Preface

Dai Fudong

Architects and artists have constantly created and enhanced various environments in which human beings live and behave, and shown the tendency to creat better and modern environments. All of them sincerely look forward to fine things and vigorously pursue magnificent prospects.

In architectural institution of higher learning, our faculty pass on their knowledges and explain difficult points to the students with their genuine love. On the other hand, They use different pens as means of modeling to convey their deeply understanding and rich feeling to the environments with ardent love for both present and future.

On the academic point of view, we have followed the guiding principle of 'Take in Everything, Let Hundreds Flowers Blossom' since the establishment of Architectural Department in Tongji University in 1952. We are proud of our gethering together some teachers of outstanding ability, venerable elders and energetic youths, and our great successes in vivid portrayal of the environments in the last two score years.

Some works have been selected from our successful results and will be published here as a report of our efforts to the human society and as a present to the 85th anniversary of the founding of Tongji University. This publication will be beneficial to all of the authors students and our collectivity with same ideals, and will play an important role in self-cognition and exchange. Wish a great number of new and excellent works will spring up hereafter.

July 10, 1991 At Donglu

序

戴復東

建築師和藝術家們不斷地創作、美化大大小小人類生存與行為的環境。而且不斷地向更好、更新的方向發展。他們都具有一種執着的對美好事物的響往,以及對美好未來追求的素質和精神。

在建築學府中,我們的教師一方面用他們的愛心向學生們傳授知識、解答疑惑;另一方面,出於對現實環境和未來環境的熱愛,不斷地用繪畫等造型藝術手段,表達他們對這些環境的深刻理解和豐富感受.

同濟大學自1952年調整成立建築系以來,在對待學術問題上將"兼收並蓄、百花齊放"一貫作爲我們遵循的方針和原則。幾十年來,我們不斷地吸引和集聚英才,從過去到現在,我們有很多水平很高的長者,也有朝氣蓬勃技法嫻熟的靑年,在對環境刻劃描述方面積纍了豐盛的成果,這是值得我們自豪的。
