魔药

两个小矮人正在调制魔药。

他们要调制的药有两种：

一种能让物体纵向伸缩，

一种能让物体横向伸缩。

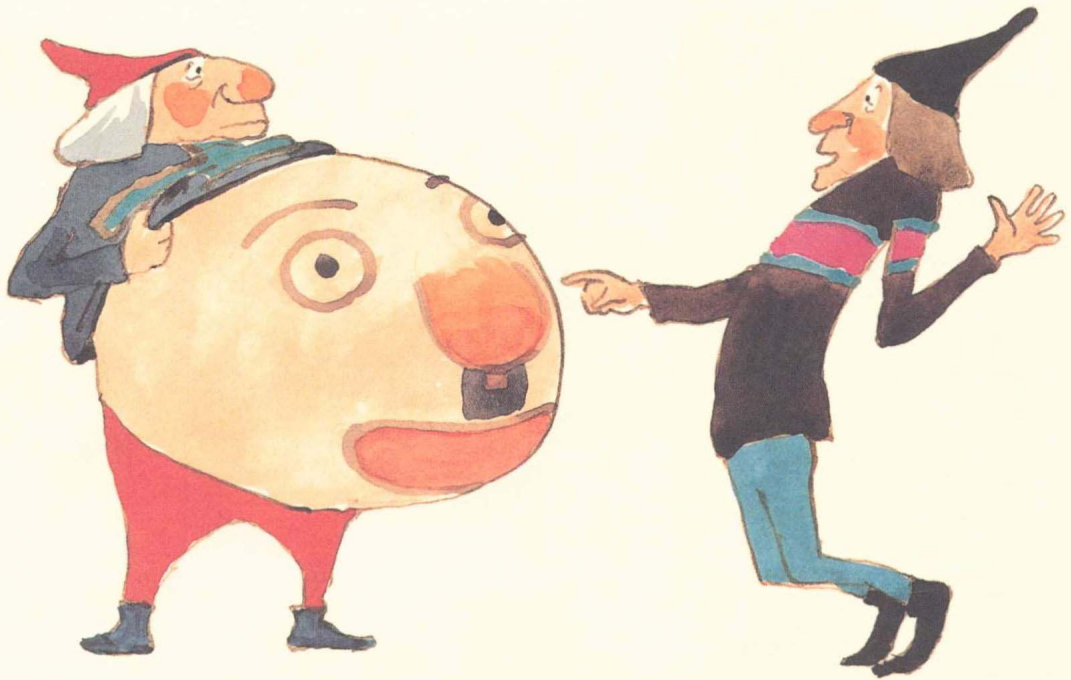

如果把这两种药巧妙地混合在一起，

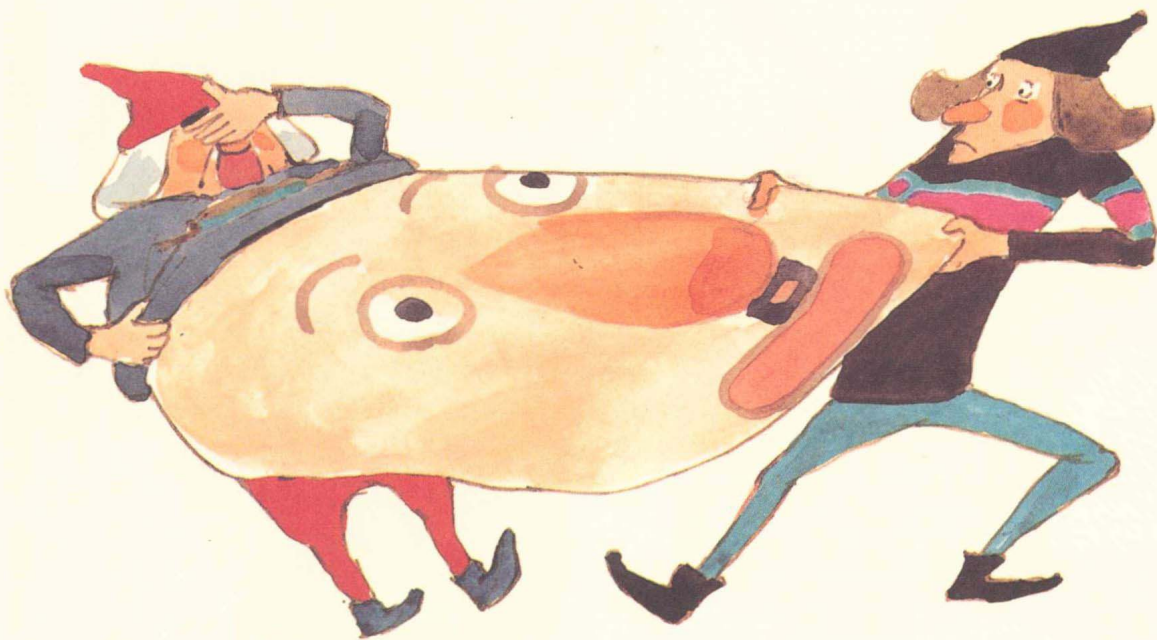

