Welcome to Shanghai

In China, there is a large river named Yangtze River. At its mouth stands a beautiful and fascinating oriental city-Shanghai. Maybe you have ever been to Shanghai or have just got a glimpse of Shanghai on the map of the world. Nevertheless, when you curiously open this *Guide for Study in Shanghai* before your eyes, most probably a desire will arise from the bottom of your heart, that is, to study in Shanghai.

Shanghai has a history of over 700 years and it was the international financial center in the Far East Asia. Since China began to reform and open to the world, especially since 1990's, Shanghai has seized the historic opportunity of developing and opening Pudong. Great changes have taken place in its national economy, social cause and appearance. According to the new round over-all plan for the city development, Shanghai will have basically been built into a modern industrial metropolis and an international center of economy, finance, trade and transportation. With the fast development of the city, the educational cause in Shanghai has also achieved a rapid development. At present, there are 65 universities in Shanghai. In recent years more than thirty thousand students come from different countries of the world every year to study and live in some of these universities.

In order to provide up-to-date and accurate information for the international students from different parts of the world and offer you help and advice in choosing a proper university and specific major in Shanghai, we have edited this *Guide for Study in Shanghai*. In the years of 2008 and 2009, 31 universities and 2 scientific research institutions in Shanghai will enroll international students. All of them have acquired abundant experience in international students education and have cultivated many talents in the fields of scientific research, culture and education, and economic construction for over 100 countries and regions.

At present, We are actively implementing the policy of "expanding scale, raising level, guaranteeing quality and standardizing administration" put forward by the Chinese government. In 2006, we were among the first in the country to set up "Shanghai Municipal Government Scholarship for International Students" so as to attract more excellent international students to study in Shanghai. We fully realize that the education for international students coming to China is a highly significant cause. It has not only trained various kinds of talents for related countries but also become a bridge and strengthened the understanding and friendship between the Chinese people and the peoples of other countries and regions in the world. We sincerely hope that what we have done may provide good service for you in your study in Shanghai. If you come to Shanghai, you will see a brand new world. May your life get a new start in Shanghai.

Shanghai is expecting you! You are welcome to Shanghai!
