Preface

CAiSE 2007 was the 19th in the series of International Conferences on Advanced Information Systems Engineering. This year's conference was located in Trondheim and hosted by the Norwegian University of Science and Technology, with the aim of bringing together practitioners and researchers in the field of information systems engineering. The CAiSE series thereby returned to the city where the third CAiSE conference was held in 1991.

Since the first CAiSE was organized in Stockholm in 1989, CAiSE has grown to become one of the most prestigious international conferences at the intersection between information systems, software engineering, database technology and other related fields. The CAiSE conferences present basic and applied research results from academia alongside keynotes and research presentations from industry.

The special theme of CAiSE 2007 was "Ubiquitous Information Systems Engineering," reflecting that modern information systems often span activities performed in several organizations and at different geographical locations. They often support the untethered mobility of their users. Already today, these systems have a large impact on the everyday life of individuals and organizations. As we move towards ambient, pervasive and ubiquitous computing, this impact will increase significantly.

While CAiSE 2007 invited general submissions on the development, maintenance, procurement and use of information systems, submissions dealing with aspects related to information systems engineering in ubiquitous environments were especially welcome. The response was overwhelming. In all, 301 papers were submitted, which is a new record for CAiSE conferences. After all submissions had been carefully assessed by three independent reviewers, the Program Committee meeting selected 40 top-quality papers, resulting in an acceptance rate of around 13%. Several other high-quality papers were selected for the CAiSE Forum, a tradition initiated at CAiSE 2003 in Velden to stimulate open discussions of high-quality on-going research.

The success of CAiSE 2007 is also evidenced by the many top-quality workshops that were arranged as CAiSE pre-conference events. The longest running, the REFSQ series on Requirements Engineering: Foundation for Software Quality, was organized for the 13th time in Trondheim. Over the years it has evolved into a Working Conference, this year with its own LNCS proceedings published by Springer. Other workshops associated with CAiSE have almost equally long histories. The EMMSAD 2007 Workshop on Exploring Modelling Methods for Information Systems Analysis and Design was organized for the 12th time. The AOIS 2007 Workshop on Agent-Oriented Information Systems was organized for the 17th time and was associated with CAiSE for the eighth time. Other high-quality international workshops this year were BPMDS 2007 on Business

Process Modelling, Development, and Support, BUSITAL 2007 on Business IT alignment and WISM 2007 on Web Information Systems Modelling.

The special theme of CAiSE 2007 was high-lighted by an additional workshop on Ubiquitous Mobile Information and collaboration systems, UMICS 2007, and by three industrial keynote speeches: Ora Lassila of Nokia Research, UK, on “Setting Your Data Free: Thoughts on Information Interoperability,” Pekka Abrahamsson of VTT, Finland, on “Agile Software Development of Mobile Information Systems” and Christen Krogh of Opera Software, Norway, with a talk titled “40 Million Users, 300 Engineers, 40 Enterprise Customers, 7 Development Locations, and 1 CVS - Lessons Learned Through Design, Development and Deployment of the Opera Browser.”

Contact with industry was emphasized through two one-day industrial seminars on Agile Methods in Practice (organized by Torgeir Dingsøyr) and on Interoperability in the Public Sector (organized by Arne-Jørgen Berre). As usual, a doctoral consortium was also organized in conjunction with CAiSE, giving research students an opportunity to present and discuss their PhD topics and plans face to face with internationally leading researchers in their fields.

Last, but not least, CAiSE 2007 was also an occasion to honor one of the founding fathers of the CAiSE series and Organizing Chair of the 1991 conference, Professor Arne Sølvberg, who celebrated his 67th birthday in 2007. This is the usual retirement age in Norway, although Arne has promised to be working until 70 (at least)! A symposium to honor Professor Sølvberg was arranged before CAiSE 2007 as an additional pre-conference event.

As the organizers of the CAiSE 2007 main conference, we deeply thank the many members of the CAiSE 2007 Program Committee and the additional reviewers for making the reviewing process so thorough and smooth. We equally deeply thank the Chairs and other committee members involved in the many additional events associated with CAiSE 2007. We also want to thank Richard van de Stadt for his excellent technical support during the various stages of evaluating papers and preparing the proceedings. We also wish to thank all the local organizers at the Norwegian University of Science and Technology (NTNU) for their hard work and devotion. Finally, we would like to thank the conference gold sponsors Google, SINTEF and Telenor, institutional sponsor ERCIM, local sponsors The City of Trondheim and the NTNU, as well as our collaborators, the University of Bergen and The Norwegian Computer Society.