然后涂抹在各种东西上，会发生什么事呢？

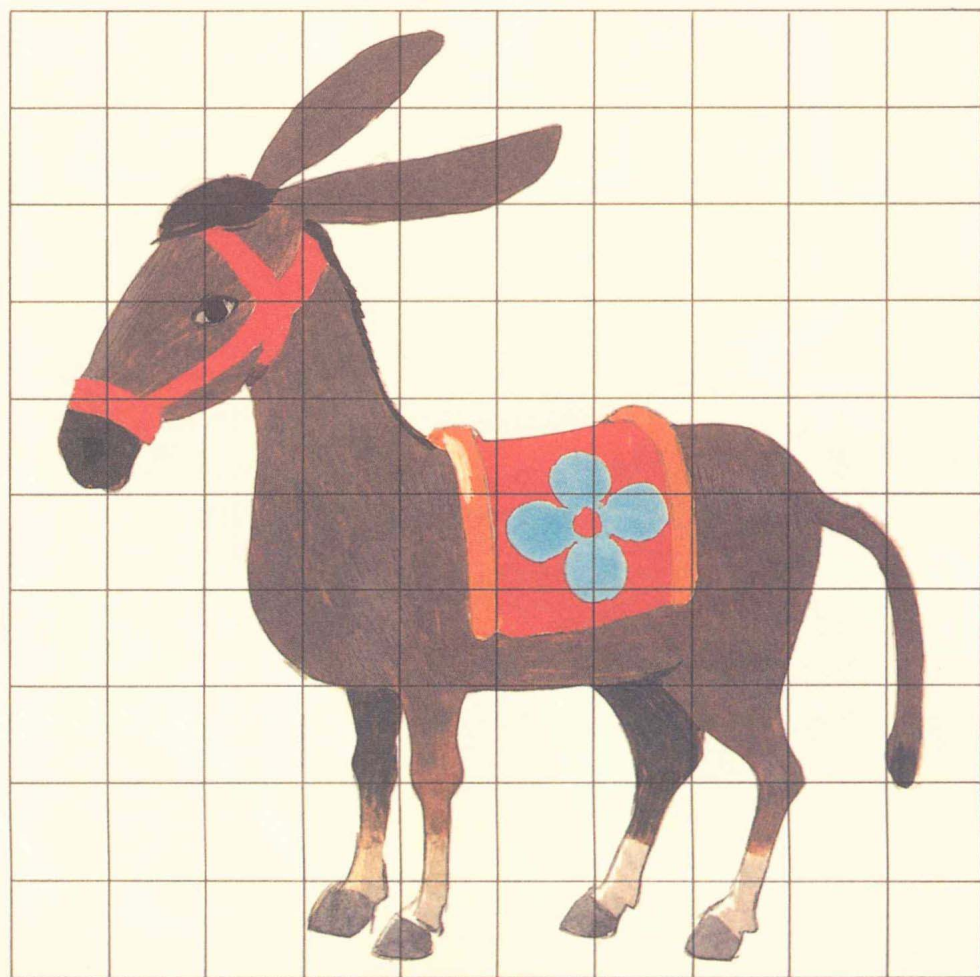

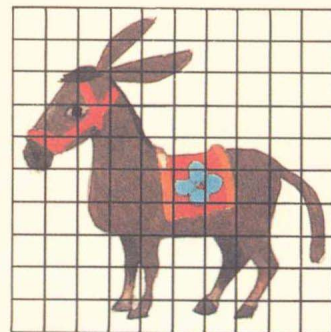

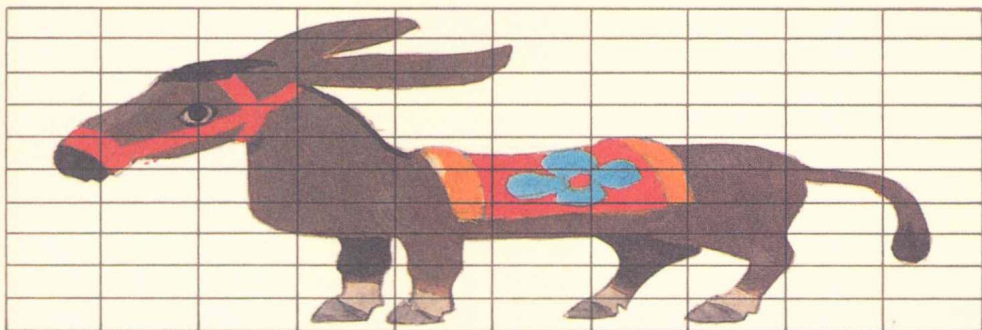

这可不是在
