全真模拟试卷

清华大学 侯成源 主编 山东大学 刻世橋

中国人口出版社

英语专业八级考试全真模拟试卷 SIMULATED TEST FOR ENGLISH MAJORS

---GRADE EIGHT----

01

考生注意事项

- 一、将自己的校名、姓名、学校代号、准考证号写在答题纸和作文纸上。考试结束后,把试题册、答题纸和作文纸放在桌上。教师收卷后才可离开考场。试题册、答题纸和作文纸均不得带走。
- 二、仔细阅读题目的说明。
- 三、在规定时间内答完全部试题,不得拖延时间。
- 四、PAPER ONE (I, II, II)除 I. Section D 与 II. 校对与改错为主观试题外,其他为客观试题,考生要从每题 所给的 A,B,C,D 4 个选择项中选出一个最佳答案,并按规定用 2B 铅笔在答题纸上相应字母的中部划一条 横线。正确方法是: $[A][B][\mathcal{C}][D]$ 。划线要有一定粗度,浓度要盖过红色。凡是写在试题册上的答案一律作废。每题只能选一个答案,多选作废。多项选择题只计算答对的题数,答错不扣分。

五、PAPER TWO (Part IV 和 Part V)为主观试题,要求考生用钢笔或圆珠笔把翻译和作文直接写在答题卷上。 六、如果要改动答案,必须先用橡皮擦净原来选定的答案,然后再按上面的规定重新答题。

答题提示

- 1. 本试卷是按照考试大纲的要求及近几年的考题而设计,覆盖面广,针对性强,权威性高,是考前模拟训练的 精品。
- 2. 本套试卷共10套试题,建议您每周做1套。
- 3. 自测时间可分上午、下午两个半天进行,上午考试卷一,下午考试卷二。考生要自主做题,不看参考答案。
- 4. 将心态调整到临战状态,与进考场无异。
- 5. 自测结束后,请对照标准答案,评分填好下表,并找出自己的薄弱环节,在以后的复习中重点突破。

| | 总得分 | 听力理解 | 校对与改错 | 阅读理解 | 翻译(英译汉、汉译英) | 写作 |

Part I

Reading Comprehension

(40 minutes)

Section A

Reading Comprehension

(30 minutes)

In this section there are four reading passages followed by a total of fifteefi multiple-choice questions. Read the passages carefully and then mark your answers on your Coloured Answer Sheet.

TEXT A

If you had asked me then if I would accept a job as a restaurant critic for The New York Times, or any establishment publication, I would have replied, without a second thought, "Of course not!" And not just because I did not want to think of myself as an ambitious sort, walking on my grandmother's grave. Working in restaurants was honest labor, anyone could see that. Writing about them for the mainstream press was not; it felt like joining the enemy,

But reviewing was fun, so much fun that when mainstream publishers started paying me for my opinions, I didn't do the decent thing. Before I knew it, I had stopped cooking professionally. Then I stopped cooking altogether. "She's joined the leisure class," my friends said.

I disarmed my critics by inviting them along; nobody I knew could afford to eat out and nobody refused. We went with equal amounts of guilt and pleasure, with a feeling that we were trespassing on the playgrounds of the rich.

We didn't belong in those starchy restaurants. We knew it, and when we climbed out of my rent-a-wreck, splendid in years from the Salvation Army, everybody else knew it, too. We always got the worst table. And then, because I didn't own a credit card, I had to pay in cash. The year turned into two, and three, and more. I got a credit card. I got good clothes. I was writing for increasingly prestigious publications. Meanwhile, a voice inside me kept whispering, "How could you?"

The voice is still there, yakking away. When I receive weekly letters from people who think it is indecent to write about \$100 meals while half the world is hungry, the voice yaks right along, "They're absolutely right, you elitist pig it hisses". And when it asks, "When are you going to grow up and get a real job?" it sounds a lot like my mother.

And just about then is when I tell the voice to shut up. Because when my mother starts telling me that all I'm doing with my life is telling rich people where to eat, I realize how much the world has changed.

