# FINAL PROGRAM AND ABSTRACTS

## 2nd World Congress of Chemical Engineering and World Chemical Exposition

Montréal, Canada  
1981 October 4-9

IX Interamerican Congress  
of Chemical Engineering

31<sup>st</sup> Canadian Chemical  
Engineering Conference

VILLE DE MONTRÉAL  
CABINET DU MAIRE

MESSAGE DU MAIRE JEAN DRAPEAU

C'est toujours un plaisir pour le Maire de Montréal de souhaiter la bienvenue à ceux qui viennent dans notre ville pour y tenir leur congrès; c'est un plaisir et un honneur quand il s'agit du IIe Congrès mondial du génie chimique, organisé sous les auspices de trois fédérations prestigieuses d'Amérique, d'Europe et d'Asie, qui ont délégué ici leurs représentants parmi les plus qualifiés. Je félicite le comité organisateur de votre congrès d'avoir choisi Montréal et d'avoir mis au point un programme très dense, qui témoigne, d'une part, de l'importance de la chimie à notre époque, de l'industrie chimique et paracimique surtout, sur le plan technique et économique, d'autre part, de la haute conscience que vous avez de votre mission.

Quand, surmenés par des heures de cours intensifs, d'exposés, de séances techniques ou d'information, vous voudrez vous égayer, ou à tout le moins vous détendre, sachez que Montréal vous offre la possibilité. Vous êtes des congressistes; faites-vous touristes pendant quelques heures par jour. Vous constaterez que Montréal vaut la peine d'être visité. Ville de contrastes, fondée par les Français en 1642, mais en partie anglophone et comptant de nombreuses minorités ethniques; deuxième ville française du monde, cependant et, pour cette raison, trait d'union entre l'Europe et l'Amérique, point de rencontre de deux grandes civilisations; au contact d'une troisième, celle des États-Unis; ville où se sont déroulées depuis 1967 trois manifestations internationales prestigieuses; aussi, la partie récréative de votre programme comprend-elle la visite de pavillons de l'Exposition universelle, des Floralis, du stade olympique, "l'un des plus beaux, sinon le plus beau du monde", écrit Daniel Costelle dans l'*Histoire des Jeux Olympiques*. Bien d'autres endroits intéressants à visiter vous attendent.

Je souhaite que votre congrès soit une réussite sur le plan professionnel et culturel. Sachez d'avance que, pour avoir réuni ici tant de gens distingués, il restera dans la mémoire des Montréalais que je représente ici comme l'un des plus marquants qui auront été tenus à Montréal.

Le maire de Montréal

*Jean Drapeau*

VILLE DE MONTRÉAL  
CABINET DU MAIRE

MESSAGE FROM MAYOR JEAN DRAPEAU

It is always a pleasure for the mayor of Montréal to welcome to our city visitors who come here to attend a congress, a pleasure that becomes an honour when that event is the 2nd World Congress of Chemical Engineering, held under the auspices of the three major federations active in America, Europe and Asia and bringing together the foremost representatives of those bodies. The organizing committee of your congress deserves to be congratulated for its selection of Montréal and for the development of a very compact agenda in keeping, on the one hand, with the world importance of chemistry at the economic and technological levels - with special emphasis on the chemical and para-chemical activities - and, on the other hand, with your own very conscientious approach to your mission.

After many hours of taxing lectures, conferences, technical or information meetings, you may seek relaxation and entertainment: this is one field where Montréal has a great deal to offer. So, forget the congress for a few hours to become tourists in our fair city: you will soon find that it is well worth a visit. Montréal is a city of many faces, having been founded by the French in 1642 and is fashioned with time by the English and many ethnic communities. It is the second French-speaking city of the world and, as such, a valuable link between Europe and America, standing at the crossroads of two major civilizations and in close contact with still another, that of the United States. It is a city which, since 1967, has gained world stature through three highly prestigious international events: this is why your recreational activities include a visit to the Expo 67 pavilions, the site of the 1980 Floralis and the Olympic stadium "one of the most beautiful if not the most beautiful in the entire world" in the words of Daniel Costelle in his "*Histoire des Jeux Olympiques*". Many other areas of our city are also of considerable interest to visitors.

I sincerely hope that your deliberations will be successful both professionally and culturally. In any case, because it has brought together so many distinguished participants, this event will remain a most memorable one for all Montréalers whom it is my honour to represent.

*Jean D. Drapeau*  
Mayor of Montréal

VILLE DE MONTRÉAL  
CABINET DU MAIRE

MENSAJE DEL ALCALDE DE MONTREAL

Siempre es un orgullo para el Alcalde de Montréal el desear una cordial bienvenida a todos los que vienen a nuestra ciudad para celebrar sus congresos.

En esta ocasión es un placer y un honor recibir al Segundo Congreso de Ingeniería Química organizado bajo los auspicios de tres federaciones prestigiosas de América, de Europa y de Asia que han escogido sus representantes de entre los más calificados. Yo felicito al Comité Organizador de este Congreso por haber preferido Montréal y por haber estructurado un programa tan interesante, que subraya por una parte la importancia de la química en nuestra época, y económico, y por otra parte la alta conciencia que todos ustedes tienen de su misión.

Cuando extenuados por los cursos intensivos o agobiados por las reuniones técnicas o de información, quisieran ustedes divertirse o cuando menos relajarse, deben saber que Montréal les ofrece la posibilidad. Ustedes son Congresistas, transformense en turistas durante algunas horas cada día y constataren que Montréal vale la pena de disfrutarse.

Ciudad de contrastes, fundada por los Franceses en 1642, en parte de habla Inglesa y hogar de numerosos grupos étnicos, es la segunda ciudad de habla francesa del Mundo y por esta razón la liga entre Europa y América, punto de contacto entre dos grandes civilizaciones y vecina de una tercera, los Estados Unidos. Ciudad donde se han desarrollado desde 1967 tres manifestaciones internacionales de gran prestigio.

La sección recreativa de su programa de actividades comprende la visita de los Pabellones de la Exposición Universal, Los Floralis, el Estadio Olímpico, "uno de los más hermosos si no el más hermoso del Mundo" según escribe Daniel Costelle en la *História de los Juegos Olímpicos*, además de otros muchos lugares interesantes que esperan la visita de ustedes.

