The 7th International Conference on Cognitive Science

Beijing, China
August 17 – 20, 2010

Sponsored by

International Association for Cognitive Science (IACS)
Chinese Society for Cognitive Science (CSCS)
Institute of Biophysics, Chinese Academy of Sciences (IBP, CAS)

Organized by

Chinese Society for Cognitive Science (CSCS)

Co-organized by

State Key Laboratory of Brain and Cognitive Science, IBP, CAS
State Key Laboratory of Brain and Cognitive Science, The University of Hong Kong
School of Computer Science and Technology, Beijing Institute of Technology

Supported by

Chinese Academy of Sciences
National Natural Science Foundation of China
State Administration of Foreign Experts Affairs(SAFEA)

Organization of ICCS 2010

Honorary Chairs

WEI, Yu, South-East University of China, China

LEE, Chungmin, Seoul National University, Korea

Conference Chair

CHEN, Lin, Institute of Biophysics, Chinese Academy of Sciences, China;
President of IACS

Program Committee

Chair:

ZHENG, Nanning, Xi'an Jiaotong University, China

BARA, Bruno G., University of Turin, Italy

CHAE, Hee-Rahk, Hankuk Univ. of Foreign Studies, Korea

CHEN, Lin, Institute of Biophysics, CAS, China

DAI, Ruwei, Institute of Automation, CAS, China

DUAN, Shumin, Institute of Neuroscience, CAS, China

GRAY, Wayne, Rensselaer Polytechnic Institute, USA

GUO, Aike, Institute of Biophysics, CAS, China

HASIDA, Koiti, National Institute of Advanced Industrial Science and Technology,
President of JCSS, Japan

KATAGIRI, Yasuhiro, Future University-Hakodate, Japan

LI, Chaoyi, Institute of Neuroscience, CAS;

University of Electronic Sci & Tech of China, China

LING, Charles X., University of Western Ontario, Canada

LU, Changlin, The Second Military Medical University;

Secretary-in-general of Chinese Society of Neural Science, China

PAN, Yunhe, Chinese Academy of Engineering, China

PENG Kaiping, Tsinghua University, China; UC Berkeley, USA

SHIN, Hyun Jung, President of Korean Society for Cognitive Science, Korea

SLEZAK, Peter, Univ. of New South Wales, Australia

TAN, Li-Hai, Univ. of Hong Kong, Hong Kong, China

TAN, Tieniu, Chinese Academy of Sciences, China

TZENG, Ovid, Institute of Linguistics, Academia Sinica

YANG, Xiongli, Fudan University, China

ZHANG, Bo, Tsinghua University, China

ZHANG, Kan, Institute of Psychology, CAS;

Secretary-in-general of Chinese Society of Psychology, China

ZHONG, Yixin, Beijing University of Posts and Telecommunications;

Secretary-in-general of Chinese Society of Artificial Intelligence, China

Organizing Committee

Chair:

TAN, Li-Hai, University of Hong Kong

Co-Chair:

FU, Xiaolan, Institute of Psychology, Chinese Academy of Sciences

Co-Chair:

SHI, Zhongzhi, Institute of Computing Technology, Chinese Academy of Sciences

Co-Chair:

