Preface.....	v
--------------	---

Part I

GENERAL ASPECTS OF INORGANIC COLORIMETRIC TRACE ANALYSIS

I. Trace Analysis.....	3
I. Methods of Trace Analysis.....	7
The Role of Colorimetry in Trace Analysis.....	11
II. Precautions in Trace Analysis.....	14
1. Reagents.....	17
2. Blanks.....	19
3. Standard Solutions.....	19
4. Sampling.....	21
Preparation of Bio Samples for Trace Metal Determinations.....	21
II. Methods for the Separation and Isolation of Traces of Elements.....	24
I. Methods Involving Precipitation, Coprecipitation, Adsorption, and Related Processes.....	25
A. Chemical Precipitation and Its Congeners.....	25
B. Chromatographic Separations.....	35
C. Electrolytic Deposition.....	40
II. Extraction by Immiscible Solvents.....	41
A. Inorganic Substances.....	44
B. Metal Compounds of Organic Reagents.....	53
1. Dithizone.....	58
2. 8-Hydroxyquinoline.....	58
3. Acetylacetone and Derivatives.....	58
4. Cupferron.....	60
5. Other Extraction Reagents.....	64
C. Rationale of Separations by Simple Extraction with Immiscible Liquids.....	65
Case I. A Is To Be Determined and $E_A > E_B$	68
Case II. B Is To Be Determined and $E_A > E_B$	70
D. Other Extraction Processes.....	71
Dry or Fire Assaying.....	71
Extraction of Solid Mixtures.....	71
III. Methods Involving Evolution of a Gas, Distillation, and Volatilization.....	72
III. Colorimetry and Spectrophotometry in Trace Analysis.....	75
Classification of Methods.....	78
Sensitivity.....	80
Visual Colorimetry.....	81
Photoelectric Spectrophotometry.....	83
I. Colorimetry.....	84
Photoelectric Colorimetry.....	92
II. Absorption Spectrophotometry.....	93
Visual Instruments and Methods.....	93
Photoelectric Spectrophotometric Methods.....	95

Absorption Cells	98
Filters	100
Standard Curves	103
III. Sources of Error in Color Methods	105
Failure of Beer's Law	107
IV. General Desiderata for Color Reactions for Trace Analysis	112
1. High Sensitivity	112
2. Specificity or Selectivity	112
3. Good Reproducibility and Stability of Color	113
4. Adherence to Beer's Law	113
V. Indirect Colorimetric Methods	114
VI. Fluorimetry	116
VII. Turbidimetry and Nephelometry	123
IV. General Colorimetric Reagents	123
I. Inorganic Reagents	126
Oxidation-Reduction Reactions	126
Complex-Forming Reactions	128
Indirect Color Reactions	128
1. Halogen Acids	129
2. Ammonium Hydroxide	130
3. Hydrogen Peroxide	130
4. Molybdate and Reducing Agents	132
5. Hydrogen Sulfide	133
II. Organic Reagents	134
Extractability	136
Selectivity	138
A. Dithizone	139
1. The Metal Dithizonates	140
2. Dithizone Equilibria	144
a. Distribution of Dithizone between Aqueous and Organic Solvent Phases	144
b. Metal-Dithizone Equilibria	147
Extraction Constants of Dithizonates	151
Extraction of Dithizonates from Strongly Basic Medium	154
Rate of Extraction	156
3. Specificity of Dithizone Reactions	158
4. Colorimetric Determination of Metals with Dithizone	163
5. Oxidation of Dithizone	169
6. Purification of Dithizone; Stability of Dithizone Solutions	170
7. Errors in Dithizone Methods	174
B. Di- β -naphthylthiocarbazone	176
C. Diphenylcarbazide and Diphenylcarbazone	178
D. 8-Hydroxyquinoline (Oxine)	179
E. Diethyldithiocarbamic Acid	191
F. Thioglycolic- β -aminonaphthalide (Thionalide)	194
G. Toluene-3,4-dithiol	195
H. Thiocyanate	196
I. Thiourea	198
J. Rubeanic Acid	199
K. Alizarin and Related Compounds	200
L. Morin	203

M. Phenylfluorone.....	205
N. Reagents with <i>o</i> -Nitrosophenol Grouping.....	206
1. <i>o</i> -Nitrosophenol.....	206
2. Nitrosonaphthols.....	207
O. <i>p</i> -Nitrosodimethylaniline.....	208
P. <i>p</i> -Dimethylaminobenzylidenerhodanine.....	209
Q. Rhodamine B.....	210
R. Organic Oxidizing and Reducing Agents.....	213

