《中国古地图辑录》分区域各辑总序

中国古代人民绘制了相当可观数量的地图,单就唐宋时期而言,当时定制,全国各府州每3年或5年都要绘制一次本州地图上报尚书省,唐宋两代以600年、300州,平均每4年造送一次计,即有州图共45000幅。再加上其他官绘或私人制作的各种地图,数量将更多。但可惜的是这些地图大都淹没在历史的长河中,得以流传下来的微乎其微。难怪当代不少学者发出古地图存世太少,给研究工作带来诸多不便的感叹。

在我们感叹古地图存世不多,不利学术研究的同时,却往往忽略了古籍图书中附有大量的以插图形式存在的地图。像古代地理类著作中重要的分支地方志中就附有大量地图,如《雍正陕西通志》收录地图130余幅,《万历绍兴府志》收录地图101幅;有些县志,所收地图也有数十幅之多,如《同治通山县志》就有总图、县郭图及各种地图多达88幅。附有地图的古籍图书虽然主要集中在史部地理类方志属,但史部地理类的其他各属,以及子部或集部有些类别的一些古籍图书中,亦可能附录有古地图。这些以插图形式存在的地图同样具有以单幅或图集形式存在的地图的特性和功用,甚至对特定区域的描绘上更加详实、准确,如果不加以充分利用殊为可惜。然而,这些古地图分散在各个古籍图书中,非常不便阅读使用,特别是不便于古地图之间的比对研究,所以整理、汇编这些古地图已是十分必要的事情了。

已故著名历史地理学家谭其骧先生早在1986年就曾指出:“古人在当时的技术条件限制之下,除了刻石、入土之外,既无法将地图长期保存下来,也无法把许多单幅地图汇为一编。时至今日,对古人说来是无法克服的限制早已为现代技术所突破。我们当然再也不能听任那些历经劫难幸存下来的古地图,仍然像过去那样只是将原制品或加上极少量的复制品度藏于图书馆、博物馆、档案馆的善本珍品库里,不令广泛传播;仍然像过去那样以单幅零页的原貌或作为罕见版本书籍的插图而散在各地,不予汇集成编。利用照相缩印技术把古地图拍下来汇集成编,这是一种保存古文物、传播古文化必须做的工作。这种工作世界上有许多历史比较短的国家都已做了,我们这个文明古国到今天才来动手做,应该说是已到了不容许再推迟的时候。”

将古籍图书中以插图形式存在的古地图辑录出来汇编成册,是一件极为浩繁的工程,不可能一蹴而就,所以我们采用整理好一批出版一批的分辑出版方式,并冠以总书名《中国古地图辑录》。其中《中国古地图辑录》系列丛书的第一辑《康雍乾盛世图》已于2002年10月出版,该专辑选取有代表性的清代康雍乾三朝的一百余年作为一个时间截面,收录在此期间出版的古籍图书中的地图约1700幅,所收集的地图再按当时的政区归类编排,使各地图之间在时间上和空间上具有了内在联系,为读者了解当时的地理状况提供了较完整的资料。接下来,我们开始编辑《中国古地图辑录》分区域各辑,分区域各辑将以区域为单位,同一区域地图再按编制时间先后排列。可独立成辑的省区,独立成辑;不足一辑的省区合并成一辑。分区域各辑仍为8开精装,每面又分上下两栏,每栏一幅图(个别大型图幅除外)。

《中国古地图辑录》分区域各辑具有开创性、实用性和丰富性三大特点。首先,中国古代书籍中收录了大量的地图,但一直没有人对其进行广泛的开发和利用,本书是首次对古籍图书中的地图进行了一定系统的整理和归纳,并辑成图集。其次,地图中承载了大量的自然、社会和人文信息,描述了这些信息在特定时间内的空间分布,其重要功能就是实用性,古地图也不例外,它是研究古代历史文化的实物资料。分区域各辑从地图的实用性出发,以区域为单位,同一区域的

地图再按编制先后排列,使区域之间可进行横向比对,区域内部可进行纵向研究,为今天研究历史、地理、文化提供完整、丰富的地图资料,大大提高了分散于各个古籍图书中的地图的利用价值。再次,分区域各卷的丰富性表现在,所收录古地图是从上万种古籍图书中辑录出来的,总收录地图不低于3万幅,是全国乃至世界最大的古地图整理项目。《中国古地图辑录》分区域各辑出版后,原来很难看到看全的很多分散在各古籍图书中的地图只需通过翻阅几十册汇编起来的图集就基本可窥其全貌了。

还要说明的是,在如此众多的存世古籍图书中,想要全面地将古地图辑出,在短期内是不可能的,也是不经济的。我们以为踏踏实实地做一些其他人不必再做的基础工作,对学术界是十分有益的事情,不完备的地方可以在今后做一些补遗,如果过于求全责备,反而会永远做不完,所以就有了本图集的问世。当然,我们并不是借机开脱工作中的错漏之处,我们会尽所能做好这项工作。

古地图整理汇编项目只取得了阶段成果,还有很长的路要走,让我们共同努力!

