Washback, or influence of testing on teaching and learning, has been a frequent topic for discussion in education.

In spite of the many assumptions and claims about how teaching is affected by testing, insufficient empirical research has been conducted to look into the issue.

This book reports on a large-scale study on the intended washback effect of the National Matriculation English Test (NMET) on English teaching and learning in secondary schools in China.

Findings from the study throw much light on the tough issue: why powerful high-stakes tests like the NMET could not serve as effective agents for educational reform that is intended by test constructors and policymakers.

Qi Luxia is currently on the Faculty of English Language and Culture at the Guangdong University of Foreign Studies, and the study reported in the book was supported by MOE Project of the Centre of Linguistics and Applied Linguistics of Guangdong University of Foreign Studies.

# ABSTRACT

The present study, which adopted the approach of use-oriented language testing proposed by Shohamy (2001), investigated the intended washback effect of the National Matriculation English Test (NMET) in China. Specifically, it aims to find out whether the test has fulfilled its mission to induce an intended effect, which is to make English language teaching in secondary schools shift from its previous focus on language form to an emphasis on language use. In the study, factors that contribute to the test's success or failure in this mission were scrutinized. A multi-method design was contrived, using interview, observation, and questionnaire to collect data from eight NMET constructors, six English inspectors, 388 secondary school teachers, and 986 students.

The results show that the NMET has largely failed to achieve the intended washback effect. The failure is attributable mainly to an inherent conflict between the two functions of the test. One function is to select students for higher education. The other function is to bring about changes in teaching and learning, which is the intended washback of the test per se. While injecting high-stakes into the NMET and empowering it to effect educational reform, the selection function also imposes constraints on the test design and production, and thereby hinders realization of the intended washback effect. In addition, the pressure arising from the testing process encourages teaching and learning mainly to achieve higher scores rather than to develop the desired ability to use language effectively. These findings demonstrate that a high-stakes test is a powerful encouragement to "teaching to the test", but an ineffective means to promote learning

## ABSTRACT

or development of the educationally desired knowledge and ability.

Other factors that have been found to interact with the NMET to shape teaching and learning include teachers' own language proficiency and learning experience, and misuses of test results to evaluate schools and teachers.

On the basis of the findings of the present study as well as other washback studies, it is argued that the potentiality of a test to achieve strong intended washback effects is determined, to a large degree, by the stakes attached to the test. Neither low-stakes tests nor extremely high-stakes tests produce high intended washback effects. The tests that are likely to succeed in bringing about intended effects on teaching and learning are those whose stakes are at the right level. The stakes are high enough to make users pay attention to the message encoded in the tests but not so high as to trigger intense test preparations at the expense of teaching and learning to the objectives laid down by the curriculum.

The study also suggests ways to modify the NMET with a view to facilitating intended washback effects and minimizing unwanted side effects on teaching and learning.

# ACKNOWLEDGEMENTS

The study reported in this book is my Ph. D. research carried out at the City University of Hong Kong. Many people have contributed in various ways to the completion of the research and the book. Sincerely, I would like to express my heartfelt thanks to the following people.

First of all, I would like to thank my two supervisors, Dr. Alastair Allan and Dr. Jonathan Zhu for their advice and support, both in the early and later stages of my research. Thanks are also due to the other two members of my supervision panel, Dr. Mathew Peacock and Dr. Ken Rose, both of whom made valuable comments on my ongoing work. I am also grateful to Professor Charles Alderson, Professor Liz Hamp-Lyons, and Dr. Angel Lin, the examiners of my Ph. D. orals, for their critical and constructive comments on an earlier draft of the present book.

My thanks also goes to Professor Li Xiaojun, one of the designers of the National Matriculation English Test, who generously shared information with me, and also Dr. He Zhou for his time and helpful discussions. Dr. Carol MacLennan also provided valuable comments and constructive feedback. Other colleagues and friends who have helped in one way or another include Dr. Ouyang, Dr. Liu Jianda, Ms Ou Aihua, Dr. Rodney Jones, Dr. Betty Li, Dr. Charles Man, Dr. Jin Jianbin, and Dr. Wu Xudong.