肚皮上画画哟，
而是在往肚皮上
涂抹魔药，
魔药有什么效果呢？
看看下面
这几张图就知道了。

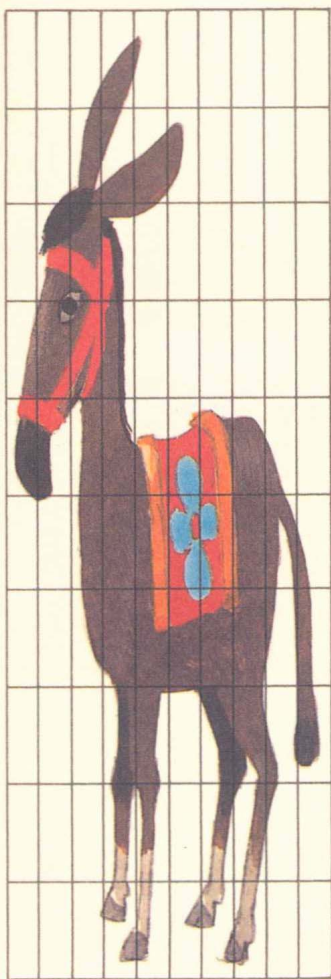

如果纵向伸缩和横向伸缩的
调配的比例合适，
物体会被放大得很均匀、很漂亮。

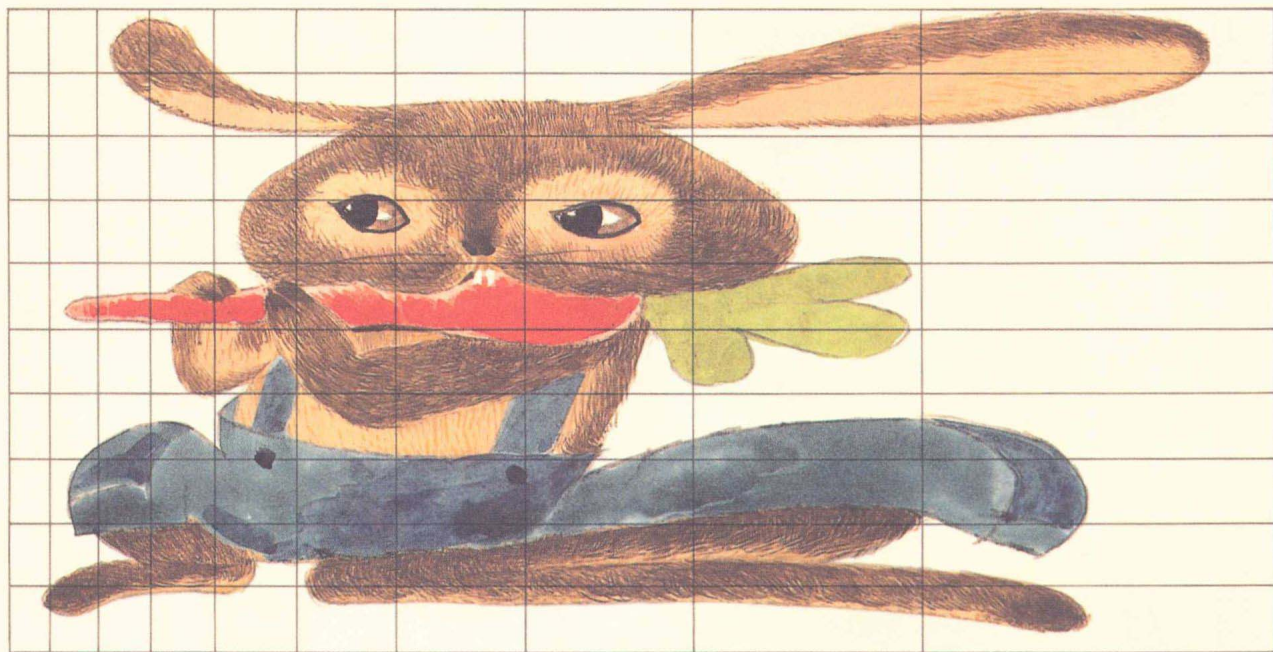