Part II

PROCEDURES FOR THE DETERMINATION OF TRACES OF METALS

Some Practical Notes.....	217
V. Aluminum.....	219
I. Separations.....	219
A. Precipitation Methods.....	219
B. Extraction Methods.....	221
C. Electrolysis.....	225
D. Ion-Exchange and Chromatographic Methods.....	225
II. Methods of Determination.....	226
A. Aurintricarboxylate Method.....	228
B. 8-Hydroxyquinoline Method.....	231
C. Other Methods.....	238
1. Eriochrome Cyanine R.....	238
2. Alizarinsulfonic Acid (Alizarin S).....	240
3. Pontachrome Method (Fluorescence).....	241
4. Miscellaneous.....	242
III. Applications.....	243
A. Steels.....	243
1. 8-Hydroxyquinoline as Reagent.....	243
2. Pontachrome Blue Black R as Reagent.....	243
3. Aurintricarboxylate as Reagent.....	244
B. High-Purity Iron.....	246
C. Non-ferrous Alloys.....	246
1. Lead, Antimony, Tin, and Their Alloys.....	246
2. Bronze, Brass, and Copper.....	247
3. Zinc.....	248
4. Nickel.....	248
5. Chromium-Nickel.....	250
6. Titanium Alloys.....	250
7. Zirconium.....	250
8. Thorium.....	250
9. Calcium and Magnesium.....	251
D. Iron Ore.....	251
E. Glass Sand.....	251
F. Phosphate Rock.....	251
G. Water.....	251
H. Bio Materials.....	252
VI. Antimony.....	254
I. Separations.....	254
A. Precipitation Methods.....	254

	B. Extraction Methods.....	256
	C. Evolution and Distillation Methods.....	257
II.	Methods of Determination.....	257
	A. Rhodamine B Method.....	258
	B. Iodide Method.....	266
	C. Pyridine-Iodide Method.....	267
	D. Phosphomolybdic Acid Method.....	268
	E. Other Methods.....	269
III.	Applications.....	270
	A. Silicate Rocks.....	270
	B. Soils.....	271
	C. Copper and Its Alloys.....	272
	D. Lead.....	273
	E. Germanium.....	274
	F. Other Metals.....	274
	G. Bio Materials.....	274
VII.	Arsenic.....	278
	I. Separations.....	278
	A. Distillation Methods.....	278
	B. Evolution as AsH_3	279
	C. Extraction Methods.....	280
	D. Precipitation Methods.....	282
II.	Methods of Determination.....	282
	A. Heteropoly Molybdenum Blue Method.....	282
	Method 1: Determination of Arsenic after Distillation of Arsenious Chloride.....	285
	Method 2: Determination of Arsenic after Evolution as Arsine.....	288
	B. Gutzeit Method.....	289
	C. Other Methods.....	290
III.	Applications.....	291
	A. Silicate Rocks.....	291
	B. Soils.....	293
	C. Sulfide Minerals.....	294
	D. Metals and Alloys.....	294
	E. Germanium Compounds.....	295
	F. Coal.....	296
	G. Bio Materials.....	296
VIII.	Barium.....	300
	I. Separations.....	300
II.	Methods of Determination.....	301
	A. <i>o</i> -Cresolphthalein Complexone Method.....	301
	B. Chromate Method.....	301
	C. Other Methods.....	302
IX.	Beryllium.....	304
	I. Separations.....	304
	A. Precipitation Methods.....	304
	1. By Ammonia Precipitation in the Presence of Mercapto- acetate Followed by Sodium Hydroxide Fusion of Pre- cipitate.....	304
	2. With Cupferron.....	306
	3. With 8-Hydroxyquinoline.....	306

