序

编写《煤矿总工程师工作指南》是煤炭工业现代化的基础建设之一。它的出版不仅对改善和提高煤矿总工程师的素质，而且对提高全体煤矿工程技术人员的素质将起促进作用。

煤炭是工业的粮食。我国一次能源消费结构中，煤炭占75%以上。煤炭工业发展的快慢，直接关系到国计民生。建国以来，特别是党的十一届三中全会以来，煤炭工业发展迅速，原煤年产量达到九亿吨以上，居世界第二位，煤炭工业的技术装备和管理水平亦相应地有了提高，但是，从实现四个现代化、大幅度地提高生产能力、改变旧生产力发展不相适应的生产关系与上层建筑、改变一切与生产力发展不适应的管理方式、活动方式和思想方式这样一个高度来要求，差距还是很大的。现代化矿井建设不仅取决于它的技术装备水平，更重要的决定于它的管理水平。党的十三大报告中指出：“现代科学技术和现代化管理是提高经济效益的决定因素，是使我国经济走向新的成长阶段的主要支柱。”根据当前的形势，结合煤矿的具体情况，组织编写了《煤矿总工程师工作指南》一书，目的是为总工程师以及其他技术管理干部提供必备的管理新知识。

本书是从我国实际出发，系统总结建国以来煤炭工业科学技术经验的同时，吸收国外煤炭工业的新技术、新工艺、新设备和科学管理的新成就编写而成的。《指南》在理论联系实际的基础上，把科学技术和经济管理统一起来；把传统的工程方法和现代化管理科学结合起来；从国情出发吸收国外先进技术，坚持洋为中用。《指南》着重阐述了党对煤炭工业的方针政策及总工程师的基本任务；较详细地介绍了总工程师常用的技术知识、资料和国内外先进经验、现代管理科学理论、决策方法以及现代管理手段等。《指南》也是一部比较实用的、完整的煤矿总工程师工具书，可以帮助老工程技术干部进行知识更新，又可以帮助新进入技术岗位的人员尽快熟悉自己新岗位，获取必备的知识，有利于促进煤炭工业技术队伍素质的提高，有利于煤矿总工程师加强技术管理和推动技术进步。它具有比较明显的针对性、实用性、先进性和指导性。

《煤矿总工程师工作指南》的出版，是三十多位编委、近百名专家、教授历经三年辛勤劳动的结果，是他们从事煤炭工业几十年经验的结晶，也是通过他们，汇集了煤炭战线成千上万工程技术人员、管理工部、工人创造性劳动的结晶。就这点来说，《指南》也是一部集体智慧的著作，它必将在实现煤炭工业现代化的事业中作出应有的贡献。

《煤矿总工程师工作指南》编委会

一九八八年一月

编 者 说 明

《煤矿总工程师工作指南》是煤炭工业部组织近百名专家、教授编写的一部跨学科的仅涉及煤矿井工开采内容的大部头著作。全书分上、中、下三册出版。

本书以《中共中央关于经济体制改革的决定》为指导思想，按照面向未来，面向世界，面向现代化的要求，以促进煤矿总工程师有力地加强技术管理，推动技术进步。

本书的特点是理论联系实际，具有明显的针对性、实用性、先进性和指导性。具体介绍国内外煤矿技术，但不同于教科书，不追求教科书的系统性；具体介绍必要的解决实际问题所需要的定量方法及实用数据，但不同于手册，不追求资料的详尽性；具体介绍国内外煤矿各有关学科的新经验，但不追求专著的详细论述。

本书的编写重点有四个方面：第一、结合当前我国的经济体制改革，论述煤矿总工程师的基本任务及重大技术政策；第二、在总结建国以来我国煤矿技术理论的发展及实践经验的基础上，把理论和实践结合起来，把传统的工程方法与现代化的科学管理方法结合起来，把定性分析与定量分析结合起来；第三、提高经济素养，总工程师既要研究技术的先进性又要研究经济的合理性，对技术活动、技术方案进行经济分析，评价其经济效果，确定其适度的数量界限；第四，提高总工程师正确指挥和处理矿井灾变的能力。

