

A TEXT-BOOK OF
QUANTITATIVE
INORGANIC ANALYSIS
INCLUDING
ELEMENTARY INSTRUMENTAL
ANALYSIS

BY
ARTHUR I. VOGEL, D.Sc. (LOND.), D.I.C., F.R.I.C.
HEAD OF CHEMISTRY DEPARTMENT, WOOLWICH POLYTECHNIC:
SOMETIME BEIT SCIENTIFIC RESEARCH FELLOW OF THE
IMPERIAL COLLEGE, LONDON

With Diagrams and Illustrations

THIRD EDITION

LONGMANS, GREEN AND CO LTD
48 GROSVENOR STREET, LONDON W1
RAILWAY CRESCENT, CROYDON, VICTORIA, AUSTRALIA
AUCKLAND, KINGSTON (JAMAICA), LAHORE, NAIROBI

LONGMANS SOUTHERN AFRICA (PTY) LTD
THIBAUT HOUSE, THIBAUT SQUARE, CAPE TOWN
JOHANNESBURG, SALISBURY

LONGMANS OF NIGERIA LTD
W. R. INDUSTRIAL ESTATE, IKEJA

LONGMANS OF GHANA LTD
INDUSTRIAL ESTATE, RING ROAD SOUTH, ACCRA

LONGMANS GREEN (FAR EAST) LTD
443 LOCKHART ROAD, HONG KONG

LONGMANS OF MALAYA LTD
44 JALAN AMPANG, KUALA LUMPUR

ORIENT LONGMANS LTD
CALCUTTA, BOMBAY, MADRAS
DELHI, HYDERABAD, DACCA

LONGMANS CANADA LTD
137 BOND STREET, TORONTO 2

Third Edition © Arthur I. Vogel 1961

First Published 1939

New Impressions 1941, 1942

New Impression with corrections 1943

New Impressions 1944, 1945, 1946, 1947, 1948

Second Edition 1951

New Impressions 1953, 1955, 1957, 1958, 1959, 1960

*Third Edition (published under the title A TEXT-BOOK
OF QUANTITATIVE INORGANIC ANALYSIS INCLUDING
ELEMENTARY INSTRUMENTAL ANALYSIS) 1961.*

New impression with corrections 1962

PRINTED IN GREAT BRITAIN BY RICHARD CLAY AND COMPANY, LTD.,
BUNGAY, SUFFOLK.

9697 1 9

CONTENTS

CHAPTER I

THE THEORETICAL BASIS OF QUANTITATIVE INORGANIC ANALYSIS

	PAGE
I, 1. Electrolytic dissociation	1
I, 2. The law of mass action	4
I, 3. Activity and activity coefficient	5
I, 4. Acid-base equilibria in water. Determination of ionisation constants	7
I, 5. Strengths of acids and bases	9
I, 6. Ionisation of polybasic acids.	10
I, 7. Common ion effect	11
I, 8. Solubility product	13
I, 9. Completeness of precipitation. Quantitative effects of a common ion	16
I, 10. Limitations of the solubility product principle	17
I, 11. Fractional precipitation	19
I, 12. Complex ions	20
I, 13. Effect of acids upon the solubility of a precipitate	22
I, 14. Effect of temperature upon the solubility of a precipitate	23
I, 15. Effect of solvent upon the solubility of a precipitate	23
I, 16. The ionic product of water	23
I, 17. The hydrogen-ion exponent, pH	25
I, 18. The hydrolysis of salts	27
I, 19. Hydrolysis constant and degree of hydrolysis	29
I, 20. Buffer solutions	33

VOLUMETRIC (TITRIMETRIC) ANALYSIS

I, 21. Volumetric (titrimetric) analysis	38
I, 22. Classification of reactions in volumetric (analysis) titrimetric	39
I, 23. Equivalent weights. Normal solutions	40
I, 24. Advantages of the use of the equivalent system for the preparation of standard solutions	48
I, 25. Preparation of standard solutions	49
I, 26. Primary standard substances	50

THEORY OF ACID-BASE TITRATIONS

I, 27. Neutralisation indicators	51
I, 28. Preparation of indicator solutions	56
I, 29. Mixed indicators	58
I, 30. Universal or multiple range indicators	59
I, 31. Neutralisation curves	59
I, 32. Neutralisation of a strong acid and a strong base	60
I, 33. Neutralisation of a weak acid with a strong base	62
I, 34. Neutralisation of a weak base with a strong acid	64
I, 35. Neutralisation of a weak acid with a weak base	66
I, 36. Neutralisation of a polybasic acid with a strong base	67
I, 37. Titration of anions of weak acids (Brönsted bases) with strong acids. "Displacement titrations"	68
I, 38. Choice of indicators in neutralisation reactions	70

