WELCOMING ADDRESS

Ladies and gentlemen, distinguished participants of the 25th OHOLO Conference, dear friends and colleagues,

We extend our hearty welcome to our guests from abroad and from Israel, and hope you will enjoy scientifically and otherwise your stay in Zichron Yaacov.

The Israel Institute for Biological Research has been organizing the OHOLO Conferences for 25 consecutive years. Today, my colleagues and I feel a deep satisfaction and pride in having succeeded to establish these meetings as a permanent event on the scene of Israel's scientific happenings.

During all these years we insisted on having the scientific, social and even technical organization of the OHOLO Conferences carried out by members of our staff. We also ensured the participation of our colleagues from other Israeli scientific institutions in working out the programs of the meetings. All this was done to fulfill the primary purpose we set for these meetings, namely the exposure of young Israeli scientists to important fields of scientific interest as represented by the distinguished invited lecturers, and providing an opportunity for direct informal discussions between Israeli and foreign scientists. Today we may say that each one of the 24 meetings had its own scientific merit, but all of them were more than successful in fulfilling their main purpose. Many fruitful and lasting scientific collaborations were initiated at the OHOLO Meetings.