本书采用中华人民共和国法定计量单位。但对某些经验公式、通过实践及试验取得的数据及引入的国外技术资料，仍暂时保留了原使用的计量单位。

本书在编写过程中，得到煤炭工业系统各级领导部门、企事业单位的许多领导、专家、教授的支持和指导，有些专家、教授具体参加了编写与审稿工作，我们表示衷心的感谢。

我们的学识所限，书中难免有不妥之处，恳请读者批评指正。

内 容 简 介

全书分上、中、下三册，八个部分。总论部分，论述煤矿总工程师的基本任务、素养、职责、以及应掌握的煤炭工业重大的技术政策，它是全书的总纲。煤矿开采、矿井通风与灾害防治两篇是全书的主体，着重介绍了国内外近年来的主要科研成果及新的理论和经验。诸如矿山压力及岩层控制的理论及其应用，矿井的开拓与准备，综合机械化采煤及掘进机械化方面的新技术、新工艺及新装备，特殊条件下采煤，风力充填新技术，煤与瓦斯突出及预防，矿井灾变处理要点以及井下环境监测等。煤田地质与矿山测量和矿山运输、机电与供电两篇重点介绍了新的知识及国内外先进经验，煤炭洗选加工与矿区环境保护和现代科学管理与技术经济两篇，着重介绍了基本理论、基本概念和基本方法，为拓宽知识面，注重经济效益，正确处理技术和经济的关系提供了必要的知识。附录部分，为煤矿总工程师提供了日常工作所需要的一般技术资料以及常用管理数学知识。

本书供煤矿总工程师工作参考，对煤矿生产各级领导干部及采矿、地质测量、机电、通风安全、选煤、综合利用的工程技术人员，以及煤炭工业科研、设计部门的技术人员和高等院校师生均有参考价值。

虽然本书主要是针对煤矿编写的，但也适用于开采其他层状矿床的矿山。

AN OUTLINE OF THE CONTENT

There are altogether three volumes in this book, which is further broken into eight parts. In the part entitled General Considerations, the basic task, quality and duty of, as well as the important technical policies in coal industry to be mastered by the chief engineer are discussed. It is therefore the backbone of the whole book. The principal portion of the book, however, consists of the part of Coal Mining and Mine Ventilation and the part of Prevention and Control of Mine Disasters in which the recent research achievements and up-to-date theories and practices both at home and abroad are introduced, such as the theory and application of mine pressure and strata control, the underground mine development and mining section preparation, the current technique, technology and installations in fully mechanized mining and driving, mining under special conditions, advanced technique in pneumatic stowing, sudden outburst of methane with coal and its prevention, main points in the control of mine disasters, as well as underground environmental monitor. Stress is laid on introducing new informations and domestic and foreign advanced practices in the parts of Coalfield Geology and Mine Surveying, as well as in Mine transportation, Electrical and Mechanical Engineering and Power Supply. Fundamental theories, conceptions and methods are described in the part of Coal Preparation and Processing and Environmental Protection and the Part of Modern Scientific Management and Techno-Economics, so as to broaden our knowledges in such fields, to attach importance to economic benefit and to provide necessary understanding in correctly dealing with the relation between technique and economy. In the Appendices, common technical materials needed by mining chief engineers in their day-to-day work and managing mathematics in common use are also provided.

This book is essentially referential to mining chief engineers, but is also available to leading cadres at all levels involved in coal mine production, as well as engineers and technicians in the fields of mining, mine geology and surveying, electrical and mechanical engineering, ventilation and safety, coal preparation and comprehensive utilization of coal. Technical personnel in mine research and design institutes and teachers and students in colleges can also find this book valuable.

Although the original idea of composing this manual is aimed at coal mines, it seems likely to be adoptable to mines working any stratified deposit.

中 册 目 录

第三篇 矿井通风与灾害防治	1
第十二章 矿井通风	2
1. 矿井风流能量及其变化规律	2
2. 矿井通风动力的应用	24
3. 采区通风	46
4. 矿井风网解算	65
5. 矿井通风系统改造	88
6. 矿井空气调节	104
第十三章 矿井瓦斯、矿尘与火灾的防治	130
1. 矿井瓦斯涌出及其控制	130
2. 矿井瓦斯爆炸及其预防	148
3. 瓦斯喷出、煤与瓦斯突出及其预防	163
4. 煤矿瓦斯抽放	188
5. 矿尘防治	210
6. 矿井火灾防治	249
第十四章 煤矿安全与灾变处理	302
1. 煤矿安全现状	302
2. 矿井重大灾害应变要点	307
3. 矿井灾害预防和处理计划的编制	318
4. 采煤、掘进、开拓工作面安全技术装备标准	326
5. 煤矿安全监测监控装备	329
6. 矿山救护	351
7. 煤矿事故的统计	362
第十五章 煤矿职业危害及其防治原则	368
1. 煤矿职业危害	368
2. 煤矿井下常见职业病的防治	369
3. 煤矿井下工人职业性多发病的防治	385
4. 煤矿创伤急救	387
5. 个体劳动保护	389
第四篇 矿山运输、机电与供电	393
第十六章 矿井运输	394
1. 概述	394
2. 刮板输送机	394
3. 带式输送机	411
4. 矿用窄轨机车运输	426
5. 辅助运输	434
第十七章 矿井提升设备	449
1. 矿井提升机的型式及适用范围	449
2. 确定提升系统及提升容器的技术要点	460

