党的十一届三中全会以来的十八年,我国走了一条符合中国国情的循序渐进的改革之路,经济体制和运行机制发生了深刻变化,事业有了很大发展,为世人所瞩目。尤其是近十年来,由于改革领域的不断扩大,改革力度的不断加强革,各级领导干部和广大人民群众在党中央正确路线都呈现出勃勃生机。在十八年的改革历程中,各级领导干部和广大人民群众在党中央正确路线的指引下,解放思想、实事求是、大胆尝试,在实践中努力探索,产生了许多新思路、新办法、新举措,获得了许多宝贵的经验,取得了巨大成就。这无疑为改革的进一步深化和完善奠定了基础、坚定了信心、加快了步伐。

《中国改革经纬录》在改革大潮中应运而生, 是改革进一步深化的产物。它力求将改革十八 年,尤其是近十年来,各条战线在改革的探索中 获得的新思路、新办法和宝贵经验,以及所取得 的巨大成就,加以归纳,汇编成集。

《中国改革经纬录》是一套大型文献性丛书,

共分理论、实践、科技文论、图录等四卷,分别从 不同的领域、不同的方面反映各条战线的改革经 验和成果。理论卷着重结合改革实践的经验与成 就,从理论的高度加以论述,探讨改革的新方法、 新途径。它还打破了以往的模式——理论家谈理 论, 而更多的由活跃在一线的领导者和管理人 员,将多年改革实践的经验和成果加以总结形成 理论。这些理论未见高深,但具有贴近现实、源于 实践的特点,很有借鉴性。实践卷以报告文学、通 讯、特写等形式,真实地再现改革大潮中搏风击 浪、攻坚创业的先进人物和先进事迹。科技文论 卷汇编了多年来科技战线上多学科的科学家和 工程技术人员大胆探索、不断创新的科研成果, 具有交流、借鉴和推广的价值。图录卷则以生动 的画面形象地反映出一些地方、区域及企业近年 改革开放的成果。

本丛书选入的文章,在把握质量的同时,也 考虑各地区、各层次、各行业、各学科的平衡;入 选的作者既有著名的专家、学者、教授和省部级 领导干部,也有活跃在一线的领导者、管理人员 和科技人员。采用这种"大而全"的编辑原则,目 的是求其广泛性、借鉴性和交流性。

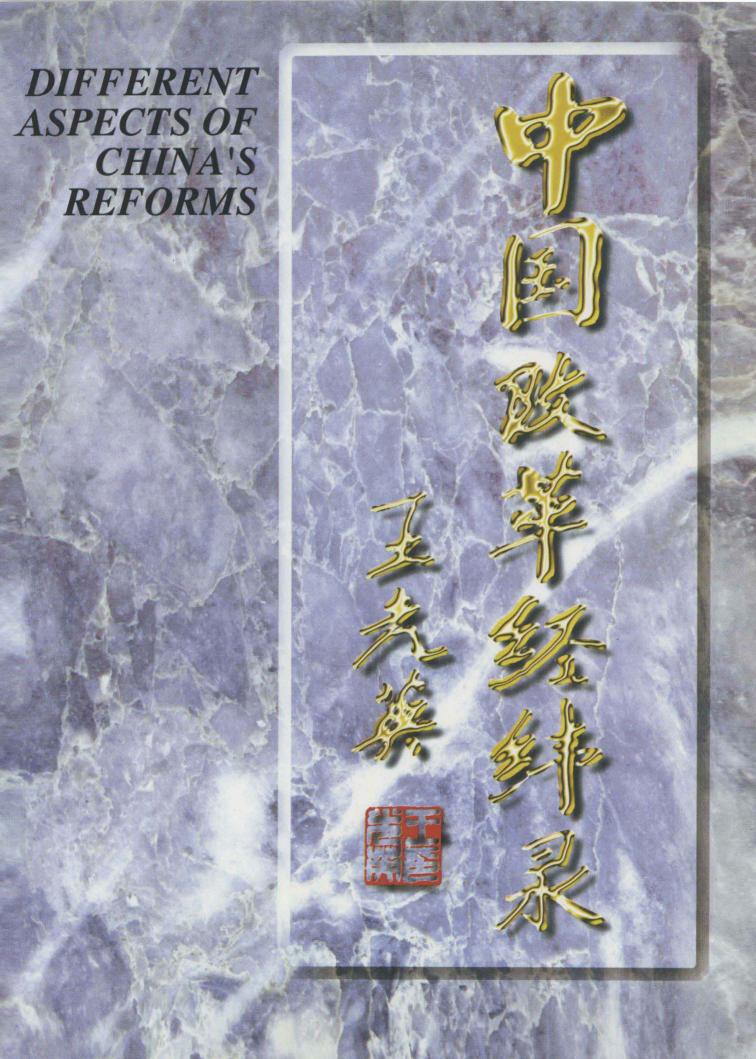

本丛书力求全面、务实和高水准,但终未能 尽如人意,甚至还存有一些缺点错误。希望专家、 学者和广大读者予以教正。

本丛书在征稿、编辑、出版过程中,得到了有 关领导、专家、学者及同仁的大力支持和帮助,在 此一并致谢!

