营养解析 / 台大营养师 吕莹珍

《素·豆腐》的问世与前一本《美味豆腐》相隔不远，短短时间内两本同以豆腐为主题的食谱出版，正反应了豆腐的变化莫测。上一本，我们以荤食为出发点，设计出了36道各具特色的菜肴，这一次我们则考虑到了愈来愈庞大的素食族群，转换另一个角度来重新塑造豆腐，赋予它更精彩、旺盛的生命。

近年来，吃素已不再完全是宗教的专利，有愈来愈多的民众以健康为目的，投入了素食的行列，反璞归真的粗茶淡饭，让人们免去了不少疾病的威胁；然而当我们自己在家制作素食料理时，不论再怎样的精心设计，在口味上却似乎还是要比一般菜肴略逊一筹，让人不禁疑惑，难道偶一为之甚或365天的吃素生活就不能多采多姿、变化多端吗？凭借着这个目标，加上自己多年的烹饪经验，我们设计出了这样的一本食谱，将豆腐捧为主角，搭配些简单的素材与创意，36道外形多变、口味丰富的素食豆腐料理便一一上桌了，让吃素的您享有健康，更吃得到美味。

豆腐的高营养价值已是无庸置疑，素食者又杜绝了肉类、海鲜等高油脂、高胆固醇的吸收，因此豆腐素着吃，比加了各式荤料，更是高营养、低脂肪。若您曾有抗拒吃素的念头，品尝过这些豆腐滋味后，相信您会就此爱上吃素的感觉。

本书除了有36道素食佳肴，以详细的步骤示范外，更有着台大营养师清楚的分析，充分实践美食与健康维持平衡的理想，是现代新贵族的养生宝典。今年台北中华美食展，以“白玉珍馐”为主题，仅以《美味豆腐》与《素·豆腐》两书庆贺，亦希望豆腐能从此深入家庭，成为您家庭、宴客的最佳食材。

‘Vegetarian Style of Tofu’ is not longer than previous ‘Good Tasting of Tofu’. To publish two books with subject of Tofu in the short time, which affect Tofu are various changes. We designed 36 dishes with meat in previous book, this time, we consider the vegetarian people. Transmit another angle to mold the Tofu and give it more attractive and prosperous life.

From these few years, eat vegetables is not the monopoly of religion, there are more and more people to consider the health and start eating vegetables, which make them have less threat of diseases. However, when we cook vegetarian dishes at home, no matter how to design attentively, the taste is still slightly worse. According to this objective plus the cooking experience, we design this kind of cooking book. Let the Tofu be the leading role and select some simple ingredients and creation then 36 vegetarian Tofu dishes are finished. Let you not only have health but also taste delicious.

The high nutrition of Tofu is no double. Vegetarian people also stop to absorb the high fat and high cholesterol of meat and seafood so vegetarian taste of Tofu is higher nutrition and less obligation than cook with meat. If you ever resist eating vegetables, believing you will love it after tasting these tofu dishes.

Besides the clear cooking steps of 36 dishes, there still have the analysis of the dietetics from National Taiwan University Hospital, which practice the ideal of keeping the delicious food and health. This year, Taipei Chinese Food Festival use the subject of “Tofu”, we only congregation with these two books and also hope Tofu can deeply enter the family to be the best ingredients.

“豆腐”是中国人智慧的结晶，它是素食者的至宝，更是米食国家营养的最佳搭档。

我国安南王刘安约在1500年前发明了豆腐，后传至日本发扬光大，制成了各式各样的豆腐食品，成为日本人奠定长寿的基础；由于豆腐好吃又营养，且不含有胆固醇，因此也已成为北美健康追求者的新宠。日本的豆制品非常丰富，兼具有古代传统与现代食品科技的特色；美国的现代豆制品工厂，从制作豆腐到豆腐冰淇淋，也已大量地占有市场。眼见豆腐食品如此蓬勃发展，我们一则以喜，喜的是中国传统优良的豆腐文化正深入世界各个角落；另一则以忧，忧的是本土目前西方高油脂、高糖风尚逐渐取代了传统的青菜豆腐文明，正一步步啃噬中国下一代的健康。因此我们惟有不断创新制作高品质的豆腐，加速开拓行銷渠道，并不断教育民众，才能使“米食、青菜和豆腐”重新登上21世纪的健康饮食舞台。

同为中餐烹调技术士本科考试评审，得与现任中华美食交流协会理事长许堂仁先生取得“美食兼顾健康”的共识，而适逢今年“台北中华美食展”将以“豆腐宴”为主题，乃接受许理事长之邀，仅为其之食谱作营养分析及建议。期盼不同专业领域的结合，能提供民众在“怎样做豆腐才好吃”的同时，了解“怎样吃豆腐更营养”！

此外，合理的素食可降低癌症和心脏病、高血压、糖尿病等慢性退化性疾病的罹患率，而这些慢性病正是台湾地区近年来十大死亡原因的主要因素，因此绝不容轻视。从事医院营养工作二十年，一直有未能将营养落实于民众日常饮食生活以达到预防疾病的遗憾，因此若能确切将“饮食设计与营养”融入美味的食谱之中，民众便不难掌握均衡饮食的要领。但愿民众能因本食谱获得美食与健康，更希望大家不吝指教，给予本人更多服务民众的机会。期望这将是本人梦想实现的第一步。

“Tofu” is the representative of Chinese wisdom. It is also a treasure for vegetarians. In countries where rice is the main course, Tofu is the best partner for rice.