3. 提升钢丝绳的使用及维护	472
4. 安全提升技术要点	476
5. 提升机电力拖动系统	491
6. 矿井提升机的技术测定	498
7. 改造现有提升设备，提高提升能力的途径	499
第十八章 固定压风设备	503
1. 国产空气压缩机的类型及技术特征	503
2. 选择矿井压风设备常用公式及图表	510
3. 矿井空气压缩机站的布置及压气管网的敷设	514
4. 空气压缩机安全、经济运行注意事项	520
第十九章 矿井通风设备	534
1. 矿用扇风机分类	534
2. 风机基本性能参数	534
3. 矿井扇风机的调节	544
4. 风机设备构筑物及反风装置	550
5. 轴流式风机的消声	558
6. 老旧风机的技术改造	563
7. 局扇性能测定	571
第二十章 矿井排水设备	576
1. 矿井涌水量及其测定方法	576
2. 矿用离心水泵的性能和特性曲线	577
3. 排水设备的选择、布置和安装	591
4. 矿井排水设备的经济运行	595
5. 压入式水泵房和潜水泵房	605
6. 水仓的清理方法	609
7. 淹井事故排水	617
第二十一章 供电及电气设备	621
1. 矿区供电	621
2. 矿井供电系统	625
3. 矿井电网	632
4. 高压供电设备	645
5. 矿用防爆电气设备	649
6. 井下低压电网过流保护	658
7. 井下低压电网的漏电保护	659
8. 井下保护接地	661
9. 节约用电和用电管理	664
10. 电气安全	666
11. 矿区电厂	676
第二十二章 矿山地面系统及矿山设备的维修与管理	690
1. 概述	690
2. 受煤车间设备及设施	690
3. 贮煤设备及设施	702

4. 装车仓设备及设施	712
5. 矸石堆放	720
6. 矿山工业油脂及其应用	731
7. 设备的维护和检修与设备状态诊断技术	742
8. 设备管理	746
第二十三章 矿区通信	759
1. 概述	759
2. 通信技术基础	759
3. 矿用电话	780
4. 井下专用通信设备	793
5. 矿区地面通信	806
第五篇 煤炭洗选加工与矿区环境保护	835
第二十四章 煤炭的洗选加工	836
1. 选煤的任务及选煤厂	836
2. 煤炭的质量品种	837
3. 原煤的选矸和筛选	854
4. 选煤	864
5. 煤泥的处理	883
6. 选煤产品的脱水	903
7. 煤炭的质量、数量检查	918
8. 选煤生产的管理	924
9. 粉煤成型	941
第二十五章 煤矸石利用及燃烧	957
1. 煤矸石利用	957
2. 锅炉与燃烧	990
第二十六章 煤化工及瓦斯利用	1012
1. 煤炭焦化	1012
2. 煤炭气化	1043
3. 煤矿瓦斯资源的利用	1066
4. 煤炭液化	1068
5. 煤制炭质材料	1078
第二十七章 矿区环境保护	1088
1. 概述	1088
2. 煤炭企业环境管理	1091
3. 矿区废水污染与防治	1097
4. 矿区大气污染与防治	1111
5. 矿区噪声污染及其控制	1119
6. 固体废物的处理与利用	1126
7. 煤矿地表塌陷及土地的复用与整治	1131
8. 环境监测	1135
9. 环境质量评价	1138
10. 矿区绿化	1148

Contents of Volume II

Part III Mine Ventilation, Prevention and Control of Mine Disasters

Chapter XII Mine Ventilation	1
1. Underground air-flow energy and its changing regularities	2
2. Application of ventilating power in mine ventilation	24
3. Ventilation in mining section	46
4. Analysis and calculation of mine ventilation network	65
5. Reformation of mine ventilation system	88
6. Regulation of mine atmosphere	104
Chapter XIII Prevention and Control of Mine Gas, Dust and Fire	130
1. Emission of mine gas and its control	130
2. Explosion of mine gas and its prevention	148
3. Inrush of gas, outburst of gas with coal and their prevention	163
4. Draining of mine gas	188
5. Prevention and control of mine dust	210
6. Prevention and control of underground fire	249
Chapter XIV Mine Safety and Treatment of Disasters	302
1. Current status concerning coal mine safety	302
2. Fundamental emergency measures during heavy mine disaster	307
3. Working out program in preventing and treating mine disasters	318
4. Standard technical devices required for safety at working faces of mining, driving and development	326
5. Monitoring and controlling installations for coal mine safety	329
6. Mine rescue	351
7. Making statistics for coal mine disasters.....	362
Chapter XV Occupational Harm in Coal Mine and Principles in Prevention and Treatment.....	368
1. Coal mine occupational harms	368
2. Prevention and control of common underground occupational diseases in coal mine	369
3. Prevention and control of occupational diseases frequently gained by underground miners in coal mine.....	385
4. First-aid of injuries in coal mine.....	387
5. Individual working protection	389

