前言

徐 光 春

中国改革开放十五年，雄狮振鬣，彪炳史册！

十五年，在历史的长河中只是短暂一瞬。然而弹指一挥间，孕育了五千年华夏文明的中国大地发生了翻天覆地的变化，善良、谦恭曾倍受西方帝国列强欺辱的中国人民扬眉吐气，东方之狮雄视世界！

回首十五年的历程，中国人民伴着自豪与思考，喜乐与清醒，顺畅与坎坷，成功与挫折，一步一个脚印，一步一洼汗水，在建设现代化强国的征途上奋勇前行。

总结过去，激励今天，憧憬未来，值此邓小平南巡谈话两周年暨建国 45 周年之际，光明日报出版社从今春开始组织国家部分部委、省、区、市的领导和专家编撰了一套大型中国改革系列丛书《辉煌十五年》。

丛书以省（部委、地市、行业）立卷编纂，旨在全面总结改革开放十五年来成就与经验，多角度地展示在党的十一届三中全会路线指引下，我国人民的精神风貌、物质生活、思想水平等诸多方面发生的巨大变化，展示两个文明建设、综合实力、工农兵商、教科文卫各行各业在邓小平同志建设有中国特色的社会主义理论指引下，所取得的伟大成就。

在各省、部、地、市、行业领导的直接关心指导下，丛书撰稿人、编辑以极大的热情为我国今后更快更好的发展而析理、为伟大的人民而立传、为改革开放的大好形势而讴歌。在如此短的

时间内将这套资料丰富、卷帙浩繁的丛书付梓，充分体现：改革开放，党心所向，民心所向。

回首过去，展望未来，再一次雄辩地证明，只要我们始终坚持邓小平同志建设有中国特色的社会主义理论，在江泽民总书记为核心的党中央领导下，抓住机遇、深化改革、扩大开放、促进发展、保持稳定，我们的国家就将进一步取得举世瞩目的伟大成就，我们古老而伟大的民族，必将面向未来，自立于世界民族之林！

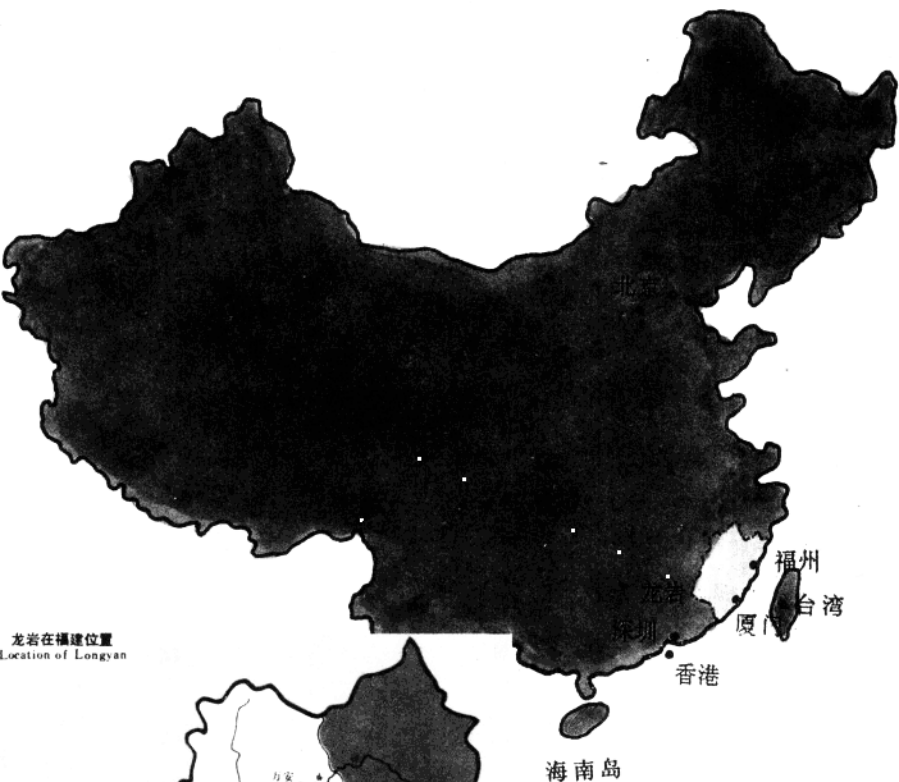

一九九四年十二月

序

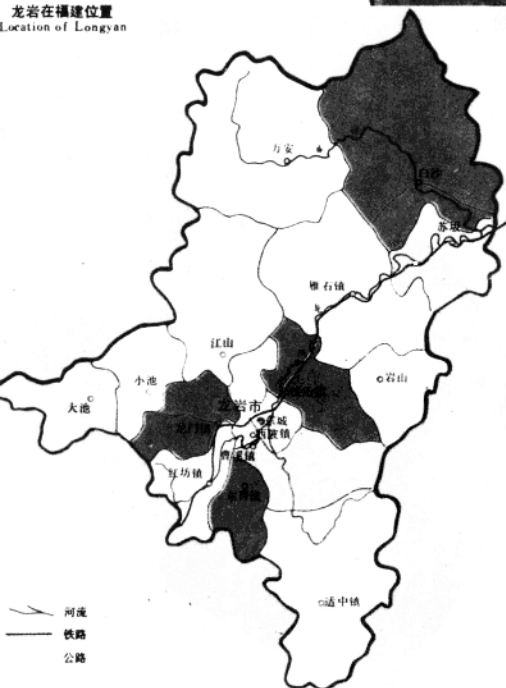

这是一块洒满革命先烈鲜血的土地，是我党创建的全国最早的闽西革命根据地的一部分。1928年3月，中共龙岩县委在东肖后田镇率先举行武装暴动，开创“闽西土地革命之先声”。尔后，毛泽东、朱德等同志亲自率领红军“三打龙岩城”，建立了革命根据地。在长期的革命斗争中，建立革命基点村305个，有700多人参加红军、赤卫队和新四军，近4000人为革命献出了生命，在这块红色土地上涌现了郭滴人、邓子恢等一批无产阶级先锋战士。龙岩，几十年红旗不倒，干革命走在前头，搞建设力争上游。龙岩儿女在社会主义革命和建设的新时期里，以崭新的时代风貌，用自己勤劳的双手，创建了美丽的家园。

