前 言

听说读写作为语言技能的四个方面,缺一不可。而“写”作为技能之一,又是重中之重,它反映的是学生实际语言水平的一种综合能力,而在中国目前的大学英语教学中,由于缺乏必要的写作实践,学生们的写作水平普遍较低。

笔者曾多次参加四六级考试的作文批改工作,非常了解学生们四六级写作水平。根据笔者的经验,目前参加四六级考试的学生在写作中普遍存在的问题如下:其一,言之无物。纵使心中万语千言,却不知用英语如何表达;其二,语言不地道,中式英语占据很大篇幅;其三,下笔盲从,文章篇章结构松散,主题思想不鲜明;其四,语法、标点符号及拼写错误比比皆是,表达平白,句型句式简单。有鉴于此,笔者根据多年来的教学体会,针对学生经常出现的上述问题,精心收集并编写了这本实用性强、题材新颖、体裁多样的即学即用的参考书。

实用性和针对性强是本书的一大特点;每篇作文的点评内容都是四六级考试中作文批改时的采分点。此外,在具体语篇结构安排上,对每篇范文进行了点评,如:清晰的篇章结构;精彩的长句、难句翻译;精选的词语造句。本书的写作宗旨是让读者读完每篇范文后,学习、借鉴该篇作文的篇章结构、语言表达以及词语搭配,从而达到从容驾驭语言的功效。

本书由齐丽霞主编,副主编:傅静媛,参加编写的人员还有李明秋、罗华、黄凌宇、倪锡英、栗红、刘京、王宏、董岩、韩齐、刘卓、李君等人。

作者在编撰的过程中难免出现不妥之处,请诸位同仁及广大英语学习爱好者指正。

The Advantages and Disadvantages of China's Entry into the WTO

中国加入世贸组织的得与失

China's entry into the WTO is widely expected. However, every coin has its two sides, it will bring China advantages as well as disadvantages.

We Chinese people cherish this chance and give it a warm welcome. Firstly, it will quicken China's overall economic reform, reconstruct our national economic structure. Secondly, it will attract much more foreign fund to China and, by setting up more joint ventures and foreign-funded enterprises, create countless job opportunities for job hunters. Lastly, it will benefit our light industry and tourism industry.

However, some people are still scared by the great risks and challenges after China enters the WTO. First, they assume that it will exert tremendous influence on our national industry such as car, telecom and many other industries. Second, they even fear that the great pressure will leave more and more people jobless. Worst of all, it will intensify the fierce competition in the global economic markets.

In my opinion, I confirm that the advantages far outweigh the disadvantages. With the industries and agriculture becoming more mature in the global markets, the post-WTO China will

become unprecedentedly prosperous.

Man and Nature

人类与自然

It is self-evident that man depends on nature for survival and development. Almost everything man possesses derives from nature. It is nature that has shaped man himself and his civilizations.

Ironically, the history of the development of human civilizations is also a history of man's increasing destruction of nature. In primitive societies, people were completely at the mercy of their natural environment. In the agricultural era, however, large scales of land cultivation and prodigious irrigation projects caused serious deforestation. The damage to natural environment and ecosystem has even been much greater since the "Industrial

Revolution". Our land, rivers, oceans and air have now been seriously polluted by poisonous gases, waste drainage, and other pollutants released from factories.

Man has damaged the environment almost to the extent of ruining his own living space. This has been frighteningly evidenced by the revenges nature has wreaked on man in return; the greenhouse effects, acid rains and the gradual depletion of the ozone layer in the atmosphere. If we want to continue to live in this world, we had better try the best we can to protect our natural environment, for the maintenance of a harmonious relationship with nature is a matter of life and death to us.