THEORY OF PRECIPITATION AND COMPLEX FORMATION PROCESSES

	PAGE
I, 39. Precipitation reactions	72
I, 40. Complex formation reactions	74
I, 41. Determination of end points in precipitation and in complex formation reactions	76

THEORY OF OXIDATION-REDUCTION REACTIONS

I, 42. Oxidation-reduction reactions	83
I, 43. Electrode potentials	84
I, 44. Concentration cells	87
I, 45. Calculation of the e.m.f. of a voltaic cell	88
I, 46. Oxidation-reduction cells	88
I, 47. Calculation of the standard (reduction) potential	90
I, 48. Equilibrium constants of oxidation-reduction reactions	91
I, 49. Change of the electrode potential during the titration of an oxidant and a reductant. Oxidation-reduction curve	94
I, 50. Formal potentials	97
I, 51. Detection of the end point in oxidation-reduction titrations	99

THEORY OF GRAVIMETRIC ANALYSIS

I, 52. Gravimetric analysis	104
I, 53. Precipitation methods	104
I, 54. The colloidal state	105
I, 55. Supersaturation and precipitate formation	109
I, 56. The purity of the precipitate. Co-precipitation	110
I, 57. Conditions of precipitation	112
I, 58. Precipitation from homogeneous solution	113
I, 59. Washing of the precipitate	114
I, 60. Ignition of the precipitate. Thermogravimetric method of analysis	116
I, 61. Fractional precipitation	120
I, 62. Organic precipitants	124
I, 63. Extraction reagents	134
I, 64. Volatilisation or evolution methods	137
I, 65. Selected bibliography	139

CHAPTER II

EXPERIMENTAL TECHNIQUE OF QUANTITATIVE INORGANIC ANALYSIS

II, 1. Balance, weights, and weighing	140
II, 2. Description of a typical analytical balance	141
II, 3. The requirements of a good balance	142
II, 4. Weights, reference masses	143
II, 5. Care and use of the balance	144
II, 6. Methods of weighing	145
II, 7. Errors in weighing	151
II, 8. Calibration of weights	155
II, 9. Other types of balances	160

GENERAL APPARATUS, REAGENTS, AND OPERATIONS

II, 10. General apparatus	169
II, 11. Reagents	179
II, 12. Purification of substances	181

	PAGE
II, 13. Heating apparatus	183
II, 14. Stirring of liquids	186
II, 15. Sampling of solids	187
II, 16. Solution of the sample	188

TECHNIQUE OF VOLUMETRIC (TITRIMETRIC) ANALYSIS

II, 17. Unit of volume	191
II, 18. Standard temperature	191
II, 19. Volumetric apparatus	192
II, 20. Volumetric flasks	193
II, 21. Pipettes	196
II, 22. Burettes	200
II, 23. Weight burettes	206
II, 24. Graduated cylinders	207
II, 25. Storage and preservation of solutions for volumetric analysis	207

TECHNIQUE OF GRAVIMETRIC ANALYSIS

II, 26. Precipitation	211
II, 27. Filtration	211
II, 28. Filter papers	212
II, 29. Filter pulp	214
II, 30. Filter mats. Gooch crucibles	215
II, 31. Preparation of a Gooch crucible	215
II, 32. Munroe crucibles	218
II, 33. Crucibles fitted with permanent porous plates	218
II, 34. Washing of precipitates	219
II, 35. Technique of filtration	220
II, 36. Drying and ignition of precipitates	221
II, 37. The care and use of platinum vessels	225
II, 38. Perforated screens for crucibles	227

MISCELLANEOUS OPERATIONS

II, 39. Reduction with metals	227
II, 40. Use of perchloric acid in inorganic analysis	229
II, 41. Selected bibliography	232

CHAPTER III

VOLUMETRIC (TITRIMETRIC) ANALYSIS

AQUEOUS ACID-BASE TITRATIONS

ACIDIMETRY AND ALKALIMETRY

III, 1. Preparation of a standard acid	233
III, 2. Preparation of constant-boiling-point hydrochloric acid.	234
III, 3. Direct preparation of 0.1N-hydrochloric acid from the constant-boiling-point acid.	234
III, 4. Preparation of 0.1N-hydrochloric acid and standardisation	235
III, 5. Preparation of standard alkali	239
III, 6. Standardisation of the approximately 0.1N-sodium hydroxide.	242
III, 7. Other standard substances for acidimetry and alkalimetry	243
III, 8. Standard barium hydroxide (baryta) solution	246
III, 9. D.* of the Na_2CO_3 content of washing soda	246
III, 10. D. of the strength of glacial acetic acid	247
III, 11. D. of sulphuric acid in the concentrated acid	248

* D. = determination.

