二、读写任务

阅读下列短文,将信息填入表格内的空白处,每空一词,将答案填在相应位置。

Smoking is one of the worst things kids can do to their bodies. Every single day, about 4,000 kids between the ages of 12 and 17 start smoking. Most junior school students don't smoke—only about 1 in 10 does. Most senior school students don't smoke either—about 1 in 4 does.

But why do those who smoke ever begin? There's more than just one simple answer. Some kids may start smoking just because they're curious. Others may like the

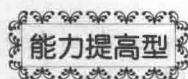

idea of doing something that grown-ups don't want them to do. Still others might think smoking is a way to act or smoking makes them look like an adult.

Luckily, fewer people are starting to smoke than a few years ago. Maybe that's because more and more people have learned that smoking can cause cancer and heart disease. Sometimes kids don't worry about what future illness they might get.

Nicotine and other poisonous chemicals in tobacco cause lots of diseases, like heart problems and some kinds of cancer. If kids smoke, it will hurt their lungs and hearts each time they light up. It can also make it more difficult for blood to flow in the body, so smokers may feel tired. The longer they smoke, the worse the damage becomes.

The human body is smart, and it knows when it's being poisoned. When kids try smoking for the first time, they often cough a lot and feel pain or burnt in their throats and lungs. This is their lungs' way of trying to protect them. Also, many kids say that they feel sick to their stomachs or even throw up(呕吐).

I was playing at my cousin house. Since his family was rich than mine, he had more toys than I did. There was one on particular I'd always wanted. I put into my pocket when he wasn't looking. I guessed, even at that age, I would never be able to enjoy to playing with the toy or faced my cousin again; I would always know I'd done

something wrong. Late on, my aunt drove me home. When she dropped me off, I pulled out the toy slow and gave it back. She knows what had happened, but she thanked me and ever mentioned it again.

If you're a person who wants to be fit, here are some suggestions for you.

Get to know yourself well. You should know what the

right weight is for your age, height, and body type. You can check with your parents or with a doctor. Only by knowing enough about yourself can you make a suitable fitness plan for yourself.

Eat a variety of foods, especially fruits and vegetables. You may have a favorite food, but it is best to eat a variety of foods. If you eat different kinds of foods, you're more likely to get the nutrients your body needs.

Drink water and milk more often. When you're really thirsty, water is the No. 1 thirst quencher(饮料). Try to limit the intake of sugary soft drinks, like sodas and juice cocktails. They contain a lot of added sugar. Also you need calcium to grow strong bones, and milk is a great source of this mineral. Two cups of milk(about half a liter) will work for you each day.

Limit screen time. What's screen time? It's the amount of time you spend watching TV, DVDs and videos, playing hand-down activities, the less time is available for active stuff, like basketball, bike riding and swimming. Try to spend no more than 2 hours a day on screen time. Don't be a couch potato.

Be active. You should figure out which activities you

like best. Boys may be more interested in ball games, or maybe have a passion for karate(空手道) and things like that. Girls may like dancing; nowadays yoga has become more and more popular among females of all ages.