Yes, there are still restaurants where rich people go to remind themselves that they are different from you and me. But there are fewer and fewer of them. As American food has come of age, American restaurants have changed. Going out to eat used to be like going to the opera; today, it is more like going to the movies.

And so everyone has become a critic. I couldn't be happier. The more people pay attention to what and how they eat, the more attuned they become to their own senses and the world around them.

When I remember that conversation with M. F. K. Fisher, I wish I had not been quite so gentle. When I rerun the loop in my mind, I turn to her and say this:

"No, you're wrong. A. J. Liebling had it right. All it really takes to be a restaurant critic is a good appetite."

16. Why would the author have refused the job as a restaurant critic at the very beginning?

- A) Because she thought she was more ambitious.
- B) Because she didn't think high of the job.
- C) Because she liked being a cook.

- D) Because she didn't want to criticize anyone.
- 17. Why did they go "with equal amounts of guilt and pleasure" (in paragraph 3)?
 - A) They felt guilty because they were poor, but when they did eat out, they forgot their troubles.
 - B) They felt guilty because they were not rich, yet they were spending money in the same way as the rich people do, meanwhile they got pleasure from it.
 - C) They felt guilty because they got pleasure not only from eating out, but also from going onto privately-owned land without permission.
 - D) They felt guilty because half the world is hungry, but they were eating out, and got pleasure from it.
- 18. What does the sentence "The year turned into two, and three, and more" (in paragraph 4) mean?
 - A) It means that she was a restaurant cook for many years.
 - B) It means that she enjoyed a rich life for many years.
 - C) It means that she was upset by her job of being a restaurant critic for many years.
 - D) It means that she went on and on writing as a restaurant critic for many years.
- 19. What changes have taken place to American restaurants?
 - A) they have places for both the rich and the poor.
 - B) they have more varieties of entertainment.
 - C) they have become more expensive.
 - D) they have become less expensive.
- The end of the text implies that _____
 - A) the author feels guilty of her job as a restaurant critic
 - B) the author is happy about being a restaurant critic
 - C) the author starts to approve of the job of being a restaurant critic
 - D) the author thinks that she has no appetite for a restaurant critic

TEXT B

Despite the fact that half of all married American men undergo the rite of divorce sconer or later, most of us haven't a clue on how to behave ourselves through it with grace. We think we have to automatically go to war, scorn the ex (former wives or husbands) and speak ill of those extended family members we used to call our own. It's as if

Wouldn't it be great if we could default to courtliness? If only there were a divorce Ph. D. out there to answer our questions, lay some ground rules and reveal to us the etiquette (proper behavior) of divorce—which is every bit as careful as the etiquette of courtship.

After a bitter divorce and many years to be sorry about it myself, I humbly volunteer to get the ball rolling.

Dear Dr. Divorce, I still love my first wife and find myself unable to stick up for my rights.

What's my problem?

Answer: As a duckling will imprint the first thing that feeds it, and thereafter follow around, say, the dish-washer repairman as if he were his ever-loving pa, so do first husbands and wives imprint upon each other. Of course you still love her. We all love our "first" to some degree, and she still loves you. That's what all the heat lightning is about. But that doesn't mean you can't fight for the home team. Your destinies are separate.

Dear Dr. Divorce, Jealousy isn't appropriate, is that right?

Answer: Right. Strive to get to the point where you can see the letters "TONY" on her calendar and not care, even before you realize it is not the name of a new lover but only that she is going "TO New York."

Dear Dr. Divorce, I'm used to most aspects of divorce, but the grammar still gets sticky enough to upset our child. Must I always refer to my ex in the past tense?

Answer ; Chances are she still is a graphic designer and still has brown eyes. Divorce did not make her die nor

TEM8 01-6

change her eyes to blue. As with most linguistic modifications, new behavior will follow, and your child won't have to go into mourning every time you refer to your ex.

Dear Dr. Divorce, what's the etiquette when we're thrown together?

