Care has been taken to confirm the accuracy of the information presented and to describe generally accepted practices. However, the authors, editors, and publisher are not responsible for errors or omissions or for any consequences from application of the information in this book and make no warranty, expressed or implied, with respect to the currency, completeness, or accuracy of the contents of the publication. Application of this information in a particular situation remains the professional responsibility of the practitioner.

The authors, editors, and publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accordance with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new or infrequently employed drug.

Some drugs and medical devices presented in this publication have Food and Drug Administration (FDA) clearance for limited use in restricted research settings. It is the responsibility of health care providers to ascertain the FDA status of each drug or device planned for use in their clinical practice.

Preface

We are proud to introduce the first edition of *The Washington Manual of Ambulatory Therapeutics*. It joins *The Washington Manual of Medical Therapeutics* and *The Washington Manual Internship Survival Guide* as the newest member of the Washington Manual series and recognizes the ever-increasing role that ambulatory care is assuming in health care. Rational yet practical diagnostic and therapeutic approaches in the ambulatory setting are critical, and we offer this manual to help fulfill this need.

Our focus is to provide a reference that covers common ambulatory medical problems encountered in each medical subspecialty. Recognizing that the approach to each may be handled differently, many of the subspecialties have separate symptom- and disease-based chapters. Many problems seen in the ambulatory setting fall outside traditional internal medicine subspecialties; we have included chapters on topics such as dermatology, neurology, ophthalmology, otolaryngology, and psychiatry to help address this. Each of these chapters benefits from being written by a subspecialist in the given field but with the primary care practitioner in mind. Recognizing the increasing importance of population-specific problems, we have included several pertinent appendixes and separate chapters on geriatrics and men's and women's health.

The diagnostic and therapeutic approaches presented reflect the current practices of physicians at the Washington University School of Medicine, although there may be several effective therapies

for any disease process. Each author is a well-respected clinician and teacher. All have faced the challenges of a busy clinic and the degree of uncertainty inherent in the ambulatory setting.

An endeavor of this sort would not have been possible without the assistance and support of many people. We wish to thank the many fellows, house officers, medical students, and other colleagues at Barnes-Jewish Hospital who reviewed manuscripts and provided feedback. Jeff Blunt, Peter Crawford, Margaret Coplin, Anupam Goel, Grace Lin, Martin Maron, John Mohart, Toni Rastelli, William Read, Michael Riley, Gregory Sayuk, Dan Williams, and, particularly, Kevin Latinis were helpful in this regard. We thank Alice Lin and Joanne Shen for their input during manuscript review. Jeanne Wehner provided helpful assistance as well. From the Agency for Health Care Quality and Research, we thank Gregg Meyers for his contribution. We also thank the late John Eisenberg, a beloved friend of Washington University, for his contributions. The pharmacy staff from Barnes-Jewish Hospital was instrumental in reviewing drug dosages, and we would like to thank Robyn Schaiff for her expert assistance as Associate Editor for Pharmacotherapeutics.

From Lippincott Williams & Wilkins, we thank Katie Sharp, Kathy Neely, Delois Patterson, and Richard Winters for their excellent guidance and assistance. Erica Nelson, Shannon Allen, and Elizabeth Willingham from Silverchair Science + Communications were especially patient and helpful as we moved from manuscript to manual completion.

Erica Nelson deserves our special thanks and appreciation as she followed up every detail and treated this project as her own.

We received tremendous support throughout the Department of Medicine, and there are several people without whom this manual would not have been possible. Megan Wren and Thomas DeFer not only served as authors, but also provided encouragement and valuable assistance at key points. Daniel Goodenberger and Alison Whelan provided guidance, steadfast support, and the benefit of their experience on previ-

ous manuals. It was our pleasure to serve as chief residents under Kenneth Polonsky, Chairman of the Department of Medicine, whose enthusiasm for medical education allows innovative ideas to become realities.