ZHUO, Yan, Institute of Biophysics, Chinese Academy of Sciences

BAI, Xuejun, Tianjin Normal University

CAI, Shushan, Tsinghua University

CHEN, Min, Beijing Hospital

GAO, Dingguo, Sun Yat-Sen University

GONG, Qiyong, West China Hospital, Sichuan University

GUO, Chunyan, Capital Normal University

HU, Dewen, National University of Defense Technology

HU, Zhujiang, Jiangxi Normal University

LI, Baoming, Fudan University

LI, Hong, Southwest University

LI, Kuncheng, Xuanwu Hospital, Capital Medical University

LIAN, Rong, Fujian Normal University

LU, Zuhong, Southeast University

LUO, Yuejia, Beijing Normal University

MO, Lei, South China Normal University

TANG, Shiwei, Peking University

YAO, Dezhong, University of Electronic Science and Technology of China

ZHANG, Tianxu, Huazhong University of Science and Technology

ZHONG, Ning, Beijing University of Technology

ZHOU, Changle, Xiamen University

ZHOU, Xiaolin, Peking University

ZHOU, Yongdi, East China Normal University

Contents

Part I Opening Ceremony Speeches

1. Neural Basis for Selective Visual Attention (2)
2. Modelling Visual Attention in a Biologically Plausible System; Bridging the Gap between Physiology and Cognition (3)
3. Spike Timing-Dependent Plasticity of Neural Circuits-Hebb's Postulate Revisited (3)
4. Brain Mechanisms Underlying the Intuitive Thinking in Board-Game Experts (4)
5. A Conspiracy Theory of Learning to Read Chinese; Mapping the Educated Eyes to the Educated Brain ... (5)

Part II Frontiers in Cognitive Science

- Section 1 Presidential Symposium on Vision (8)
1. The Global-first Topological Definition of Perceptual Objects, and Its Neural Correlation in Anterior Temporal Lobe (8)
 2. Examining Cortical Circuitry Subservient Working Memory for Visual Motion (9)
 3. Binocular Rivalry; Mechanisms and Applications (10)
 4. Fast and Robust Processing of Visual Information From Field Potentials in the Human Temporal Visual Cortex (10)
 5. Imaging Attention in the Brain; Optical Imaging Studies of Area V4 in Awake, Behaving Macaque Monkeys (11)
 6. Seeing the Functional Role of Adaptation (12)
- Section 2 Attention (13)
- Symposium 1 Intentions in the Mind/Brain (13)
1. The Intentionality Network (13)
 2. From Social Intention to Action; Kinematic Evidence of Social Planning and Control (14)
 3. Inferring Intentions from Biological Motion (14)
 4. Minds Made for Sharing? An fMRI Investigation of the Neural Correlates of Joint Attention (15)
- Symposium 2 A General Theory of Visual Attention (TVA); Cognitive Modeling and Neuropsychological Applications (16)
1. Modulation of Working Memory Related Neural Activity Bydistraction (16)
 2. TVA Based Studies of Dyslexia (17)
 3. TVA Based Studies on the Neurogenetics of Cognition (18)
 4. Neuro-Cognitive Markers of Progressive Attentional Decline in Neurodegenerative Diseases; Parametric Assessment Based on Bundesen's Theory of Visual Attention (TVA) (19)
 5. The NTVA Framework; Linking Cognition and Neuroscience (19)
 6. Attentional Capture and Control; Computation of Attentional Weights (20)

