前 言

英语作文,对一般学生而言,不外有两大困难:一是不知写什么;二是不知怎么写。解决这两大困难,除了具备相关知识和必要的语文能力外,更需要不断地练习。所以,本书目的不仅在提供有关的基本知识,以帮助思考,亦在提供大量的范例,以作为练习作文的参考。

本书精选各类短文 80 余篇。题材广泛、文字生动、结构完整。其中不少篇幅涉及近年考试的作文题目。

本书每篇作文皆附中文翻译,更易理解、记忆。

参加本书编写的还有王茂林、唐风云、马向荣、薛东权、刘永兵、张雪丽、李玉华。

由于编写时间仓促,如有疏漏,请读者批评指正。

1. The Oceans

People all over the world realize the fact that the oceans are man's last natural resources. The oceans occupy about 71 percent of the earth's surface. Since the ancient time, man has been obtaining his food from the vast oceans. In modern times, man also gets oil and other minerals from the oceans.

People depend on the oceans so much that they can't live without them. By rough estimate, the world population will come to 8 billions in another ten years. That is to say, more and more people are to be fed, clothed, and housed. Man has no way out but turn to the oceans — the last and great resources.

We must realize that if the oceans are polluted, we can't find other possible resources instead. For man's own benefit, we should protect the ocean from being polluted. And we should put forward a set of laws to safeguard the proper use of the oceans.

1. 海 洋

全世界的人们都知道这一事实：海洋是人类最后的自然资源。海洋占地球表面积的 71%。自古以来，人类就一直从浩瀚的海洋中获取食物。如今人类又从海底开采石油和其他矿藏。

人类如此依赖海洋以至于离开海洋便无法生存。据粗略估计，再过十年全世界的人口将达 80 亿。这就是说，越来越多的人要吃，要穿，要住。人类已经别无选择地依赖于这最后的，也是最大的自然资源——海洋。

我们必须充分地认识到，如果海洋也被污染，我们是不可能找到另一种可能的替代资源了。为了人类自身的利益，我们要保护海洋不受污染。另外还要立法来保证海洋的正当利用。

2. Make the Cities Greener

In China, with the development of economy almost every city is growing fast. High buildings of hotel, office, restaurant and apartment are being built here and there. To make room for those buildings, trees are being cut down, grass plots occupied. Cities look like nothing but grey concrete woods.

Modern cities should be expanding with a certain percentage for green - plant areas. This is not only because people like the green plants but because green plants can help keep the air clean and fresh, and, to some degree, balance the climate. Most important of all, green plants can help make the cities lively.

More and more people are realizing the importance of planting trees and grass. Many city governments even make laws to force the city planning work to stop on a right way. With all the efforts, the cities are sure to become greener and more beautiful.

2. 让城市绿起来

随着经济的发展,在中国几乎每个城市都在高速扩展。到处是拔地而起的高层旅店,商务楼,饭店和公寓。为了建造这些大楼,一棵棵的树被伐倒,一块块的草地被侵占了。城市是一幢幢混凝土的建筑物群构成的,毫无生气。

现代化城市的扩大应给绿地面积一定的比例。这不仅仅是因为人们喜欢绿色植物,也是因为植物能帮助保持城市空气新鲜、洁净,并在一定程度上调节气候。最主要的是,绿色植物能使城市充满生机。

现在越来越多的人认识到了植树种草的重要性。许多城市的政府部门还制定了法律、法规,强制规化工作走上正规。有了大家的共同努力,城市肯定会越来越绿,越来越美的。

3. We Have Only One World

When industries grow, pollution problems also grow. Today the problem of environment has become more and more important. The world population is rising so quickly that the world has become too crowded. We are using up our natural resources too quickly and at the same time we are polluting our environment with dangerous chemicals. If we don't then we will destroy our only world.

Man has made great progress in environment protection. Governments of many countries have established laws to protect the forest and sea resources and to stop the environmental pollution.

Still more measures should be taken to solve the problem. First, we should start by educating the public about the hazards of pollution. The government on its part should also design stricter laws. This is not only for our own generation but also for the future generations to come.

It is necessary to protect our nature environment. We must begin now to protect our only world.

3. 我们只有一个地球

当工业发达时,污染问题也严重起来。如今,环境问题已变得越来越重要了。世界人口增长如此迅速以至于世界正变得拥挤不堪。自然资源被迅速消耗。同时,危险的化学物质正污染着我们的环境。如果我们不立即采取行动,我们将会毁掉我们唯一的世界。

在环境保护方面,人类已经取得了巨大的进步。许多国家的政府已立法保护森林和海洋资源,阻止环境污染。

但仍然需要采取更多的措施来解决这些问题。首先,我们应该从教育民众有关污染的危险性开始,政府方面也应该制定更严格的法律。这不仅是我们自己这一代着想,同样也是为我们的后代着想。

保护我们的自然环境是必要的。我们必须从现在开始保护我们唯一的地球。

4. Make the Best Use of Our Land

It is the land that has been providing us with everything we need for centuries. In other words, almost everything we use daily comes from the land directly or indirectly. The food, clothes, houses, even the books and furniture are all supplied by the land.

But the limited land is decreasing at a surprising speed. With the expanding of the cities, the development of the industry and over population, lots of large pieces of good farm - land are being turned into residential areas with many houses and apartment buildings, or industrial areas, or warehouses.

Therefore some measures must be taken to stop the abusing of our farmland. On the other hand, we should let everyone realize the danger of being short of land. And also we should educate them how to make better use of our land.

4. 更合理地利用我们的土地

多少个世纪以来,是土地一直向人类提供着所需的一切。换句话说,人们日常生活所需要的一切都是直接或间接地来自土地。食品、衣服、住宅甚至书本和家具都是土地向人类提供的。

但有限的土地正在以惊人的速度减少着。随着城市不断地向外扩展,工厂的发展以及人口过剩等原因,大片大片的良田上盖起住宅,厂房或仓库。

因此我们必须采取一些措施来制止滥用土地。另一方面要让人们认识到土地缺乏的危险,教育人们如何更好地利用土地资源。