Finally, we acknowledge those close to us for their support, especially the unwavering support of our families—George, Jean, Grace, and Alice; Amy, Keaton, Richard, and Elaine.

Tammy L. Lin

**The
Washington
Manual of
Ambulatory
Therapeutics**

Preface

前言		xv
1	Approach to the Ambulatory Patient	
	对非卧床病人的处理方法	1
	Screening for Disease	
	疾病筛查	4
	Tobacco Use and Cessation	
	吸烟与戒烟	6
	Adult Immunizations	
	成人免疫法	9
2	Care of the Surgical Patient	
	外科病人的护理	20
	General Considerations	
	一般护理原则	20
	Cardiovascular Considerations	
	心血管病人的护理	22
	Pulmonary Considerations	
	肺疾病患者的护理	30
	Prophylaxis	
	预防	31
	Medication Adjustments in the Perioperative Period	
	围手术期中的药物调整	33
	Special Considerations in the Perioperative and Postoperative Period	
	手术前后的特殊护理原则	36
3	Nutrition	
	营养	38
4	Hypertension	
	高血压	70
	Definitions and Diagnostic Evaluation	
	定义与诊断评估	70
	Therapeutic Considerations	
	治疗原则	72
	Special Considerations	
	特殊治疗原则	86
5	Lipid Disorders	
	脂质代谢障碍	88
	Detection and Evaluation	
	检查与评估	88
	Diagnosis of Specific Disorders	
	特异性脂质代谢障碍的诊断	90
	Therapy of Hyperlipidemia	
	高脂血症的治疗	92
	Drugs	

	药物	96
6	Cardiovascular I : Ischemic Heart Disease	
	心血管疾病 (I): 缺血性心脏病	100
	Ischemic Heart Disease Risk Factors	
	缺血性心脏病的危险因素	100
	Prevention	
	预防	100
	Stable Angina	
	稳定性心绞痛	105
	Acute Coronary Syndromes and Indications for Hospitalization	
	急性冠状动脉综合征与住院指征	113
	Post-Myocardial Infarction Care	
	心肌梗死后的护理	114
	Cardiac Rehabilitation	
	心脏康复	117
7	Cardiovascular II : Heart Failure, Cardiomyopathy, and Valvular Heart Disease	
	心血管疾病 (II): 心力衰竭、心肌病和心瓣膜病	118
	Heart Failure	
	心力衰竭	118
	Cardiomyopathy	
	心肌病	130
	Valvular Heart Disease	
	心瓣膜病	133
8	Cardiovascular III : Cardiac Arrhythmias	
	心血管疾病 (III): 心律失常	138
	Mechanisms of Arrhythmia	
	心律失常的机理	139
	Antiarrhythmic Drug Therapy	
	抗心律失常的药物治疗	147
	Related Topics	
	相关心血管疾病	150
	Syncope	
	晕厥	152
9	Vascular Disease and Antithrombotic Therapy	
	血管疾病和抗血栓形成的治疗	155
10	Pulmonary I : Common Symptoms and Complaints	
	肺部疾病 (I): 常见症状与主诉	178
11	Pulmonary II : Diseases	
	肺部疾病 (II): 肺病	202
	Chronic Obstructive Lung Disease	
	慢性阻塞性肺病	202
	Obstructive Sleep Apnea - Hypopnea Syndrome	
	阻塞性睡眠呼吸暂停—呼吸不足综合征	207
	Cystic Fibrosis	
	囊性纤维化	211
	Diffuse Interstitial Lung Disease	
	弥漫性间质性肺病	214
	Pulmonary Hypertension	
	肺高压	219
12	Allergy and Asthma	
	变态反应与哮喘	227

	Allergy	
	变态反应	227
	Anaphylaxis	
	过敏症	233
	Venom Hypersensitivity	
	毒素过敏性	237
	Urticaria and Angioedema	
	荨麻疹与血管性水肿	238
	Drug and Food Allergies