7. Top-Down Suppression from Prefrontal to Primary Somatosensory Cortex Facilitates Tactile	(20)
8. Modeling Attentional Dwell-Time	(21)
9. Towards a Neural Theory of Visual Attention in Perception and Sensori-Motor Control (TVA-M)	(21)
10. Testing Theories of Pure Alexia Using TVA	(22)
11. Examining Spatial Properties from Multiple Views	(22)
12. Quantifying Visual Attention: TVA-Based Assessment of Distinct Components of Visual Attention ...	(23)
Symposium 3 Neural Correlates of Attention and Meditation	(24)
1. Brain Activation during Development	(24)
2. Children 3 – 8 Years of Age: Evidence from ERPs	(25)
3. The Effects of Working Memory Training and Processing Speed Training on Neural Systems and Cognitive Functions	(25)
4. Neural Correlates of Attention Training and Meditation Practice	(26)
5. The Early Attentional Modulation of C1 Component-High Perceptual Load Preferred, but Attentional Load not Crucial	(27)
Section 3 Language	(28)
Plenary Speech	(28)
1. Social Intelligence as a Domain-Specific Module and the Emergence of Language	(28)
2. Developmental Dyslexia in Chinese and English	(29)
Symposium 1 Cognitive Neuroscience of Language	(31)
1. Characterizing Ventral Occipito-Temporal Contributions to Reading	(32)
2. Neural Substrates of Lexical Tone as Revealed at Different Stages of Cortical and Subcortical Processing	(33)
3. Understanding Dynamic Interacting Neural Networks: Applications to Speech and Language	(34)
4. Auditory Memory, Lead-Lag Integration, and Speech Unmasking in Noisy, Reverberant Environments	(34)
5. The Architecture of Speech Perception and Its Temporal Foundations	(35)
6. Evidence Against a Dedicated System for Visual Word Forms in the Fusiform Gyrus	(36)
Symposium 2 Cognitive Processes and Representation of Asian Languages	(36)
1. The Phonological Process with two Patterns of Chinese Characters	(38)
Symposium 3 Universality and Language-specificity of Sound Symbolism: the Interplay of Multimodality, Embodiment, and Iconicity	(38)
1. The Cognitive Semantics of Onomatopoeia: A Crosslinguistic Perspective on the Lexical Integration of Sound Symbolism	(39)
2. Sound Symbolism on Touch	(40)
3. Parallel Relationship between Sound Symbolism and Cross-Modal Correspondence	(41)
4. Neural Priming of Action Concept: fMRI Adaptation for Action Words	(42)
5. Mimetics and Verb Learning: a Discourse Analysis of Verbs Introduced with Mimetic Verbs	(43)
Symposium 4 Enhancing Electronic Dictionaries with the Help of Lexicographers, Computer Scientists and Cognitive Psychologists	(43)
1. A Proposal for Obtaining the Knowledge Base of Onomasiological Dictionaries	(44)

2. Word Sense Disambiguation Using Associative Concept Dictionary	(46)
3. Utilizing the Distributional Hypothesis for Multilingual Thesaurus Construction	(47)
4. Evaluating Statistical Models for Basic Lexicon	(48)
5. The Mental Lexicon, Blueprint of Tomorrow's Electronic Dictionaries	(49)
Section 4 Animal Cognition	(49)
1. Accessing the Neural Bases of Cognitive Processing: Lessons from an Insect Brain	(49)
Symposium 1 Animal Cognition—Intelligent Behavior Emerging from a Small Brain	(51)
1. MAPK Cascades in Rat Anterior Cingulate Cortex Contribute to Induction and Expression of Pain-Related Emotion	(51)
2. Emotional Learning Enhances Stimulus-Specific Top-Down Modulation of Sensorimotor Gating in Socially Reared Rats But Not Isolation-Reared Rats	(52)
3. Face Processing by Honeybees; How Does Brightness Inversion Affect the Capacity of the Miniature Brain to Bind and Configure Spatial Elements for Reliable Recognition?	(53)
4. Differential Roles of the Fan-Shaped Body and the Ellipsoid Body in <i>Drosophila</i> Visual Pattern Memory	(54)
5. Deep Sequencing-Based Transcriptome Profiling Reveals the Differences between Foraging and Dancing behavior in the Honey Bee, <i>Apis Mellifera</i>	(54)
6. Vision of Bees in Relation to Flower Patterns	(55)
7. Selective Visual Attention in <i>Drosophila</i> during Tethered Flight	(56)
8. Small Brains, Smart Minds: New Evidence of Higher Cognitive Function Emerging from the Small Brain	(57)
9. Investigating Episodic Memory in Rats	(58)
Symposium 2 Animal Cognition: Nonhuman Primates Studies	(59)
1. Visuospatial Properties of Caudal 7b in the Monkey	(59)
2. Adaptive Visual Processing in the Primary Visual Cortex	(60)
3. The Cortical Functional Organizations for Illusory and Kinetic Contour Processing across V1, V2 and V4 of Macaque Ventral Pathway	(60)
Section 5 Early Development on Face Processing	(63)
1. The Development of Specialization in Face Processing	(63)
2. Emergence of the Own-Race Advantage in Taiwanese Infants: Rethinking Perceptual Narrowing in a Developing Visual System	(64)
3. Emergence and Development of the Other-Race Effect in Infancy and Early Childhood	(65)
4. Infants' Knowledge of Their Own Species	(65)
5. Body Inversion Effect: a Qualitative Change or a Quantitative Change	(66)
Section 6 Philosophy of Mind: Computation and Cognition	(68)
1. Can Computationalism Avoid the Triviality Problem? The Triviality Arguments and Implementation in Cognitive Science	(68)
2. Why the Mind Is Not Computational?	(69)
3. A Computational Explanation of Intentionality	(70)
4. The Representation-Computation Metaphor and the Embodiment-Interaction Metaphor	(70)

