序 言

中国轻工协会理事长 季 龙

由中国轻工协会组织编写、中国展望出版社出版的《中国轻工企业及可供出口产品名录》，现以中、英文对照的形式出版了。这是一件新事、好事，也是一件大事。

《中国轻工企业及可供出口产品名录》，是一部工具书。这本工具书，汇集了我国轻工业行业有代表性的企业 300 多家，分行业加以编排，除介绍企业名称、地址、电话、厂长、职工人数等基本情况外，还简要介绍了各自可供内外销的主要产品名称、型号、规格、性能、用途和销路。它将密切与全国各地的经济联系，为沟通产销、提供信息、促进交流、扩大渠道、发展联合、密切协作，加强我国轻工企业同国内外的经济合作和交流，提供了有利的条件。有了这部工具书，进行联系就比较方便了。

我国轻工业是国民经济中的一个支柱行业，地位很重要。它主要生产日用工业消费品，特别是它生产的名牌优质产品和市场紧俏商品，对活跃城乡市场，扩大出口创汇，增加财政收入，积累建设资金和安排劳动就业等有重要作用。建国以来，我国轻工业发展较快，具有一定实力。从轻工业部系统来说，全国已有 7 万多个企业，40 多个行业，1200 多万职工，1987 年产值达 1860 多亿元，上交税利 420 多亿元，不含烟草为 1656 亿多元，出口创汇 60 多亿美元，上交税利 250 多亿元，是一支浩浩荡荡的产业大军，在国民经济中占有重要比重。随着国民经济建设和人民日益增长的物质文化生活的需要，向我们轻工系统提出了更多更高的要求，今后的生产发展速度和经济效益，将会更快。我们将努力提高产品档次，增加花色品种，满足人民消费需要，并争取更多更好的产品进入国际市场。以出口创汇为突破口，全面振兴轻工业，把轻工业产品提高到一个新水平，这是摆在我们面前的艰巨任务。

要适应市场变化的新趋势，大力发展适销对路的轻工业产品。我们要始终坚持把满足人民的物质文化生活需要作为社会主义生产的目的和再生产的动力。发展轻工业，必须做到产品适销对路，符合市场需要。在有计划商品经济的条件下，我们必须十分重视市场调查和预测，重视信息工作，及时根据市场需求变化，调整产品结构。要花大力进一步提高产品质量，改进包装装潢，坚持质量第一的方针。在消费水平不断提高，市场竞争日趋激烈的情况下，轻工业品的质量好坏是关系到企业在生存发展的大问题。特别是出口产品，搞不好不但销不出去，而且会影响国家的声誉。要加强技术基础工作，积极采用国际标准，充实计量测试手段，建立质量保证体系。对少数忽视质量管理、偷工减料、粗制滥造、以次充好、蒙骗用户的企业，要严肃查处。必须明确树立全心全意为消费者服务的思想，并搞好售后服务的工作。

要坚持把改革放在总揽全局的位置上。加快和深化改革、增强轻工企业活力，并根据配套、完善、深化、发展的方针，把以承包经营责任制为主要内容的企业经营机制改革不断推向前进。解放思想，尊重实践，支持改革者，鼓励探索者，帮助失误者，查处违法者，促使企业进一步走上自主经营、自负盈亏、健康发展的道路。

要坚持以提高经济效益为中心，不断推进科技进步和加强现代化管理，把生产建设切实转移到依靠科技进步和提高劳动者素质的轨道上来。这是实现轻工业现代化的关键和基础，也是我们在经济上和技术上缩小同发达国家之间差距的一项重要措施。我们必须在不断提高经济效益的前提下，求得结构合理的比较高的增长速度。要以极大的热情，采取正确的政策措施，促进生产力的发展和经济效益的提高。

要不失时机地加快实施沿海地区经济发展战略，进一步发展外向型经济。轻工业多属劳动密集型行业，要充分利用我国劳动力资源丰富和成本较低的优势，在沿海地区实行“两头在外”（即原材料来源在外和产品销售市场在外），积极扩大劳动密集型产品和劳动与技术密集型产品的加工出口，参加国际交流。在实施沿海经济发展战略的同时，必须统筹规划全国轻工业的发展。内地要利用沿海地区发展外向型经济的机会，促进本地轻工业的发展，并从自己的实际情况出发，在对外开放中迈出新的步伐。

我国轻工企业之间的联系十分广泛，经济领域情况错综复杂。特别是党的十一届三中全会以来，我国实行了改革、开放的政策，党的十三大进一步加快了改革、开放的进程，并明确了社会主义经济是有计划的商品经济，实行“国家调控市场，市场引导企业”，扩大企业经营管理自主权；同行业以及不同行业的企业实行专业化协作和横向经济联合。在这种新形势下，我国企业之间的生产和交换关系，企业和社会各方面的经济关系，日趋活跃。生产上合理分工，技术上取长补短，经营上互通有无。更多的是要求购置原材料、零配件和适销对路的产品，要求推销自己的产品或提供加工和服务。因此，广大轻工企业和社会各方面都迫切要求了解情况，掌握市场信息。《中国轻工企业及可供出口产品名录》，就是在这样的情况下应运而生的。这部工具书，还将向海外发行，热切希望与海外有关经济贸易界进一步加强经济合作和贸易往来。

Preface

The book, *China's Light Industry and Its Products for Export*, edited by the China National Light Industry Association and published by the China Prospect Publishing House now comes off the press. This is good news to us and to our readers.

