盤棗 Mopan date (<i>Zizyphus jujuba</i> var. <i>Lageniformis</i> Hort.)	
杏 Apricot (<i>Prunus armeniaca</i> L.)	
核桃古樹 Old walnut tree (<i>Juglans regia</i> L.)	
板栗 Chinese chestnut (<i>Castanea mollissima</i> Blume.)	
老柿樹 Old persimmon tree (<i>Diospyros kaki</i> L. f.)	
柿 Persimmon (<i>Diospyros kaki</i> L. f.)	
無核白葡萄 Seedless white grape (<i>Vitis vinifera</i> L.)	
銀杏 Ginkgo (<i>Ginkgo biloba</i> L.)	
中華獮猴桃 Yangtao Actinidia (<i>Actinidia chinensis</i> Planch.)	
大棚栽培油桃結果狀 Fruiting of Nectarine (<i>prunus persica varnectana</i> Maxim.) culture in plastic tunnel	
塑料大棚栽培李 fruiting of plum (<i>prunus salicina</i> Lindl.) culture in plastic tunnel	
塑料大棚栽培草莓 Strawberry (<i>Fragaria</i> L.) growing and fruiting in plastic tunnel	
長綠果樹 Evergreen fruit trees	(7)
枇杷 Loquat (<i>musa acuminata</i> Colla.)	
佛手 Fleshfingered citrus (<i>citrus medica</i> var. <i>sarcodactylis</i> Swingle.)	
碰柑 Satsuma orange (<i>citrus reticulata</i> Blanco.)	
中育 7 號甜橙 ZhongYu No.7 sweet orange (<i>citrus sinesis</i> Osbeck.)	
荔枝 Litchi (<i>litchi chinensis</i> sonn.)	
香蕉 Banana (<i>Musa acuminata</i> Colla)	
番石榴 Guava (<i>psidium guajava</i> L.)	
楊桃 Common Averrhoa (<i>Averrhoa carambola</i> L.)	
番木瓜 Papaya (<i>Carica papaya</i> L.)	
人心果 Heart balata (<i>Manikara zapotilla</i> (Tacq.) Gilly.)	
龍眼 Longan (<i>Euphoria longanalam.</i> (<i>Dimocarpus longana</i> Lour.)	
山金柑 Hong Kong Kumquat (<i>Fortunella nindsii</i> (champ.) Swingle.)	
木菠蘿 Diversileaf artocarpus (<i>Artocarpus heterphyllus</i> Lam.)	
涪溪蜜柚 Guanxi pomelo (<i>citrus sinensis</i> osbeck.)	
蔬 菜 Vegetables	(10)
蘿蔔 Radish (<i>Raphanus sativus</i> L.)	
sHeading Chinese cabbage (<i>Brassica campestris</i> L. ssp. <i>Pekinensis</i> (Lour.) Olsson)	
白菜 Non-heading Chinese Cabbage (<i>Brassica campestris</i> L. ssp. <i>chinensis</i> (L.) Makino var. <i>communis</i> Tsen et Lee)	
菜心 Flowering Chinese cabbage (<i>Brassica campestris</i> L. ssp. <i>Chinensis</i> var. <i>utilis</i> Tsen et Lee)	
芥藍 Chinese Kale (<i>Brassica alboglabra</i> Bailey.)	
葉芥菜 Leaf mustard (<i>Brassica juncea</i> Coss. var. <i>foliosa</i> Bailey)	
冬瓜 Wax gourd (<i>Benincasa hispida</i> (Thunb.) Cogn.)	
絲瓜 Sponge gourd (<i>Luffa</i> sp.)	
蛇瓜 Snake gourd (<i>Trichosanthes anguina</i> L.)	
苦瓜 Balsam pear (<i>Momordica Charantia</i> L.)	
瓠瓜 Bottle gourd (<i>Lagenaria siceraria</i> (Molina) Standl)	
節瓜 Chieh-gua (<i>Benincasa hispida</i> Cogn. var. <i>chieh-qua</i> How.)	
黃瓜 Cucumber (<i>Cucumis sativus</i> L.)	
佛手瓜 Chayote (<i>Sechium edule</i> Swartz.)	
中國南瓜 Pumpkin (<i>Cucurbita moschata</i> Duch.)	
菜豆 Kidney bean (<i>Phaseolus vulgaris</i> L.)	
長豇豆 Asparagus bean (<i>Vigna unguiculata</i> W. ssp. <i>sesquipedalis</i> (L.) Verd)	
扁豆 Lablab (<i>Dolichos lablab</i> L.)	
蕹菜 Water spinach (<i>Ipomoea aquatica</i> Forsk)	
豆瓣菜 Water cress (<i>Nasturtium officinale</i> R.Br.)	
茼蒿 Garland chrysanthemum (<i>Chrysanthemum coronarium</i> L.)	
萵筍 Asparagus lettuce (<i>Lactuca sativa</i> L. var. <i>angustana</i> Irish.)	
水芹 Water dropwort (<i>Oenanthe Stotonifera</i> DC.)	
落葵 Malbar Spinach (<i>Basella</i> spp.)	
黃花菜 Day lily (<i>Hemerocallis</i> spp.)	
韭 Chinese chive (<i>Allium tuberosum</i> Rottl. Ex Spr.)	
節能型日光溫室 Energy saving solar greenhouse	
魔芋 Elephant foot taro (<i>Amorphophallus</i> sp.)	
山藥 Yam (<i>Dioscorea</i> spp.)	
節能型日光溫室內黃瓜生產情況 Cucumber Production in Energy saving solar greenhouse	
辣椒 Pepper (<i>Capsicum annuum</i> L., syn. <i>C. frutescens</i> L.)	
冬寒菜 Curled mallow (<i>Malva verticillata</i> L. (M. <i>crispia</i> L.))	
莧菜 Edible amaranth (<i>Amaranthus mangostanus</i> L.)	
薑 Ginger (<i>Zingiber officinale</i> Rosc.)	
蓮藕 Lotus root (<i>Nelumbo nucifera</i> Gaerth)	
茭白 water bamboo (<i>Zizania caduciflora</i> Turcz.)	
大蒜 Garlic (<i>Allium sativum</i> L.)	
蒼山大蒜田 Cangshan garlic field	
竹筍 Bamboo shoot (<i>Bambusoideae</i> spp.)	
百合 Lily (<i>Lilium</i> spp.)	
大葱 Welsh onion (<i>Allium fistulosum</i> L. var. <i>giganteum</i> Makino)	
甜瓜西瓜 Melons and Watermelon	(21)
甜瓜 Melon	(22)
甜瓜野生資源 Wild germplasm resources of melon	