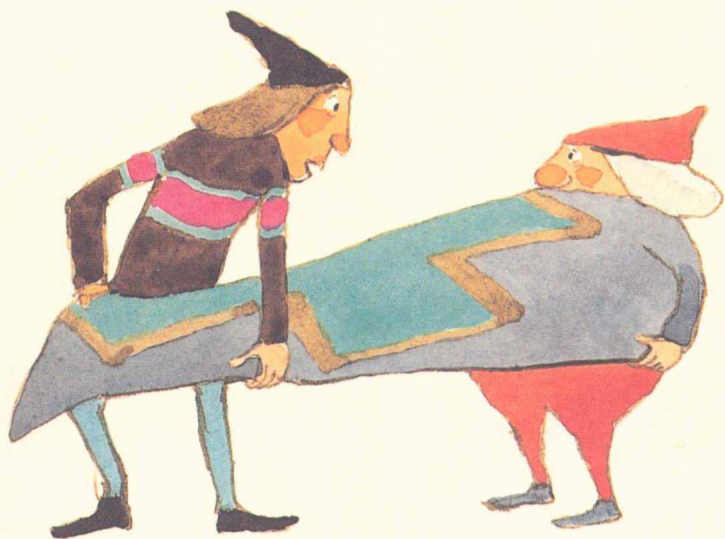

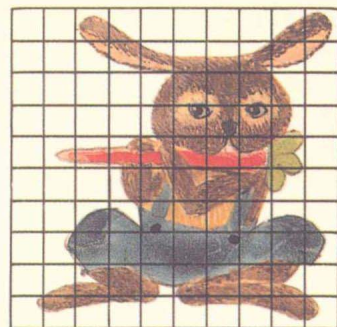

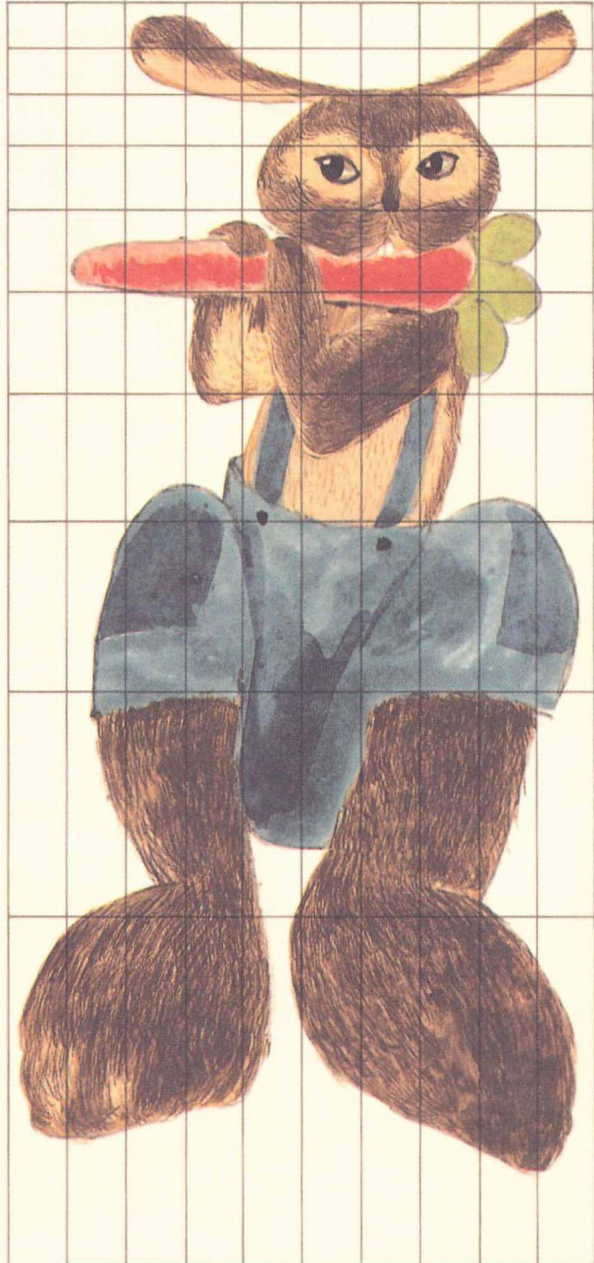