4. Miscellaneous.....	307
B. Extraction Methods.....	307
1. Acetylacetone Extraction.....	307
2. Butyrate Extraction.....	308
C. Other Methods.....	308
II. Methods of Determination.....	308
A. Fluorimetric Methods.....	309
1. Morin as Reagent.....	309
2. 1-Amino-4-hydroxyanthraquinone and 1,4-Dihydroxyanthraquinone as Reagents.....	312
3. 8-Hydroxyquinoline as Reagent.....	313
B. Colorimetric Methods.....	313
1. <i>p</i> -Nitrobenzeneazo-orcinol as Reagent.....	314
2. Quinalizarin as Reagent.....	315
3. 8-Hydroxyquinoline as Reagent.....	316
4. Acetylacetone as Reagent.....	317
5. Other Reagents.....	317
III. Applications.....	319
A. Silicates and Silicate Rocks.....	319
B. Bio Materials.....	321
C. Dust.....	324
D. Metals.....	324
X. Bismuth.....	325
I. Separations.....	325
Precipitation Methods.....	325
1. Sulfide.....	325
2. Miscellaneous.....	325
B. Extraction Methods.....	326
1. Dithizone.....	326
2. Cupferron.....	329
3. Miscellaneous.....	331
C. Ion-Exchange.....	331
D. Volatilization.....	331
II. Methods of Determination.....	331
A. Dithizone Method.....	332
B. Iodide Method.....	332
C. Thiourea Method.....	337
D. Diethyldithiocarbamate Method.....	338
E. Other Methods.....	339
III. Applications.....	340
A. Metals.....	340
1. Antimony, Mercury, Silver, Iron, Etc.....	340
2. Copper.....	341
3. Lead.....	342
4. Lead-Base and Tin-Base Alloys.....	343
5. Uranium.....	345
B. Ores.....	345
C. Bio Materials.....	345
1. Iodide Method.....	346
2. Dithizone Method.....	347
XI. Cadmium.....	350

I. Separations.....	350
A. Extraction Methods.....	350
B. Sulfide Precipitation.....	352
C. Other Methods.....	353
II. Methods of Determination.....	353
A. Dithizone Method.....	353
1. Method of Saltzman.....	354
2. Method of Fischer and Leopoldi.....	356
B. Di- β -naphthylthiocarbazone Method.....	359
C. Other Methods.....	360
III. Applications of the Dithizone and Naphthylthiocarbazone Methods.....	360
A. Silicate Rocks.....	360
B. Zinc Metal.....	363
C. Bio Materials.....	363
XII. Calcium.....	366
I. Separations.....	366
A. Precipitation and Extraction Methods.....	366
B. Ion-Exchange and Chromatographic Methods.....	367
II. Methods of Determination.....	368
A. Purpurate (Murexide) Method.....	368
B. <i>o</i> -Cresolphthalein Complexone Method.....	370
C. Oxalate Method.....	371
D. Chloranilate Method.....	374
E. Phosphate Method.....	375
F. Oleate Method (Turbidimetric).....	377
G. Miscellaneous Methods.....	378
Strontium.....	380
XIII. Cerium.....	381
I. Separations.....	381
II. Methods of Determination.....	382
A. Persulfate Method.....	382
B. 8-Hydroxyquinoline Method.....	384
C. Carbonate Method.....	385
D. Other Methods.....	386
XIV. Chromium.....	388
I. Separations.....	388
A. Precipitation Methods.....	388
B. Extraction Methods.....	389
C. Chromatographic Method.....	389
II. Methods of Determination.....	390
A. Chromate Method.....	390
B. Diphenylcarbazide Method.....	392
C. Other Methods.....	397
III. Application of the Chromate and Diphenylcarbazide Methods.....	398
A. Silicate Rocks.....	398
B. Iron Ore.....	401
C. Iron and Steel.....	401
D. Other Metals.....	404
E. Bio Materials.....	404
XV. Cobalt.....	409
I. Separations.....	409
A. Nitrosonaphthol Extraction.....	409