王自强

2003年6月于北京

The General Preface for The Complete Collection of Early Maps in China

Ancient Chinese people produced considerable amount of maps. In the time period of Tang and Song Dynasty, it was regulated that every 3 – 5 years each state or province of the country must produce a map of the locality to submit to the minister of the province. If we calculate on basis of 600 years and 300 prefectures and that every four years a map was produced and submitted, it turns out that there are 45000 maps. If we add other types of maps produced by officials or private persons, the number is still large. However it is a pity that majority of these maps are buried at the sea of the history. Those in existence yet are very few. That is why many modern scholars complain that too few ancient maps are kept resulting in much inconvenience for the research work.

At the same time, we ignore the fact that there are still a lot of ancient maps kept in the form of illustrations in ancient books. For instance, there are a lot of maps in chorography, which can be consider as an important branch of ancient geographical work. More detailed speaking, in the *Annals of Yongzheng Shaanxi*, there are some 130 maps collected and in the *Annals of Wanli ShaoXing Prefecture*, there are 101 maps collected. In some annals of certain counties, there are tens of maps collected, such as in the *Annals of Tongzhi Tongshan County*, in which there are some 88 maps, including general map, city plan and other kinds of maps. The ancient books that have included maps are mainly in the field of annals, but there are ancient maps attached in other type of books belonging to geography in history category, as well as in such types of books as *Zi Radical* and *Ji Radical*. Those maps in the form of illustrations possess the function of a map in single or collection form and they offer even more detailed and accurate description on a particular region. It will be a pity if we fail to utilize them. However, it is not convenient for reading since these maps are scattered in various kinds of ancient books. It is more inconvenient with the comparison study and research on the ancient maps. Therefore it is imperative to have these ancient maps sorted out and edited.

Mr. Tan Qixiang, the late famous historian and geographer pointed out in 1986: "As to the technological limitations, the ancient people could not have the maps preserved other than by means of stone carving and burying them under earth, nor could they have many single maps compiled into one atlas. By now, modern technology has broken the restraints of ancient people. Therefore, we certainly shall no longer be content with the small number of original and the very few of their reproduction in libraries, museums or archives as rare books or treasures. These maps ought to be circulated. Neither should we allow scattered single map or pages or maps continue to exist everywhere or as illustrations to rare copies of ancient books. We should compile these maps into atlases, which is a work to be done without delay for the preservation of ancient cultural relics and for the propagation of ancient cultural relics and for the propagation of ancient culture. This work has been undertaken by countries that have a history shorter than China. While for a country like ours having a long civil history, it is high time to embarked on it, without loss of time."

It is a huge and heavy task to have the maps in forms of illustrations in ancient books compiled and made into an atlas and it can never be accomplished in one move. Hence, we have adopted the way where we publish one section after we have compiled it and we give it a general name *the Complete Collection of Early Maps in China*. The first section of the series books – *Maps in China Ancient Books: Kangxi, Yongzheng and Qianlong Golden times (1662 – 1795)* was published in October 2002. In this atlas, there is a cross section of time of 100 years representative of three reigns— Kangxi reign, Yongzheng reign and Qianlong reign, and here are collected about 1700 maps in ancient books that had been published in these 100 years. The collected maps are compiled according to administrative area at that time so that it makes senses for the internal relations between the maps time wise and space wise and thus offering rather complete information of geographical conditions at that time for readers.

Then, we will begin to compile separate editions based on regions of *the Complete Collection of Early Maps in China*. We base the edition on regions and within the same region, we compile according to time sequence. If we can compile the maps into an independent edition by province, we do it; otherwise, we combine some provinces into one edition. The region editions adopt hardcover with 8 Vo and there are two columns on one page— above and below where there is a figure in each column (except individual large figures).

The separated editing based on regions of *the Complete Collection of Early Maps in China* has three characteristics: creativeness, practicality and abundance. First of all, Chinese ancient books collected and included a large number of maps, which nobody tries to make good use of. This atlas is the first one to try to make systematic sorting out and sum-up of these maps and compile them into an atlas. Next, in those maps there contain lot of information on nature, society and human culture. It gives the space distribution of the information in a specific time so the main function of it is practicality. So is the case with ancient maps, which is a factual resource for the study and research on ancient history and culture. The separate edition based on regions starts from the practicality of the maps and taking each region as the unit, the maps in the same region will be compiled according to time sequence. Then horizontal comparison can be conducted between regions and longitudinal research can be conducted inside the region to offer a complete and rich map resource, and optimize the utilization value of the maps that are scattered in each and every ancient book. Last, the abundance of the editions based on regions is embodied in the fact that the collected and edited maps are obtained from over ten thousand of ancient books. The total amount of collected maps is no less than 30000 sheets. It is one of the largest projects with sorting out of the ancient maps in China as well as in the whole world. After the publication of each edition based on regions of *the Complete Collection of Early Maps in China*, by just looking over several dozens of atlases you can take an overall view of the maps that had been scattered in all ancient books and that were once proved difficult to find.