The King of Annan, Liu An, invented Tofu 1500 years ago. It was brought to Japan afterwards and was developed into various kinds of dishes and has assisted the Japanese to pursue longevity. Because it is delicious, nutritious, and with no cholesterol, it is the new favorite for people seeking health in America. There are lots of Tofu products in Japan combining the characteristics of ancient and modern techniques. In the modern Tofu factories in America, the products vary from traditional Tofu, Tofu yogurt, to Tofu icecream, and these products are available in most of the markets. I am glad to see that the Chinese Tofu culture has pervaded wide into the world. However, I feel disappointed to see that the western style of high-oil and high-sugar food is replacing our traditional healthy cuisine and ruining the health of our next generation. We can only continue the study of Tofu cuisine and stimulate the market to educate our own people the right conception of dinning. Only in this way can we input the healthy idea of “Rice, Vegetable, and Tofu” into people’s mind in the 21st century.

The Chair of Chinese Cuisine Commission, Mr. Tony Hsu, and I are both judges of Chinese cuisine examination. We have consensus on “Eating good and healthy”. The theme of “Taipei Chinese Food Festival” this year is “Tofu Feast”. It is my pleasure to make analysis and suggestions to Mr. Hsu’s recipes. We wish that while teaching people how to make a delicious Tofu dish, we might also let people understand how to eat Tofu in a more healthy way.

Also, reasonable vegetarian cuisine can reduce the odds of getting cancer heart disease, high blood pressure, and diabetes. These chronic diseases are the main causes of death in Taiwan in the recent 10 years, therefore the importance of right dinning is quite important.

Working in the hospital as a health consultant for 20 years, I always regret that I do not have the opportunity to help people exactly utilizing the right conception in daily dinning. I wish people may be benefited from this cookbook. Any suggestion is welcomed. It will be my first step to fulfill my dream of providing service to more people.

## 豆腐家族

豆类有个庞大的家族，除了纯净、洁白的豆腐外，亦有许多外形、口感皆不相同的伙伴。事实上它们的原料及制作过程与豆腐是大同小异的，因此，让我们先多来了解一下这个家族的成员特性，为充实自己的饮食飨宴而准备。

### 臭豆腐 Fermented Tofu

提到臭豆腐，很少人会没品味过臭中带香的特殊气味，让人又爱又恨。制作时，首先将经过压榨的坚实豆腐块，放入发酵厚液中浸渍一两天后，取出洗净，再置于热油锅里煎煮，待当中发空、全块豆腐涨大时，臭豆腐即已制成。其中的发酵液，是一种带有臭气的盐水，依使用材料的不同，大致可分为两种：一为咸菜卤液，另一种则是以烂咸菜卤加虾头、咸鸭蛋、盐、酒、茶叶等，经过3个小时的发酵过程而形成，其因发酵液材料的不同而有了荤、素两种不同口味。不论是蒸、煮或炸均是风味独特、广受欢迎。

### 冻豆腐 Frozen Tofu

冻豆腐的作法相当简单，除了市面上购买外，自己平常在家中也可以少少的时间动手制作。只要将板豆腐置于冷冻库中2~3小时，豆腐组织便会自然产生许多的空洞，不过由于自家的冷冻温度无法达到专业工厂的标准，因此内部的冰晶组织并不如市售的细腻，但自制自吃的滋味，却也别有一番乐趣。

### 油豆腐 Bean curd puff in oil

不论是吃米粉汤时长方形或是关东煮的三角形油豆腐，它的制作过程基本上是一致的。只要将豆腐依需求切块，置入油锅中先以60°C的油温让豆腐发胀，再置入更高温（约140~150°C）的油锅中油炸，日常食用的油豆腐便形成了。它虽只比豆腐的制作多出了一个油炸步骤，但却比豆腐的油脂含量高出许多，因此当我们在烹调时，应尽量避免二次油炸，改以水煮等方式烹调，以减少多余油脂的吸收。

