编者前言

《美国原版青少年核心能力拓展:好玩的数学》(学前阶段及1~8级)是从美国教师创新教材出版公司(Teacher Created Materials Inc.)引进的现行介入式数学指南,全面反映了美国学前班至八年级数学课的现行教学内容及教学要求,同时也为我们展示了美国青少年丰富多彩、生动活泼的学习场景。

阅读使用这套丛书会让你有一种犹如在美国上学、与美国的小朋友同步学习的亲身体验。从中不仅可以了解美国学生在数学课上学些什么,做些什么样的作业,考些什么样的数学题;还可以知道他们的老师在课堂上讲些什么,以及对学生的要求是什么。由此你会发现,他们的数学课与我们的有相同之处,但也并非完全相同。我们侧重于背公式,做习题,备考应试;而他们侧重于理解和掌握数学的基础知识,既讲述初等数学的内容,又介绍了一些高等数学、数论、概率论、统计学的知识,并与其他学科相互联系,从而了解数学在其他学科中的应用,而且在教学中注意联系实际,注重实践应用,因此上数学课不会让学生感到枯燥乏味,而是感觉生动有趣。二者有着不同的教学理念和方式,如果能通过这套丛书的学习将二者有机地结合起来,取长补短,优势互补,必能开阔你的眼界,提高你对数学概念的理解,提升你的应用能力(当然也包括应试能力)。

数学是世界各地通用的一门学科,有着共同的概念、公式、术语、习题、计算方法,因此在这套书中有着非常熟悉的学习内容和知识背景:学过的数学知识,做过的数学习题,考过的数学试题。特别之处在于这套丛书以英文原版形式体现,这就为你营造了一个在熟悉的背景下学习英语的环境,学会用地道的英语来表达学过的知识,表达真实的日常生活和学习活动,学会用英语和同学进行学习互动,从而大幅度提高你的英语水平。既学了数学又学了英语(而且是非常实用的英语),岂非两全其美的好事。

这套丛书适用于我国广大青少年读者,尤其是双语学校的学生以及打算到英语国家上高中、上大学的学生。学习这套丛书,就等于在国内体验了国外的学校生活,这对今后的深造无疑是大有裨益的。

打开书本,开启你在国内“留学”的全新生活吧!

Student Welcome Letter

欢迎信

Dear Student,

You are starting a math program that will help you review mathematics. In school, you have learned many math skills. This program will help you review what you already know how to do in math. It will also help you see what you need to learn. You will learn important math concepts, skills, and vocabulary so that you are ready for next year.

Sometimes, students have trouble learning math. It can seem confusing. This program will help you practice math every day, so you will get better at math.

You will review many skills you have already learned in school. Some of those skills include addition, fractions, and problem solving.

Please sign the bottom of this letter. This shows that you are ready to learn and have fun!

7. Who had more cards, J.C. or B.B.? _____ Explain your answer.

Drawing a Diagram 1

图解法 1

Sometimes, a word problem is hard. Draw a diagram or picture of the word problem. It can help you see the answer. You can picture the answer in your mind. Then, the information in the problem is clearer. 有时候,一道文字应用题会很难。画图解能帮你找出答案。你可以在脑海中想象一下,然后题目信息就更清楚了。

You do not have to draw the real objects from the word problem. Use simple symbols or pictures. The symbols can stand for the objects in the word problem. For example, you can draw a circle to stand for an apple. 你无须真的画出题目中的物体,使用简单记号或者图标即可,你可以画一个圆代表一个苹果。

Some problems have more than one step. Drawing diagrams helps you keep track of the information in each step. Diagrams help you to sort out your thoughts. This makes a problem simpler. 有些题目不只一步,图解法能帮你理清每一步的信息,理清思维,这样题目就简单多了。

Problem: Shoes

The Problem 问题

There are 5 pairs of shoes on a shelf. There are boots (靴子), sneakers (运动鞋), flip-flops (夹脚拖鞋), slippers (拖鞋), and dress shoes (皮鞋). The shoes are in a row. The sneakers are last (on the right). The dress shoes are in the middle of the shelf. The boots are after the dress shoes. The flip flops are first. The slippers are before the dress shoes. In what order are the shoes from left to right?

Understanding the Problem 理解问题

- *What do we know?*

The shoes are in a row. The shoes are on a shelf. The shoes are in a specific order.

- *What do we need to find out?*

What order the shoes are in.

Planning and Communicating a Solution 计划与交流解决方法

By drawing a picture, it is easy to figure out the order of the shoes.

Drawing a picture helps you solve the problem. You can see the answer. You will make fewer mistakes.

For this picture, you do not need to actually draw shoes. You can draw rectangles to stand for the shoes. Then, write letters from the shoes in the rectangles.

B = boots D = dress shoes
SL = slippers F = flip-flops
SN = sneakers

- *Do you see the answer?*

The order is: flip-flops, slippers, dress shoes, boots, and sneakers.

Reflecting and Generalizing 回想与归纳

Drawing a diagram helped you see the correct order. Without the picture, you might have gotten confused about the order.

Extension 拓展题目

There are seven cans of food on a shelf. There are peas, beans, carrots, soup, corn, tuna, and chili. They are in a row. The soup is last (on the right). The beans are in the middle of the shelf. The peas are third. The carrots are sixth. The chili is next to the beans. The tuna is first. The corn is after the tuna. In what order are the cans from left to right?