5. Information Processing, Computation, and Cognition	(71)
6. How to Tell a Propositional-Attitude-Eliminating Story on Cognition without Eliminating Contents? ...	(72)
7. Fodor's Worry	(73)
Section 7 Higher Levels of Cognition	(74)
1. The Influence of Working Memory on Transfer of Incompatible Location-Relevant Mapping on a Subsequent Simon Task	(74)
2. What is the Smallest Number of Premises in Inductive Decision-Making under Uncertainty in Daily Life?	(75)
3. Order-Effect Verification Bias and the "Denial Antecedent Error"	(76)
4. The Development of Cognitive Abilities in Chinese Children	(76)
5. How Does Anxiety Affect Decision-Making	(77)
6. Neural Correlates of "Aha" Experiences during Insight Problem Solving	(78)
7. Inferior Frontal Gyrus Was Activated During Sentence-Level Semantic Unification in Both Explicit and Implicit Reading Tasks	(79)
8. Rapid Processing of both Reward Probability and Reward Uncertainty in the Human Anterior Cingulate Cortex	(80)

Part III Impacts of Cognitive Science

Section 1 Cognitive Science and Brain Mapping	(84)
Workshop Neuro MR Insights Into the Brain	(84)
1. Opportunities and Challenges of High Field MRI and MRS	(84)
2. Ultrafast Functional Magnetic Resonance	(85)
3. Sounds and Music: fMRI of the Auditory System	(86)
4. Gains and Losses of 7T MRI for Imaging Neuroscience	(87)
Symposium 1 Brain Imaging and Signal Processing Methods	(88)
1. A Kalman Smoother-Based Approach for Estimating Time-Varying Cortical Connectivity from High-Density EEG	(88)
2. An Adaptive Algorithm of Second Order Blind Identification (SOBI) with Reference	(89)
3. Taking into Account Latency, Amplitude and Morphology: Improved Estimation of Single-Trial EEG/MEG Responses by Wavelet Filtering and Multiple Linear Regression	(90)
4. A Network Graphical Analysis Approach Demonstrates Different Connectivity Patterns Across Disease Subtypes in Parkinson's Disease (PD)	(91)
5. Likelihood Unimodality of a State-Space Model with Point Process Observations for Neural Spike Train Modeling	(92)
6. Multiblock PLS Model for Group Analysis Detects Ipsilateral Cerebellum and Globus Pallidus Hyperactivity in Parkinson Disease	(93)
Symposium 2 ASL Perfusion MRI in Cognitive and Clinical Neuroscience	(94)
Symposium 3 Multimodal Brain Mapping Methods Overview	(95)
1. Electrocorticography (ECoG) in Functional Cognitive Studies	(95)