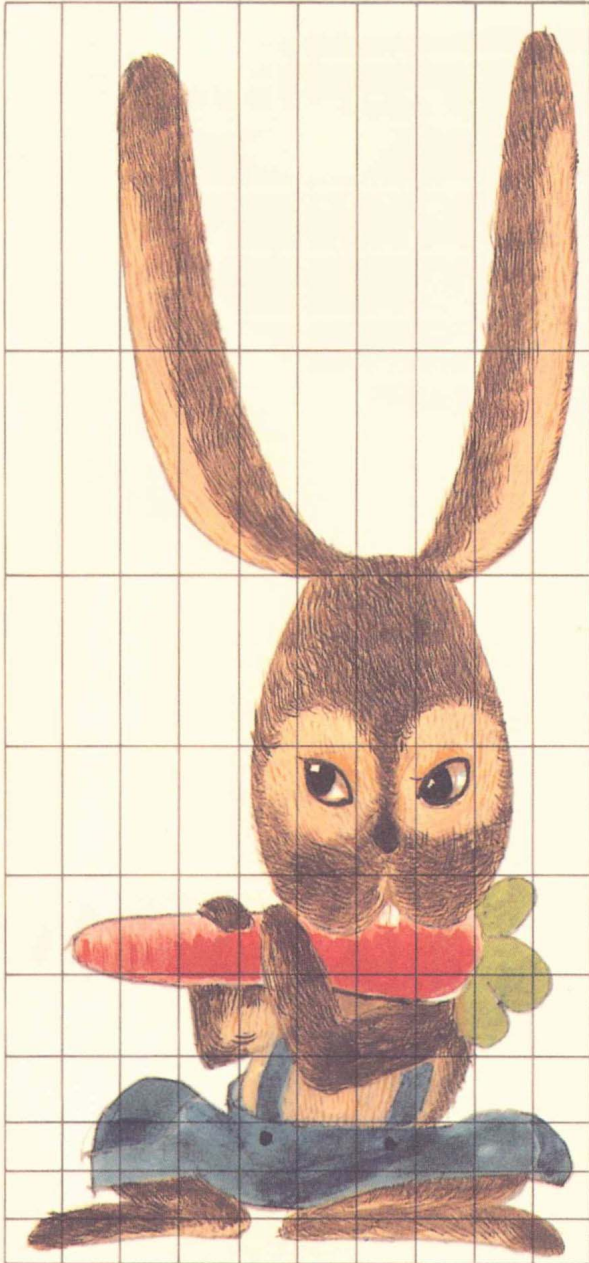

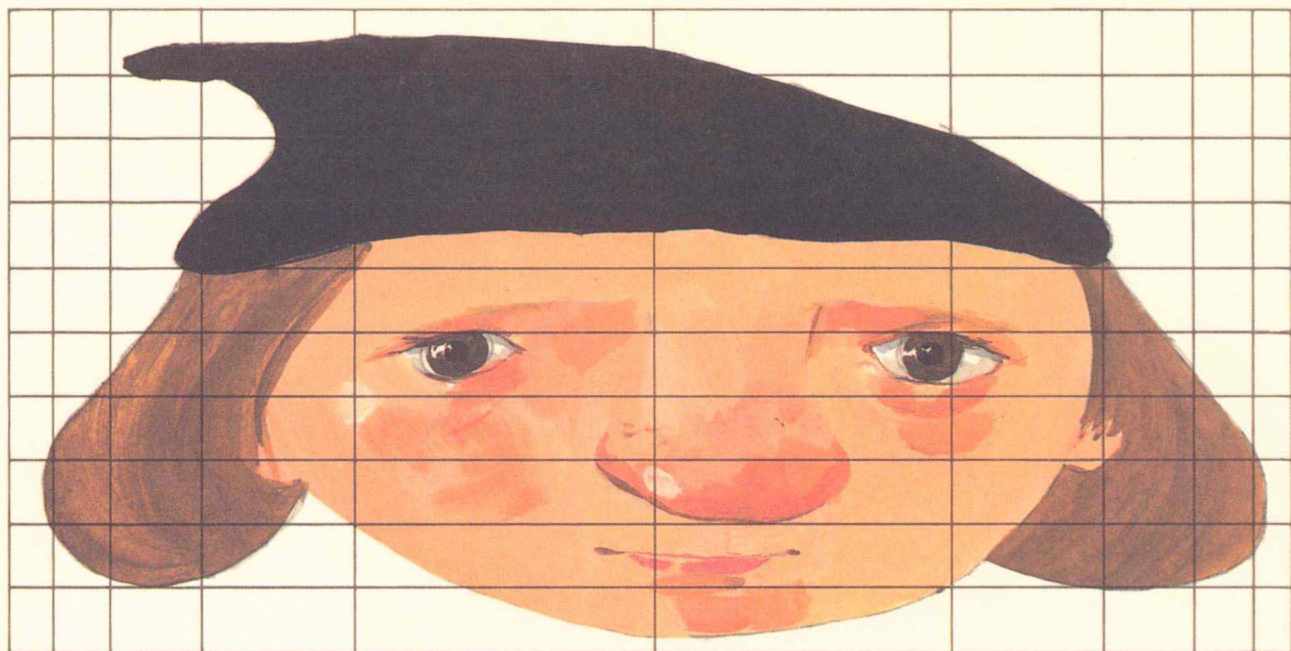

只涂横向伸缩的药，
或者只涂纵向伸缩的药，
就会很遗憾地变成画上的样子。

因为使用了奇怪的调配方法，
所以就出现了画面上这些奇怪的兔子。