It is also necessary to note that among such huge amount of ancient books in existence, it is not possible to publish a complete set of ancient map edition in a short period of time, nor is economical. We believe when we do this fundamental work to save others from repeating it, it is of benefit to the academic field. What is left incomplete can be improved in future. If we seek perfection then we will trap ourselves in endless work. That is why there comes this edition of the maps. Of course, we will not try to evade the mistakes, if any, in our work and we will do our best to fulfill this task to its fullest.

We have only achieved stage— wise results in the compiling of ancient maps and there is a long way to go, so let us strive together!

Wang Ziqiang

June 2003, Beijing

凡 例

1. 本图集从 200 余种古籍图书中辑录出地图 1000 余幅。其中,宋代地图 5 幅、元代地图 1 幅、明代地图 139 幅,其余 800 余幅为清代地图。在这些古籍图书中,地方志占绝大多数。

2. 本图集所收录古地图的区域范围包括湖北全省 [按清末政区,但康熙六年(1667 年)以前的湖广省总图亦收入此图集中],有总图、府图(直隶州图)、县图(散州图)、乡村图以及城池图等。所收录古地图的时间范围为清代以前(1911 年以前),本辑所收最早的地图是宋淳熙年间(1174-1189 年)。虽然满足以上条件,但图面模糊不清的地图不予收录。

3. 本图集收录的各地图按清末行政区划排序,先总图,后区域图,城池图排在所在区域图之后。描述同一区域的图幅再按地图编制或刊刻时间顺序排列,无法确认准确编制或刊刻时间的地图按推定编制或出版时间的底线排序。如康熙年间纂修的《江夏县志》,无法确定其具体纂修时间,就按康熙年间的底线 1722 年排序。

4. 本图集中收录的各地图按原书中或图中标注的图名著录,并注明出处。如无法在原书中或图中找到图名需自拟图名时,则自拟图名括以方括号[]。

5. 本图集收录的地图尽量保持原貌,不做无谓的加工整理,但为使图面清晰易读,而进行了适当的拼接和修版。

6. 本图集分为上下两册,采用 8 开本,精装。总图部分每面一幅,相当印原书两面。其余部分分上下两栏,相当印原书四面。为便于国际交流,本图集总序、凡例、目录等内容采用中英文对照。

Guide to the use of the atlas

1. This atlas contains some 1000 maps, which are extracted from 200 sets of ancient books. Among these maps, there are 5 maps from Song Dynasty, one map from Yuan Dynasty, 139 maps from Ming Dynasty, and the other 800 maps are from Qing Dynasty. The local chronicles are in the majority among others.
2. The area coverage of the maps in this atlas includes entire Hubei Province (as of late Qing Dynasty's administrative area. But the general map of Huguang province before the Sixth Year of Kangxi or 1667, is also included). There are general maps, prefecture maps, sub-prefecture maps, county maps and city plans, etc. The time range of the collected ancient maps is based on Qing Dynasty (1644-1911) and before Qing Dynasty and the earliest map collected in this edition is from Song Chunxi reign (1174-1189). We tried to meet above requirement, but we did not include those with vague pictures.
3. The maps collected in this atlas are based on the administrative area division at the end of Qing Dynasty, with the general map shown at the beginning, followed by regional maps, and the plans of cities are arranged at the end of the relevantly regional maps. Then the sequence falls to the compilation of the maps or it is arranged by publication time sequence. For those maps that cannot have an accurate time mark for compilation or publication, their order is arranged according to presumed compilation or publication time bottom line. As to the Annals of Jiangxia County compiled in Kang Xi reign, the specific compiling time cannot be determined so it is edited according to bottom line of 1722 in Kangxi reign.
4. The maps collected in this atlas are compiled according to the name given in the original books where it was attached and the source of origin is given. If no name can be found in the original books, the author gives a name to the map and the self-named maps are in brackets.
5. The maps collected in this atlas are kept as they are, with no unnecessary processing being done. But in order to make the maps clear and readable, we made necessary putting together and edition revision.
6. This atlas is composed of a first and second volume and adopts hardcover edition with 8 Vols. For general map section, each map occupies one whole page - twice the side of the original book and the rest part is divided into two columns - above and below - amounting to four faces of the original book. In order to facilitate international exchange, this atlas has Chinese-English bilingual version for preface, Practical guide and catalogues.