2. Evaluating the Effective Connectivity of Brain Using Granger Causality	(96)
3. Discriminative Analysis of Multimodal Neuroimages for Early Diagnosis of Neurological Disorders	(97)
4. Investigating Human Inhibitory Control with Transcranial Magnetic Stimulation (TMS) and Transcranial Direct Current Stimulation (tDCS)	(98)
5. In-vivo Mapping of Structural Connectivity in the Human Brain	(99)
6. Perspective Talk for Optogenetics	(99)
7. Multimodal MRI/MRS Methods for Brain Mapping	(100)
8. Brain Networks Based on EEG and fMRI: a Parallel Approach	(100)
9. Use of fNIRS to Assess Resting State Functional Brain Connectivity	(101)
Symposium 4 Functional and Effective Connectivity in Neuropsychiatric Disorders	(102)
1. Studying Neuroanatomical Connectivity with Diffusion MRI	(102)
Symposium 5 Diagnostic Imaging for Neuropsychiatry	(103)
1. Brain Network on Schizophrenia	(103)
2. Neuroprotective Effect of Coenzyme Q10 on Ischemic Hemisphere in Aged Mice with Mutations in the Amyloid Precursor Protein	(104)
3. Diagnostic Imaging in Neuropsychiatry: Promise Versus Reality-Examples from Schizophrenia and Substance Abuse	(104)
Symposium 6 Establishing Chinese Human Brain Probabilistic Anatomical Atlases	(106)
1. Changes of Default Mode Network in Amnesic MCI	(106)
2. Construction of Chinese Human Brain MRI Probabilistic Atlas Using HAMMER Elastic Registration Algorithm	(107)
Section 2 Cognitive Science and Mental Health	(109)
Symposium 1 Cognition and Lifespan	(109)
1. Brain Structure, Neuropsychological Test Performance and Modulating Factors in Healthy Chinese Elders	(109)
2. What MEG Reveals about Children's Linguistic Knowledge	(110)
3. Persisting Mild Cognitive Impairment in Combat Veterans Sustaining Mild Traumatic Brain from Blasts	(111)
4. Visual Working Memory and Functional Reorganization in the Aging Brain: Evidence from Multimodal Imaging	(112)
5. Clinical and Molecular Genetic Predictors of Cognitive Recovery and Decline Following	(113)
Symposium 2 Coding and Coping: Environmental Information and Mental Health	(115)
1. The Contributions of Endogenous Mu-, Delta- and Kappa-Opioid Receptors in Modulating Placebo Analgesia in Rat	(115)
2. The Neural Basis of Vital Decision-Making	(116)
3. Neural Basis of Insightful Chunk Decomposition	(117)
4. Coding of Negative Body Signal and Depressive Mode: When Emotion Meets Sensation	(118)
5. Placebo vs. Reappraisal: Different Approaches for Regulating Negative Emotion	(119)
6. Searching for Life Motion Signals: Visual Search Asymmetry in Local but Not Global Biological Motion Processing	(120)