華北野生甜瓜 North China wild melon (*C. Melo Agrestis*)
 中國甜瓜優良品種 “黃金瓜” " Huang Jin Gua "(*C. melo Makuwa*), China good melon variety
 中國甜瓜優良品種三峽（白）和八里香
 Shanxia (white) and Balixiang , China good melon variety
 中國甜瓜優良品種 “亞洲二號”
 " Asia No.2" (*C. melo Makuwa*), China good melon variety
 中國甜瓜優良品種 “皇妃”
 " Huangfei " (*C. melo Makuwa*), China good melon variety
 早熟厚皮甜瓜優良品系 84 - 39
 84-39, China good early ripening muskmelon
 金鳳凰無土栽培 Gold Phenix melon soilless culture
 甜瓜珍貴種質 – 完全花高節成品種
 Melon precious germplasm - complete flower, high internode (*C. melo Makuwa*)
 蛇形甜瓜 Snake like melon (*C. melo Flexuosus*)
 甘肅甜瓜資源之一 One of the melon germplasm in Gansu Province (*C.melo* var. *cassaba*)
 華北綠菜瓜 North China conomon melon (*C. melon* var. *Conomon*)
 四川菜瓜品種 Sichuan Province caiqua melon(*C. melon* *Flexuosus*)
 菜瓜品種 – 毛菜瓜 Mao Cai Gua (*C. melo Flexuosus*)
 南瓜形甜瓜種質 Pumpkin type melon germplasm
 甜瓜重要種質資源 – 巴倫西亞諾
 Important melon germplasm - Balonsiano
 哈密瓜品種 Golden phenix - Hamigua (*C. melo* var. *saccharinus*)
 著名蜜瓜優良品種 – 黃河蜜
 Huanghemi - Well known sweet melon
 張家口灤田栽培密瓜 Zhangjiakou gravel cultured melon
 哈密瓜新品系 81 - 49
 81 - 49 (*C. melo* var. *saccharinus*) Hamigua new line
 白蘭瓜新品種 81 - 49
 81 - 48 Bailangua (*C. melo* var. *inodrus*) new variety
 蘭州白蘭瓜卵石砂田栽培 Lanzhou Bailangua oval gravel melon production
 “麗春”日光溫室栽培 " Lichun " melon in solar greenhouse
 “麗春”蜜瓜小拱棚早熟栽培
 " Lichun " sweet melon in mini-plastic tunnel, early ripening culture