Les deseo que este Congreso sea un éxito en el aspecto profesional y cultural, sepan de antemano que por haber reunido aquí tantas personalidades distinguidas, quedará en la memoria de los habitantes de Montréal que yo represento, el orgullo de haberlos tenido con nosotros.

*Ramón V. Díaz*  
Alcalde de Montréal

## WELCOME TO MONTREAL

As the host of this World Congress, the Interamerican Confederation of Chemical Engineering takes a special pleasure in welcoming you to what we believe will truly be one of the memorable events of your career. Starting with the very choice of cosmopolitan Montreal as the site of this meeting, everything about the arrangements has been carefully planned to combine a tremendously diversified technical program of the highest caliber with equally enticing and enjoyable social activities. On behalf of the chemical engineers from North, Central and South America, who constitute our Confederation, heartiest greetings to our fellow engineers from all over the world.

W.H. GAUVIN

President  
Interamerican Confederation  
of Chemical Engineering

The Canadian Society for Chemical Engineering is most delighted to organize this 2nd World Congress of Chemical Engineering. We think that the Technical Program is one of the best in the history of chemical engineering. And it is truly international, with papers from 55 countries and 6 continents. The outstanding general sessions linking chemical engineering to economic and social development substantiate the Congress theme "Chemical Engineering for World Development".

We are particularly pleased to welcome visitors from abroad. We hope you find the Congress stimulating; and that you enjoy the excellent social program. As Canadians we hope that you have the time to see something of our country. And particularly that you experience the "joie de vivre" of Montreal.

J.M. STEWART

President  
Canadian Society  
for Chemical Engineering

It is with the greatest pleasure that I welcome you to Montreal for the 2nd World Congress of Chemical Engineering which coincides with the IX Interamerican Congress and the 31st Canadian Conference of Chemical Engineering. Two primary objectives were defined in the early planning stage of this Congress: the first was to publicize and have the participation of chemical engineers world-wide. The second objective was to provide a technical conference of the highest quality. I am proud to report that both these objectives have been achieved as evidenced by the program with 1200 presentations from 55 countries.

This was possible through the efforts of many persons (organizing committee members, theme coordinators, session chairpersons and federation and society representatives) who spent uncounted hours to make this Congress successful. I also acknowledge the impressive financial support from industry and government agencies.

I hope you enjoy your stay in Montreal and that the 2nd World Congress will be a most memorable event for you.

PIERRE CARREAU  
President  
2nd World Congress  
of Chemical Engineering

## BIENVENUE A MONTREAL

En tant qu'hôte de ce Congrès mondial, la Confédération interaméricaine du génie chimique se fait un grand plaisir de vous accueillir à ce que nous croyons sera l'un des événements mémorables de votre carrière! En commençant par le choix même de Montréal, ville cosmopolite par excellence, comme lieu de rencontre pour le Congrès, tout a été préparé avec soin afin d'associer une gamme d'activités sociales aussi attrayantes qu'agréables à un programme technique hautement diversifié. Au nom de tous les ingénieurs chimistes de l'Amérique du Nord, Centrale et du Sud qui forment notre Confédération, salutations cordiales à tous nos confrères ingénieurs du monde entier!

W.H. GAUVIN

Président  
Confédération interaméricaine  
du génie chimique

La Société canadienne du génie chimique est enchantée d'accueillir ce 2<sup>e</sup> Congrès mondial du génie chimique. Nous croyons que le programme technique est l'un des meilleurs de toute l'histoire du génie chimique. Et c'est vraiment un événement international, avec des communications venant de 55 pays et de 6 continents. Les séances particulières qui font le lien entre le génie chimique et les sciences économiques et le progrès social répondent bien au thème du Congrès "Le génie chimique au service du développement mondial".

Il nous fait particulièrement plaisir de souhaiter la bienvenue aux visiteurs de l'étranger. Nous espérons que le Congrès sera pour vous une expérience stimulante et que vous apprécierez l'excellent programme social. En tant que Canadiens, nous espérons que vous aurez le temps de visiter certaines parties de notre pays et particulièrement de découvrir la "joie de vivre" de Montréal.

J.M. STEWART

Président de la Société  
Canadienne du Génie Chimique

J'ai le vif plaisir de vous souhaiter la bienvenue à Montréal, à l'occasion du 2<sup>e</sup> Congrès mondial du génie chimique, qui coïncide avec le IXe Congrès interaméricain et la 31<sup>e</sup> Conférence canadienne du génie chimique. Dès le début de l'organisation de ce Congrès, nous nous étions fixés deux objectifs primordiaux: d'abord de faire connaître cet événement et d'assurer la participation des ingénieurs chimistes de tous les coins du monde; de plus, nous voulions offrir un programme de la plus haute qualité. Je crois que nous avons relevé le défi, tel qu'en témoigne le programme ci-joint, comprenant quelques 1200 communications venant de 55 pays.

Ce Congrès n'aurait pu être un succès sans les efforts soutenus de plusieurs personnes (membres du comité d'organisation, coordinateurs et présidents de séances, représentants de fédérations et de sociétés savantes). Je me dois également de souligner l'aide financière considérable reçue de l'industrie et d'agences gouvernementales.

J'espère que vous apprécierez votre séjour à Montréal et que le 2<sup>e</sup> Congrès mondial sera pour vous un événement mémorable.

PIERRE CARREAU  
Président  
2<sup>e</sup> Congrès Mondial  
du Génie Chimique

## BIENVENIDOS A MONTREAL

Como anfitrión de este Congreso, la Confederación Interamericana de Ingeniería Química se siente especialmente complacida en extenderles la bienvenida a lo que creemos será uno de los acontecimiento más recordados en vuestra carrera. Comenzando por la selección de la ciudad cosmopolita de Montreal como sitio de esta reunión, todo lo concerniente a su organización ha sido cuidadosamente planeado para combinar una tremenda diversificación en el programa técnico del más alto calibre con actividades sociales igualmente atractivas y agradables. De parte de los ingenieros químicos de Norte, Centro y Sud América, quienes constituyen nuestra Confederación, extendemos los más cordiales saludos a nuestros colegas de todo el mundo.