	PAGE
III, 12. D. of sulphuric acid in the fuming acid (oleum)	248
III, 13. D. of carbon dioxide in the atmosphere	249
III, 14. D. of a mixture of carbonate and hydroxide. Analysis of commercial caustic soda	249
III, 15. D. of a mixture of carbonate and bicarbonate	251
III, 16. D. of phosphoric acid in commercial ortho-phosphoric acid	252
III, 17. D. of boric acid and borax	252
III, 18. D. of ammonia in an ammonium salt	254
III, 19. D. of nitrates (sodium nitrate in Chile saltpetre)	255
III, 20. D. of nitrogen by Kjeldahl's method	256

PRECIPITATION TITRATIONS

III, 21. General discussion	258
III, 22. Preparation of 0.1 <i>N</i> -silver nitrate	258
III, 23. Standardisation of the silver nitrate solution	259
III, 24. D. of chlorides	260
III, 25. D. of bromides	261
III, 26. D. of chlorides and of bromides with standard mercurous perchlorate solution	261
III, 27. D. of iodides	262
III, 28. D. of thiocyanates	263
III, 29. D. of mixtures of halides with adsorption indicators	263
III, 30. D. of mixtures of halides by an indirect method	263
III, 31. Preparation and use of 0.1 <i>N</i> -ammonium or potassium thiocyanate. Titrations according to Volhard's method	264
III, 32. D. of silver in a silver alloy	266
III, 33. D. of chlorides (Volhard's method)	266
III, 34. D. of bromides (Volhard's method)	267
III, 35. D. of iodides (Volhard's method)	267
III, 36. D. of dithionites	268
III, 37. D. of cobalt	268
III, 38. D. of nickel	269
III, 39. D. of fluoride as lead chlorofluoride	269
III, 40. D. of arsenic as silver arsenate	270
III, 41. D. of cyanides	271
III, 42. D. of nickel by potassium cyanide	272
III, 43. Titrations with mercuric nitrate solution. D. of chloride	274
III, 44. D. of barium and of sulphates	275

OXIDATION-REDUCTION TITRATIONS. OXIDIMETRY AND REDUCTIMETRY

III, 45. General discussion	277
---------------------------------------	-----

OXIDATIONS WITH POTASSIUM PERMANGANATE

III, 46. Discussion	277
III, 47. Preparation of 0.1 <i>N</i> -potassium permanganate	282
III, 48. Standardisation of potassium permanganate solutions	282
III, 49. Permanence of potassium permanganate solutions	286
III, 50. D. of ferrous iron	287
III, 51. Reduction of ferric to ferrous iron	287
III, 52. D. of iron in ferric ammonium sulphate	293
III, 53. D. of the total iron in an iron ore	293
III, 54. D. of calcium in calcium carbonate	294
III, 55. Analysis of hydrogen peroxide	295
III, 56. Analysis of sodium peroxide	296
III, 57. D. of manganese dioxide in pyrolusite	296
III, 58. D. of nitrites	297

	PAGE
III, 59. D. of persulphates	298
III, 60. D. of manganese in steel	299
III, 61. D. of formates and of formic acid	301
III, 62. D. of selenium	302

OXIDATIONS WITH POTASSIUM DICHROMATE

III, 63. General discussion	304
III, 64. Preparation of 0.1 <i>N</i> -potassium dichromate	307
III, 65. Standardisation of potassium dichromate solution against iron	308
III, 66. D. of ferrous iron	309
III, 67. D. of ferric iron (iron in ferric ammonium sulphate)	309
III, 68. D. of the total iron in an iron ore	310
III, 69. D. of ferrous and ferric iron in an iron ore	310
III, 70. D. of chromium in a chromic salt	311
III, 71. D. of chromium in chromite	311
III, 72. D. of chlorate	313

OXIDATIONS WITH CERIC SULPHATE

III, 73. General discussion	314
III, 74. Preparation of 0.1 <i>N</i> -ceric sulphate	316
III, 75. Standardisation of ceric sulphate solutions	317
III, 76. D. of oxalates ($\text{H}_2\text{C}_2\text{O}_4$ in crystallised oxalic acid).	320
III, 77. D. of iron in an iron ore	322
III, 78. D. of nitrites	322
III, 79. D. of copper	323
III, 80. D. of molybdenum	323
III, 81. D. of tellurium	324
III, 82. D. of cerium	324

OXIDATIONS WITH MANGANIC SULPHATE

III, 83. General discussion	327
III, 84. Preparation and standardisation of manganic sulphate solutions	327
III, 85. Applications of manganic sulphate solutions	327

REDUCTIONS WITH TITANOUS SALTS

III, 86. General discussion	329
III, 87. Preparation of titanous solutions	329
III, 88. Standardisation of the titanous sulphate (or titanous chloride) solution	330
III, 89. D. of iron in an ore	331

