INTRODUCTION

The Sung Yüan Ming Shan Pên Ts'ung Shu Shih Chung (宋元明善本叢書十種) published by the Commercial Press in 1969, comprises 587 titles of ten series in 100 volumes, and is the most valuable collection of Chinese rare books. It covers a wide variety of subjects such as Chinese classics, philosophy, religions, social sciences, language, natural sciences, applied sciences, literature, history and geography. Even though all the works in this collection have been preserved and circulated by careful reprinting by the Commercial Press, there is a lack of a mechanism providing access to its contents. This can create enormous difficulty for the reader who tries to find a particular work. This guide is therefore intended to facilitate the use of this precious collection as a research tool.

It is divided into four parts: 1. series index; 2. author index; 3. title index; 4. subject index.

The series index is a listing of the titles in the collection. The listing is under author (including compiler, editor, annotator), and where there is no author, it is under title. The titles are transcribed directly from the collection following the Wade-Giles romanization system. The next section is the author index. All the works are arranged alphabetically under author, annotator, compiler or editor. The title

index lists in alphabetical order all the titles in the collection. Under each title in romanization and Chinese, the name of the author is given in Chinese and the volume number is indicated. The last section contains the subject index which is assigned according to the Library of Congress subject headings. Under each subject (Chinese in parenthesis), all the related titles are listed by their series titles and volume numbers in the collection. For example:

1. Series index:

¹ Series title and volume number	Authors (Including compilers, editors, and annotators) and/or title	Author's Chinese name and Chinese Title
A 1	Lo, Pi, 12th cent. Lu shih.	(宋)羅泌撰 路史

2. Author index:

Author's name in romanization	Author's Chinese name	Series title ¹ and volume number
Pan, Ku, 32-92	(漢)班固撰	A 1

3. Title index:

Title in romanization and Chinese	Author's Chinese name	Series title ¹ and volume number
Lung-ch'eng lu. 龍城錄	(唐)柳宗元撰	A 4

4. Subject index:

Subject	Chinese in parenthesis	Related series ¹ title and volume number
Ssŭ-shu	(四書)	H 1

Although this guide is intended to be an index to the collection, it can also be used as a bibliographical reference tool in locating a particular work in the rare book publication.