W.H. GAUVIN

Presidente  
Confederación Interamericana  
de Ingeniería Química

La Sociedad Canadiense de Ingeniería Química se complace en auspiciar este 2<sup>o</sup> Congreso Mundial de Ingeniería Química. Creemos que el Programa Técnico es uno de los mejores en la historia de la ingeniería química. Es verdaderamente internacional, ya que más de 55 países de 6 continentes están representados. Las importantes sesiones generales, que relacionan la ingeniería química al desarrollo económico y social, fundamentan el tema del Congreso: "Ingeniería Química para un Mundo en Desarrollo".

Nos es particularmente grato dar la bienvenida a nuestros visitantes. Esperamos que encuentren el Congreso estimulante y que disfruten del excelente programa social. Como Canadienses esperamos que ustedes tengan tiempo de ver algo de nuestro país, y, particularmente, que experimenten la "joie de vivre" de Montreal.

J.M. STEWART

Presidente  
Sociedad Canadiense  
de Ingeniería Química

Tengo el gran placer de darles la bienvenida a Montreal en la ocasión del 2<sup>o</sup> Congreso Mundial de Ingeniería Química, que coincide con el IX Congreso Interamericano y la 31<sup>a</sup> Conferencia Canadiense de Ingeniería Química. Al comienzo de la organización de este Congreso nos fijamos dos objetivos primordiales. El primero, dar amplia difusión a este acontecimiento y asegurar la participación de ingenieros químicos de todas partes del mundo. Segundo, ofrecer un programa de la más alta calidad. Creo que hemos superado estos objetivos como lo atestigua el programa adjunto que contiene unas 1200 comunicaciones provenientes de 55 países.

Este congreso no hubiese sido posible sin el gran esfuerzo de numerosas personas (miembros del comité organizador, coordinadores y presidentes de sesiones, representantes de federaciones y sociedades científicas). Debo igualmente subrayar la considerable ayuda financiera recibida de parte de la industria y de oficinas gubernamentales.

Espero que disfruten su estadía en Montreal y que el 2<sup>o</sup> Congreso Mundial sea para ustedes un acontecimiento inolvidable.

PIERRE CARREAU  
Presidente  
2<sup>o</sup> Congreso Mundial  
de Ingeniería Química

## ORGANIZING COMMITTEE

**President, 2nd World Congress**  
Professeur Pierre Carreau  
Ecole Polytechnique de Montréal

**President, Interamerican Confederation of Chemical Engineering**  
Dr. William H. Gauvin  
Noranda Research Centre

**Program Chairman**  
Professor Musa R. Kamal  
McGill University

**Vice-President, International**  
Professor W.J. Murray Douglas  
McGill University

**Vice-President, Operations**  
Dr. George R. Kubanek  
Noranda Research Centre

**Vice-President, Finance**  
Mr. Eric Jones  
Noranda Research Centre

**Treasurer**  
M. Georges L. Bata  
Institut de Génie des Matériaux

**Exposition Chairman**  
**Continuing Education Chairman**  
Dr. Michael M. Avedesian  
Noranda Research Centre

**Publicity Chairman**  
Dr. Keith M. Thompson  
Pulp and Paper Research Institute of Canada

**Secretary**  
Professeur Frank Ajersch  
Ecole Polytechnique de Montréal

**Congress Secretariat**  
Mr. Barry Bockus  
Canadian Society for Chemical Engineering

## PROGRAM COMMITTEE

**Chairman**  
Professor Musa R. Kamal  
McGill University

**Communications**  
Dr. R.H. Crotogino  
Pulp and Paper Research Institute of Canada

**Proceedings**  
Professor Martin E. Weber  
McGill University

**Poster Sessions**  
Professeur Claude Chavarie  
Ecole Polytechnique de Montréal

Mr. R. Burnside  
Pulp and Paper Research Institute of Canada

**Student Program**  
Dr. W. Ian Patterson  
Ecole Polytechnique de Montréal

**Secretary**  
Mrs. Karen W. Brown  
McGill University

1985 — XI Congreso Montevideo, Uruguay

### Acknowledgement

The Organizing Committee would like to thank all those volunteers and others who have worked to make the Congress a success, but whose names could not be included for lack of space.

### Remerciements

Le comité organisateur voudrait remercier tous ceux qui ont contribué au succès de ce Congrès. Le manque d'espace nous empêche malheureusement de les mentionner individuellement.

### Agradecimiento

El Comité Organizador quisiera agradecer a todos aquellos que han hecho posible el éxito del Congreso y cuyos nombres han sido omitidos por falta de espacio.

## SERVICES

### Message Center

Messages can be relayed to Congress participants by calling the following Congress number:

(514) 866-4131

Messages received at this number will be posted at a booth located on the convention floor of the Queen Elizabeth Hotel. This service will be available during the following periods:

Sunday October 4                    15:00 – 19:00  
Monday – Thursday                9:00 – 18:00

### Congress Information Center

Need to know where and when your committee meeting is being held? This and any other information on Congress activities is available at the Congress information center located on the convention floor of the Queen Elizabeth Hotel and open during the following hours:

Sunday October 4                    15:00 – 19:00  
Monday – Thursday                9:00 – 18:00

### Tourist Information Center

What to do and what to see in and around Montreal? Brochures and information will be available at a self-service counter on the convention floor of the Queen Elizabeth Hotel.

### Congress Ticket Counter

It is strongly recommended that tickets for Congress events be purchased at registration time. However additional tickets may be purchased, if available, at a counter on the convention floor of the Queen Elizabeth Hotel. Ticket refunds may be obtained at this counter up to 48 hours prior to the event, when our contractual obligations allow. The refund will be at the price listed for advance registration. This counter is open during the following hours:

Sunday October 4                    15:00 – 19:00  
Monday – Wednesday                9:00 – 18:00

### Proceedings Purchase and Mailing

Congress participants will receive one ticket for each proceedings volume ordered at registration time. (Free volume and purchased volumes). These tickets should be exchanged later for the corresponding volumes at a counter located on the convention floor of the Queen Elizabeth Hotel. Additional volumes can also be purchased directly from this counter if available.