Answer: Imagine a civilized situation. Let's say you and your ex are in a car together, driving to a prep-school interview for your child. You've packed along a cooler of snacks. The etiquette prescribes that if your ex wants a grape, you hold the bunch out without plucking one for her directly. You may proffer, in other words, but you may not pluck.

You may nibble one of her potato chips but not make a bite from her sandwich.

You may sample food from each other's forks but not sip from the same glass.

You may share a napkin but not the same tissue.

You may burp discreetly but now you must always, always, excuse yourself.

The operative principle is that you're close but not too close. Let it be a strained intimacy. The discipline of distance should be an ascetic exercise that will put you both on your best behavior.

- 21. Which of the following behavior is NOT mentioned when one gets divorced?
 - A) Behave oneself with grace.
- B) Quarrel with each other.
- C) Fight against each other.
- D) Try to be cruel to one's ex.
- 22. According to this passage, what is the impression of one's first love?
 - A) One feels it is unpleasant.
- B) One feels it is strong and warm.
- C) One feels it is unforgivable.
- D) One feels it is unforgettable.
- 23. How should one refer to one's ex in front of the children according to the text?
 - A) One should refer to one's ex in the past tense.
 - B) One should change one's language a lot when mentioning one's ex.
 - C) One should describe one's ex in a graphic form.
 - D) One should use correct grammatical sentences when talking about one's ex.
- 24. What is the operative principle when you and your ex are thrown together?

 - A) Try to behave as if nothing had happened. B) Try to show your love.
 - C) Try to be self-disciplined.
- D) Try to be comfortable with each other.

TEXT C

Notable as important nineteenth-century novels by women, Mary Shelley's Frankenstein and Emily Bronte's Wuthering Heights treat women very differently. Shelley produced a "masculine" text in which the fates of subordinate female characters seem entirely dependent on the actions of male heroes or anti-heroes. Bronte produced a more realistic narrative portraying a world where men battle for the favors of apparently high spirited, independent women. Nevertheless, these two novels are alike in several crucial ways. Many readers are convinced that the compelling mysteries of each plot conceal elaborate structures of allusion and fierce, though shadowy, moral ambitions that seem to indicate metaphysical intentions, though efforts by critics to articulate these intentions have generated much controversy. Both novelists use a storytelling method that emphasizes ironic disjunction between different perspectives on the same events as well as ironic tensions that in here in the relationship between surface drama and concealed authorities rial intention, a method I call an evidentiary narrative technique.

- 25. The primary purpose of the passage is to __
 - A) defend a controversial interpretation of two novels
 - B) explain the source of widely recognized responses to two novels
 - C) delineate broad differences between two novels
 - D) compare and contrast two novels
- 26. According to the passage, Frankenstein differs from Wuthering Heights in its __
 - A) use of multiple narrators

- B) method of disguising the author's real purposes
- C) portrayal of men as determiners of the novel's action
- D) creation of a realistic story.
- 27. Which of the following statements best exemplifies the underlined "evidentiary narrative technique"?
 - A) Telling a story in such a way that the author's real intentions are discernible only through interpretations of allusions to a world outside that of the story.
 - B) Telling a story in such a way that the reader is aware as events unfold of the author's underlying purposes and the ways these purposes conflict with the drama of the plot.
 - C) Telling a story in a way that both directs attention to the incongruities among the points of view several characters and hints that the plot has a significance other than that suggested by its mere events.
 - D) Telling a story as a mystery in which the reader must deduce, from the conflicting evidence presented by several narrators, the moral and philosophical significance of character and event.

TEXT D

The world above the forest floor can be observed by all of us. Rarely, however, do we take the time to notice the teeming life and bustling activity that occurs beneath the ground we walk on.

Of all soil-dwelling creatures, the most abundant are mites and springtails, insect-like creatures that literally eat their way through caverns of subterranean vegetation. The tiny, eight-legged mites lay their eggs on plant matter, which their larvae eat and convert into fresh soil. The bright-colored springtails are named for their ability to leap long distances during their search for decomposed plant matter to eat.

