About the Authors

Steven D. Elliott is president of Visual Language Systems and specializes in computer graphics consulting, training, and production for architecture and construction. He is a consultant to Autodesk as an Educational Training Specialist for both AutoCAD and 3D Studio, and he teaches CAD and multimedia applications at Moraine Valley Community College in Palos Hills, Illinois. Mr. Elliott has published articles in *CADENCE* magazine and will teach at Autodesk University in October. He is a registered architect in the state of Illinois and holds advanced degrees in both architecture and computer science.

Tim Forcade has over two decades of practice as an artist, designer, and photographer. For the past 16 years, his company, Forcade & Associates, has accumulated commercial experience and expertise in areas from architectural graphics and design for print, through studio photography and package design to computer animation. Mr. Forcade's project experience includes work for a diverse client base including Autodesk, Inc., Spiegel, HDR, Inc., and Kimball International. His work in electronic media, video, and photography has been exhibited in the U.S., Canada, Europe, and Japan. He is a contributing editor for *Computer Graphics World* and *Computer Artist* magazines.

Phillip L. Miller is a practicing architectural designer and CAD manager for a mid-sized, full-service architecture and engineering firm in Rockford, Illinois. He is an expert in the customization and use of AutoCAD for architectural production and is accomplished in the use of 3D Studio. Mr. Miller also is a consultant with Visual Language Systems and has co-authored two articles for *CADENCE* magazine. He holds an advanced degree in architecture with a minor in painting.

Gregory G. Pyros, CEO, founded Pyros Partnership, Inc. in 1981. He is one of the country's most advanced computer animation and video consultants. His firm provides consulting expertise in all phases of computer operations, programming and configurations, and inter-operability between UNIX and DOS. Mr. Pyros currently is acting as computer visualization consultant for such diverse firms as Sony Pictures, The Ralph M. Parsons Company, The Jerde Partnership, The Walt Disney Company, Unisys Corporation, Union Bank, Fluor Daniel, Hughes Aircraft, and various governmental agencies. Mr. Pyros graduated from Rensselaer Polytechnic Institute in Troy, New York with degrees in Architecture, Building Sciences, and a Masters in Business Administration. Currently Mr. Pyros serves on the Board of Directors of TrialVision, Inc., specializing in forensic animations, Sno-Tek, Inc., a manufacturing concern, and also holds a seat on the Autodesk MultiMedia Dealer Advisory Board. He also has served on the Board of Directors of the American Institute of Architects, Orange County Chapter as Director of Professional Development.

Acknowledgments

Mr. Elliot wishes to thank his wife, Jean, and daughter, Mary. Their love, support, and most of all, patience made this book possible. He also thanks J.C. Malitzke and Don McIntyre of Moraine Valley Community College, and Wayne Hodgins of Autodesk for their professional support and encouragement for the past three years.

Mr. Miller congratulates his wife, Karen, on her tolerance and ensures her that, yes, it is finally done.

Trademark Acknowledgments

New Riders Publishing has made every attempt to supply trademark information about company names, products, and services mentioned in this book. Trademarks indicated below were derived from various sources. New Riders Publishing cannot attest to the accuracy of this information.

AutoCAD is a registered trademark of Autodesk, Inc.

CompuServe is a registered trademark of CompuServe, Inc.

Trademarks of other products mentioned in this book are held by the companies producing them.

New Riders Publishing

The staff of New Riders Publishing is committed to bringing you the very best in computer reference material. Each New Riders book is the result of months of work by authors and staff, who research and refine the information contained within its covers.

As part of this commitment to you, the NRP reader, New Riders invites your input. Please let us know if you enjoy this book, if you have trouble with the information and examples presented, or if you have a suggestion for the next edition.

Please note, however, that the New Riders staff cannot serve as a technical resource for 3D Studio or 3D Studio-related questions, including hardware- or software-related problems. Refer to the documentation that accompanies your 3D Studio application package for help with specific problems.