It is also possible for Congress participants to have their volumes shipped back home. Arrangements for packing and mailing should be made at the purchase counter. As Congress participants may need their volumes until the end of the Congress, this service will be extended until Friday, October 9. The counter will be open during the following periods:

Monday – Wednesday                9:00 – 16:00  
Thursday and Friday                8:00 – 18:00

### Currency and Exchange Facilities

The Canadian dollar is legal tender in Canada but the U.S. dollar is accepted almost everywhere at the prevailing rate of exchange.

Foreign currencies may be exchanged at the exchange service located to the east of the lobby of the Queen Elizabeth Hotel (08:30 – 17:30 Monday through Friday). Several banks will also exchange some foreign currencies. The Guardian Trust, 618 St. Jacques will exchange most foreign currencies.

## INFORMATION GENERALE

### Bureau des messages

Les messages pourront être transmis aux congressistes en appelant au numéro suivant:

(514) 866-4131

Les messages ainsi reçus seront affichés sur un babillard spécifique à l'étage du Congrès de l'hôtel Reine Elizabeth. Ce service sera disponible aux périodes suivantes:

Le dimanche 4 octobre            15:00 – 19:00  
Lundi à jeudi                      9:00 – 18:00

### Centre d'information du Congrès

Un centre est ouvert à l'étage du Congrès (hôtel Reine Elizabeth) pour faire part des diverses activités ou réunions de comités ainsi que l'endroit ou la salle qui est réservée à ces fins. Il sera ouvert aux heures suivantes:

Le dimanche 4 octobre            15:00 – 19:00  
Lundi à jeudi                      9:00 – 18:00

### Information touristique

Des brochures et renseignements sur les activités et les visites recommandées seront disponibles à l'étage du Congrès de l'hôtel Reine Elizabeth.

### Comptoir des billets

On recommande fortement de se procurer les billets pour les diverses activités du Congrès lors de l'inscription. Toutefois des billets pourront être obtenus, lorsque disponibles, à ce comptoir situé à l'étage des congrès de l'hôtel Reine Elizabeth. Des remboursements se feront aux prix de la pré-inscription dans les 48 heures précédentes et si nos obligations contractuelles le permettent. Ce comptoir sera ouvert aux heures suivantes:

Le dimanche 4 octobre            15:00 – 19:00  
Lundi à mercredi                9:00 – 18:00

### Achat des compte-rendus

Les congressistes recevront 1 ticket par volume des compte-rendus commandés lors de l'inscription (volumes inclus dans frais d'inscription et achetés). Ces tickets seront échangés contre le ou les volumes requis à un comptoir situé à l'étage des Congrès de l'hôtel Reine Elizabeth. Des volumes additionnels pourront aussi être obtenus directement à ce comptoir.

Il est aussi possible de faire envoyer ces volumes par courrier. Des arrangements devront être pris pour préparer les paquets et les affranchir au comptoir d'achat. Ce service sera offert jusqu'au vendredi 9 octobre:

Lundi à mercredi                9:00 – 16:00  
Jeudi et vendredi                8:00 – 18:00

### Devises et bureau de change

Le dollar canadien a cours légal au Canada, mais le dollar U.S. est accepté presque partout au taux de change courant. Les devises étrangères pourront être changées au bureau de change situé tout près de l'hôtel Reine Elizabeth (08:30 – 17:30, du lundi au vendredi). Plusieurs banques acceptent quelques devises étrangères. On peut changer presque n'importe quelles devises étrangères au Guardian Trust, 618 St. Jacques.

## SERVICIOS

### Centro de Mensajes

Para enviar mensajes a los participantes en el congreso debe llamarse al siguiente número:

(514) 866-4131

Los mensajes que se reciban en este número se anunciarán en una cabina ubicada en el piso de la convención del Hotel Queen Elizabeth. Este servicio podrá utilizarse en los siguientes períodos.

Domingo, 4 de Octubre            15:00 – 19:00  
Lunes a Jueves                    9:00 – 18:00

### Centro de Información del Congreso

Necesita saber cuando y donde se realizará su reunión de Comité? Esta y cualquier otra información acerca de las actividades del Congreso puede obtenerse en el Centro de Información del Congreso ubicado en el piso de la convención del Hotel Queen Elizabeth, que permanecerá abierto durante las horas siguientes:

Domingo, 4 de Octubre            15:00 – 19:00  
Lunes a Jueves                    9:00 – 18:00

### Centro de Información Turística

Qué hacer y qué ver en Montreal y sus proximidades? La información necesaria estará a su disposición en la mesa de auto servicio en el piso de la convención del Hotel Queen Elizabeth.

### Mesa de Tickets del Congreso

Recomendamos a los participantes reservar las entradas para todas las funciones en el momento de la inscripción. Sin embargo, en caso de haber disponibilidad, es posible adquirir tickets adicionales en la mesa del piso de la convención del Hotel Queen Elizabeth. Devoluciones también pueden efectuarse en esta mesa con 48 horas de anticipación cuando los contratos lo permitan. La devolución se efectuará precio de inscripción anticipada. Esta mesa está abierta con el siguiente horario:

Domingo, 4 de Octubre            15:00 – 19:00  
Lunes a Miércoles                9:00 – 18:00

### Compra y Envío de los Anales

Los participantes recibirán un boleto por cada volumen de los anales que haya sido solicitado en el momento de la inscripción. (Volumen gratis y volúmenes comprados). Estos boletos deben cambiarse posteriormente por los volúmenes correspondientes en la mesa ubicada en el piso de la convención del Hotel Queen Elizabeth. En esta mesa también pueden comprarse volúmenes adicionales si los hubiera disponibles.

Los congresales pueden solicitar el envío de los volúmenes a su domicilio. Los arreglos para empaque y envío deben realizarse en la mesa de compra. Este servicio se extenderá hasta el Viernes 9 de Octubre para permitir el uso de los volúmenes durante el Congreso. La mesa de compra operará en los períodos siguientes:

Lunes a Miércoles                9:00 – 16:00  
Jueves y Viernes                8:00 – 18:00

### Cambio de Moneda

La moneda legal en Canadá es el dólar Canadiense, pero U.S. dólares se aceptan casi sin excepción en todas los lados, al cambio del día.

