

like smelting, is a process of removing impurities from a raw material. Kerosene was used to light lamps. It was cheap substitute for whale oil, which was harder to get. Soon there was a large demand for kerosene. People began to search for supplies of petroleum.

The first oil well was drilled by E. L. Drake, a retired railroad conductor. In 1859 he was drilling in Titusville, Pennsylvania. The whole venture seemed so impractical that onlookers called it "Drake's Folly". About a month later, Drake struck oil at a rate of about 11 barrels a day.

News of Drake's success brought on prospectors to the scene, and the early 1860's saw many miners were drilling for "black gold" all over western Pennsylvania. This boom town gold rush of 1848 in its excitement and West atmosphere. And it brought wealth to the prospectors than any gold rush.

Petroleum oil could be refined into many products. For some years, kerosene continued to be the principal one. It was sold in glass bottles to door-to-door. In the 1880's and 1890's, chemists learned how to make other petroleum products such as waxes and lubricating oils. Oil was not then used to make gasoline or heating oil.

11. The Petroleum Industry

Today, petroleum by-products have also become more efficient and cheaper to use than other fuel sources. Heat for our home, offices, and school, for example, is more and more provided by oil instead of coal. Oil is now also used to power most forms of transport. It has replaced horses and trains in many countries. Oil is also used to lubricate many different machines, including automobiles. Without lubrication, the moving parts of our machines would quickly wear out.

Another important factor in the development of the petroleum industry has been the development of new chemicals. Many products have been derived by chemists from petroleum. These include such items as plastics and fertilizers. Indeed, the increase in agriculture produced by the so-called green revolution —— could not have taken place without the use of chemicals, including not only those that enrich the soil like fertilizers, but also those that control weeds, insects, and other pests —— herbicides, insecticides, and so on.

前　　言

随着对外合作交流的发展，英语作为一种重要的交际手段，已成为人们不可缺少的工具。如何在短时间内迅速提高英语水平已成为大家日益关注的问题。既想学得快，又想学得牢，以不变应万变，顺利通过各类考试，只有通过训练才能真正掌握语言学习的基本技能。为此，我们根据多年来从事英语培训教学工作的经验，编写了《英语综合技能培养与提高》这一丛书，以帮助朋友们攻克难关，走入英语语言的自由王国。

本丛书包括词汇、语法、阅读、科普（短文翻译）和标准化模拟试题五个分册。词汇、语法和阅读三个分册着重技能培养，介绍并分析了各类题型及解题技巧，帮助读者熟悉各类考试形式和要求、掌握应试技巧、提高应试能力，此外，还配有练习题及题解，以帮助读者及时巩固所学知识。词汇分册分三、四级和五、六级词汇练习，习题配有注释、译文和词义辨析，解决了词义相近和用法相近的词给读者带来的困扰。语法分册分析了当今考试中常见的疑难点，并配以各种习题和试题，使读者通过练习轻松地掌握令人生畏的语法现象。阅读分册分单句理解和篇章理解两个部分，因为单句理解是篇章理解的基石，只有在准确地理解单个句子含义的基础上，才能做到准确地理解整个篇章的含义，该分册还选了许多优秀范文作为阅读练习材料，并配以详解。科普（短文翻译）分册采用英汉对照的体例，选材面广，趣味性强，语言精美，译文准确，可使读者通过大量阅读实践，迅速提高阅读速度及理解能力，提高英汉互译速度及水平。标准化模拟试题分册包括 20 套模拟题，分 A (5~6 级)、B (3~4 级) 两种试卷，旨在帮助读者进行全面复习及自我英语水平测试，通过强化模拟训练，从容应试，取得最佳效果。

本丛书由中国石油天然气总公司北京外语培训中心、石油大学（北京）基础系、石油大学（华东）、石油大学（广州）、北方工业大学、哈尔滨工业大学等院校编写。语法分册由江淑娟、吴松林担任主编。这套丛书适用于报考各种标准化水平考试的读者，以及大专院校师生和英语自学者，尤其适于参加各类晋职考试及四、六级英语考试的读者参考使用。

丛书在编写过程中，得到了中国石油天然气总公司北京外语培训中心司潮春主任的大力支持，北京大学英语系的王式仁教授对该丛书提出了许多宝贵意见，英国专家 Patricia Clague 及 David King 和美国专家 Justin Auld 对本丛书进行了指导与最终审定，在此一并致以诚挚的谢意。