# 甘肃省电力工业局

### POWER SUPPLY BUREAU OF GANSU PROVINCE

电力工业局局长 张明喜 Governor of Power Supply Bureau --- Zhang Mingxi

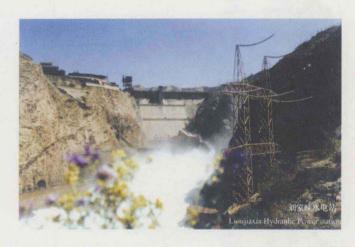

Located in the central China, Gansu province enjoys rich power supply. The total installed capacity of power supply in 1995 was 4371.2 × 10° kWh, in which hydraulic power supply capacity accounted for 2165.5 × 10°kWh and thermal power supply capacity accounted for 2205.7 × 10°kWh, with an annual generated power of 23.744 billion kWh. Gansu power network is the center of Northwest power network embracing Gansu, Shanxi, Ningxia and Qinghai provinces and regions. With the main network being 330kV in voltage grade, Gansu power network, connected with the network of Shanxi, Qinghai, Ningxia provinces and regions, plays an important role in meeting the needs of power consumption of provinces and regions by the combination of hydraulic and thermal generation of electricity.

Being the pillar of electricity industry, Gansu Power Supply Corporation ( Power supply bureau of Gansu province ) undertakes the task of overall planning, capital construction, production and management, network control and power generation management of the power industry of the province. Boasting strong technical and management forces, Gansu power industry ranks first in terms of profits and taxes and sales income of the whole province. Prediction shows that the power consumption of Gansu province will be increased by large margin in the year of 2000, which implies that power supply facilities will have to be updated or improved. To meet this challenge, Power Supply Corporation is now concentrating its efforts to diversity its fund-raising channels, introduce foreign investment and consequently speed up the pace of capital construction of power industry, and at the same time, introduce technology of national or international level, strengthen safety management and promote technical progress.

By the end of the century, the second phase of construction of key project-  $2 \times 300 \times 10^{\circ}$ kWh Jingyuan power plant, the first phase of construction of  $2 \times 300 \times 10^{\circ}$ kWh Pingliang power plant, expansion projects of Xigu and Liancheng power plants, rolling development of "Xiaosanxia" project and construction of the associated power transmission and distribution project will be completed so as to lay a solid foundation for economic development of Gansu province. The power industry of Gansu province is facing a bright prospect.

甘肃省位于中国中部,电力资源比较丰富。1995年,全省拥有发电装机容量437.12万千瓦,其中水电装机216,55万千瓦,火电装机220.57万千瓦,全年发电量237.44亿千瓦时。甘肃电网地处由甘肃、陕西、宁夏、青海四省区组成的西北电网中心,主网电压等级330千伏,分别与陕西、青海、宁夏电网联网运行,发挥着水火电互济,各省区互补的重要作用。

作为全省电力工业的支柱,甘肃省电力公司(甘肃省电力工业局) 肩负着全省电力工业的统筹规划、基本建设、生产经营、电网调度及农 电管理等任务,甘肃电力工业技术力量与管理力量雄厚,实现利税与销 售收入均居全省首位。根据预测,2000年甘肃用电量将大幅度增长,随 之,电源建设正加紧进行。为此,省电力公司(省电力局)正在进一 步拓宽集资办电渠道,积极引进外资,加快电力基本建设步伐,同时瞄 准国际国内先进水平,引进先进技术,强化安全管理,推进技术进步。 在本世纪末,将加快靖远电厂二期2×30万千瓦重点工程,平凉电厂 一期2×30万千瓦建设工程,西固热电厂和连城电厂扩建工程及大峡、 小峡、乌金峡、"小三峡"的滚动开发与相应的送变电配套工程的建设, 为甘肃经济跨世纪发展奠定可靠基础。可以预见,甘肃电力工业前景广 阔,前程似锦。