March 2007

Xiaohui Zhao, Chengfei Liu, Yun Yang, and Wasim Sadiq

- Assessing Feasibility of IT-Enabled Networked Value Constellations:
A Case Study in the Electricity Sector 66
*Zsófia Derzsi, Jaap Gordijn, Koen Kok, Hans Akkermans, and
Yao-Hua Tan*

- Behavioral Consistency for B2B Process Integration 81
Gero Decker and Mathias Weske

Information Integration

- Declarative XML Data Cleaning with XClean 96
Melanie Weis and Ioana Manolescu

- Personalizing PageRank-Based Ranking over Distributed Collections ... 111
Stefania Costache, Wolfgang Nejdl, and Raluca Paiu

- Generic Schema Merging 127
Christoph Quix, David Kensche, and Xiang Li

Service-oriented Architecture I

- Discovering Web Services to Specify More Complete System
Requirements 142
Konstantinos Zachos, Neil Maiden, Xiaohong Zhu, and Sara Jones

On ISOA: Intentional Services Oriented Architecture	158
<i>Colette Rolland, Rim Samia Kaabi, and Naoufel Kraiem</i>	
WSXplorer: Searching for Desired Web Services	173
<i>Yanan Hao, Yanchun Zhang, and Jinli Cao</i>	

Strategic Alignment

<i>e³forces</i> : Understanding Strategies of Networked <i>e³value</i> Constellations by Analyzing Environmental Forces	188
<i>Vincent Pijpers and Jaap Gordijn</i>	
Aligning IS to Organization's Strategy: The INSTAL Method	203
<i>Laure-Hélène Thevenet and Camille Salinesi</i>	
Towards a Framework for Tracking Legal Compliance in Healthcare	218
<i>Sepideh Ghanavati, Daniel Amyot, and Liam Peyton</i>	

Service-oriented Architecture II

Conceptual Modeling of Privacy-Aware Web Service Protocols	233
<i>Rachid Hamadi, Hye-Young Paik, and Boualem Benatallah</i>	
Policies for Context-Driven Transactional Web Services	249
<i>Zakaria Maamar, Nanjangud C. Narendra, Djamal Benslimane, and Sattanathan Subramanian</i>	
On Automated Generation of Web Service Level Agreements	264
<i>Cinzia Cappiello, Marco Comuzzi, and Pierluigi Plebani</i>	

Requirements I

RED-PL, a Method for Deriving Product Requirements from a Product Line Requirements Model	279
<i>Olfa Djebbi and Camille Salinesi</i>	
Deciding to Adopt Requirements Traceability in Practice	294
<i>Floris Blaauboer, Klaas Sikkel, and Mehmet N. Aydin</i>	
Designing Social Patterns Using Advanced Separation of Concerns	309
<i>Carla Silva, João Araújo, Ana Moreira, and Jaelson Castro</i>	

Process Modelling I

Modeling Business Contexture and Behavior Using Business Artifacts	324
<i>Rong Liu, Kamal Bhattacharya, and Frederick Y. Wu</i>	
Policies and Aspects for the Supervision of BPEL Processes	340
<i>Luciano Baresi, Sam Guineo, and Pierluigi Plebani</i>	

Goal Annotation of Process Models for Semantic Enrichment of Process Knowledge	355
<i>Yun Lin and Arne Sølvberg</i>	

Requirements II

Stakeholder Identification as an Issue in the Improvement of Software Requirements Quality	370
<i>Carla Pacheco and Edmundo Tovar</i>	

The Impact of Task Structure and Negotiation Sequence on Distributed Requirements Negotiation Activity, Conflict, and Satisfaction	381
<i>Bartel Van de Walle, Catherine Campbell, and Fadi P. Deek</i>	

Introducing Graphic Designers in a Web Development Process	395
<i>Pedro Valderas, Vicente Pelechano, and Oscar Pastor</i>	

Process Modelling II

Communication Abstractions for Distributed Business Processes	409
<i>Lachlan Aldred, Wil M.P. van der Aalst, Marlon Dumas, and Arthur H.M. ter Hofstede</i>	

Questionnaire-driven Configuration of Reference Process Models	424
<i>Marcello La Rosa, Johannes Lux, Stefan Seidel, Marlon Dumas, and Arthur H.M. ter Hofstede</i>	

Formalization and Verification of EPCs with OR-Joins Based on State and Context	439
<i>Jan Mendling and Wil van der Aalst</i>	

Method Engineering

Towards More Extensible MetaCASE Tools	454
<i>Vincent Englebert and Patrick Heymans</i>	

Concepts for Incremental Method Evolution: Empirical Exploration and Validation in Requirements Management	469
<i>Inge van de Weerd, Sjaak Brinkkemper, and Johan Versendaal</i>	

ReeF: Defining a Customizable Reengineering Framework	485
<i>Gemma Grau and Xavier Franch</i>	

Novel Applications

Publishing and Discovering Information and Services for Tagged Products	501
<i>Christof Roduner and Marc Langheinrich</i>
