Changchun is a young city. It lies in the Northeast China like a bright pearl. As the capital of Jilin Province, Changchun is the political, economic and cultural center of the whole province. After several years of development and construction Changchun has had its own economic advantages. It has become a central city who plays an important role in China with solid basis of industry and agriculture, booming business and vigorous growing of science, technology and education. Changchun has established enviable reputations as “Auto City”, “Forest City”, “Movie City” and “the City of Science, Technology and Education”.

As China's “Northern Spring City”, Changchun has an urban green-cover-rate of 38%. It is an ideal summer resort with luxuriant green and cool weather. And in winter it has an outstanding feature of the north with snow white. So Changchun has caught more and more men of insight's attention with its beautiful scenery, rich natural resources, ideal location, potential market and perfect investment environment. Today's Changchun is striding forward aiming at a modern international city, which shows its magnificent prospects.

One's personality is much influenced by the natural environment and climate which he lives in. The rich black soil of the Northeast not only has cultivated splendid modern culture but also brought up honest, frank, warm-hearted and hospitable Changchun people. Hereby, CPC, Changchun Municipal Committee and Changchun Municipal People's Government warmly welcome our friends both at home and abroad to Changchun to go sightseeing and make business investment, contributing to mutual flourishing and creating a same bright future.