En el servicio de cambio inmediato al Hotel Queen Elizabeth es posible cambiar moneda extranjera (08:30 – 17:30, Lunes a Viernes). Diversos bancos también cambian moneda extranjera, El Guardian Trust, de 618 St. Jacques cambia casi todo tipo de moneda.

### Admission to Congress Sessions

Admission to the technical sessions will be by Congress registration badge only. Admission to the special events and tours will be by ticket only. Tickets for special events and for tours, if still available, may be purchased at the Congress Ticket Counter.

### Press Headquarters

The Matapedia Room of the Queen Elizabeth Hotel will be available to members of the press from 12:00 Sunday, October 4, 1981 to 17:00 Thursday, October 8, 1981.

### STUDENT PROGRAM

Students are especially invited to the 2nd World Congress and a special program has been organized. This program includes presentations of the winning papers in the student contest (Sessions 18.1 and 18.2) and a session on career opportunities and development in Chemical Engineering (Session 18.3) as well as a number of industrial visits.

The special events feature a Student Mixer on Sunday, October 4, 1981, a Luncheon on Tuesday, October 6, 1981 and the Student Party on Wednesday evening, October 7, 1981 with Ecole Polytechnique and McGill University acting as hosts.

The student registration will give access to all Congress sessions. Student identification will be required.

### HOUSES' PROGRAM

The Hospitality Lounge, St. Charles, is located on the Convention floor of the 7:00pm Elizabeth Hotel. This lounge will be open by Badge only, to registrants in the houses' program on Sunday, October 4, 13:00 to 17:00 and on Monday, October 5 through Thursday, October 8, 8:30 to 17:30. Telephone, information service, sale of tickets for sport and cultural events, general information on 12:30 restaurants, shopping and "how to get there" in the Montreal area, as well as coffee and cookies, will be available.

17

### Admission au Congrès

L'admission aux sessions techniques sera permise aux détenteurs d'un macaron d'inscription et celle aux autres activités se fera sur présentation de billets. Ces billets peuvent être obtenus lors de l'inscription ou sur place jusqu'à épuisement de ces derniers.

### Centre de la presse

La salle Matapedia du Reine Elizabeth est réservée pour les agents d'information, les journalistes, photographes et personnel de télévision du dimanche 4 octobre à 12:00 jusqu'au jeudi 8 octobre à 17:00.

### PROGRAMME POUR ETUDIANTS

Une invitation toute particulière est lancée aux étudiants de participer à ce 2<sup>e</sup> Congrès mondial et un programme spécial a été créé à cette fin. Ce programme comprend la présentation des solutions gagnantes dans le concours entre étudiants, (sessions 18.1 et 18.2) un colloque sur les carrières et le développement en génie chimique (la session 18.3) et un certain nombre de visites industrielles.

Des activités sociales ont aussi été prévues, tels un cocktail le dimanche 4 octobre, un déjeuner le mardi 6 octobre et une réception le mercredi soir 7 octobre offerte par l'Ecole Polytechnique et l'Université McGill.

L'inscription donne droit à toutes les présentations. La carte d'étudiant sera requise.

### PROGRAMME D'ACTIVITES POUR LES CONJOINTS

Le salon de Réception St. Charles situé sur le même étage que les salles de conférence du Reine Elizabeth sera ouvert le dimanche 4 octobre de 13:00 à 17:00, et de 08:30 à 17:30 du 5 au 8 octobre, à l'intention de ceux qui s'inscrivent à ce programme. On pourra y obtenir des billets pour les activités culturelles et sportives, des renseignements sur les restaurants, magasins, transports etc. Le café avec biscuits sera servi.

### GALA

Le mercredi 7 octobre                  19:30 – 23:30  
Activité 03: Soirée de gala québécois

Des cocktails et un buffet pour gourmet seront servis, vin inclus, dans un décor très québécois. Vous appréciez votre soirée grâce au trio d'accordéonistes Bibi la Crème et à la chanteuse Carole Cloutier. L'excellent groupe de danse folklorique, "Les Sortilèges" vêtus des costumes authentiques du temps, présentera les meilleures danses du répertoire québécois, auxquelles, on vous demandera de participer. Finalement la soirée se terminera avec une heure de danse au son de l'orchestre de Johnny Monti. Venez et participez à la joie de vivre à la québécoise. Il faut s'inscrire rapidement car le nombre de places est limité.

### Tenue de Ville

Coût:                  \$35 canadiens

Ladies:                  Cocktail dress  
Gentlemen:                  Business suit  
Price:                  \$35 Can.

### Admisión a las Sesiones del Congreso

Para ser admitidos a las Sesiones Técnicas los participantes deberán exhibir el distintivo de Inscripción. La admisión a las funciones especiales y excusiones se controlará a través de cupones. Ellos podrán ser adquiridos, en caso de haber boletos disponibles en ese momento, en la mesa de Tickets del Congreso.

### Oficinas de Prensa

El Salón Matapedia del Hotel Queen Elizabeth será habilitado para los miembros de la Prensa desde las 12:00 del Domingo 4 de Octubre de 1981 hasta las 17:00 del jueves 8 de Octubre de 1981.

### PROGRAMA ESTUDIANTIL

Se ha extendido una invitación especial a los estudiantes de Ingeniería Química, para quienes se ha organizado un programa especial. Dicho programa incluye la presentación de las publicaciones ganadoras de la competencia estudiantil (sesiones 18.1 y 18.2), una sesión sobre las perspectivas de la carrera y el desarrollo de la Ingeniería Química, (sesión 18.3) así como un cierto número de visitas industriales.

Las funciones especiales organizadas incluyen un Encuentro de Estudiantes el domingo 4 de Octubre, un Almuerzo el martes 6 de Octubre y la Fiesta de Estudiantes la noche del miércoles 7 de Octubre, actuando como anfitriones la Ecole Polytechnique y la Universidad de McGill.

La inscripción de los estudiantes da acceso a todas las Sesiones Técnicas. Se solicitará comprobante de inscripción.

### PROGRAMA PARA LOS CONYUGES

El Salón de Recepción St. Charles está ubicado en el piso de Convenciones del Queen Elizabeth Hotel y estará abierto para las personas inscritas en el Programa para Cónyuges que lleven la tarjeta de identificación, el domingo 4 de Octubre de 13:00 a 17:00 y entre el lunes 5 y jueves 8 de Octubre de 8:30 a 17:30. Allí existirá un servicio de información telefónica, venta de entradas para funciones culturales y deportivos, información general sobre restaurantes, centros de compras y "como ubicarse" en el área de Montreal. Se servirá café y masitas a las personas registradas en el programa para cónyuges.

