Topic 7:说明信	157
Topic 8:咨询信	160
Topic 9:道歉信	163
Topic 10:咨询信	165

第一部分

议论文

Topic 1: 孩子的业余活动必须是教育性的

You should spend about 40 minutes on this task.

Some people believe that children should engage in educational pursuits in their spare time, otherwise they are wasting their time.

Do you agree or disagree?

You should write at least 250 words.

You should use your own ideas of knowledge and experience and support your arguments with examples and relevant evidence.

Many parents regretfully observe that their

kids seem unable to come up with anything to do in their spare time besides turning on the TV or playing video games. I agree that children should make the best use of their spare time, and therefore educational programs should be their first choice when they are free.

The first reason is that educational activities, if properly planned and carried out, play a fundamental role in building children's characters. Children are in the process of forming their outlook of the outside world as of themselves. By engaging in educational pursuits in their spare time, they have the opportunity to develop themselves, to enlarge their horizons and to discover the pleasure of doing things in a crea-

004

tive way. Educational activities may also help children to learn and develop the skills of gaining fulfillment from doing things.

The second factor is that educational activities also help children to learn and develop the skills. What is the main task of children? It is not only playing but also learning. Almost all the parents do not wish their children can only watch TV after they grow up. Children themselves also hope they can contribute to the world and the people when they enter the society. Therefore, it is important for children to do meaningful and valuable things in their spare time such as reading and studying.

At the same time, the problem with pursuits such as watching TV and playing video games, although entertaining, is that they do not contribute to children's exploration of either themselves or the outside world in the process of their growing up. They do not require children to use any of their imagination or creativity. What is more, they are harmful to children's intellectual development. The children tend to be satisfied with being couch potatoes, happily watching the screen all the time.

To sum up, it is wise for children to discover the joy of doing educational things when they are not otherwise engaged. They will find that the experience of searching and understanding is both useful and thor-

oughly satisfying as well as being the basis of many skills applicable to both academic and non-academic tasks.

Topic 2: 学生评价老师

You should spend about 40 minutes on this task.

Some people think that , in order to improve the quality of education , students should be encouraged to evaluate and criticize their teachers. Others feel that this will result in a loss of respect and discipline in the classroom. What do you think?

You should write at least 250 words.

You should use your own ideas of knowl-

edge and experience and support your arguments with examples and relevant evidence.

In many universities, students are asked to evaluate their teachers after each course. Some people believe the system has many advantages to the students and the teachers. Others argue that it would lead to poor discipline in the classroom. Indeed, evaluation of their teachers by students has both pros and cons.

There are many drawbacks in student assessment. First of all, students are very young and, compared with their teachers, are less knowledgeable both in theory and practice on a subject. Therefore, they are

008

unable to evaluate their teachers' performance in a sound way. Secondly, student assessment would lead to poor discipline in the classroom. If each of the students is allowed to decide on what, how and when to learn, classroom management would become impossible. Thirdly, in order to gain a better evaluation, teachers would seek to please each of the students by lowering the study requirements. This would do harm to students' academic performance in the long run.

However advocates of student assessment have their reasons. Firstly, this kind of feedback can be used to improve teachers' performance. Teaching methods can only be successful if they are student-centered.

Therefore, listening to the students' constructive suggestions, teachers will have a better idea of what students' needs are and can then adjust their teaching to meet them. Secondly, the process of writing evaluations will help the students think in their own way independently. Students should be encouraged to learn by even challenging their teachers' thinking. Thirdly, the matter could be considered in a commercial way. Teachers are those who provide paid educational services while students, paying for their education, are customers. In this way, it can be fully justified that students have the right to evaluate the services they receive.

In my own opinion, student evaluations of

010