REDUCTIONS WITH AMALGAMATED ZINC AND WITH LIQUID AMALGAMS

III, 90. General discussion	332
III, 91. D. of uranium	333
III, 92. D. of titanium	333
III, 93. D. of molybdenum	333
III, 94. D. of titanium (zinc amalgam method)	334
III, 95. D. of tungsten (lead amalgam method)	335
III, 96. Simplified technique in the use of liquid amalgam reductors	336
III, 97. Reductions with hypovanadous salts	337

	PAGE
III, 98. Reductions with chromous salts	340

OXIDATION AND REDUCTION PROCESSES INVOLVING IODINE—IODIMETRY AND IODOMETRY

III, 99. General discussion	343
III, 100. Detection of the end point	345
III, 101. Preparation of 0.1 <i>N</i> -sodium thiosulphate	348
III, 102. Standardisation of sodium thiosulphate solutions	349
III, 103. Preparation of 0.1 <i>N</i> -iodine solution	354
III, 104. Standardisation of iodine solutions	355
III, 105. D. of copper in crystallised copper sulphate	358
III, 106. D. of copper in an ore	358
III, 107. D. of manganese dioxide in pyrolusite	360
III, 108. D. of chlorates	361
III, 109. Volumetric determination of lead	362
III, 110. Analysis of hydrogen peroxide	363
III, 111. D. of available chlorine in bleaching powder	363
III, 112. D. of hypochlorites	365
III, 113. D. of antimony(III)	365
III, 114. D. of antimony(V) in antimonite oxide and in "antimonates"	366
III, 115. D. of arsenic(V) in arsenic oxide and in arsenates	367
III, 116. D. of tin(II)	367
III, 117. D. of antimony and tin in type metal	369
III, 118. D. of sulphurous acid and of sulphites	370
III, 119. D. of hydrogen sulphide and of sulphides	370
III, 120. D. of ferricyanides	371
III, 121. D. of ferric iron (iodometric method)	372

OXIDATIONS WITH POTASSIUM IODATE

III, 122. General discussion	374
III, 123. Preparation of 0.1 <i>N</i> (0.025 <i>M</i>)-potassium iodate	375
III, 124. D. of iodides	375
III, 125. D. of arsenic or of antimony	376
III, 126. D. of copper	377
III, 127. D. of mercury	377
III, 128. D. of tin	378
III, 129. D. of dioxides (lead, barium, and manganese dioxides)	379
III, 130. D. of hydrogen peroxide	379
III, 131. D. of hydrazine	380
III, 132. D. of thallium	380
III, 133. D. of iron	380
III, 134. D. of vanadium	381

OXIDATIONS WITH POTASSIUM BROMATE

III, 135. General discussion	383
III, 136. Preparation of 0.1 <i>N</i> -potassium bromate	385
III, 137. D. of antimony or of arsenic	385
III, 138. D. of metals by means of 8-hydroxyquinoline ("oxine")	386
III, 139. D. of hydroxylamine	391

OXIDATIONS WITH CHLORAMINE-T

III, 140. General discussion. Preparation and standardisation of 0.1 <i>N</i> -solution	392
III, 141. D. of antimony	392
III, 142. D. of nitrites	393

	PAGE
III, 143. D. of tin	393
III, 144. D. of ferrocyanides	394

OXIDATIONS WITH SODIUM HYPOCHLORITE

III, 145. General discussion	395
III, 146. Preparation of 0.1 <i>N</i> -sodium hypochlorite	396
III, 147. D. of ammonia in an ammonium salt (hypobromite method)	396

REDUCTIONS WITH MERCUROUS NITRATE

III, 148. General discussion	398
III, 149. Preparation of 0.1 <i>N</i> -mercurous nitrate	398
III, 150. D. of ferric iron (mercurous nitrate method)	399
III, 151. Miscellaneous determinations with standard mercurous nitrate solution	399
III, 152. D. of ferricyanide with standard mercurous perchlorate solution	400

MISCELLANEOUS VOLUMETRIC (TITRIMETRIC) DETERMINATIONS

III, 153. D. of zinc with standard potassium ferrocyanide solution .	401
III, 154. D. of phosphorus as ammonium phosphomolybdate	402
III, 155. D. of phosphorus as quinoline phosphomolybdate	404
III, 156. D. of silicon as quinoline silicomolybdate	406
III, 157. D. of calcium (urea hydrolysis method; precipitation from homogeneous solution)	408
III, 158. D. of zirconium as the normal selenite, $Zr(SeO_3)_2$	409
III, 159. D. of phosphites	410
III, 160. D. of hypophosphites	411
III, 161. D. of sodium	411
III, 162. D. of potassium	412
III, 163. Selected bibliography	414

