Unlike Britain, the US does not have a national health care service. The government does help pay for some medical care for people who are on low incomes and for old people, but most people buy insurance (保险) to help pay for medical care. The problems of those who cannot afford insurance are an important political subject.

In Britain, when people are ill, they usually go to a family doctor first. However, people in America sometimes go straight to an expert without seeing their family doctor first. Children are usually taken to a doctor who is an expert in the treatment (治疗) of children. In Britain, if a patient needs to see a specialist doctor, their family doctor will usually recommend a specialist. Doctors do not go to people's homes when they are ill. People always make appointments to see the doctor in the doctor's office. In a serious situation, people call for an ambulance (救护车). In America, hospitals must treat all seriously ill patients, even if they do not have medical insurance. The government will then help pay for some of the cost of the medical care.

36. Some medical care is paid by the U. S. government for the poor and the old.
A) people living in the country
B) non-government officials
C) people with insurance
D) the poor and the old
37. Most people in the United States buy insurance to pay for their own medical care.
A) to pay for their own medical care
B) to help to live on their low incomes
C) to improve the national health care service
D) to solve one of the important political problems
38. What do British people usually do when they are ill?
A) They go to see their family doctor first.
B) They go to see a specialist doctor first.

C) They call for a specialist doctor.

A) be treated if they have an insurance

Task 3

Directions: The following is a report. After reading it, you should complete the information by filling in the blanks marked 46 through 50 in the table below. For each blank, you should write no more than 3 words.

A Report on New Factory Location

The committee initially (最初) considered three possible locations for the proposed new factory. Of the three cities, Chicago presently seems to the committee to offer the greatest advan-

tages. Here are our observations of the city.

Though not at the geographical center of the United States, Chicago is centrally located in an area that contains more than three-quarters of the U. S. population. It is within easy reach of our head office in New York. And it is close to several of our most important suppliers of components (配件) and raw materials—those, for example, in Columbus, Detroit, and St. Louis.

The city is served by several major railroads. Except during the winter months when the Great Lakes are frozen, it is an international seaport. Chicago has two major airports and both home and international air cargo (货物) services are available.

A Report on New Factory Location

Location recommended: 46

Advantages of the location:

- 1) in the 47 part of an area with a huge population;
- 2) within easy reach of the 48 in New York;
- 3) close to the important 49 of components and raw materials;
- 4) convenient in rail, water and 50 cargo transport.