Both mites and springtails are prey to a host of soil-dwelling predators. They thus anchor one end of the food chain that extends to higher forms of forest "lowlife," such as moles that feed on earthworms.

Those mammals, in turn, dig tunnels that function as underground byways for other subterranean species. Hibernating chipmunks, turtles, and salamanders sift and mix the soil when they burrow to winter dens. Cottontails and gray foxes excavate shallow dens as sanctuary from predators and harsh weather, while gray squirrels, hiding acoms for the lean season, further blend the earth. From microbe to people, thousands of species work the land upon which all life depends.

| | . 6 | , | |
|-----|--|------|---|
| | A) Foxes and cottontails. | B) | Earthworms and ants. |
| | C) Mites and springtails. | D) | Shrews and moles. |
| 29. | According to the passage, all of the following | are | true about mites and springtails EXCEPT |
| | A) they make new soil | B) | they resemble insects |
| | C) they form the lower end of the food chain | D) | they hibernate for the winter |
| 30. | An example of predator and prey given in this | sele | ection is |
| | A) mites and springtails | B) | turtles and salamanders |
| | C) moles and earthworms | D) | gray squirrels and acorns |
| | | | |

28. The passage states that which of the following are the most numerous inhabitants of the soil?

Section B

Skimming & Scanning

(10 minutes)

In this section there are six passages followed by ten multiple-choice questions. Skim or scan them as required and then mark your answers on your Coloured Answer Sheet.

The Japanese delegation includes _____ members from four organizations.

Read the text quickly and then answer the question.

Japanese Set Down Roots in China

The Japanese delegation marked the end of its first joint venture to plant trees in China by planting some more in Beijing yesterday. The delegation comprising representatives of several Japanese organizations aims to improve the environment in China.

Yesterday, its members joined Chinese Government officials and local farmers to plant about 2 000 trees in the Sino-Japanese Friendship Memorial Forest near the Great Wall at Badaling in suburban Yanqing County.

After their efforts the delegates, led by Hideo Ichiriki, a director of the Asahi Shimbun newspaper, were taken to a meeting at the Great Hall of the People hosted by Chen Muhua, vice-Chairwoman of the National People's Congress Standing Committee.

The 10-member delegation includes representatives of the Forest Culture Association, the Nissy Green Foundation, Asahi Sun Tours and the Kumon Children's Research Institute which have donated 4.7 million yuan (\$394,000) to the Green China Fund.

Chen, who is also the chairwoman of the Green China Fund, told the meeting the country had launched six massive forest planting projects to improve the environment.

However, she added, the country had too little cash to plant its 67 million hectares of barren land.

She spoke highly of the delegation's work and hoped more foreign organizations would help China's planting campaign.

Ichiriki said his group would continue the program to make a contribution with China to improve the environment in Asia and the world.

|-------|------|-----|-------|--------|

- 32. Weight Watchers are quite good in that _____.
 - A) it provides cheap scales for its members
 - B) it distributes guide books
 - C) it tells its members exactly what and how to eat to reduce their weight
 - D) it prescribes the balanced diet
- 33. The members of Weight Watchers must
 - A) check and record his or her weight
 - B) attend the weekly meeting
 - C) discuss their problems with the counselor D) read the pamphlet on weight loss

Read the text quickly and then answer the questions.

Weight Watchers has grown in recent years from a small club to a large national organization. It has chapters in dezens of cities and includes in its membership millions of people of all ages and from all walks of life. For those who follow the rules it lays down, it has an outstanding record of loss.

Perhaps the thing that Weight Watchers does best is to tell its members exactly what and how much to eat. Members who follow the rules weight what they eat at each meal. The club sells a small, low-priced set of scales with which to weight food. The kinds and amounts of food are indicated for each meal eaten. Meals are eaten three times daily. Menus that feature a variety of dishes are also found in the Guide Book. Portions of food are identified for men, women, and youngsters. If members follow the prescribed diet exactly, they must lose weight, and most of them lose a great deal. An odd happening in the process is that many members have trouble eating all their food once they're into the program. The balanced diet more than meets their needs.