If you have a question or comment about any New Riders book, please write to NRP at the following address. We will respond to as many readers as we can. Your name, address, or phone number will never become part of a mailing list or be used for any other purpose than to help us continue to bring you the best books possible.

Thank you for selecting *Inside 3D Studio!*

Contents at a Glance

Introduction

Part I Getting Started	10
1 <i>Configuring and Preparation</i>	12
2 <i>Working with Worksheet Data</i>	76
3 <i>Universal Modeling Techniques</i>	130
Part II Basic Modeling	160
4 <i>2D to 3D: The 2D Shaper and 3D Lofted Combination</i>	162
5 <i>Building Models in the 3D Editor</i>	216
6 <i>Introduction to the Materials Editor</i>	290
7 <i>Lights, Camera, and Basic Rendering Options</i>	382
8 <i>8-Bit Still Imaging</i>	430
Part III Advanced Modeling	456
9 <i>Lofting Complex Objects</i>	458
10 <i>Creating and Editing Faces and Vertices in the 3D Editor</i>	506
11 <i>Integrating AutoCAD with 3D Studio</i>	572
12 <i>Materials and Mapping</i>	602
13 <i>Lighting and Camera Special Effects</i>	656
14 <i>24-Bit High Resolution Imaging</i>	712
Part IV Basic Animation Techniques	732
15 <i>Introduction to the Keyframer</i>	734
16 <i>Manipulating Tracks and Keys</i>	764
17 <i>Animated Materials</i>	786
18 <i>Animating Lights and Cameras</i>	800
19 <i>Animation for Real-Time Recording and Presentation</i>	840
Part V Advanced Animation	871
20 <i>Special Keyframer Techniques</i>	872
21 <i>Animation for Field/Frame-Accurate Recording</i>	928
Part VI Appendixes	950
A <i>System Requirements</i>	952
B <i>Rendering and Output Equipment</i>	966
C <i>Other Software Tools</i>	988
D <i>The Infrastructure of a Multimedia Project</i>	996
E <i>The Inside 3D Studio CD-ROM</i>	1004

Table of Contents

Introduction	2
Getting the Most from Inside 3D Studio	4
<i>Using the 3D Studio Manuals with this Book</i>	<i>4</i>
<i>Organization of the Book</i>	<i>4</i>
<i>Other Programs Used with 3D Studio</i>	<i>6</i>
Using the Inside 3D Studio CD-ROM	7
<i>Installing the Exercise Files</i>	<i>8</i>
<i>Using the Sample Meshes</i>	<i>8</i>
<i>Using Material Maps</i>	<i>8</i>
<i>Viewing the Sample Flics</i>	<i>8</i>
<i>Registering Shareware</i>	<i>8</i>
Using CompuServe	9
Part I Getting Started	10
1 Configuring and Preparation	12
Installing 3D Studio	14
Setting System Configuration	15
<i>Before Starting 3D Studio</i>	<i>15</i>
<i>The 3DS.SET File</i>	<i>15</i>
Configuring for Network Rendering	27
<i>The Theory of Network Rendering</i>	<i>27</i>
<i>Benefits of Network Rendering</i>	<i>27</i>
<i>Network Rendering on a Single Machine</i>	<i>28</i>
<i>Configuring the Network</i>	<i>28</i>
<i>Configuring the 3DSNET.SET File</i>	<i>29</i>
Configuring the Vibrant Options	31
<i>Main Display</i>	<i>32</i>
<i>Materials Display</i>	<i>34</i>
<i>Render Display</i>	<i>34</i>
<i>Flic Playing</i>	<i>35</i>
Adjusting System Options Within 3D Studio	35
<i>The Configure Dialog Box</i>	<i>35</i>
<i>Map Paths Dialog</i>	<i>37</i>
<i>System Options Dialog Box</i>	<i>37</i>