CHAPTER IV

COMPLEXOMETRIC (LARGELY EDTA) TITRATIONS

IV, 1. General discussion	415
IV, 2. Stability constants	418
IV, 3. Titration curves	419
IV, 4. Types of EDTA titrations	419
IV, 5. Titration of mixtures. Masking and demasking agents	421
IV, 6. Metal ion indicators	422
IV, 7. Some examples of metal ion indicators	424
IV, 8. Detection of colour changes of metal ion indicators by an instrumental method	432
IV, 9. Standard EDTA solutions	432
IV, 10. D. of zinc using Eriochrome Black T as indicator	433
IV, 11. D. of magnesium using Eriochrome Black T as indicator	434
IV, 12. D. of manganese using Eriochrome Black T as indicator	434
IV, 13. D. of magnesium using Solochrome Black 6B as indicator	435
IV, 14. D. of nickel using murexide as indicator (direct titration)	435
IV, 15. D. of nickel using Eriochrome Black T as indicator (back- titration)	435
IV, 16. D. of aluminium using Eriochrome Black T as indicator (back- titration)	436

	PAGE
IV, 17. D. of calcium using Eriochrome Black T as indicator (substitution titration)	436
IV, 18. D. of the total hardness (permanent and temporary) of water using Eriochrome Black T as indicator	438
IV, 19. D. of calcium and of magnesium in admixture	439
IV, 20. D. of copper using Fast Sulphon Black F as indicator	441
IV, 21. D. of nickel using Bromopyrogallol Red as indicator	441
IV, 22. D. of bismuth using Bromopyrogallol Red as indicator	442
IV, 23. D. of bismuth using Xylenol Orange as indicator	442
IV, 24. D. of thorium using Xylenol Orange as indicator	442
IV, 25. D. of lead using Xylenol Orange as indicator	443
IV, 26. D. of cobalt using Xylenol Orange as indicator	443
IV, 27. D. of zinc using Xylenol Orange as indicator	443
IV, 28. D. of cadmium using Xylenol Orange as indicator	444
IV, 29. D. of ferric iron using Variamine Blue B as indicator	444
IV, 30. D. of thorium using Pyrocatechol Violet as indicator	444
IV, 31. D. of bismuth using Pyrocatechol Violet as indicator	445
IV, 32. D. of copper using Pyrocatechol Violet as indicator	445
IV, 33. D. of nickel using Eriochrome Red B as indicator	445
IV, 34. D. of manganese using Thymolphthalexone as indicator	445
IV, 35. D. of sulphate by precipitation as barium sulphate and dissolution of the precipitate in excess of EDTA	446
IV, 36. D. of sulphate by precipitation as lead sulphate and indirect titration with EDTA	447
IV, 37. D. of phosphate by precipitation as $Mg(NH_4)PO_4 \cdot 6H_2O$ and indirect titration with EDTA	448
IV, 38. Indirect determination of halides: potassium nickelocyanide and nickel ion-indicator method	449
IV, 39. Indirect determination of silver: potassium nickelocyanide and nickel ion-indicator method	450
IV, 40. Analysis of manganese-magnesium and of manganese-magnesium-zinc mixtures	450
IV, 41. Analysis of solder	452
IV, 42. D. of manganese in ferro-manganese	453
IV, 43. D. of nickel in nickel steel	453
IV, 44. Analysis of low-melting Bi-Pb-Cd-Sn alloys	454
IV, 45. Selected bibliography	457

CHAPTER V

GRAVIMETRIC ANALYSIS

V, 1. General discussion	458
V, 2. Note-book, entries, and calculations	458
V, 3. Calculations of gravimetric analysis. Chemical factors	458

SIMPLE GRAVIMETRIC DETERMINATIONS

V, 4. D. of water of hydration in crystallised barium chloride	459
V, 5. D. of chloride as silver chloride	460
V, 6. D. of sulphate as barium sulphate	462
V, 7. D. of sulphur in iron pyrites	466
V, 8. D. of iron as ferric oxide	468
V, 9. D. of aluminium as aluminium oxide	472
V, 10. D. of calcium as oxalate	473
V, 11. D. of magnesium as the ammonium phosphate hexahydrate and as the pyrophosphate	477
V, 12. D. of nickel as the dimethylglyoximate	479

