Preface

To meet requirements of reform and opening-up, *China Forestry Statistical Yearbook* has been annually published since 1987. The yearbook, as a reference tool, is used to help people from all walks of life at home and abroad to understand forestry construction and development in China.

China Forestry Statistical Yearbook 2015 is edited on the basis of some relevant information and the statistics submitted by the competent forestry departments of provinces, autonomous regions, municipalities directly under the Central Government and some institutions affiliated to the State Forestry Administration. The yearbook is composed of six components including forest and wetland resources, ecological improvement, development of forestry industry, employment, forestry investment and education. It also contains 8 appendices of major statistical data of 135 forest industry enterprises and 20 key silviculture bureaus in state-owned forest areas, forestry working stations and rural forest farms, major forest disasters, afforestation in counties, main forestry statistical indicators over years, import and export of primary forest products (2006 ~ 2015), import and export of wild fauna and flora and forestry in major countries of the world.

The yearbook (in case there are no specific notes) does not include the data of Hong Kong Special Administrative Region, Macao Special Administrative Region and Taiwan Province.

“—” indicates that the figure is not large enough to be measured with the smallest unit in the table or the data are not available.

In order to improve the quality of the yearbook, the suggestions and comments are warmly welcomed.