Membership in Weight Watchers requires weekly attendance. The schedule of meeting is flexible, but atten-

dance by members at one meeting per week is mandatory. A requirement at the meeting is a weight-in. Each member checks and records his or her weekly weight with the club chapter counselor. After all members have weighted in there are group sessions. Members discuss with the counselor and each other their progress and problems with weight. Much mutual encouragement is offered. The program provides lectures on nutrition by guest speakers. Films on various weight-related topics are shown. Pamphlets on weight loss, prepared by Weight Watchers and called "Modules" are distributed. These are to be read for discussion at the next meeting.

TEXT G

| First read the questions. | |
|---|----------------------------------|
| 34. The says about the onion is | |
| A) purely scientific | B) rhyming nonsense |
| C) clever verse | D) somewhat more sensible |
| 35. In the spider rhyme, the weather's breaking | could mean |
| A) a weather change for the worse | B) an improvement in the weather |
| C) the sun will break through the clouds | D) any of the above |
| | |

Read the text quickly and then answer the questions.

Ancient man attempted to change the weather by using magic. When experience taught him this was impossible, he tried to forecast weather condones. Even earlier than 1000 BC, there were weather seers in Babylon—and priests clever enough to denounce as frauds those who predicted the weather a year in advance.

Some forecasters used methods that seem to have no connection with the actual factors controlling the weather. Chickens and other animals were sacrificed and their intestines poked to find signs indicating rain or drought.

Somewhat more scientific were predictions based on vegetation: "Onion's skin very thin, mild winter coming in. Onion's skin thick and tough, coming winter cold and rough."

Insects and animals were also favorite weather clues: "When the glowworm lights his lamp, then the air is always damp." "If spiders leave their cobwebs forsake, the weather will for certain break." "If frogs remained in pools, the weather would be fine." "If they were seen on rocks, rain and cold were due." It's difficult to say whether this rhyme should be taken seriously: "Hark, I hear the asses bray. Me thinks we will have some rain today."

TEXT H

| First read the questions. |
|---|
| 36. The writer implies that |
| A) sleep is important for good mental and physical health |
| B) a light sleep is as a deep sleep |
| C) memory is improved during sleep |
| D) sleep is relatively unimportant for human being |
| 37. By the age of thirty, most people have slept for a total of more than |
| A) ten years B) twelve years C) fourteen years D) sixteen ye |

Read the text quickly and then answer the questions.

During the rest of sleep, the fatigue of the body disappears and recuperation begins. The tired mind gathers new energy; the memory improves; and annoyance and problems are in better perspective.

Some adults require little sleep; other need eight to ten hours in every twenty-four. Infants sleep sixteen to eighteen hours daily, the amount gradually diminishing as they grow older. Young students may need twelve hours; university students may need ten. A worker with physically demanding job may also need ten, whereas an executive working under great pressure may manage on six to eight. Many famous people are reputed to have required little

TEM8 01-10

sleep. Napoleon Bonaparte, Thomas Edison, and Charles Darwin apparently averaged only four to six hours a night.

Whatever your individual need, you can be sure that by the age of thirty you will have slept for a total of more than twelve years. By that age you will also have developed a sleep routine; a favorite hour, a favorite bed, a favorite posture, and a formula you need to follow in order to rest comfortably.

Investigations have tried to find out how long a person can go without sleep. Several people have reached more than 115 hours—nearly five days. Whatever the limit, it is absolute. Animals kept awake for from five to eight days have died of exhaustion. The limit for human beings is probably about a week.

TEXT I

First read the questions.

- 38. An IQ of 74 would, on most current intelligent scales, classify an individual as ______
 - A) 6 percent below dull normal
- B) borderline between dull normal and mentally retarded

C) dull normal

- D) mentally defective
- 39. If an IQ of 110 or better is desirable as minimum equipment for college work, and 1 000 000 persons graduate from high school in a given year, how many would you expect to be excluded from college, other factors not controlling your calculations?
 - A) 750 000.
- B) 500 000.
- C) 250 000.
- D) 100 000.