SYSTEMATIC GRAVIMETRIC ANALYSIS

	PAGE
V, 13. General discussion	481
V, 14. Lead	482
V, 15. Silver	486
V, 16. Mercury	486
V, 17. Bismuth	488
V, 18. Cadmium	492
V, 19. Copper	496
V, 20. Arsenic	500
V, 21. Antimony	502
V, 22. Tin	503
V, 23. Molybdenum	506
V, 24. Selenium and tellurium	508
V, 25. Platinum	510
V, 26. Palladium	511
V, 27. Gold	513
V, 28. Aluminium	514
V, 29. Beryllium	517
V, 30. Chromium	520
V, 31. Iron	523
V, 32. Nickel	526
V, 33. Cobalt	528
V, 34. Zinc	532
V, 35. Manganese	536
V, 36. Vanadium	537
V, 37. Uranium	539
V, 38. Thorium	540
V, 39. Cerium	543
V, 40. Titanium	543
V, 41. Zirconium	546
V, 42. Thallium	549
V, 43. Calcium	551
V, 44. Strontium	552
V, 45. Barium	553
V, 46. Magnesium	556
V, 47. Sodium	557
V, 48. Potassium	560
V, 49. Lithium	564
V, 50. Ammonium	566
V, 51. Tungsten	566
V, 52. Chloride	568
V, 53. Bromide	568
V, 54. Iodide	568
V, 55. Thiocyanate	569
V, 56. Cyanide	569
V, 57. Fluoride	569
V, 58. Chlorate	571
V, 59. Perchlorate	572
V, 60. Iodate	572
V, 61. Sulphate	573
V, 62. Sulphide	573
V, 63. Sulphite	574
V, 64. Thiosulphate	574
V, 65. Phosphate	574
V, 66. Phosphite	577

CHAPTER VI

ELECTRO-GRAVIMETRIC ANALYSIS

VI, 1. Theory of electro-analysis	588
VI, 2. Electrode reactions	592
VI, 3. Overvoltage	593
VI, 4. Completeness of deposition.	594
VI, 5. Electrolytic separation of metals.	595
VI, 6. Character of the deposit	597
VI, 7. Electrolytic separation of metals with controlled cathode potential	598

ELECTROLYTIC DETERMINATIONS AT CONSTANT CURRENT

VI, 8. Apparatus	601
VI, 9. Copper	608
VI, 10. Lead	611
VI, 11. Cadmium	612
VI, 12. Nickel	613
VI, 13. Cobalt	614
VI, 14. Silver	614
VI, 15. Zinc	615
VI, 16. Bismuth	615
VI, 17. Electrolytic separation and determination of copper and nickel	616

ELECTROLYTIC DETERMINATIONS WITH CONTROLLED POTENTIAL AT THE CATHODE

VI, 18. General considerations	618
VI, 19. Controlled potential electro-analysis. Apparatus for automatic control of potential	620
VI, 20. D. of metals in alloys using controlled potential at the cathode	621
VI, 21. Internal electrolysis	625
VI, 22. Selected bibliography	627

CHAPTER VII

ANALYSES OF COMPLEX MATERIALS

VII, 1. General discussion	628
VII, 2. Analysis of brass	629
VII, 3. Analysis of bronze	634
VII, 4. Analysis of nickel silver	635

	PAGE
VII, 5. Analysis of solder	636
VII, 6. Analysis of a silver alloy	638
VII, 7. Analysis of steel	639
VII, 8. Analysis of a limestone or dolomite	654
VII, 9. Analysis of an insoluble silicate	660
VII, 10. Analysis of Portland cement	663
VII, 11. Selected bibliography	667

CHAPTER VIII

COULOMETRIC ANALYSIS

VIII, 1. General discussion	668
VIII, 2. Coulometry at controlled potential	669
VIII, 3. Separation of nickel and cobalt by coulometric analysis at controlled potential	674

COULOMETRY AT CONSTANT CURRENT. COULOMETRIC TITRATIONS

VIII, 4. General discussion	676
VIII, 5. Instrumentation	679
VIII, 6. Circuit and cell for coulometry at controlled current	680
VIII, 7. Coulometric titrations with a low-inertia integrating motor. General considerations	681
VIII, 8. Coulometric titration using an integrating motor-counter unit. Experimental details	684
VIII, 9. External generation of titrant	685
VIII, 10. Experimental details for typical coulometric titrations at constant current	686

ELECTROLYTICALLY GENERATED IODINE

VIII, 11. Antimony(III)	687
VIII, 12. Thiosulphate	688

ELECTROLYTICALLY GENERATED BROMINE

VIII, 13. Oxine (8-hydroxyquinoline)	688
Metal oxinates	689

ELECTROLYTICALLY GENERATED FERROUS ION

VIII, 14. Potassium dichromate (dichromate ion)	689
--	-----

ELECTROLYTICALLY GENERATED CERIC ION

VIII, 15. Ferrous iron	691
---	-----

ELECTROLYTICALLY GENERATED MERCUROUS ION

VIII, 16. Chloride, bromide, and iodide	692
--	-----

ELECTROLYTICALLY GENERATED SILVER ION

VIII, 17. Bromide and iodide	694 ^a
---	------------------

ELECTROLYTICALLY GENERATED FERRICYANIDE ION

VIII, 18. Thallium(I)	695
--	-----

ELECTROLYTICALLY GENERATED FERROCYANIDE ION

VIII, 19. Zinc	696
---------------------------------	-----

ELECTROLYTICALLY GENERATED HYDROXIDE ION

VIII, 20. Titration of acids	697
---	-----

ELECTROLYTICALLY GENERATED HYDROGEN ION

	PAGE
VIII, 21. Titration of bases	700
VIII, 22. Selected bibliography	701

CHAPTER IX

ION EXCHANGE AND CHROMATOGRAPHIC METHODS IN ANALYSIS

ION-EXCHANGE METHODS

IX, 1. General discussion	702
IX, 2. Action of ion-exchange resins	704
IX, 3. Column operation	708
IX, 4. Experimental techniques	710
IX, 5. Changing the ionic form. Some widely used resins	711