China's Light Industry and Its Products for Export, a Chinese and English bilingual reference book, has gathered China's more than 300 most accredited light industrial enterprises and laid them out in a classified way. Each entry includes not only such background data as name, address, telephone number, name of the director and number of employees but also names of its major products, their models, specifications, characteristics, functions and their marketabilities both at home and abroad. This book, we hope, would help strengthen the economic ties between enterprises throughout the country and the co-operation and exchanges between China's light industry and its foreign counterparts. Our readers will find this book a big boon as it provides information on production and market and helps establish producer-consumer relations.

Light industry is the pillar of China's economy. It provides the Chinese people with plenty of consumer goods. In particular, its brand-name products and hot-selling commodities have been playing an important role in invigorating the domestic market, making foreign exchange, increasing financial income, accumulating funds for construction and promoting employment. Since the founding of the People's Republic in 1949, China's light industry has grown rapidly to become a powerful sector of its national economy. Under the ministry of Light Industry, nationwide there are more than 70,000 enterprises employing more than 12 million people. Last year, the industry produced more than 186 billion yuan in output value and delivered to the state more than 42 billion yuan in taxes and profits. With tobacco and cigarettes excluded, the industry turned out more than 165.6 billion yuan in output value, delivered to the state more than 25 billion yuan in taxes and profits and earned more than US \$ 6 billion in foreign exchange. As a powerful sector, light industry is playing an increasingly important role in the national economy. The continued growth of the national economy and the continued improvement in the people's material and cultural livelihood place an ever-mounting demand on light industry, which has to develop at a still higher speed and yield better economic returns. We will strive to upgrade our products and increase varieties to satisfy the people's needs and thrust more and better products into the international market. We should strive to invigorate the light industry in an all-round way and raise our light industrial products to a new level through expansion of export. This is one of the pressing tasks confronting us.

We should strive to catch up with the ever-changing market trends and produce more and marketable light industrial products. We should take satisfying the people's material and cultural needs as the aim of and driving force for the expansion of socialist production. To develop the light industry, we must make our products marketable and in

conformity with the market needs. In the planned commodity economy, we must pay particular attention to market investigation and forecast, and to market information so that we can readjust the mix of our products in light of the supply and demand of the market. We should do everything in our ability to improve the quality of our products and packaging and adhere, as always, to the principle of "quality going first." As the people's living standards continue to improve and competition becomes increasingly intense, the quality of light industrial products become a vital factor determining whether an enterprise can survive or not. In particular, export commodities will affect the reputation of our country if they are of poor quality. We should update our technology, actively apply international standards, improve our measurement facilities and establish a quality control system. We should punish those enterprises that ignore quality, produce sub-standard goods by using inferior materials. We must adhere to the principle of serving consumers wholeheartedly and offer them good after-sale services.

We must put reform at the helm of all our endeavours. Efforts should be made to accelerate and deepen the reform, invigorate our light industry and push ahead with the reform of management mechanism of enterprises characterized by establishing the contract management responsibility system in accordance with the principle of supplementing, perfecting, deepening and development. We must emancipate our minds, respect practice, support reformers, encourage explorers, help those who made mistakes or errors in the reform, and punish those who violated laws, so as to steer our enterprises on to the road of healthy development of being independent in management and responsible for their economic performance.

We should put the improvement of economic returns at the centre of our work, promote scientific advancement, and modernize management so as to push ahead with production and construction through continued scientific progress and improved labour quality. This is not only the key to realizing the modernization of our country's light industry but also an important measure for our country to catch up with the developed countries economically and technically. While ensuring a steady growth in economic returns, we should seek for a highly reasonable industrial structure. We should energetically promote the development of the productive forces and the improvement of economic performance by adopting correct policies and measures.

We should lose no time to implement the economic development strategy for the coastal areas and further develop the export-oriented economy. Since most of our light industrial enterprises are labour-intensive ones, we should make the fullest possible use of our labour resources and take advantage of the low costs to manufacture labour- and technology-intensive products for export by processing imported materials in the coastal areas. While materializing the economic development strategy for the coastal areas, we should draw up an all-round programme for the development of the light industry as a whole. For the inland areas, they should take advantage of the opportunity of developing an export-oriented economy in the coastal areas to promote the development of

their own light industries, and, proceeding from their own conditions, to make a new step forward in opening to the outside world.

Our country's light industrial enterprises have established extensive economic relations among themselves. Since the Third Plenary Session of the 11th Party Central Committee, our country has introduced the policy of economic reforms and opening to the outside world. The convening of the 13th Congress of the Chinese Communist Party marks the further acceleration of economic reforms and opening to the outside world. The congress has also made it clear that socialist economy is a planned commodity economy in which the state "regulates the market which, in return, gives guidance to enterprises," and enterprises are given the autonomy in management and production. In addition, enterprises should develop specialized co-operation and establish horizontal alliances among themselves. Under this new situation, the production and exchange relations between enterprises and the economic relations between enterprises and other fields will become even more active. They will become more specialized. They will exchange technology and managerial expertise among themselves. They will buy materials, sell products and offer services. Therefore, they will become much more eager to know the market and grasp information. To meet their needs, we prepared *China's Light Industry and Its Products for Export*, which, we hope, will help promote the economic co-operation and trade relations between China's light industry and its foreign counterparts.