B. Dithizone Extraction.....	410
C. Extraction of Cobalt Thiocyanate Complex.....	411
D. Other Extraction Methods.....	412
E. Ion-Exchange and Chromatographic Adsorption.....	413
F. Miscellaneous Methods.....	413
II. Methods of Determination.....	413
A. Nitroso-R Salt Method.....	415
B. 2-Nitroso-1-naphthol Method.....	420
C. Nitrosocresol Method.....	422
D. Thiocyanate Method.....	423
E. Other Methods.....	427
III. Applications.....	429
A. Silicate Rocks.....	429
B. Soils.....	431
C. Iron and Steel.....	431
D. Non-ferrous Alloys and Compounds.....	433
E. Bio Materials.....	433
XVI. Copper.....	437
I. Separations.....	437
A. Sulfide Precipitation.....	437
B. Dithizone Extraction.....	438
C. Miscellaneous Separations.....	442
II. Methods of Determination.....	442
A. Dithiocarbamate Methods.....	443
1. Diethyldithiocarbamate as Reagent.....	444
2. Dibenzylthiocarbamate as Reagent.....	450
B. Methods with Derivatives of Bipyridine and Phenanthroline as Reagents.....	451
C. Dithizone Method.....	453
D. Other Methods.....	458
III. Applications.....	460
A. Silicate Rocks.....	460
B. Soils.....	461
C. Water.....	461
D. Iron and Steel.....	462
1. Biquinoline as Reagent.....	462
2. Diethyldithiocarbamate as Reagent.....	463
E. Non-ferrous Metals.....	464
F. Miscellaneous Materials.....	465
G. Bio Materials.....	466
Destruction of Organic Matter.....	467
Determination of Copper.....	469
XVII. Gallium.....	471
I. Separations.....	471
A. Extraction Methods.....	471
B. Ion-Exchange and Chromatographic Methods.....	472
C. Precipitation Methods.....	472
II. Methods of Determination.....	473
A. Rhodamine B Method.....	473
B. 8-Hydroxyquinoline Method.....	477
1. Fluorimetric Determination.....	477

2. Absorptiometric Determination.....	480
C. Other Methods.....	481
XVIII. Germanium.....	482
I. Separations.....	482
A. Volatilization Methods.....	482
B. Extraction of Germanium Tetrachloride.....	483
C. Precipitation Methods.....	485
II. Methods of Determination.....	485
A. Phenylfluorone Method.....	485
B. Other Methods.....	492
1. Oxidized Hematoxylin.....	492
2. Molybdate.....	492
3. Molybdate and Reducing Agent.....	493
4. Miscellaneous.....	493
XIX. Gold.....	494
I. Separations.....	494
A. Precipitation Methods.....	494
B. Extraction Methods.....	495
C. Other Methods.....	497
II. Methods of Determination.....	497
A. Rhodanine Method.....	497
B. Rhodamine B Method.....	502
C. Bromoaurate Method.....	503
D. Stannous Chloride Method.....	503
E. Methods Involving Formation of Strongly Colored Organic Compounds by the Oxidizing Action of Auric Gold.....	505
1. <i>o</i> -Tolidine Method.....	506
2. Malachite Green Method.....	506
3. <i>o</i> -Dianisidine Method.....	507
F. Dithizone Method.....	507
G. Mercurous Chloride Method.....	507
III. Special Applications.....	508
XX. Indium.....	510
I. Separations.....	510
A. Extraction Methods.....	510
B. Other Methods.....	512
II. Methods of Determination.....	513
A. 8-Hydroxyquinoline Method.....	513
B. Dithizone Method.....	516
XXI. Iridium.....	518
I. Separations.....	518
II. Methods of Determination.....	518
A. Stannous Chloride-Hydrobromic Acid Method.....	519
B. Other Methods.....	520
XXII. Iron.....	522
I. Separations.....	522
II. Methods of Determination.....	524
A. Thiocyanate Method.....	524
B. 1,10-Phenanthroline Method.....	537
C. Mercaptoacetate (Thioglycolate) Method.....	542
D. Other Methods.....	544

III. Applications.....	546
A. Glass Sand.....	546
B. Water.....	547
C. Magnesium and Its Alloys.....	548
D. Other Metals and Alloys.....	549
E. Bio Materials.....	550
1. 1,10-Phenanthroline Method.....	551
2. Thiocyanate Method.....	553
XXIII. Lead.....	555
I. Separations.....	555
A. Dithizone Extraction.....	555
B. Dithiocarbamate Method.....	559
C. Sulfide Precipitation.....	560
D. Electrolytic Deposition as Lead Metal or as Dioxide.....	561
E. Coprecipitation with Strontium Sulfate.....	561
F. Precipitation as Chromate or Phosphate.....	561
G. Miscellaneous Separations.....	562
II. Methods of Determination.....	563
A. Dithizone Method.....	563
B. Other Methods.....	571
III. Applications of the Dithizone Method.....	572
A. Silicate Rocks.....	572
B. Steel.....	575
C. Non-ferrous Alloys.....	577
D. Gasolines and Naphthas.....	578
E. Water.....	579
F. Bio Materials.....	579
1. Ashing.....	580
2. Acid Digestion.....	582
XXIV. Lithium.....	584
I. Separations.....	584
II. Methods of Determination.....	585
A. "Thoron" Method.....	585
B. Other Methods.....	586
XXV. Magnesium.....	587
I. Separations.....	587
A. Precipitation Methods.....	587
B. Extraction Methods.....	588
C. Ion-Exchange and Chromatographic Methods.....	590
II. Methods of Determination.....	590
A. Titan Yellow Method.....	591
B. Other Lake Methods.....	598
C. Eriochrome Black T Method.....	599
D. 8-Hydroxyquinoline Method.....	600
1. By Precipitation.....	600
2. By Extraction.....	603
E. Miscellaneous Methods.....	605
XXVI. Manganese.....	606
I. Separations.....	606
II. Methods of Determination.....	608
A. Permanganate Method.....	608