7. Corticofugal Influences During Nociceptive Transmission in Awake Rats	(120)
8. Integrating Olfactory and Visual Inputs; Olfactory Modulation of Visual Perception and Attention	(121)
Symposium 3 Brain Imaging and Neuropsychology of Typical and Atypical Development	(123)
1. Developmental Trajectories of Language Pathways; Recent Insight from DTI Tractography	(123)
2. Differential Brain Structure Abnormalities along the Illness Progression of Schizophrenia; Evidence from ALE Meta-analysis	(124)
3. Minor Physical Anomalies on MRI ; Relevance to Childhood Autism and Aberrant Neurodevelopment in Infancy	(125)
4. Imaging and Genetic Analysis of Schizophrenia; the Challenge of Defining Phenotype	(125)
5. MRI as a Translational Tool in Autism Research	(126)
Symposium 4 Neurocognitive Dysfunctions in Psychiatric Illness	(127)
1. Behavioural and Imaging Modeling of Neurological Soft signs; Evidence from both Healthy Cohorts and Schizophrenia	(127)
2. Altered Brain Networks in Neuropsychiatric Disorders	(128)
3. Neurocognitive Components of Impulsivity in Alcohol and Cocaine Abusers; Functional MRI Studies	(129)
4. Neural System Dysfunction in Schizophrenia; fMRI during Three Executive Function Tasks	(130)
Symposium 5 Cognitive Remediation Treatment in Schizophrenia	(131)
1. Cognitive Remediation Therapy in Chronic Schizophrenia; Improving Neurocognition and Daily Functioning	(131)
2. Meta-analysis of 40 Studies of Cognitive Remediation in Schizophrenia; Factors Related to Effectiveness	(132)
3. Pathophysiologically-based Cognitive Remediation Treatment in Schizophrenia; a Translational Science Approach	(133)
4. A Longitudinal Multi-Center RCT of a Chinese Computerized Cognitive Remediation Therapy for Chronic Schizophrenia	(133)
Symposium 6 Alzheimer's Diseases	(135)
1. Functional Magnetic Resonance Imaging Study of Human Olfaction	(135)
2. Clinical Imaging of Dementia	(136)
3. Effects of Traditional Chinese Medicine on Multiple Targets of Alzheimer's Disease in Several AD-Like Animal Models	(137)
4. SWI; a New Tool for Imaging Dementia (Case Report)	(138)
Symposium 7 Depression	(139)
1. The Neural Basis of Emotion Regulation	(139)
2. Mongolian Gerbil as a Seasonal Affective Disorder Animal Model	(140)
3. Possible Involvement of Neurogenesis in Male Rat Mating Behavior	(141)
4. Is Adult Neurogenesis Relevant in Human Depression ?	(142)
Symposium 8 Neuropsychology; Regulation of Behaviors	(143)
1. Vascular Cognitive Impairment	(143)

2. NeuralCorrelates of Affective Facial Processing in Rapid Serial Visual Presentation	(144)
3. EEG-Pattern Classification during Emotional Picture Processing	(145)
4. Specifically Progressive Deficits of Default Mode Network Inamnestic Type Mild Cognitive Cimpairment; a Follow-up Study	(145)
Section 3 Cognitive Science and Information Science	(147)
Keynote speech	(147)
1. Rough-Fuzzy Granular Computing: Concepts, Features and Applications in Bio-informatics and Web Intelligence	(147)
2. A Mind Model CAM: Consciousness and Memory Model	(148)
3. Advantage Effect Switches in Different Levels Due to the Concept Familiarity	(149)
4. New Concept and Principle Linking Brain, Cognitive, and Information Sciences	(150)
Symposium 1 Brain-Computer Interface	(152)
1. Brain Computer Interfaces Based on the Code Modulation and Frequency Modulation VEP	(152)
2. Multi-Media Based Interactive Training on Cognition, Perception and Motor Control of Reaching Task for Stroke Patients	(153)
3. Neural Control of Multifunctional Artificial Arms Based on Targeted Muscle Reinnervation Interface	(153)
4. An Iterative Semi-supervised Support Vector Machine Algorithm and Its Application in BCIs	(154)
5. On-Line Estimation of Driver Vigilance Based on EEG and EOG	(155)
6. Classify Motor Imagery Tasks Using Kernel Spectral Learning	(155)
7. Development of Effective Neural Decoding Methods for Practical Brain-Computer Interface Applications	(156)
Symposium 2 Decoding Cognitive States from Neuroimaging Data	(157)
1. Decoding Semantics from Electrophysiological Data	(157)
2. Decoding of Continuous 3D Hand Trajectories with Epidural Electroecorticographic Signals in the Japanese Macaque	(158)
3. Maternal Immune Activation Impairs Reversal Learning and Increases Serum TNF- α in Adolescent Offspring	(159)
4. What Causes Individual Differences in Picture Naming Latencies?	(159)
5. The Coding of Abstract Category Information in Macaque Inferior Temporal and Prefrontal Cortex	(160)
Symposium 3 Intelligent Learning Technologies	(161)
Symposium 4 Virtual Reality in Behavioral Research I: Space Perception	(162)
1. Why is the Perception of Geographical Slant Exaggerated?	(162)
2. Virtual Reality Investigations into Self Motion and Orientation Perception	(163)
Symposium 4 Virtual Reality in Behavioral Research II: Visual Motor Control	(165)
1. Optimal Combination of Form and Motion Cues in Human Heading Perception	(165)
2. Visual Processing of Impending Collision	(166)
3. The Roles of Optic Flow Processing During Locomotion	(166)
Symposium 6 Web Intelligence Meets Brain Informatics	(168)
1. Different Brain Activity in Heuristic Problem Solving Between MCI Patient and Normal Aging	(168)