西瓜 Watermelon

北京市大興縣瓜鄉種瓜王
 King of watermelon-Beijing Daxing county
 黃皮西瓜 Yellow skin water melon
 甘肅砂田地膜西瓜栽培
 Gravel plastic film mulch wa-termelon in Gansu Province
 金太陽無籽西瓜新品種
 Golden sun seedless water- melon new variety

保護地專用西瓜良種 819
 Good variety 819 watermelon special for protective cultivation
 河北新樂市大棚吊式栽培西瓜
 Pendent watermelon culture in plastic greenhouse, Xinle city.
 Hebei province
 京欣類型西瓜在大棚中上架栽培提高單產和品質
 Jingxing type watermelon in plastic greenhouse. Pendent growing for raising production and improving quality
 51 公斤特大西瓜 Special giant watermelon weighs 51 kg

花卉 Flowers (28)

花卉的应用 Utilization of flowers (29)

天安門節日花壇 Flower terrace at Tian An Men square during festival
 荷花蕩 Lotus flower marsh
 牡丹類園 Peony garden
 立體綠化 Three-dimensional greening

常用花卉名錄 Commonly used flowers (30)

金盞菊 Pot marigold (*Calendula officinalis*)
 矢車菊 Cornflower (*Centaurea cyanus*)
 曙花 Queen of the night (*Epiphyllum oxypetalum*)
 蝴蝶蘭 Moth orchid (*Phalaenopsis amabilis*)
 瓜葉菊 Florists cineraria (*Senecio × hybridus*)
 菊花 Chrysanthemum (*Dendranthema × grandiflorum*)
 香石竹 Carnation (*Dianthus caryophyllus*)
 令箭荷花 Orchid cactus (*Nopalxchia ackermannii*)
 桔梗 Balloon flower (*Platycodon grandiflorus*)
 唐菖蒲 Gladiolus (*Gladiolus hybridus*)
 芍藥 Chinese peony (*Paeonia lactiflora*)
 虞美人 Corn poppy (*Papaver rhoeas*)
 碧桃 Flowering Peach (*Prunus pensica*, f. *duplex* (*Qrnamental peach*))
 地生蘭 Cymbidium (*Cymbidium spp.*)
 蓼花 Prince's feather (*Polyyonum Orientale*)
 嘉蘭 Glorglily (*Gloriosa superba*)
 卡特蘭 Autumn cattleya (*Cattleya bowringiana*)
 向日葵 Sunflower (*Helianthus annuus*)
 百合 Lily (*Lilium spp.*)
 矮牽牛 Petunia (*Petunia hybrida*)
 半支蓮 Chinese lobelia (*Pontulaca grandiflora*)
 中國水仙 Chinese sacred lily (*Narcissus tazetta* var. *chinensis*)
 荷花 Lotus (*Nelumbo nucifera*)
 鶴望蘭 Bird of paradise flower (*Strelitzia reginae*)
 月季 Monthly Rose (*Rose cvs.*)
 牽牛花 Indian Pharbitis (*Pharbitis nil*)
 牡丹 Tree Peony (*Paeonia suffruticosa*)
 梅花 Mei flower (*Prunus mume* (*Armeniaca mume*))