SIMPLE APPLICATIONS IN ANALYTICAL CHEMISTRY

IX, 6. General remarks on the preparation of ion-exchange resins	714
IX, 7. Determination of the capacity of an ion-exchange resin (column method)	714
IX, 8. Separation of zinc and magnesium on an anion exchanger	715
IX, 9. Separation of chloride and bromide on an anion exchanger	716
IX, 10. D. of the total cation concentration in water	716
IX, 11. Separation of cobalt and nickel on an anion exchanger	717
IX, 12. Separation of cadmium and zinc on an anion exchanger	718
IX, 13. D. of fluoride with the aid of a cation exchanger	720
IX, 14. D. of sulphur in iron pyrites with the aid of a cation exchanger	721
IX, 15. D. of sodium with the aid of a cation exchanger	722
IX, 16. D. of sodium and potassium in admixture. Use of a cation exchanger	723

CHROMATOGRAPHIC METHODS

IX, 17. General introduction	724
IX, 18. Separation of nickel, manganese, cobalt, and zinc on paper strips. Determination of R_F values	727
IX, 19. Separation of nickel, copper, cobalt, and zinc on paper strips	728
IX, 20. Semi-quantitative separation of copper, cobalt, and nickel on slotted paper strips	729
IX, 21. Separation of iron and aluminium on a cellulose column	730
IX, 22. Separation of cobalt and nickel on a cellulose column	733
IX, 23. Separation of copper and nickel on a cellulose column	734
IX, 24. Selected bibliography	736

CHAPTER X

COLORIMETRIC AND SPECTROPHOTOMETRIC ANALYSIS

X, 1. General discussion	738
X, 2. Theory of spectrophotometry and colorimetry	740
X, 3. Classification of methods of "colour" measurement or comparison	744
X, 4. Standard series method	747
X, 5. Duplication method	748
X, 6. Balancing method	749
X, 7. Photoelectric filter photometer method	752
X, 8. D. of pH of solutions by colorimetric methods	778
X, 9. Some general remarks upon colorimetric determinations	781

	PAGE
X, 10. D. of ammonia	783
X, 11. D. of nitrites	784
X, 12. D. of iron	785
X, 13. Manganese	787
X, 14. Titanium	788
X, 15. Vanadium	790
X, 16. Chromium	791
X, 17. Aluminium	792
X, 18. Molybdenum	793
X, 19. Nickel	794
X, 20. Cobalt	795
X, 21. Arsenic	796
X, 22. Antimony	800
X, 23. Tin	800
X, 24. Lead	801
X, 25. Copper	802
X, 26. Bismuth	803
X, 27. Magnesium	804
X, 28. Tungsten	805
X, 29. Sulphate	806
Fluoride	807
X, 30. Chloride	808
X, 31. Silicate	809
X, 32. Phosphate	810
X, 33. Borate	810

EXPERIMENTS WITH ULTRA-VIOLET AND VISIBLE SPECTROPHOTOMETERS

X, 34. Determination of the absorption curve of a substance (potassium nitrate). Use of a spectrophotometer for the determination of the concentration of a solution	813
X, 35. Spectrophotometric determination of the pK value of an indicator (the acid dissociation constant of methyl red)	814
X, 36. Simultaneous spectrophotometric determination (chromium and manganese)	817

SPECTROPHOTOMETRIC TITRATIONS

X, 37. Spectrophotometric titrations	821
X, 38. Apparatus for spectrophotometric titrations	822
X, 39. Spectrophotometric determination of ferric iron with EDTA	823
X, 40. Spectrophotometric determination of cupric ion with EDTA	824
X, 41. Spectrophotometric determination of nickel ion with EDTA	824

INFRA-RED SPECTROPHOTOMETRY

X, 42. Infra-red absorption spectrophotometry	826
X, 43. Apparatus for infra-red spectrophotometry	829
X, 44. Commercial instruments	831
X, 45. Some experiments with the infra-red spectrophotometer	834
X, 46. Selected bibliography	836