19:30 - 23:30	Gala Quebecois Evening, Queen Elizabeth - Le Grand Salon									
<b>Thursday, October 8</b>										
8:30 - 9:15	Plenary Session, Queen Elizabeth - Le Grand Salon									
9:30 - 12:30	16.7 Biofuels (II) - Gaseous Fuels	5.6 Coal Liquefaction	5.8 Feedstock Trends for Petrochemicals	2.5 International Practice of Ch.E. (III)	6.9 Energy Conservation and Analysis in CPI (III)	15.7 Plastics Processing	15.11 Reactive Polymer Processing (III)	4.5 Conf. Inter-Americanas: General	18.6 Innovative Course & Teaching Techniques	10.7 Poster Control Environment 13.11 Polymer 15.6
12:30 - 14:15	Exposition Luncheon, Place Bonaventure - Exposition Reception Area									
14:30 - 17:30	16.10 Chemicals from Biomass	3.3 Chamber of Commerce Montreal Urban Community	5.9 Heavy Oil Resources	5.7 Solid Fuel Processing	6.11 Hydrogen as Fuel	15.8 Rheological Behaviour of Polymers	15.12 Reactive Polymer Processing (IV)	9.24 Process Equipment: Design and Analysis	18.7 Challenges to Ch.E. Curriculum	11.10 Poster Reaction Engineering Unit Operations (II) 9.25

## SS AT A GLANCE

Hyatt agency	Hotel Bonaventure									Place Bonaventure
	Lasalle	Lachine	Verdun	Outremont	Westmount	Mount Royal	Hampstead	Cote St Luc		Exposition Hall
Sunday, October 4										
Opening Ceremony									19:00 - 19:30	
World Congress Reception, Queen Elizabeth – Le Grand Salon									19:30 - 21:00	
Monday, October 5										
Plenary Session, Queen Elizabeth – Le Grand Salon										
	8.1 Thermodynamics of Non-Electrolytes	9.4 Crystallization from Solutions (I)	9.8 Solid-Liquid Separation (I)	16.1 Fermentation Design	13.2 Acidic Gaseous Emissions (I)	10.1 Control of Chemical Processes (I)	13.1 Toxic Organics in Gaseous Emissions	17.1 Physiological Transport Phenomena	8:30 - 9:15	
									9:30 - 12:30	
									12:30 - 14:15	
2.1 Safety in Ammonia Plants (I)	8.2 Thermodynamics of Heavy Hydrocarbons	9.5 Crystallization from Solutions (II)	9.9 Solid-Liquid Separation (II)	16.2 Enzyme Technology	13.3 Acidic Gaseous Emissions (II)	10.2 Control of Chemical Processes (II)	11.1 Hydrogenation of Hydrocarbons	17.2 Implants & Artificial Organs	14:30 - 17:30	
									19:30 - 22:00	
Canadian Chemical Engineering Banquet, Hotel Bonaventure – Outremont – Westmount										
Tuesday, October 6										
Plenary Session, Queen Elizabeth – Le Grand Salon										
	8.3 Thermodynamics of Electrolytes	9.12 Membrane Separation Processes (I)	9.10 Solid-Liquid Separation (III)	16.3 Biological Waste Treatment	13.4 Toxic Solid Wastes	10.3 Computer Design & Control (I)	11.2 Reaction Engineering (I)		8:30 - 9:15	
									9:30 - 12:30	
									14:30 - 17:30	
2.2 Safety in Ammonia Plants (II)									12:30 - 14:15	
									14:30 - 17:30	
									17:00 - 19:00	
Congress Luncheon, Queen Elizabeth – Le Grand Salon										
Wednesday, October 7										
Plenary Session, Queen Elizabeth – Le Grand Salon										
	8.7 Interfacial Phenomena	9.17 Desalination (I)	9.15 Distillation (I)		13.6 Hazardous Organics in Wastewater	10.5 Process Dynamics (I)	11.4 Electrochemical Reaction Engineering (I)	1.4 Innovation Management	8:30 - 9:15	
									9:30 - 12:30	
									12:30 - 14:15	
2.4 Safety in Ammonia Plants (IV)									14:30 - 17:30	
									17:00 - 19:00	
Congress Luncheon, Queen Elizabeth – Le Grand Salon										
2.5 Safety in Ammonia Plants (V)	8.8 Bubbling Systems	9.18 Desalination (II)	9.16 Distillation (II)		13.7 Toxic Inorganics in Aqueous Emissions	10.6 Process Dynamics (II)	11.5 Electrochemical Reaction Engineering (II)	18.8 University – Industry Cooperation	12:30 - 14:15	
									14:30 - 17:30	
									19:30 - 23:30	
Gala Quebecoise Evening, Queen Elizabeth – Le Grand Salon										
Thursday, October 8										
Plenary Session, Queen Elizabeth – Le Grand Salon										
	8.9 Mathematical Application in Ch.E. (I): Numerical	9.20 Mixing (I)	9.22 Liquid-Liquid Extraction (I)		13.8 Occupational Hygiene	11.7 Plasma Technology (I)	11.6 Heterogeneous Reactions	16.8 Unconventional Foods	8:30 - 9:15	
									9:30 - 12:30	
									12:30 - 14:15

									17:00 - 18:00	
Exposition Luncheon, Place Bonaventure – Exhibition Reception Area										
	8.10 Mathematical Application in Ch.E. (II): Analytical	9.21 Mixing (II)	9.23 Liquid-Liquid Extraction (II)	13.9 Uncontrolled Release of Hazardous Materials	13.10 Water Pollution Control	11.8 Plasma Technology (II)	11.9 Catalysis	16.9 Food Processing	14:30 - 17:30	
									17:00 - 18:00	

## CHEMICAL ENGINEERING FOR WORLD DEVELOPMENT

LE GENIE CHIMIQUE AU SERVICE DU DEVELOPPEMENT MONDIAL

INGENIERIA QUIMICA PARA UN MUNDO EN DESARROLLO

## Detailed Technical Program

The speaker's name is in italics

### 1. ECONOMIC AND TECHNOLOGICAL OUTLOOKS

Organized by the Economics and Business Management Division  
of the Chemical Institute of Canada