2. Advantage Effect Switches in Different Levels Due to the Concept Familiarity	(169)
3. Primary Visual Area Contributes to Initial Processing of Text	(170)
4. Large-Scale Segregation in the Human Brain: a Negatively-Correlated Functional Network Study	(171)
5. Neural Mechanisms of Working Memory and Mental Imagery in Problem Solving	(172)
6. Is the Primary Visual Area Necessary for Graphic Mental Imagery?	(173)
7. Contributions of Parahippocampal Cortex to Encoding of Text and Figure	(174)
8. The Role of Category Label in Adults' Categorization Judgment	(175)
9. Cognitive Memory Inspired Search Refinement on Life Science Literatures	(176)
Symposium 7 Natural Language Understanding with Cognitive Science (NLU-CS)	(178)
1. Web Semantic Knowledge Acquisition and Uncertainty of Knowledge Computing and Application	(178)
2. Feature Structures: A Resource and Analyzer	(179)
3. Determination of Lexical Meaning Serving Text Entailment	(180)
4. Resource Sharing and Evaluation for Chinese Semantic Computing	(181)
5. Advances on Building Visual Information Based Chinese Semantics	(181)
6. Multimodal Interaction for Speech Translation Disambiguation	(182)
7. Progress in Speech Separation, Recognition and Understanding in Multi-Person Dialogues	(183)
8. Computational Modeling for Chinese Syntactic Parsing and Semantic Computing Based on Valence Structure and Topic Structure	(184)
9. Semantic Processes at Different Levels of Syntactic Hierarchy: Combined ERP and fMRI Evidence	(184)
10. Sparse Representation and Manifold Learning for Cross-Media Understanding and Retrieval	(185)
Section 4 Cognitive Science and Education	(187)
Keynote Speech	(187)
1. Learning Science, Neuroeducation and Modernization of Education Research	(187)
Symposium 1 Cognitive Science and Learning Science	(189)
1. Heteroscedastic Discriminant Analysis for Close-Class-Mean Problems via the Bayes Error Estimation	(189)
2. Temporally Local Information for EEG Processing and Classification	(190)
3. Cognitive Perspectives of Social Informatics in Professional Education	(191)
Symposium 2 Calligraphy for Cognitive Health & Therapy	(192)
1. Treatment Effects of Calligraphy Training on ADHD Children	(192)
2. Cognitive and Mental Health Effects of Calligraphy Training on Children with Mild Mental Retardation	(193)
3. Calligraphy for Cognitive and Behavioral Therapy: A System for Health, Treatment & Rehabilitation	(193)
4. Concentrated and Relaxed State Evoked by Calligraphy: Evidence from an EEG Study and its Therapeutic Implications	(194)
Section 5 Cognitive Science and Social Sciences	(195)
Plenary Speech	(195)
1. Do we click? Speaker-Listener Neural Coupling Underlies Successful Communication	(195)
2. Brain Activity Evoked by Feedback during Learning: Interaction with Personality	(196)

Keynote Speech	(197)
Symposium Social Neuroscience: Social Cognition and Decision-Making in Human Brain	(198)
1. My Gain or Our Gain? Reward-Related Brain Potentials in Single and Mutual Situations	(198)
2. Person Perception Precedes Theory of Mind: an ERP Analysis	(199)
3. Selective Influence of Emotional States on MFN in Unfair Ultimatum Bargaining	(199)
4. Reading Other's Mind or Reading Interactive Mind from Chinese Idioms Revealed by ERPs	(200)
5. Joint Memory Guidance of Visual Attention: Contributions from Culture	(200)
6. Effects of Duration of Expressions on the Recognition of Microexpressions	(201)