Read the text quickly and then answer the questions.

The rating assigned to an IQ depends upon the test from which it was derived. For most current intelligence scales the IQ range $90 \sim 10$ includes approximately 50 percent of the population and is accordingly interpreted as representing average intelligence. IQ's of $110 \sim 120$, which include some 16 percent, are classified as bright normal IQ's of $120 \sim 130$ (about 7 percent) as superior; and IQ over 130, the top of 2 percent, as very superior. Comparably, IQ of $80 \sim 90$ (approximately 16 percent) are classified as dull normal; IQ's of $70 \sim 80$ (6 percent) as borderline, and IQ's below 70 ($2 \sim 3$ percent) are usually considered mentally retarded or defective. These limits are only approximate; other factors have to be taken into consideration when classified a person.

TEXT J

First read the question.

- 40. A note with a frequency of 512 vibrations per second would be
 - A) pleasing

- B) unpleasant
- C) indeterminate as to its quality
- D) hard to hear because of the high frequency

Read the text quickly and then answer the question.

Without attempting a rigorous definition, we can define music generally as a pleasing combination of sounds. Oddly enough, physicists tell us that notes which make harmonious combination have frequencies (number of vibrations per second) that can be expressed in the ratio of small whole numbers. For example, the octave consists of two tones whose frequencies have the ratio 2:1. Another harmonious combination is the fifth, whose frequencies ratio is 3:2. One of the most pleasing combination of all is the major chord consisting of three tones having a frequency ratio of 4:5:6. An example may serve to show how this works. The C major chord is made up of the notes C, E, and G. The frequencies of these notes (in the physical scale used by physicists) are 256,320, and 384 vibrations per second respectively. If each of these frequencies is divided by 64, the resulting numbers are 4, 5, and 6. These notes, therefore, are in the ratio of 4:5:6. In a similar matter, the minor chords are made up of notes in the ratio of 10:12:15. Now let's investigate a discordant combination of notes. If F and E are played together too often, most musicians rapidly lose their audience, these notes are in the ratio 853:1 600. The fact that F and E are not in the ratio of small whole numbers seems to make them sound discordant to the human ear.

TIME LIMIT: 120 MIN.

Translation

(60 minutes)

Section A Chinese to English

Translate the following boldfaced part of the text into English. Write your translation on ANSWER SHEET THREE.

我怎么做起小说来?——这一来由,已经在前面约略说过了。这里还应该补叙一点的,是当我留心文学的时候,情形和现在很不同:在中国,小说不算文学,做小说的也决不能称为文学家,所以并没有人想在这一条道路上出世。我也并没有要将小说抬进(文苑)里的意思,不过想利用他的力量,来改良社会。

但也不是自己想创作,注重的倒是在介绍,在翻译,而尤其注重于短篇,特别是被压迫的民族中的作者的作品。因为那时正盛行着排满论,有些青年,都引那叫喊和反抗的作者为同调的。

Section B English to Chinese

Translate the following text into Chinese. Write your translation on ANSWER SHEET THREE.

We did not base our system on property but opportunity—which meant we based it not on stability but on mobility. The more things changed, that is, the more rapidly the wheel turned, the steadier we would be. The conventional picture of class politics is composed of the Haves, who want a stability to keep what they have, and the Have-Nots, who want a touch of instability and change in which to scramble for the things they have not. But Americans imagined a condition in which speculators, self-makers, runners are always using the new opportunities given by our land. These economic leaders (front-runners) would thus be mainly agents of change. The nonstarters were considered the ones who wanted stability, a strong referee to give them some position in the race, a regulative hand to calm manic speculation; an authority that can call things to a halt, begin things again from compensatorily staggered starting lines.

Part V Writing (60 minutes)

We now face a keen shortage of talent, but one batch of gifted people after another have gone abroad. A handful of people go aboard to seek a comfortable life. But most Chinese intellectuals emigrate because they cannot bring their talent into full play in their motherland.