The participants of the study—the test constructors, the English inspectors, teachers, and students—were kind enough to set aside much of their precious time to talk to me in the interviews and complete the questionnaires. This was much appreciated. Some

## ACKNOWLEDGEMENTS

teachers also let me sit in on their classes to carry out observations. Their generous help and cooperation have contributed significantly to the completion of this study.

I am grateful to the Drs. Richard Charles Lee and Esther Yew-pick Lee Charitable Foundation which awarded me the scholarship that made my Ph. D. studies possible. City University of Hong Kong has not only offered me a place to do the studies but also provided excellent service in every way, the library service in particular.

My family members have been extremely considerate and supportive. My husband frequently discussed my research with me, spot-checked my transcripts and coding, gave me useful feedback, and encouraged me to persevere during the course of the research. He also shouldered all family responsibilities during my absence from home. My 99-year-old grandmother, my elderly mother, and teenage daughter accepted my absence and neglect of their interests without complaint during the years of my studies.

Without the guidance, support, and help from all the people above, it would not have been possible for me to complete the research reported here. I am deeply indebted to them all.

# TABLE OF CONTENTS

List of Tables .....	ix
List of Figures .....	xi

## **Chapter One Introduction .....** 1

1. 1 Research Problem .....	2
1. 2 The Setting of the Study .....	4
1. 2. 1 The Educational System in China .....	4
1. 2. 2 Key Schools .....	5
1. 2. 3 Curriculum and Teaching Materials .....	10
1. 2. 4 The Role of Examinations .....	11
1. 2. 5 The National Matriculation English Test as a Selection Tool .....	12
1. 2. 6 The National Matriculation English Test as a Change Agent .....	14
1. 3 Significance of the Study .....	17
1. 4 Definition of Terms Referring to Test Effect .....	18
1. 5 Organization of the Thesis .....	19

## **Chapter Two Review of the Literature .....** 21

2. 1 Empowerment of Tests: Origin of Washback .....	21
2. 2 Role of High-Stakes Tests in Educational Reform .....	24
2. 2. 1. Test as a Spur for Action .....	24
2. 2. 2. Test as a Model for Instruction .....	26
2. 2. 2. 1 Finely tuned models .....	26
2. 2. 2. 2 Roughly tuned models .....	28
2. 2. 3 Criticisms of High-stakes Tests .....	29
2. 3 Conceptualization of Washback/Impact .....	30

## TABLE OF CONTENTS

2. 3. 1 The Debate over Washback/Impact as an Aspect of Validity .....	30
2. 3. 2 Use-oriented Testing and Washback .....	33
2. 3. 3 The Scope, Pattern and Mechanisms of Washback .....	36
2. 4 Empirical Research on Test Impact or Washback .....	41
2. 4. 1 General Education .....	41
2. 4. 2 Language Education .....	48
2. 5 A Critique of Approaches and Methods in Washback/Impact Studies .....	59
2. 5. 1 Research Approaches .....	59
2. 5. 2 Research Methods .....	64
2. 6 Summary .....	66
 <b>Chapter Three Method .....</b>	 71
3. 1 Conceptual Background .....	71
3. 2 Research Design .....	73
3. 3 Participants .....	76
3. 3. 1 Test Constructors .....	76
3. 3. 2 English Inspectors .....	77
3. 3. 3 Teachers .....	78
3. 3. 3. 1 Sampling teachers for qualitative data collection .....	78
3. 3. 3. 2 Sampling teachers for quantitative data collection .....	81
3. 3. 4 Students .....	82
3. 3. 5 The Researcher .....	83
3. 4 Instruments .....	85
3. 4. 1 Interview .....	85
3. 4. 1. 1 Data collection procedures .....	85