**Part IV Transportation, Mechanical and Electrical
Engineering and Power Supply in Mines**

Chapter XVII Underground Haulage	393
1. General description.....	394
2. Flight conveyor	394
3. Belt conveyor	411
4. Narrow-gauge loco haulage in mines	426
5. Auxiliary haulage	434
Chapter XVIII Shaft Hoisting Installations	449
1. Type and scope of adaptability of mine hoisting machine.....	449
2. Technical essentials for determining the hoisting system and hoisting container	460
3. Use and maintenance of hoisting wire rope	472
4. Technical essentials for safe hoisting	476
5. Electrical driving system of hoisting machine	491
6. Technical tests of mine hoisting machine	498
7. Ways of reforming existing hoisting equipment and upgrading hoisting capacity.....	499
Chapter XIX Permanent Air-compressing Plant	503
1. Type and technical specification of home-made air compressors	503
2. Common formula and charts used for selecting mine air-compressing equipment.....	510
3. Layout of mine air-compressing plant and compressed air pipe network	514
4. Attention points in the safe and economic operation of air compressor.....	520
Chapter XX Mine Ventilating Installations	534
1. Classification of mine fans	534
2. Basic performing parameters of fan	534
3. Regulating mine fan	544
4. Fan house and air-reversal installation	550
5. Noise elimination of axial flow fan.....	558
6. Technical reformation of existing fan	563
Chapter XXI Mine Drainage Installations	576
1. Mine inflow and its measurement.....	576
2. Performance and characteristic curve of mine centrifugal pump	577
3. Selection, layout and installation of drainage equipment	591
4. Economic operation of mine drainage equipment	595
5. Pressurized-priming pump room and submersible pump room	605
6. Clearing of water sump	609
7. Drainage during mine flooding	617
Chapter XXII Power Supply and Electrical Installations	621
1. Power supply in mine area.....	621

2. Power supply system in mine.....	625
3. Power transmission grid in mine	632
4. High voltage power supply equipment.....	645
5. Explosion-proof electrical equipment	649
6. Overcurrent protection of underground low voltage transmission grid.....	658
7. Earth-leakage protection of underground low voltage transmission grid	659
8. Underground protective earthing	661
9. Power economization and control	664
10. Electrical safety	666
11. Power plant within mine area	676
Chapter XIII Surface Plant System and Maintenance/Repairing and Management of Mine Equipment	690
1. General description	690
2. Coal-receiving equipment and installation	690
3. Coal-storing equipment and installation	702
4. Equipment and installation in load-out bin	712
5. Disposal of waste rock	720
6. Industrial oil and grease for mine use and their application	731
7. Maintenance and repair of equipment and diagnostic technique in testing state of equipment	742
8. Management of equipment	746
Chapter XIV Communication in Mine Area	759
1. General description.....	759
2. Fundamentals of communication technique.....	759
3. Mine-use telephone	780
4. Underground special communication equipment.....	793
5. Surface communication within mine area	806
Part V Coal Preparation and Processing and Environmental Protection in Mine Area	
Chapter XV Coal Preparation and Processing	835
1. Task of coal washing and washing plant	836
2. Quality and rank of coal.....	837
3. Hand sorting and screening of raw coal	854
4. Coal washing	864
5. Treatment of sludge	883
6. Dewatering of washed coal products	903
7. Check on quality and quantity of coal	918
8. Supervision in coal washing operation.....	924
9. Forming of pulverized coal.....	941
Chapter XVI Utilization and Burning of Coal Waste	957
1. Utilization of coal waste	957

2. Boiler and combustion	990
Chapter III Coal Chemical Engineering and Utilization of Methane	1012
1. Coking of coal.....	1012
2. Gasification of coal	1043
3. Utilization of coalbed gas	1066
4. Liquefaction of coal	1068
5. Coal-oriented carbonaceous materials	1078
Chapter IV Environmental Protection in Mine Area.....	1088
1. General description.....	1088
2. Environmental control of coal mine enterprise	1091
3. Prevention and control of waste water pollution in mine area	1097
4. Prevention and control of atmospheric pollution in mine area	1111
5. Noise pollution in mine area and its control.....	1119
6. Treatment and utilization of solid waste.....	1126
7. Surface subsidence in coal mine and land reclamation	1131
8. Environment monitoring	1135
9. Evaluation of environmental quality	1138
10. Afforestation in mine area	1148