### 豆干 Dried bean curd

豆干与豆腐制作方法大同小异，最大差别在于豆干的水分要比豆腐少。豆腐干依口味的不同作法亦各异，最基本的一种是先将豆腐中多余的水分压干，再放入浓茶或焦糖液中熬煮，待豆腐颜色变褐后即可捞出；另一种则是以烟熏的方法，将压干水分的豆腐放在燃烧中的木屑上熏至黑褐色；而还有一种是将豆腐与一些辛香调味料如花椒、茴香、丁香等一起放入滚水中熬煮约20~30分钟后，再加入酱油、糖等调味料浸渍数天，取出后以小火烘干水分，而此种即为市面上常见的五香豆干。豆干在烹调上的使用性极高，不论烧、煮、炒、炸均各具特色，一般家庭主妇可多善加利用。

### 豆皮 Tofu skin

豆皮依干燥程度可分生、干两种。在煮豆浆时，加入少许的凝固剂或食盐静置后，以小火慢煮，待表面水分自然蒸发，便会有一层淡黄色的薄膜形成，这层薄膜即为生豆皮；若再以竹签挑起，折叠成方块，置于空气中自然风干，所谓的干豆皮便产生了。不过需注意日晒的时间不可过长，否则制作出来的成品会因过于干燥，而造成脆裂。豆皮一般都当作外皮来使用，内包食材，或蒸或炸，或咸或甜都很适合。

### 千丝 Dry shredded bean curd

细长的千丝同样是由豆腐所变化出来的，只要将豆腐以切面机切成长条丝状后，晾干至颜色变黄，再置入木桶内进行发酵，最后入油锅炸至色泽金黄便算完成。不论热炒或凉拌都很下饭。

## 百页 Bean curd sheets

百页的制作与豆皮类似，主要是将加入了凝固剂的豆浆，倒入木框内加压而成，属于半干性产品。市面上有整片，亦有发好、打好结的成品在贩售，由于其处理方式简单，因此若担忧市售的安全性，也可自己在家中处理。先将整片的百页切段、打结，再加入碱粉与水同煮，待水的颜色变黄时，即换水，反复数次直至百页颜色变白即可。百页除可当作一般食材炒、卤、煮外，也可制作出素肉、素鸡等各种半成品。

## 豆花 Soybean

在制作好的豆浆中，加入石膏静置约20分钟后，细白滑嫩的豆腐脑—豆花，即制作完成；除了一般市售的传统豆花与盒装豆花外，一般人在家庭中也可以少少的时间与花费，制作出一锅既美味又卫生的消暑圣品。不过自己动手制作时需注意浸泡黄豆的时间不可过长，以免黄豆中所含有的蛋白质流失，造成成品的难于凝固；而加入凝固剂静置后，即不可再加拌搅，否则会有气泡产生，使风味流失。因此，平时自己制作时只要在这些步骤上多加用心，每个人也都可成为自己的甜点小厨师！

## 豆腐乳 Soybean cheese

豆腐洗净，放于空气中，待自然风干后，切为大小一致的小方块，将盐与辛香料充分与豆腐块混合后，装于瓶中，进行第一次发酵，再开封加入高粱酒、豆豉、甘草粉等调味料，完全密封放置至少1个月以上，清粥宵夜的最佳开胃小菜——豆腐乳便制作完成了。而依地域的不同，口味也有所差异，像四川的腐乳是以辣闻名，江西则是以豆豉为主要调味料，福建以红糟调味，均各富地方色彩，个人可依喜好选择。

## 素肉

素肉种类多元，有猪肉丝、肉片、猪肚、鸭肉丝等多种产品，但事实上它们的制作过程却是大同小异。一般人造肉的主要原料为黄豆粉，经加工而制成，使用前先以1.5倍的水量浸泡后即可烹调，可用性广泛，是素食者的最佳良伴。

卤味中常见的素鸡，无论是肉食主义或素食者均常

食用。其主要原料为豆皮，先浸泡于调味料中，再依序叠于上卷为筒状，以纱布包裹、扎紧，蒸约半小时左右，取出晾凉，除去纱布，一个个的素鸡便制作完成了。

## 面筋

面筋虽非豆制产品，但却也是素食者不可或缺的日常食材。面筋的主要原料为面粉，依不同的处理过程，可制作出不同的种类。将面粉揉成面团后，置于水中，不断将粉浆洗出至水清时，便为光滑细软的生面筋；若再置入蒸笼内蒸熟，即成熟面筋；而以水烫煮，则为水面筋；以油炸则又称为油面筋的面筋泡。烹煮方法可烧、煨、炸、炒相当多变，除此之外，也有些素肉是以面筋为基础来制作，为素食者日常的基本食材。

小小的一粒黄豆，经过智慧的累积，得以幻化出一种又一种各具特色的产品，让豆腐家族的扩充从未间断，更让我们味蕾的舞动未曾停歇。单单一种豆腐就有百种以上的吃法，可想而知这整个家族能为我们摆下多少桌的美宴。生活只要多点创新，加些新意，不论你食肉还是吃素，都一样可以有着吃不完的天上圣品，人间美味。
