上海现代设计集团是由华东建筑设计研究院和上海建筑设计研究院组合而成的、全国最大的建筑设计机构。两个设计院在全国资历都较老。50多年来，他们汇集了众多的建筑设计人才，从白发苍苍到青年才俊，济济一堂，展现了深厚的设计力量。他们在全国有着较大的影响，是一个举足轻重的设计机构。

从50年代中叶起，历年都有一些同济大学建筑系的毕业生被两个设计研究院选拔。皆正先生就是在1964年被上海建筑设计研究院择优录选的成员之一。

现代设计集团为了表彰和皆正先生一样的各类总建筑师的成就，拟出版现代设计集团丛书，《张皆正建筑师作品集》就是其中重要一册。蒙皆正先生嘱我作序，感到不胜荣幸。

皆正先生生性聪慧，思想敏锐。在学校求学时，就显示了他是有才华的学生之一，成绩一直位列前茅。毕业以后走上工作岗位，他又有机会师从我国老一辈建筑学专家陈植老先生和汪定曾老先生。皆正先生在工作中肯动脑筋，具有认真努力的学风和踏踏实实的工作态度，通过大量实践，得到脱颖而出的机会，受到院领导、两位老专家 and 老前辈的赏识，以及其他各位专家的好评，在上海建筑设计研究院、现代设计集团、上海建筑界和全国建筑界作出了不少的好成绩，令人可喜可贺。

皆正先生是一位“学不厌”的专家学者，他很早就对建筑和建筑设计工作有了爱好，孜孜不倦的追求，是他在学术上的特色。他在工作上精益求精，设计上也精益求精，作出了不少建筑精品。同时，他是一位对理论、绘画、书法、金石有着广泛兴趣并作深入探索的人才。他的这本作品集除了表现他的建筑设计成果之外，还展现了他的多面才华。

皆正先生还算是年轻，同时他的内心和外表都比他实际年龄显得年轻得多。在过去40多年的辛勤耕耘中，他已经作出了光彩照人的业绩，相信在今后的时日中他会作出炳炳琅琅的成果来。预祝他的成功！

Preface

Shanghai Xian Dai Architectural Design (Group) Co., Ltd., formed by East China Architectural Design & Research Institute Co., Ltd.(ECADI) and Shanghai Institute of Architectural Design & Research Co., Ltd. (SIADR), is the largest architectural design corporation in China, both of which have high qualifications domestically. Over the past 50 years, a number of talented architectural designers, from highly experienced doyens to ambitious young people, gathered in the two institutes. Their strong design capabilities have had a greater influence in China; thus the two institutes are very important design firms.

From the middle of the 1950s, every year there were graduates from the Architectural Department of Tongji University to be selected by both institutes. Mr. Zhang was one of the graduates selected by Shanghai Institute of Architectural Design & Research Co., Ltd. in 1964.

In order to celebrate all chief architects like Mr. Zhang for their achievements, Shanghai Xian Dai Architectural Design (Group) Co., Ltd. wants to publish a series of books, one of which is the "Selected Works of Zhang Jiezheng". It is a greatly honor for me to write the preface with Mr. Zhang's entrustment.

With an intelligent and incisive mind, Mr. Zhang was one of the gifted students in the university and having an outstanding result in his studies. After graduated from the university, he had a chance to practice with Mr. Chen Zhi and Mr. Wang Dingzeng, both of whom the Chinese architect experts of the older generation. During the practice, Mr. Zhang is willing to use his ideas in his work with earnest study and working attitudes. He shows his own ability in early practice. As a result, not only Mr. Zhang gain recognition from the managers of our institute and the two experts, he also is well received by all other architects. In addition, he has made greater contributions to Shanghai Institute of Architectural Design & Research Co., Ltd, Shanghai Xian Dai Architectural Design (Group) Co., Ltd., as well as the whole Shanghai architectural practices and even Chinese architectural practices. His achievements are emerging and congratulated.

Mr. Zhang is an expert scholar insatiable in learning. With his early and consistent enthusiasm in the architecture practices, he has created a number of excellent works with constant improvement in design. In addition, he is talented in academic theory, painting, calligraphy and sculpture in metal & stone. His selected works not only show his architectural design results, but also present his gifted projects in many respects.

Mr. Zhang is not old, his thoughts and appearance is young and energetic. Over the past 40-year's hard work, he has made outstanding achievements. I am sure he will make glorious achievements in the future. Congratulate him on success!

我自幼喜好画画，初中时在美术启蒙老师段在衡先生的引导下，接受正规美术教育。不久学校送我去上海市少年宫课外学美术图案，因家境清贫，每次步行来回一个多小时。当时延安中路铜仁路有个大工地，建筑如春笋般长高，后来才知这栋宏伟的建筑是中苏友好大厦，给我非常深刻的印象，也许是我后来进入同济读建筑学的原由。

建筑学内涵极为丰富，是横跨科学技术与文化艺术的学科，吴良镛先生进一步深化为“广义建筑学”。进入同济大学读建筑学专业后，既学习数学、力学、建筑设计，又练素描、水彩。还利用寒暑假自习书法、金石、木刻、油画……今体会逐年积累的艺术文化素养，是建筑设计创作的厚实基础。

踏上工作岗位，我坚信“业精于勤”，勤于学习、勤于积累。60年代，逢诸多“运动”，少事之时找事做，收集整理设计资料成为乐趣。80年代有机会走出国门，如海绵吸水般地实录所见所闻。

勤学篇 Diligence in Study

I like drawing since I was a child. I received regular artistic education under the guidance of my art teacher Mr. Duan Zaiheng when I was in Middle School, who has introduced me to learn art. Soon the school sent me to Shanghai Children's Palace to learn artistic patterns. Due to incapability of family financial situation at that time, I went there by feet, which took me more than one hour to go there and back. What gave me a deep impression was a large construction site at the intersection of Yan'an Road and Tongren Road. The building was getting higher like spring bamboos. Later I knew that magnificent building is Sino-Russian Friendship Building. It gave me a unforgettable influences in building forms, as later I chose to study architecture in Tongji University.

Architecture, with rich connotation, is a subject containing scientific technology and cultural art, which is called "Macro-Architecture" by Mr. Wu Liangyong. I studied math, mechanics and architecture as well as practiced in sketch and watercolor painting when I was at the Architectural Department of Tongji University. I also learnt by myself calligraphy, metal & stone, wood engraving, oil painting during summer and winter vacations. It is the artistic cultural accomplishment accumulated year by year which form basic to architectural design and creation.

After starting practice as an architect, I believe excellence in work is possible only with diligence in study and accumulation. In the 1960s, due to various issues domestically, collecting and sorting out design information was my delight to cheer up the life. In the 1980s, I had a chance to go abroad to record what is heard and seen.

消逝的老宅，永久的回忆。我长期居住在石库门老宅，是单开间二层楼加亭子间的旧式里弄，原应一户独用，后为三户合用。此画为南窗即景，图中窗扇是南北穿堂风的关键，右侧为亭子间上的北晒台。
