壶口

一亿万华夏儿女的母亲河,它源自青藏高原巴颜喀拉 山北麓,曲折东流,途径青海、四川、甘肃、宁夏、内蒙古、山西、 陕西、河南、山东等9个省区后,汇入渤海。5464公里的黄河水九曲十 人弯,巨大的黄河水流进入高山夹峙的晋陕峡谷流经吉县龙王 妲时, 300余米宽阔的水面乍然收缩为50余米的急流奔腾而下,一时间涛激雷 振,浪逐云飞。其势排山倒海,气吞山河,摊枯拉朽,惊心动魄,其 状犹如滚滚沸水骤然顿泻于一个天然巨壶之中,势不可挡,"壶口瀑 布"由此得名。

壶口瀑布是世界上唯一的黄色水流大瀑布,是我国第二大瀑布。壶口景致、故事众多,至今仍流传着"石窝宝镜"、"孟门夜月"、"镇河神龟"等动人传说。特有的"水里冒烟"、"十里龙槽"、"彩桥通天"等景象浑然天成,匪夷所思。尤其是立冬以后,壶口气温急剧下降到零度以下,此时,黄河水跌落壶口澈起的半天雾气,便会把壶口变成一座座神秘莫测、寒气逼人的水晶宫, 倒立的冰柱晶莹剔透,横悬的雪栗百态环生。那形状各异的冰滴溜有的像雄狮镇守壶口,有的像海豚逐浪嬉戏,有的像神龟憨态可掬,有的像顽猴跳跃耍闹,有的像花鹰盘旋嬉戏,有的像神龟憨态可掬,有的像顽猴跳跃耍闹,有

黄河壶口瀑布是镶嵌在黄土高原上的一颗璀璨的明珠, 吸引着无数 游客前来观赏,已成为驰名中外的旅游胜地。黄河壶口瀑布之美之奇 之壮之激瞬息万变,可入诗入画入歌入影,令人终生难忘。

Hukou Waterfall

The Yellow River, Mother River of the Chinese nation, rises in the Bayankala Mountains on Qinghai-Tibet Plateau in China. It flows over nine provinces or autonomous regions, that is, Qinghai, Sichian, Gansu, Ningxia, Inner Mongolia, Shauxi, Shaanxi, Henan and Shandong, and empties into the Bohai Sea in eastern China.

When the Yellow River flows to Longwangehan, Ji County in Shanci province, the river surface is squeezed by mountains on both banks from 300 meters to 50 meters into a narrow gorge like the spout of a kettle, he rushes rapidly and then turns the quiet river into a turbulent one. The mountains echo with the deafening sound of the roaring water, which sould be heard several kilometers away. The water rushes forward till it finally cascades over the waterfall, forming an illusion of water being poured from a kettle, hence the name of "Hukou or Kettle Spout Waterfall".

Hukou Waterfall, second only to China, is the only magnificent yellow waterfall in the world. There are many attractive tales about Hukou Waterfall as well as many beautiful scenes at Hukou Waterfalls, such as smoke from the river, boats on land, rainbows in the sunshine, and so on.

In Hukou, the water falls into the deep poud from a relatively high place, stirring the mist which rises high into the air like surging heavy smoke coming out of the river. You can see various shapes of rainbows formed by the rising mist, refracted by the sunshine from different angles. Sometimes rainbows are arched and cut into the river looking like a dragoo, playing with water; sometimes they are colored ribbons lying across the river; and sometimes they become colorful masses which change second by second. The most dramatic changes occur in the dead of winter and early spring when the temperature falls below O'C. The mist decorates Hukou as a mysterious and chill Crystal Palace. Sometimes, the subsidiary falls freeze into icicles, creating images of crouching tigers on top of the cliffs, gamboling dolphins on top of the billows, the lovely sacred turtles, dynamic monkeys and diving hawks ...

Hukou Waterfall of Yellow River is a resplendent pearl on the Loess Plateau, which attracts hundreds of thousands of tourists from both home and abroad. The Hukou Waterfall of the Yellow River is a masterpiece of nature.

数九寒冬,黄河河面大部被冰 封,往日狂奔怒吼的壶口瀑布温顺了 许多,从高空俯瞰,冰雪相映,好似 苍龙腾跃、银蛇狂舞。

In the dead of winter, when the river surface becomes frozen, the once roaring Hukou Waterfall becomes so tame. Overlooking from the sky, ice and snow sets off with each other, which is just like tumbling dragons and silvery dancing snakes.
