青岛大规模的城市建筑活动是随着 1897 年德国殖民者入侵开始的。到 20 世纪初,已成为当时亚洲引人注目的小城市。城市中的建筑,多呈现出异国的风貌,它记录了青岛这个城市发展的踪迹,留有深深的历史文化的印痕。

1949年前,青岛城市建筑的发展可按社会演变进程划分为五个时期:①本土时期(1897年以前);②德国占领时期(1897~1914);③日本占领时期(1914~1922);④北洋政府与国民政府统治时期(1922~1937);⑤日本第二次占领时期(1937~1945)。其中,德占时期是城市的形成期,出现城市建筑发展的第一次高潮;国民政府时期是城市建筑发展的第二次高潮。

#### 目录

#### 02 德国总督府旧址(青岛市人大和政协办公楼//沂水路11号)

The Former Site of the Headpuarters of the German Administration

07 胶澳帝国法院旧址(市南区人民检察院//德县路2号)

# 德国总督府旧址

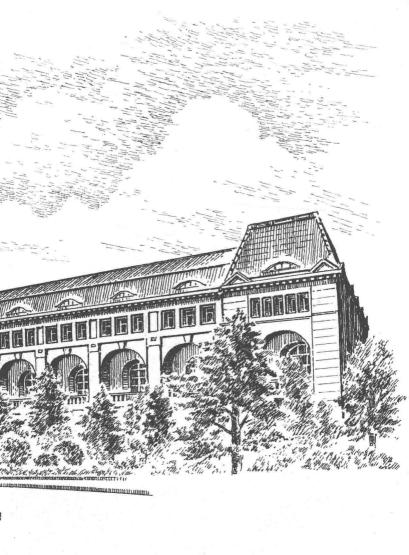

# The Former Site of the Headpuarters of the German Administration

地 址 沂水路 11号 原用途 德国胶澳总督府 现用途 青岛市人大和政协办公楼

建造年代 1904年至1906年

Address 11 Yishui Road
Original Function Kiaochow (Jiaozhou Bay)
Headquarters of the German Administration
Present Function Office building of the
Chinese People's Political and Consultative
Conference, Qingdao Committee
Years of Construction 1904 – 1906

建筑平面布局为"凹"字形,东西长80米, 南北长约40米。主体高四层、约20米、底层为半地下 形式。立面形式采取欧洲文艺复兴时期的三段构图方法, 中部及两侧略外突, 墙面采用剁斧花岗岩深凹缝砌筑。 凸显建筑物的沉稳凝重,并增加厚重感。南立面入口附 设39级台阶直达二层门庭.二、三层间采取券柱式外廊。 券洞两侧为两层高的爱奥尼方形壁柱,与其他部分形成 虚实对比。细部处理严谨但显生硬, 充分显示出德国建 筠的严肃风格。屋顶为梯形折坡状并覆以半圆式红陶瓦, 对应立面墙身置弧状屋面窗。整个建筑外墙均采用浅色 花岗岩材料嵌缝式处理。一、四层设计为每开间三扇的 小窗,二、三层则采取视觉连通式大窗,为半圆弧状。 整个建筑物依托地势,给人高大深远且庄重威严的感觉, 以展示统治者至高无卜的气势。整座建筑以砖石木结构 为主,局部辅以钢梁与素混凝土拱体楼板结构。该楼由 德国设计师马尔克设计。于1904年夏,由德国汉堡阿 尔托纳区F. H. 施密特公司着手组织施工,至1906年1 月建成。总建筑面积约7500平方米,耗资85万马克。

The plane layout of the building took the shape of the Chinese character" ". It was 80 meters from west to east and 40 meters from north to south with a floor space of 7,500 square meters. The four-storied main body was 20 meters high with its ground floor in semi-basement pattern. The facade was of Renaissance style, which displayed stability and solemnity. The 39 steps attached to the entrance in the facade directly led to the doorway in the second floor. All the details fully displayed the solemn style of German architecture. The walls were made of granite with light color. Each room on the first and fourth floors had a small window, while one big semicircle-shaped window was built in each room on the second and third floors. The whole building was mainly in the structure of post, panel and mason, with part of it in the structure of steel girder and plain concrete floorslab. Designed by Mahlke, a German architect and undertaken by the F. H. Schmidt Company in the summer of 1904, the construction was completed in January 1906 at the cost of DM 850,000.