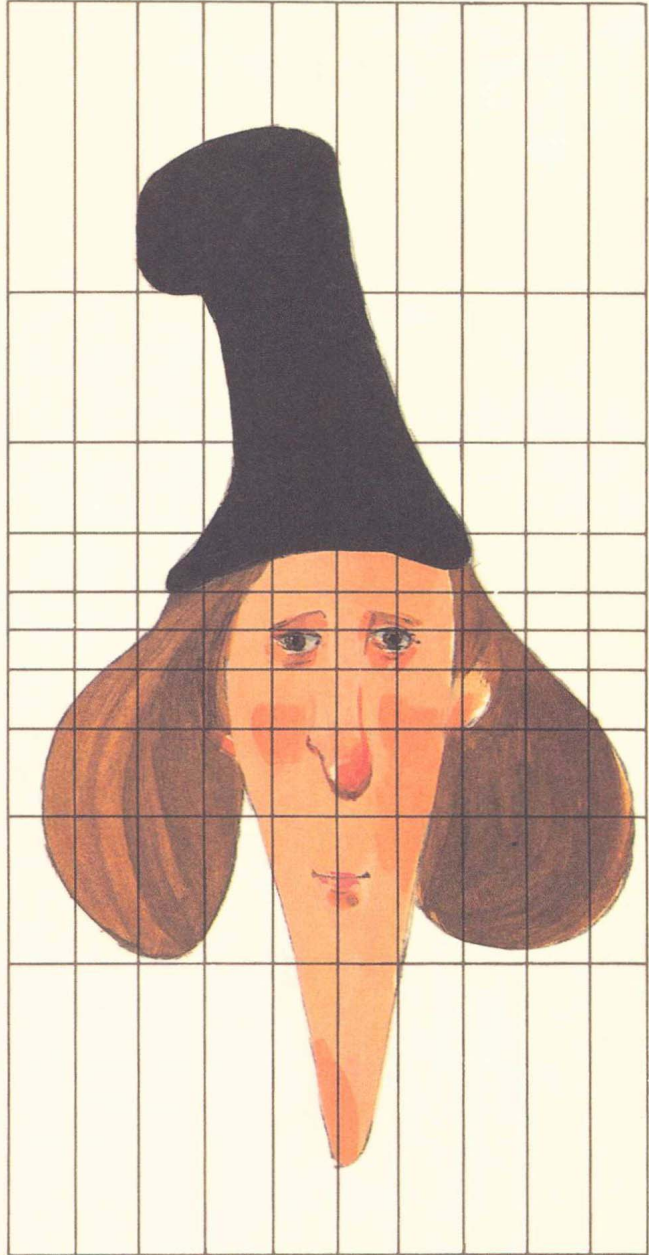

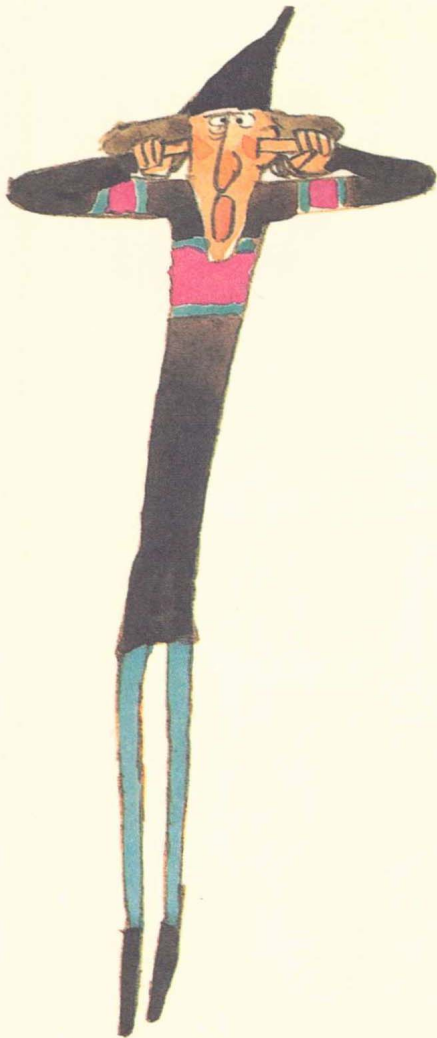

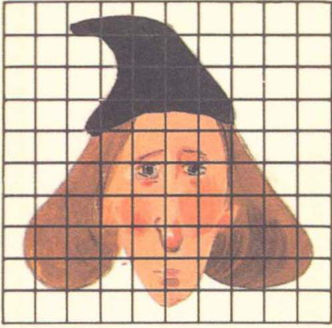

这些画是涂了怎样调配的魔药呢？

小矮人的脸变得非常奇怪。