1. Periodate as Oxidizing Agent.....	608
2. Persulfate as Oxidizing Agent.....	611
B. Formaldoxime Method.....	612
C. Other Methods.....	613
III. Applications.....	614
A. Silicate Rocks.....	614
B. Iron Ore.....	615
C. Steel.....	615
D. Non-ferrous Alloys.....	616
E. Water.....	616
F. Bio Materials.....	617
1. Permanganate Method.....	617
2. Formaldoxime Method.....	619
XXVII. Mercury.....	621
I. Separations.....	621
A. Precipitation Methods.....	621
B. Extraction Methods.....	621
C. Other Methods.....	624
II. Methods of Determination.....	625
A. Dithizone Method.....	626
B. Di- β -naphthylthiocarbazone Method.....	630
C. Diphenylcarbazone Method.....	630
D. Other Methods.....	631
III. Applications of the Dithizone Method.....	632
A. Metals.....	632
B. Sea Water Leachates.....	632
C. Soils.....	633
D. Air.....	635
E. Bio Materials.....	635
XXVIII. Molybdenum.....	640
I. Separations.....	640
A. Precipitation Methods.....	640
B. Extraction Methods.....	641
C. Ion-Exchange Methods.....	643
II. Methods of Determination.....	644
A. Thiocyanate-Stannous Chloride Method.....	644
B. Dithiol Method.....	650
C. Other Methods.....	652
III. Applications.....	654
A. Silicate Rocks.....	654
1. With Thiocyanate.....	654
2. With Dithiol.....	656
B. Phosphate Rock.....	658
C. Soils.....	659
D. Tungsten Ores.....	660
E. Steel.....	661
F. Bio Materials.....	662
XXIX. Nickel.....	665
I. Separations.....	665
A. Dimethylglyoxime Extraction Method.....	665
B. Other Methods.....	667

II. Methods of Determination.....	668
A. Dimethylglyoxime–Oxidizing Agent Method.....	668
B. Other Oxime Methods.....	673
C. Diethylthiocarbamate Method.....	674
D. Miscellaneous Methods.....	675
III. Applications.....	676
A. Silicate Rocks.....	676
B. Iron and Steel.....	676
C. Bronze.....	678
D. Copper.....	678
E. Aluminum Alloys.....	679
F. Miscellaneous Inorganic Materials.....	679
G. Bio Materials.....	680
XXX. Niobium and Tantalum.....	682
I. Separations.....	682
A. Precipitation Methods.....	682
B. Extraction Methods.....	683
1. Fluoride Extraction.....	683
2. Other Extractions.....	685
C. Miscellaneous Methods.....	686
II. Methods of Determination.....	687
Niobium.....	687
A. Thiocyanate Method.....	687
B. Hydrogen Peroxide Method.....	692
C. Other Methods.....	694
Tantalum.....	695
XXXI. Osmium.....	699
I. Separations.....	699
A. Distillation of OsO_4	699
B. Extraction of OsO_4	701
C. Other Methods.....	702
II. Methods of Determination.....	702
A. Thiourea Method.....	702
B. Methods with Derivatives of Thiourea.....	707
C. Catalytic Method.....	707
D. Other Methods.....	709
XXXII. Palladium.....	711
I. Separations.....	711
A. Precipitation Methods.....	711
B. Extraction Methods.....	712
C. Miscellaneous Methods.....	714
II. Methods of Determination.....	714
A. Nitrosophenylamino Method.....	714
1. General Procedure with <i>o</i> -Nitrosodimethylaniline.....	716
2. General Procedure with <i>p</i> -Nitrosodiphenylamine.....	716
B. Other Methods.....	716
III. Applications.....	718
XXXIII. Platinum.....	721
I. Separations.....	721
A. Precipitation Methods.....	721
B. Extraction Methods.....	722