Configuring the Renderer	38
<i>Shading Limits</i>	<i>39</i>
<i>Antialiasing</i>	<i>39</i>
<i>Other Options</i>	<i>39</i>
<i>Device Configuration</i>	<i>40</i>
<i>Render Options</i>	<i>41</i>
Configuring the Network Renderer	43
<i>Network Queue Entry</i>	<i>44</i>
<i>Network Queue Management</i>	<i>45</i>
<i>Network Parameters Configuration</i>	<i>46</i>
Setting Gamma Correction	47
<i>Display Gamma</i>	<i>48</i>
<i>Framebuffer Gamma</i>	<i>49</i>
Saving Custom Configurations	49
<i>Saving Empty Project Files</i>	<i>49</i>
<i>The 3DS.PRJ File</i>	<i>50</i>
Setting Up 3D Studio To Work with Other Programs	50
<i>3DSHELL.COM</i>	<i>50</i>
<i>The Program Pull-Down Menu</i>	<i>50</i>
Setting Up 3D Studio under Windows 3.1	51
<i>Installing the PharLap Device Driver</i>	<i>52</i>
<i>Configuring the Windows PIF File</i>	<i>52</i>
<i>Installing Graphics Board Drivers</i>	<i>53</i>
On-Line Help	53
<i>Accessing On-Line Help</i>	<i>53</i>
Custom Function Keys	54
<i>The 3DS.KEY File</i>	<i>54</i>
<i>Programming the Custom Function Keys</i>	<i>54</i>
Organizing a Project	55
<i>Building a Scene from Multiple Files</i>	<i>56</i>
<i>Coordination with Other Modeling Programs</i>	<i>59</i>
<i>Managing Maps and Material Libraries</i>	<i>61</i>
<i>Managing Output Files</i>	<i>64</i>
<i>Archiving and Backing Up Your Files</i>	<i>66</i>
Using Story Boards	68
<i>The Process</i>	<i>68</i>
<i>Types of Story Boards</i>	<i>70</i>
<i>Creating a Story Board</i>	<i>71</i>
<i>Creating the Big Bounce Story Board</i>	<i>72</i>
Summary	75

2 Concepts and Theories	76
<i>Human Vision</i>	78
<i>3D Studio's Camera Analogy</i>	79
<i>Traditional Perspective</i>	80
<i>The Importance of Horizons</i>	85
<i>Parallax</i>	90
<i>Perspective Correction</i>	91
<i>Scene Composition</i>	92
Understanding Color Theory	96
<i>Experiencing Color</i>	96
<i>The RYB Color Model</i>	97
<i>The CYM Color Model</i>	100
<i>Color Composition</i>	104
<i>Color as Reflected Light</i>	105
Lighting Theory	106
<i>The RGB Model</i>	106
<i>Complimentary Colors in Light</i>	111
<i>Bounce and Inherited Light</i>	111
<i>The Color of Light</i>	112
<i>Natural Light</i>	112
<i>Artificial Light</i>	113
<i>Considerations of Colored Light</i>	115
<i>Color and Light Summary</i>	116
Motion Theory	116
<i>Motion as a Design Element</i>	116
<i>The Physics of Motion</i>	117
<i>Anticipation</i>	118
<i>Squash and Stretch</i>	119
<i>Overlapping Action</i>	120
<i>Follow-Through</i>	121
<i>Staging</i>	121
<i>Exaggerated Motion</i>	123
<i>Secondary Action</i>	123
<i>Studies of Animal Motion</i>	124
<i>Studies of Human Motion</i>	125
Summary	126