Co-ordinator: Dr. J.F.C. Dixon, C.I.L. Inc., Canada

QUEEN ELIZABETH  
MARQUETTE

MONDAY, OCTOBER 5

#### 1.1 CHEMICAL INDUSTRY OUTLOOK IN THE 80'S: - ECONOMIC

Chairman - J. Buckingham, Allied-General Nuclear Services, U.S.A.  
Chairman - W.O. Munns, Canada Packers Ltd., Canada

1.1.1

9:30 - 10:00

The Economic Outlook for the 80's (*Keynote Introduction*), *C.E. Beigie*, President, C.D. Howe Research Institute, Canada

The decade of the 1970s produced one major shock to the world economy namely the shift to producer-country control of the energy supply situation, and a series of disruptive trend-line developments. If these shocks and disruptions are to be accommodated within a tolerable level of distress, governments and general publics must formulate, accept, and implement a series of adjustments in life styles and expectations with a sense of commitment in the 1980s. Countries vary widely in terms of their past approaches to the tasks of adjustment. A review of progress through 1981 in the context of the adjustments required, with particular emphasis on capital formation, will signal what can be expected from the 1980s.

1.1.2

10:00 - 10:30

The Outlook for the Chemical Process Industries in the Developed World in the 80's, *R.J. Richardson*, Senior Vice President, E.I. Du Pont de Nemours and Company, U.S.A.

Faced with the prospects of slowed world economic growth, the challenge to chemical processing companies in the 1980's is to select the most promising market niches and then to commit the necessary strengths and resources to capitalize on these opportunities. Key to the success of this strategy will be a stronger commitment to research and development and the availability of capital for substantial investment in new plants and equipment. While high volume production of basic chemicals will continue as the number one business for many chemical companies, higher costs and heightened competition will lead many managers to diversify further and to withdraw from weaker product lines.

1.1.3

10:30 - 11:00

The Outlook for the Chemical Process Industries in the Developing World in the 80's, *E. Beckerboost*, Director, UNIDO/World Bank Cooperative Program, Vienna, Austria

ABSTRACT NOT AVAILABLE

1.1.4

11:00 - 11:30

Economic Impact of Energy and Raw Materials in the 80's, *R. Hirono*, Seikei University, Japan

ABSTRACT NOT AVAILABLE

1.1.5

11:30 - 12:00

Future Changes in the Chemical Industry, *G.G. Betts*, British Petroleum Chemicals, *F.J. Plenard*, L'Air Liquide, United Kingdom/France

An E.F.C.E. Committee has commented on developments taking place in the world raw materials and energy situation and the ways in which the basic organic chemical industry engaged in manufacture in Western Europe might prepare to adapt to such changes from the year 2000. The Report is set against the background of the industry in Western Europe today.

1.1.6

12:00 - 12:30

The Impact and Implications of the Management of Chemicals, *the Honourable John Roberts*, Minister of the Environment and Minister of State for Science and Technology, Canada.

QUEEN ELIZABETH  
MARQUETTE

MONDAY, OCTOBER 5

#### 1.2 CHEMICAL INDUSTRY OUTLOOK IN THE 80'S - TECHNOLOGICAL

Chairman - D. Behrens, Dechema, West Germany

Chairman - M.B. Selman, Dow Chemical of Canada Limited, Canada

1.2.1

14:30 - 15:00

The Strategic Management of Technology in the 80's in the Chemical Industry, *J.M. Hay*, President, Dow Chemical of Canada Limited, Canada

In this decade and beyond, strategic management of technology in the chemical industry must be approached from an international viewpoint rather than purely nationalistic. Identification of the areas for technological opportunity depends on a careful assessment of a complex array of business, economic and political factors as much as the input from research and development. Technological development and business entrepreneurship must capitalize on the inherent strengths of the host nation in such a way as to make a substantial contribution to the nation's economic and social health. That is already being done in Canada but we have only scratched the surface of opportunity. The essential prerequisite for future growth is a widespread recognition that technological innovation and research stems from a profitable private sector operating in an economic climate conducive to investment in high technology ventures.

**1.2.2****15:00 – 15:30**

Technological Impact of Energy and Raw Materials in the 80's,  
*C.W. Suckling*, General Manager, C.N. Beard, Consultant,  
 Corporate Research and Technology, Imperial Chemical  
 Industries Limited, United Kingdom

As oil becomes more expensive the raw materials most appropriate as fuels and feedstocks may vary between different regions of the world and in consequence the technology of the chemical industry may differ between regions more than it has done in the past. That trend may be intensified by the wish of the developing world to establish its own industry particularly where there is cheap indigenous gas or coal. Under those influences the world wide disposition of the heavy chemical industry may begin to adjust in the 1980's.

**1.2.3****15:30 – 16:00**

The Role of Research in the 80's, *S.W. Tinsley*, Director of Corporate Technology, Union Carbide Corporation, U.S.A.

The impressive increases in R&D in our industry over the last five years signal great expectations on the part of management - great expectations that this investment will demonstrate process options that will place the "family jewels" in a favorable international competitive stance and product options that will ensure the growth of the firm.

This paper will attempt to portray the needs and opportunities which must be fulfilled by research in our industry in the eighties as well as the tugs and pressures of international and national issues which will determine our operational climate.

**1.2.4****16:00 – 16:30**

Technologies for Developing Nations, *L.K. Doraiswamy*, Director, National Chemical Laboratory, India

An attempt has been made to briefly review some of the problems of development, technologies for development and the Indian experience in technology generation, technology transfer and foreign collaboration. Problems of technology transfer within and between countries at various stages of development have also been discussed.

**1.2.5****16:30 – 17:00**

Technological and Social Relevance of Research in Chemical Engineering, *F. Moser*, Professor, Technological University, Graz, Austria

**ABSTRACT NOT AVAILABLE****1.2.6****17:00 – 17:30**

Possible Changes in Chemical Feedstocks, *J.M. Solbett*, United Kingdom

The paper reviews the processes available for the production of chemical feedstocks from coal and biomass. It concludes that the syngas route offers the greatest opportunities, with methanol emerging as a key commodity, and that fermentation ethanol can provide a low investment approach to chemicals manufacture in some developing countries.