C. Ion-Exchange and Chromatographic Methods.....	723
D. Miscellaneous.....	725
II. Methods of Determination.....	726
A. Stannous Chloride Method.....	726
B. Iodide Method.....	728
C. <i>p</i> -Nitrosodimethylaniline Method.....	729
D. Other Methods.....	732
XXXIV. Potassium	733
A. Chloroplatinate Method.....	734
B. Dipicrylamine Method.....	738
C. Other Methods.....	740
Rubidium and Cesium.....	740
XXXV. The Rare Earth Elements	742
I. Separations.....	742
II. Methods of Determination.....	744
A. By Light Absorption of Rare Earth Ions in Aqueous Solution..	744
B. By Fluorescence.....	746
C. Alizarinsulfonate Method.....	748
D. Other Methods.....	748
XXXVI. Rhenium	750
I. Separations.....	750
A. Volatilization of Re_2O_7	750
B. Precipitation Methods.....	751
C. Extraction Methods.....	752
D. Ion-Exchange Methods.....	754
II. Methods of Determination.....	754
A. Thiocyanate Method.....	754
B. 2,4-Diphenylthiosemicarbazide Method.....	758
C. Indirect Determination by Catalysis of Reduction of Sodium Tellurate by Stannous Chloride.....	759
D. Other Methods.....	760
III. Applications of the Thiocyanate Method.....	761
A. Determination of Rhenium in Molybdenite.....	761
B. Determination of Rhenium in Pyrolusite.....	765
XXXVII. Rhodium	767
I. Separations.....	767
II. Methods of Determination.....	769
A. Stannous Chloride Method.....	769
B. Stannous Iodide Method.....	774
C. Thiazole Method.....	775
D. Other Methods.....	777
XXXVIII. Ruthenium	778
I. Separations.....	778
A. Distillation of Ruthenium Tetroxide.....	778
B. Extraction of Ruthenium Tetroxide.....	779
II. Methods of Determination.....	780
A. Methods Based on the Use of Thiourea and Derivatives.....	781
1. Thiourea.....	781
2. Dithioxamide.....	783
3. 2,4-Diphenylthiosemicarbazide.....	784

B. 1,10-Phenanthroline Method.....	784
C. <i>p</i> -Nitrosodimethylaniline Method.....	786
D. Catalytic Method.....	786
E. Other Methods.....	791
XXXIX. Scandium	792
I. Separations.....	792
A. Precipitation Methods.....	792
B. Extraction Methods.....	793
C. By Ion-Exchange.....	797
II. Methods of Determination.....	797
A. Alizarinsulfonic Acid Method.....	797
B. Oxine Method.....	800
C. Morin Method.....	800
XL. Silver	802
I. Separations.....	802
A. Precipitation Methods.....	802
B. Extraction Methods.....	803
II. Methods of Determination.....	805
A. <i>p</i> -Diethyl- or <i>p</i> -Dimethylaminobenzylidenerrhodanine Method..	805
1. Direct Method.....	806
2. Indirect Method.....	811
B. Dithizone Method.....	812
1. Mixed-Color Method.....	814
2. Mono-Color Method.....	816
C. Chloride Method.....	817
D. Other Methods.....	818
XLI. Sodium	821
I. Separations.....	821
II. Determination by the Triple Acetate Method.....	822
XLII. Thallium	826
I. Separations.....	826
A. Precipitation Methods.....	826
B. Extraction Methods.....	827
1. Dithizone Extraction.....	827
2. Ether Extraction of Chloride.....	827
3. Ether Extraction of Bromide.....	828
4. Ether Extraction of Iodides.....	829
5. Miscellaneous.....	829
C. Other Methods.....	829
II. Methods of Determination.....	830
A. Rhodamine B Method.....	830
B. Iodine Method.....	831
C. Dithizone Method.....	834
D. Thionalide Method.....	834
E. Other Methods.....	835
XLIII. Thorium	837
I. Separations.....	837
A. Precipitation Methods.....	837
B. Extraction Methods.....	841
C. Other Methods.....	843