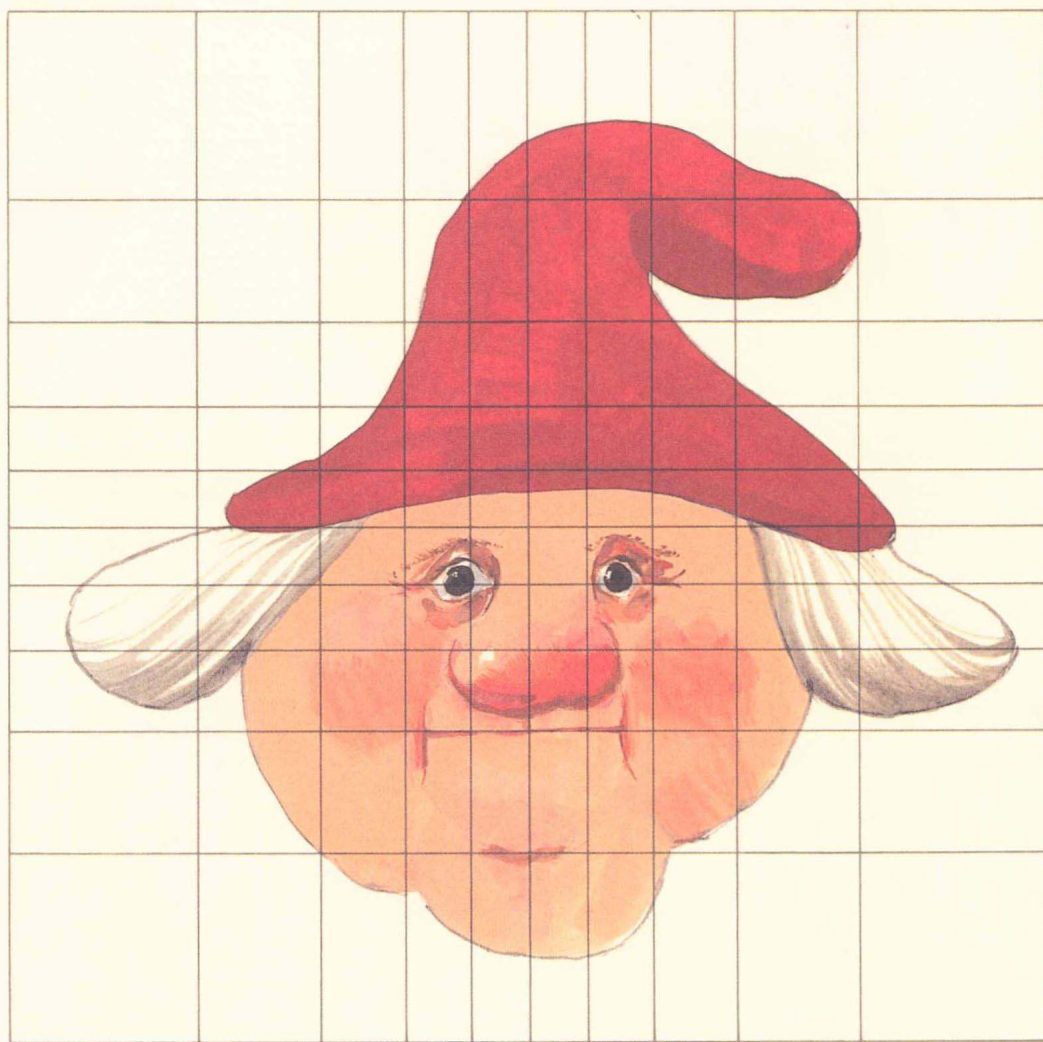

你有没有在哈哈镜或玻璃窗上，
看到过自己的脸被拉长或压扁后的样子呢？

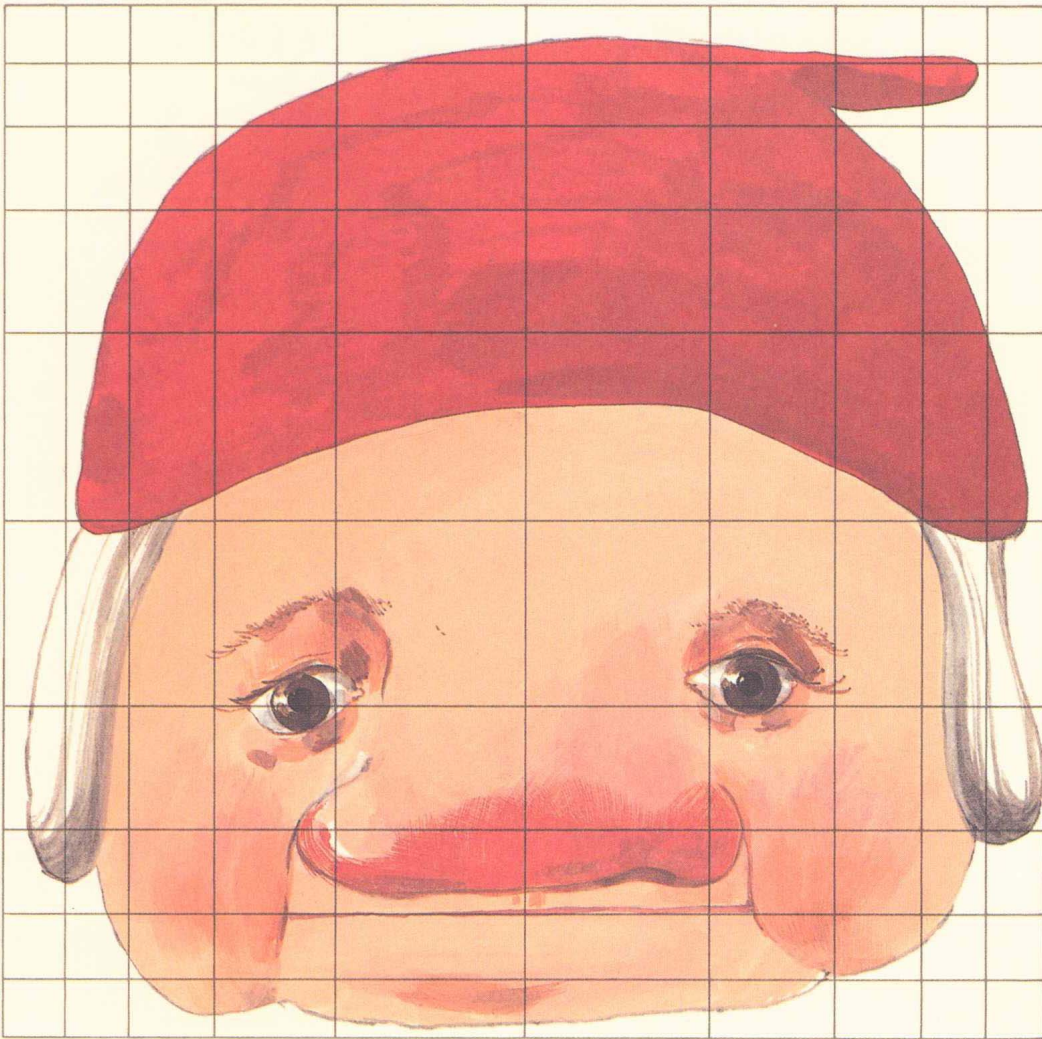

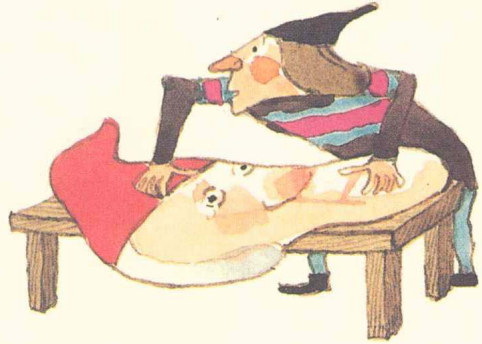

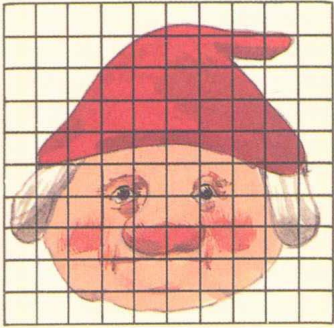

下面这些也同样发生了变化。

你可以拿着汤勺、熨斗或热水瓶内胆之类的东西，
来照照自己的脸，看看变成了什么样。

这只大猩猩的样子也变得很有趣。
涂上这种魔药后样子虽然会改变，
但是不管怎么变，
也不会变出三只眼睛或三只手来，
嘴也不会跑到眼睛上面去。