3	Universal Modeling Techniques	130
	Modeling Decisions	132
	<i>Accuracy</i>	<i>132</i>
	<i>Detail</i>	<i>135</i>
	<i>Complexity</i>	<i>136</i>
	Accuracy Techniques	137
	<i>Units Setup</i>	<i>137</i>
	<i>Drawing Aids</i>	<i>139</i>
	<i>The Tape Measure</i>	<i>141</i>
	<i>Axis Manipulation</i>	<i>142</i>
	Productivity Techniques	144
	<i>Keyboard Entry</i>	<i>145</i>
	Manipulating Views	148
	<i>Viewport Arrangement</i>	<i>148</i>
	<i>View Orientations</i>	<i>149</i>
	<i>The User View</i>	<i>150</i>
	Selection Sets	152
	<i>Building Selection Sets</i>	<i>153</i>
	<i>Selection Shortcuts</i>	<i>154</i>
	<i>Maintaining Multiple Selection Sets</i>	<i>154</i>
	<i>Cautions</i>	<i>156</i>
	Preventing Disaster	157
	<i>Saving Files</i>	<i>157</i>
	<i>Backup Files</i>	<i>158</i>
	<i>Undoing a Mistake</i>	<i>158</i>
	Summary	159
Part II	Basic Modeling	160
4	2D to 3D: The 2D Shaper and 3D Lofter Combination	162
	2D Shaper Terminology	164
	<i>Vertices</i>	<i>164</i>
	<i>Segments</i>	<i>164</i>
	<i>Steps</i>	<i>164</i>
	<i>Polygon</i>	<i>164</i>
	<i>Shape</i>	<i>164</i>
	Creating Polygons	165
	<i>Basic Polygons</i>	<i>165</i>
	<i>N-Gons</i>	<i>166</i>

<i>Text and Fonts</i>	167
<i>Outlines</i>	169
<i>Boolean Operations</i>	170
<i>Connecting Polygons</i>	171
Selecting Polygons	173
Editing Polygons	173
<i>Mirroring Polygons</i>	174
<i>Opening and Closing Polygons</i>	174
Selecting Vertices	175
Editing Vertices	175
<i>Inserting Vertices</i>	175
<i>Modifying Single Vertices</i>	176
<i>Modifying Selected Vertices</i>	176
Adjusting Spline Curves	179
<i>Vertex Adjustments</i>	181
<i>Segment Adjustments</i>	182
<i>Polygon Adjustments</i>	184
Controlling Shape Complexity	184
<i>Vertices and Curves</i>	184
<i>Setting Shape Steps</i>	185
<i>Refining Segments</i>	187
Understanding Shapes	190
<i>Closed versus Open Shapes</i>	190
<i>Valid versus Invalid Shapes</i>	191
Lofting Simple Objects	191
3D Loftter Terminology	191
<i>Shapes</i>	191
<i>Path</i>	191
<i>Levels</i>	192
2D Shaper Interaction	192
<i>Assigning Shapes</i>	193
<i>Shape Hook</i>	193
<i>First Vertex</i>	195
<i>Getting and Putting Shapes</i>	197
<i>Getting Paths</i>	197
The Path	200
<i>Adjusting Curved Paths</i>	200
<i>Path Steps and Refine</i>	201

Shape Manipulation in the 3D Loftter 205
Editing Shapes on the Path 206
Using Multiple Shapes 206
Understanding Tween 207
Understanding Contour 209
Making Objects 209
Naming 210
Capping 210
Smoothing 210
Optimizing 211
Path and Shape Detail 213
Storing and Reusing Lofts 213
Summary 214

5 Building Models in the 3D Editor 216

Understanding the 3D Editor Environment 218
3D Editor Terminology 218
The Importance of Naming Objects 223
Setting Up Views 225
Using Drawing Aids in the 3D Editor 226
Controlling Display Speed 227
Hiding and Displaying Geometry 228
Understanding Normals 229
Understanding Smoothing 235
The 3D Construction Planes 237
Creating Objects and Elements 241
Determining when to Loft or Create 241
3D Editor's Basic Building Blocks 242
Building Objects with Elements 250
Creating Objects with Array 252
Modifying Objects 256
Object Attributes 256
Selection Manipulation 259
Edit Commands for Objects and Elements 261
Creating Boolean Objects 275
Summary 288

6	Introduction to the Materials Editor	290
	Basic and Simple Materials	292
	<i>Materials Editor Overview</i>	293
	<i>Assigning Materials</i>	296
	Questions You Should Ask of Materials	298