Part IV Special Events

Section 1 Cross-Strait Forum on the Joint Development of Cognitive Science Studies	(204)
Section 2 Young Scientists Forum on Neural Mechanisms of Cognition	(206)
1. The Wolfpack Effect: Perception of Animacy Irresistibly Influences Interactive Behavior	(206)
2. The Influence of Attention on Object Representations in IT Cortex	(207)
3. Voice Recognition Deficits in Dyslexia	(207)
4. Promotion of Neurogenesis and Preservation of Dendrites by Wolfberry in Experimental Depression ...	(208)
5. Brain Activation in the Visual Processing of Chinese Calligraphy: An fMRI Study	(209)
6. Topological Change Triggers the Attentional Blink: Evidence for the Topological Definition of Perceptual Objects	(210)
7. Number Sense Follows Object Sense	(211)

Part V Special Events

Section 1 Animal Cognition	(214)
1. Modulation of Memory Processing by Donepezil in Healthy Young Male Rats	(214)
2. Functional Imaging Correlates of Environmentally Induced Memory Changes	(215)
Section 2 Cognitive Anthropology	(216)
1. A Semantic Analysis of English Prepositions	(216)
2. Interplay of Genes and Early Parenting Behavior on Infant Emotionality	(217)
Section 3 Cognitive Modeling	(218)
1. A Cognitive Tool for Generating Ideas about Concepts	(218)
2. VHALT: a Hybrid Cognitive Architecture of Learning and Verbal Thinking	(219)
3. The Influence of Code Mixing on Perception and Language Production	(220)
4. Semantic Activation Processes in German: Evidence from ERP Paradigm	(221)
5. Working Memory Guiding Visual Attention for Capturing Target: Evidence from Computational Cognitive Model	(222)
6. Categorical Invariance Model under the Light of New Empirical Data from 79 Category Types	(223)

7. KIDS (Knowledge Intuitive Description System) for Experts' Knowledge Extraction	(224)
8. The Context of Basic Communicative Acts (BCAs)	(225)
9. A Mind Model CAM—Consciousness and Memory Model	(226)
10. The Complex Network Properties of Different Connectivity Types Using Realistic Neural Model	(227)
11. Synchronization of Distributed Brain Activity	(228)
Section 4 Cognitive Neuroscience	(229)
1. Eye-Fixation-Related Potentials in Change Detection	(229)
2. Interaction of Taxonomic and Contextual Relationship in the Extraction—anEvent-Related Potential Study	(230)
3. Embodied Action Concepts in the Brain: fMRI Comparison Between Right-Handers and Left-Handers	(231)
4. Adolescent Sensitivity in Processing of Emotional Negative Stimuli: Electrophysiological Evidence from an ERP Study	(232)
5. Specific Cognitive Deficits in an Animal Model of Congenital Hypothyroidism	(233)
6. Individual Differences in Premotor Cortex Recruitment During Speech Perception	(233)
7. ERP Evidence for the Involvement of High-Level Brain Mechanisms in Perceptual Learning	(234)
8. Emotional Body Language Influences Recognition of Facial Expression	(235)
9. The P600 from the Reassignment of Thematic Roles	(236)
10. The Influence of Phonological and Semantic Training on the Cortical Circuitry of Chinese Skilled Readers Recruited to Read Aloud Low-Frequency Chinese Regular Phonograms	(237)
11. Event-Related Potentials Elicited by Numerical Extrapolation Task in Children	(238)
12. Implicit Association between Brightness and the Valence of Emotion in Modern China	(238)
13. Effects of Gruesome Photographs and Victim Impact Statements on Mock Jurors' Judgments	(239)
