Preface

This volume is the proceedings of first C-MRS/MRS-K joint meeting held in Beijing, China, November 17-21, 1996, and also one of the seven-volume proceedings of Chinese Materials Conference of 1996 held in same period. The C-MRS/MRS-K joint symposia were proposed by Chinese Materials Research Society (C-MRS) and Materials Research Society of Korea (MRS-K). The object of C-MRS/MRS-K joint meetings is to exchange the information of the achievements and results on advanced materials research and development and promote the cooperation between two society and two countries in the field of materials research. The first C-MRS/MRS-K joint meeting consists of three symposia, i.e.,

1. Semiconductor Magnetic and Epitaxial Thin films
2. Magnetic Materials
3. Surface and Intersurface of Materials

More than 200 scientists, engineers and students attended this meeting, including 20 scientists and students from Korea. 245 papers were presented at the meeting by either oral and post. 193 papers have been collected in this volume after peer review process.

In order to improve the quality of the publication, all the papers in this volume were all re-edited. Due to the limit of the time the final manuscripts of the papers didn't delivered to authors for final check therefore, some mistakes may be exists. The editorial board hopes the understanding and comments from both authors and readers of this volume.