**QUEEN ELIZABETH  
MARQUETTE**

**TUESDAY, OCTOBER 6**

**1.3 ECONOMIC ASPECTS OF ENERGY AND TECHNOLOGY**

Chairman – *T. Mizushina*, Kyoto University, Japan  
 Chairman – *J.F.C. Dixon*, C.I.L. Inc., Canada

**1.3.1****14:30 – 15:00**

Optimisation énergétique ou optimisation économique des procédés industriels, *P. Le Goff*, CNRS-ENSIC, Lorraine, France

We propose using a new type of diagram called «Energy-Cost-Characteristics» (= CAREC) to compare the various possible optimal choices, for a given technical decision. The monetary cost (either in national currency or in foreign currency) is plotted as a function of the total **cost** in primary energy, (including energy embodied in equipments). Two examples are presented.

**1.3.2****15:00 – 15:30**

The Challenges to Energy Technology Development, *J.P. Henry Jr.*, Booz Allen and Hamilton Inc., U.S.A.

Energy technology development and commercialization is an issue which has broad international interest. The confusion in energy trade following the oil embargo of 1973-1974 and the subsequent price hikes and periodic shortages have prompted both users and suppliers to exercise options that were often unexpected. This paper discusses these topics and addresses the methodology for assessing the commercial potential of new energy systems in this climate of unparalleled opportunity but with significant risks.

**1.3.3****15:30 – 16:00**

Brazilian Chemical Technology Outlook, *A.P. Da Silva Filho, Lucio Cesar Sattamini*, Brazil

Presentation of Brazilian chemical industry growth in the last two decades, and parallel with qualifications for chemical plant projects; discussion on process know-how available for licensing, and Brazilian experience of industry on alcohol-based processes. Policies for the Brazilian chemical technology in the present decade.

**1.3.4****16:00 – 16:30**

International Chemical Engineering Development Consultancy Bank, *A.K. Lal*, Tanzania Industrial Studies and Consulting Organization, Tanzania

The paper suggests furthering chemical engineering for world development through establishment of a chemical engineering know-how bank. This network of professionals will ensure unbiased flow of knowledge, advice, aid and problem solving capabilities. Immediately a committee of specialist consultant members to co-ordinate with International Development system is envisaged.

**1.3.5**

**16:30 – 17:00**  
**Horizons of Chemical Industries 1985-2000, M.G. Desensy,**  
**President, Comprimo B.V., The Netherlands**

To meet the challenges of the future it is of essence to study the developments related to oil, gas and alternative energy resources. The expected changes of refinery and chemical products together with the developments of these industries will be discussed with the objective to provide an outlook till the end of the century.

**1.3.6**

**17:00 – 17:30**  
**Growth of the Chemical Industry in the Philippines, 1950-1980, L.G. Tansinsin, The Philippines.**

**ABSTRACT NOT AVAILABLE**

**HOTEL BONAVENTURE      WEDNESDAY, OCTOBER 7  
COTE ST LUC**

**1.4 INNOVATION MANAGEMENT IN THE CHEMICAL INDUSTRY**

**Chairman – O. Hentschel, Pemex, Mexico**  
**Chairman – W.F.M. Brown, Vice-President, Innovation Canada, Inc., Canada**

**1.4.1**

**9:30 – 10:00**  
**The Basic Elements of Innovation Management, W.O. Munns,**  
**President, Innovation Canada Inc., Canada**

Innovation Canada Inc. has developed the concept of innovation management being a process, and that it can be trained. Innovation management covers the whole gamut of activities from identifying the innovative opportunity to developing and implementing the new product or service that successfully meets this need. This paper addresses this process.

**1.4.2**

**10:00 – 10:30**  
**The Technological Needs of the Chemical Industry in the Developing Nations in the 80's, the Honourable A. Loftus Roker, Minister of Works and Utilities, Commonwealth of the Bahamas.**

**ABSTRACT NOT AVAILABLE**

**1.4.3**

**10:30 – 11:00**  
**The Role of Educational Institutions in Technology Transfer, R. Blais, Directeur, Centre Québécois d'Innovation Industrielle, École Polytechnique de Montréal, Canada**

Technology transfer ( $T^2$ ) means moving research results or inventions from the laboratory or the test-bench to the market place most efficiently, in the least time, and with due regard for quality and social needs. To effect  $T^2$  universities and technical colleges must set up distinct structures such as industrial research institutes or innovation centres and have their entrepreneurial innovators academically recognized. This form of  $T^2$ , which calls for technological excellence and societal awareness, is clearly need-oriented. It aims at producing industrial leaders.

**1.4.4**

**11:00 – 11:30**  
**Innovative Responses to Economic and Technological Outlooks, C.H. Ware, J.P. Krieg, Commercialization Insights, U.S.A.**

A comprehensive three-step procedure enabling a company to make more effective use of unfolding technology utilizes within-company interaction, a technical/economic computer program, and R&D goal-setting to meet profitability and technical requirements. Details of the procedure, experience with the method, and implications for R&D and corporate management are presented.

**1.4.5**

**11:30 – 12:00**  
**An Assessment of Policies to Address the Impacts of T.S.C.A. on Chemical Innovation, C.T. Hill, R.A. Andrews, R. Frenkel, G.R. Heaton, C.S. Mitchell, W.C. Priest, N.A. Ashford, Center for Policy Alternatives, M.I.T., U.S.A.**

This paper examines 32 policy options that might reduce the unnecessary impacts of the U.S. Toxic Substances Control Act on chemical innovation while upholding the law's goals. A heuristic model for policy assessment based on magnitude estimation techniques is used to rank the options on seven criteria. The effectiveness of the options is judged based on knowledge of the chemical innovation process and on earlier studies of the effects of regulation on innovation. Private and public costs and indirect effects of the options are also judged. A resulting program package, including six complementary options, is described.

**1.4.6**

**12:00 – 12:30**  
**A Different View of the Future, W.H.C. Simmonds, National Research Council of Canada, Canada**

**ABSTRACT NOT AVAILABLE**
