Al Herpin was 90 years old when the doctors came to his home in New Jersey. They thought for sure that he got some sleep of some kind. So they stayed with him and watched every movement (行动) he made. But they were surprised. Though they watched him hour after hour and

day after day, they never saw Herpin sleeping. In fact, he did not even own a bed. He never needed one.

The only rest that Herpin sometimes got was sitting in a comfortable chair and reading newspapers. The doctors were puzzled by this strange continuous sleeplessness (连续的失眠). They asked him many questions, hoping to find an answer. They found only one answer that might explain (解释) his condition (状况). Herpin remembered some talk about his mother having been injured (受伤) several days before he was born. But that was all. Was this the real reason? No one could be sure.