II. Methods of Determination.....	844
A. With 2-(2-Hydroxy-3,6-disulfo-1-naphthylazo)benzenearsonic Acid.....	844
B. With Morin.....	849
C. Other Reagents.....	850
XLIV. Tin.....	852
I. Separations.....	852
A. Precipitation Methods.....	852
B. Halide Volatilization Methods.....	853
C. Extraction Methods.....	853
D. Other Methods.....	854
II. Methods of Determination.....	854
A. Dithiol Method.....	854
B. Phenylfluorone Method.....	862
C. Methods Based on the Reducing Action of Stannous Tin.....	865
D. Other Methods.....	866
XLV. Titanium.....	868
I. Separations.....	868
II. Methods of Determination.....	869
A. Hydrogen Peroxide Method.....	870
B. Methods Employing Phenolic Reagents.....	874
1. Tiron.....	875
2. Sulfosalicylic Acid.....	876
3. Chromotropic Acid.....	876
4. Other Reagents.....	877
III. Applications.....	878
A. Silicate Rocks.....	878
B. Steel.....	878
C. Bio Material (Animal Tissues).....	881
XLVI. Tungsten.....	883
I. Separations.....	883
A. Precipitation Methods.....	883
B. Extraction Methods.....	885
II. Methods of Determination.....	885
A. Thiocyanate Method.....	886
B. Dithiol Method.....	889
C. Other Methods.....	890
III. Applications.....	891
A. Silicate Rocks.....	891
B. Iron and Steel.....	895
C. Titanium Metal.....	895
D. Bio Materials.....	896
1. Thiocyanate Method.....	896
2. Dithiol Method.....	897
XLVII. Uranium.....	900
I. Separations.....	900
A. Precipitation Methods.....	900
1. Carbonate Precipitation.....	900
2. Cupferron Precipitation.....	902
3. Miscellaneous.....	902
B. Extraction Methods.....	903

1. Nitrate Extraction.....	903
2. Cupferron Extraction.....	904
3. Miscellaneous.....	905
C. Chromatographic and Ion-Exchange Methods.....	906
II. Methods of Determination.....	908
A. Fluorescence Method.....	908
Applications of the Fluorescence Method.....	912
1. Silicic Materials.....	912
2. Phosphate Rock.....	914
3. Monazite.....	914
4. Natural Waters.....	914
5. Organic Materials.....	915
B. Hydrogen Peroxide Method.....	915
C. Thiocyanate Method.....	916
D. Dibenzoylmethane Method.....	918
E. 2-Acetoacetylpyridine Method.....	919
F. Ferrocyanide Method.....	920
G. Other Methods.....	921
XLVIII. Vanadium.....	923
I. Separations.....	923
A. Precipitation Methods.....	923
B. Extraction Methods.....	924
C. Miscellaneous Methods.....	925
II. Methods of Determination.....	926
A. Phosphotungstate Method.....	926
B. Peroxide Method.....	929
C. 8-Hydroxyquinoline Method.....	931
D. Other Methods.....	932
III. Applications.....	934
A. Silicate Rocks.....	934
B. Iron and Steel.....	936
C. Water.....	937
D. Bio Materials.....	939
XLIX. Zinc.....	941
I. Separations.....	941
A. Sulfide Precipitation.....	941
B. Dithizone and Other Extractions.....	941
C. Miscellaneous.....	944
II. Methods of Determination.....	945
A. Dithizone Method.....	946
1. Mixed-Color Method.....	947
2. Mono-Color Method.....	950
B. Other Methods.....	954
III. Applications of the Dithizone Method.....	955
A. Silicate Rocks.....	955
B. Soils.....	956
C. Water.....	957
D. Chromium-Nickel Steels.....	957
E. Cobalt and Nickel.....	958
F. Aluminum Alloys.....	959
G. Cadmium Metal.....	960

H. Bio Materials.....	960
1. Di- β -naphthylthiocarbazone as Reagent.....	961
2. Dithizone as Reagent.....	963
L. Zirconium.....	966
I. Separations.....	966
A. Precipitation Methods.....	966
B. Extraction Methods.....	967
II. Methods of Determination.....	968
A. Alizarin Method.....	968
B. Morin Method.....	971
C. Quercetin Method.....	974
D. Other Methods.....	976
III. Applications.....	977
A. Silicate Rocks.....	977
B. Magnesium Alloys.....	980
C. Aluminum Alloys.....	980
D. Thorium Metal.....	981
E. Steel.....	981
Appendix.....	982
Four-Place Logarithms.....	982
Transmission-Absorbance Table.....	985
International Atomic Weights, 1957.....	987
Author Index.....	989
Subject Index.....	1021

PART I

**GENERAL ASPECTS OF INORGANIC
COLORIMETRIC TRACE ANALYSIS**