櫻花 Flowering Cherries (<i>Prunus serrulata</i>)	兩人餐桌花 Arrangement on the dinner table for two people
榆葉梅 Flowering almond (<i>Prunus triloba</i>)	清谷幽蘭 Quiet valley
海棠 Crabapple (<i>Malus spectabilis</i>)	缸花 Jar Flower Arrangement (50)
丁香 Lilace (<i>Syringa spp.</i>)	春光如水 Bright-colored spring sights look like floating clouds and flowing water.
扶桑 Chinese Hibiscus (<i>Hibiscus rosa-sinensis</i>)	果實的旋律 Cantos of fruits
火棘 Fortune firethorn (<i>Pyracantha fortuneana</i>)	金秋 Golden autumn
臘梅 Winter-sweet (<i>Chimonanthus praecox</i>)	雅趣 Elegant taste
茶花 Camellia (<i>Camellia japonica</i>)	紅顏如醉 A beauty look drunk
杜鵑花 Rose bay (<i>Rhododendron & R. spp.</i>)	歡宴 Happy feast
石榴 Pomegranate (<i>Punica granatum</i>)	暮歲晚照 Sunset glow in declining years

果樹 Pomology

中

國由於地域廣闊，氣候、地形、土壤類型多樣，果樹栽培歷史悠久，與世界各國、地區品種資源交換廣泛，果樹品種資源極為豐富，栽培方式多樣。據不完全統計，我國原產及引進的果樹品種資源涉及 59 個科，158 個屬，694 個種以上，品種、品係不計其數。其中經濟價值較高，分佈較廣，栽培面積較大，產量較多的有薔薇科 (Rosaceae)、芸香科 (Rutaceae)、無患子科 (Sapindaceae)、芭蕉科 (Musaceae)、鼠李科 (Rhamnaceae)、葡萄科 (Vitaceae)、山毛櫟科 (Fagaceae) 等果樹。從本世紀 50 年代開始，尤其 80 年代以來，全國果樹生產發展迅速。1997 年，全國果品總產 5089 萬噸，人均果品占有量 42.2 千克；果樹總面積 8649.5 千公頃，人均超過 71.7 平方米。面積、產量較多的果樹順次為：蘋果 (2838 千公頃, 1722 萬噸)、柑橘 (1309 千公頃, 1010 萬噸)、梨 (924 千公頃, 641.5 萬噸)、香蕉 (180 千公頃, 289 萬噸)。由於篇幅有限，現僅選擇部分有代表性的果樹種類、品種和栽培方式圖片共 42 幅介紹給讀者。

pomology

China is a country with large territory and diversified climate, geography and soil types. China has a long history in fruit tree culture. She is rich in pomology genetic resources with various cultural practices. China carries out pomological germplasm exchanges with other countries or regions. According to the incomplete statistics, there are 59 families, 158 genus and 694 species and innumerable cultivars or lines of pomology germplasm resources in our country. In which rose family (Rosaceae), Rue family (Rutaceae), Soapberry family (Sapindaceae), banana family (Musaceae), buckthorn family (Rhamnaceae), grape family (Vitaceae), beech family (Fagaceae),etc have the highest economic value with wide distribution, large growing acreage and high yield. Since 1950s especially since 1980s, fruit tree production in the whole country has been developing rapidly. In 1997, the total fruit production amounted to 50.89 million tons and the per capita consumption of fruit reached 42.2kg , the total fruit tree growing was 8.6495 million hectares with per capita occupancy of 71.7 square meters. Apple ranks the first in both acreage and output (28,380,000 hectares ,17,220,000 tons) , then comes the citrus (13,090,000 hectares, 10,100,000 tons) , pear (924,000 hectares, 6,415,000 tons) , banana (180,000 hectares, 2,890,000 tons). Because of the limited spaces, only 42 pictures of representative species, cultivars and cultural practices of fruit trees were selected for appreciation.

落葉果樹 Deciduous fruit trees

秦冠蘋果 (*Malus pumila* Mill. cv.) 陝西省果樹所育成，大果、豐產、耐貯藏，主產陝西省。