这是一块充满活力的土地。党的十一届三中全会以后，市委、市政府号召龙岩人民发扬革命传统，以实事求是、艰苦奋斗的精神积极投身改革，引导大家把老区优势、山区优势、资源优势转变为商品优势、经济优势和精神优势。改革开放，龙岩敞开山门；内引外联，广泛吸收人才、资金、技术。龙岩，正象一条龙在腾飞！

十五年，在历史长河中只是一瞬间，改革开放的大潮使龙岩发生了历史性的巨变。为记载十五年来龙岩市各行各业所走过的奋斗历程、所取得的辉煌业绩，我们组织编撰了这本书，以期对历史作一个回顾，对未来提供激励前行的信心。

A BRIEF INTRODUCTION TO LONGYAN

Longyan, a political, economical and cultural centre in south-west Fujian province, lies in the upper Jiulong River valley. It is also a hub of communications linking western Fujian with southern Fujian, southern Jiangxi province and east Guangdong Province. Besides, it serves as a distribution centre for goods and materials in the region.

With a population of 438,000, the city has seven administrative townships, eight towns and four neighbourhood communities under its jurisdiction. The entire area covers 2,677 square kilometres. There are green hills and clear waters everywhere, and it is like spring all the year round. The average annual temperature is about 20 C, and mean rainfall is around 1,700mm, which make the climate very pleasant and less subject to extremes of winter and summer.

Longyan is a fertile land and is richly endowed with natural resources. The city is known for its mineral and timber products as well as for the large number of overseas Chinese with Longyan origin. More than 60 varieties of mineral deposits have been proven, among which are 400 million tons of coal, 500 million tons of iron ore, 400 million tons of limestone and 100 million tons of china clay

(Kaolin) . Both their grade and reserve come first in Fujian province. Besides, there are also significant reserves of lead and zine, manganese, tungsten, marble, quartz, rare carths, granite and graphite, etc. 68 of the land is covered with forests, and the timber accumulation has reached 11.68% million cubic metres. 22 big of small rivers flow through Longyan and exploitable hydraulic energy amounts to 313.5 megawatts, which translates into 530 million K. W. H of power generation capacity a year.

The city is geographically situated in the subtropical zone and abounds with agricultural resources thanks to the mild climate and rich rainfall. It is famous for its picturesque scenery and many historical relics, and the national parks of natural conservation have earned the title of "green jade on the tropical desert belt", famed the world over. Other tourist attractions include Longkong Cave, Mt. Tianguan, Mt. Lotus, Mt. Zijin, Dragon Gate Pagoda, Huanggang Reservoir, Fuxi Greek, Rock hill Park, etc.

In more than a decade since the beginning of reform and opening to the outside world, the economy of Longyan has been growing rapidly. The rural area has achieved extensive economic progress. Marked by the completion of ten key Production bases of fruits, tobacco, timber, cattle, poultry and mushroom, etc. , the developmental agriculture is taking shape in a quick pace. And the township enterprises have been making great strides and boasts 14,000 units strong now, playing an ever more important role in Longyan's economy.

As a newly developed industrial city, Longyan has established a manufacturing and mining system consisting of 2,400 enterprises with fixed assets exceeding 1 billion yuan. The enterprises in the system fall into 15 categories including cigarettes, textile, food processing, mining, metallurgy, building material, machinery, forest machinery, papermaking, chemical engineering, coal, power generation and pharmacy. They can produce more than 200 varieties of goods and commodities. The scientific and technological research in the industrial area has also achieved fruitful results with 4 projects winning either national, ministerial or provincial prizes, and 44 items winning prizes at the prefectural level. Moreover, 56 products have been rewarded the title of "top quality product" by departments at or above provincial level, of which two are national titles and 14 ministerial titles.

Longyan is situated at the linking point between Yingtan—Xiamen railway and Fujian—Guangdong—Jiangxi highway network. Two local railways pass through the great Longyan area, connecting with Yingtan—Xingtan—Xiamen railway by which one can reach different parts of the whole country. Over 1,000 kilometres of highways in the city area radiate in all directions extending to more than 90% of the townships. To cope with the development of economy, the construction of Kanchi—Meizhou railway will soon break ground, and Zhangzhou—Longyan railway is going to be upgraded technically. The construction work and electrical wiring of Banliangling tunnel have all finished, opening a new route leading to the Southern Fujian Economic Development Zone. The work to widen up No. 319 national highway within the boundaries of

Longyan will soon be complete.

Longyan's newly installed modern telephone switchboard has a capacity of 50,000 lines and users can easily reach more than 160 countries and regions in the world through IDD. The city has also introduced mobile phone, radio paging service, telex, facsimile and worldwide express mail service.

There are 204 small hydraulic power stations in operation with a total generating capacity of 18,000 kilowatt in addition to a thermal power station of 24,000 kilowatt in capacity. The bigger Wanaxi Hydraulic Power Station and Shubang Thermal Power Station are under construction. The former has a capacity of 24,000 kilowatt and the latter 45,000 kilowatt. The total coal production has reached 2.5 million tons a year. All of the above mentioned projects have laid strong foundation for further development of the economy in Longyan.