CHAPTER XI

FLUORIMETRIC ANALYSIS

XI, 1. General discussion	838
XI, 2. Instruments for fluorimetric analysis	839

	PAGE
XI, 3. Some applications of fluorimetry	842
XI, 4. Fluorimetric determination of quinine	843
XI, 5. Fluorimetric determination of aluminium	843
XI, 6. Fluorimetric determination of zinc	844
XI, 7. Fluorimetric determination of cadmium	845
XI, 8. Selected bibliography	846

CHAPTER XII

NEPHELOMETRIC AND TURBIDIMETRIC ANALYSIS

XII, 1. General discussion	847
XII, 2. Instruments for nephelometry and turbidimetry	847
XII, 3. Nephelometric determination of sulphate	850
XII, 4. Nephelometric determination of phosphate	851
XII, 5. Selected bibliography	853

CHAPTER XIII

EMISSION SPECTROGRAPHIC ANALYSIS

XIII, 1. General discussion	854
XIII, 2. Equipment for emission spectrographic analysis	856
XIII, 3. Qualitative spectrographic analysis	864
XIII, 4. Quantitative spectrographic analysis	867
XIII, 5. Qualitative spectrographic analysis of (a) a non-ferrous alloy and (b) a complex inorganic mixture	869
XIII, 6. Spectrographic determination of lead in brass	872
XIII, 7. Spectrographic determination of copper and lead in white metal	875
XIII, 8. Selected bibliography	878

CHAPTER XIV

FLAME PHOTOMETRIC ANALYSIS

XIV, 1. General discussion	879
XIV, 2. Instruments	880
XIV, 3. Use of a typical simple flame photometer	882
XIV, 4. Experiments with a simple flame photometer	882
XIV, 5. Use of a typical flame spectrophotometer	885
XIV, 6. Atomic absorption spectroscopy	887
XIV, 7. Selected bibliography	889

CHAPTER XV

SOLVENT EXTRACTION METHODS IN ANALYSIS

LIQUID-LIQUID SYSTEMS

XV, 1. General discussion	890
XV, 2. Factors favouring solvent extraction	891
XV, 3. Quantitative treatment of solvent-extraction equilibria	894
XV, 4. Some practical considerations	895

SOME SIMPLE APPLICATIONS

XV, 5. D. of iron by chloride extraction	897
XV, 6. D. of iron as the 8-hydroxyquinolate	898
XV, 7. D. of uranium as the 8-hydroxyquinolate	899

	PAGE
XV, 8. D. of lead by the dithizone method	899
XV, 9. D. of nickel as the dimethylglyoxime complex	901
XV, 10. D. of copper as the diethyldithiocarbamate complex	901
XV, 11. D. of copper as the "neo-cuproin" complex	902
XV, 12. D. of beryllium as the acetylacetone complex	902
XV, 13. D. of molybdenum by the thiocyanate method	903

SOLID-LIQUID SYSTEMS

XV, 14. Extraction of soluble mixtures by solvents	904
XV, 15. Selected bibliography	907

CHAPTER XVI

POTENTIOMETRIC TITRATIONS

XVI, 1. General considerations	908
XVI, 2. Determination of pH	911
XVI, 3. Potentiometric titrations.—Classical method	928
XVI, 4. Potentiometric titrations.—Electronic instruments	934
XVI, 5. Automatic potentiometric titrations	940
XVI, 6. Determination of water with the Karl Fischer reagent	944
XVI, 7. Some experimental details for potentiometric titrations	949
XVI, 8. Standardisation of sodium thiosulphate or of iodine solution with potassium permanganate or with potassium di- chromate	951
XVI, 9. D. of the available chlorine in bleaching powder	952
XVI, 10. D. of copper	952
XVI, 11. D. of chromium	953
XVI, 12. D. of manganese	953
XVI, 13. D. of cobalt	955
XVI, 14. D. of nitrate	956
XVI, 15. D. of sulphate	958
XVI, 16. Potentiometric EDTA titrations with the mercury electrode	959
XVI, 17. D. of ferric iron with EDTA	963
XVI, 18. Standardisation of potassium permanganate solution with potassium iodide	964
XVI, 19. D. of nickel and of cobalt by complexation with cyanide	964
XVI, 20. D. of fluoride by a null-point method	966
XVI, 21. Selected bibliography	968

CHAPTER XVII

CONDUCTOMETRIC TITRATIONS

XVII, 1. General considerations	969
XVII, 2. Apparatus and measurements	972
XVII, 3. Applications of conductometric titrations	978
XVII, 4. Some experimental details for conductometric titrations	984
XVII, 5. Applications of single determinations of conductance	985
XVII, 6. Selected bibliography	987

CHAPTER XVIII

HIGH-FREQUENCY TITRATIONS

XVIII, 1. General considerations	988
XVIII, 2. Construction and use of a high-frequency titrimeter	990
XVIII, 3. Determinations with the high-frequency titrimeter	995
XVIII, 4. Selected bibliography	999
