► Introduction

The MINITAB Manual is one of a series of companion technology manuals that provide hands-on technology assistance to users of Larson/Farber *Elementary Statistics: Picturing the World*.

Detailed instructions for working selected examples, exercises, and Technology Labs from *Elementary Statistics: Picturing the World* are provided in this manual. To make the correlation with the text as seamless as possible, the table of contents includes page references for both the Larson/Farber text and this manual.

All of the data sets referenced in this manual are found on the data disk packaged in the back of every new copy of Larson/Farber *Elementary Statistics: Picturing the World*. If needed, the MINITAB files (.mtp) may also be downloaded from the texts' companion website at www.prenhall.com/Larson.

► Contents:

	Larson/Farber Elementary Statistics:	The MINITAB Manual
	Page:	Page:
Getting Started with MINITAB		1
Chapter 1 Introduction to Statistics		
Technology Lab <i>Generating Random Numbers</i>	22-23	8
Chapter 2 Descriptive Statistics		
Section 2.1:		
Example 7 <i>Constructing a Histogram</i>	38	17
Exercise 17	41	23
Exercise 21	42	26
Exercises 31a	43	28
Section 2.2		
Example 2 <i>Constructing a Stem-and-Leaf Plot</i>	45	29
Example 3 <i>Constructing a Dot Plot</i>	46	31
Example 4 <i>Constructing a Pie Chart</i>	47	33
Example 5 <i>Constructing Pareto Charts</i>	48	35
Example 7 <i>Constructing a Time Series Chart</i>	50	38
Exercise 17	52	39
Exercise 21	53	40
Exercise 23	53	41
Exercise 25	53	42
Exercise 27	54	43
Exercise 29	54	44
Section 2.3		
Example 6 <i>Finding the Mean and Standard Deviation</i>	58	45
Exercise 17	63	49
Exercise 39	66	50
Exercise 45	67	51
Section 2.4		
Example 5 <i>Calculating the Mean and Standard Deviation</i>	72	52
Exercise 11	79	53
Exercise 17	79	54
Section 2.5		
Example 2 <i>Finding Quartiles</i>	86	55
Example 4 <i>Constructing a Box-and-Whisker Plot</i>	88	56
Exercise 11	90	58
Exercise 19	91	59
Technology Lab <i>Using Descriptive Statistics</i>	93	60

Chapter 3 Probability		
Section 3.1		
<i>Law of Large Numbers</i>	108	62
Section 3.2		
Exercise 25	123	63
Technology Lab <i>Composing Mozart Variations</i>	143	64
Chapter 4 Discrete Probability Distributions		
Section 4.2		
Example 5 <i>Finding Probabilities</i>	169	66
Example 7 <i>Constructing / Graphing Binomial Distribution</i>	171	68
Section 4.3		
Example 3 <i>Finding Poisson Probabilities</i>	180	70
Technology Lab <i>Poisson Distributions as Queuing Models</i>	185	72
Chapter 5 Normal Probability Distributions		
Section 5.1		
Exercise 27	201	74
Section 5.3		
Example 4 <i>Finding Normal Probabilities</i>	215	77
Example 5 <i>Finding a specific data value</i>	216	79
Exercise 3	217	80
Section 5.4		
Example 6 <i>Finding Probabilities for X and \bar{X}</i>	229	81
Technology Lab <i>Age Distribution In the United States</i>	234	82
Chapter 6 Confidence Intervals		
Section 6.1		
Example 4 <i>Construct a 99% Confidence Interval</i>	256	85
Exercise 31	261	87
Exercise 43	263	88
Section 6.2		
Example 2 <i>Construct a 95% Confidence Interval</i>	268	89
Exercise 19	272	90
Section 6.3		
Example 2 <i>Construct a 95% Confidence Interval for p</i>	277	91
Exercise 11	280	93
Technology Lab <i>Most Admired Polls</i>	283	94

Chapter 7 Hypothesis Testing with One Sample		
Section 7.2		
Example 9 <i>Hypothesis Testing using P-values</i>	323	96
Exercise 25	326	98
Exercise 33	328	99
Section 7.3		
Example 4 <i>Testing μ with a Small Sample</i>	333	100
Exercise 23	338	101
Exercise 24	338	102
Section 7.4		
Example 2 <i>Hypothesis Testing for a Proportion</i>	342	103
Exercise 9	344	105
Exercise 11	345	106
Technology Lab <i>The Case of the Vanishing Woman</i>	346	107
Section 7.5		
Extending the Basics	355	108
Chapter 8 Hypothesis Testing with Two Samples		
Section 8.1		
Exercise 13	375	109
Exercise 15	375	111
Section 8.2		
Example 1 <i>Snow Tire Performance</i>	382	112
Exercise 17	386	113
Exercise 20	387	114
Section 8.3		
Example 2 <i>Golf Scores</i>	392	115
Exercise 16	396	117
Exercise 17	397	118
Section 8.4		
Example 1 <i>Difference between internet users</i>	402	119
Exercise 7	404	121
Exercise 10	405	122
Technology Lab <i>Tails over Heads</i>	407	123

	Larson/Farber Elementary Statistics:	The MINITAB Manual
	Page:	Page:
Chapter 9 Correlation and Regression		
Section 9.1		
Example 3 <i>Constructing a Scatterplot</i>	420	124
Example 5 <i>Finding the Correlation Coefficient</i>	423	126
Exercise 13	428	128
Section 9.2		
Example 2 <i>Finding a Regression Equation</i>	434	130
Exercise 11	437	132
Section 9.3		
Example 2 <i>Finding the Standard Error and Coefficient of Determination</i>	445	134
Example 3 <i>Constructing a Prediction Interval</i>	447	135
Exercise 11	449	137
Exercise 19	450	137
Section 9.4		
Example 1 <i>Finding a Multiple Regression Equation</i>	452	138
Exercise 5	456	139
Technology Lab <i>Tar, Nicotine, and Carbon Monoxide</i>	457	140
Chapter 10 Chi-Square Tests and the F-Distribution		
Section 10.1		
Example 3 <i>The Chi-Square Goodness of Fit Test</i>	470	141
Exercise 5	473	144
Section 10.2		
Example 3 <i>Chi-Square Independence Test</i>	481	146
Exercise 5	483	148
Section 10.3		
Picturing the World <i>A Two-Sample F-Test</i>	491	149
Section 10.4		
Example 2 <i>ANOVA Tests</i>	501	152
Exercise 1	503	153
Exercise 5	504	154
Technology Lab <i>Crash Tests</i>	508	155

	Page:	Page:
Chapter 11 Nonparametric Tests		
Section 11.1		
Example 3 <i>Using the Paired-Sample Sign Test</i>	521	157
Exercise 3	522	159
Exercise 15	524	161
Section 11.2		
Example 1 <i>Performing a Wilcoxon Signed-Rank Test</i>	528	162
Example 2 <i>Performing a Wilcoxon Rank Sum Test</i>	531	164
Exercise 5	534	166
Section 11.3		
Example 1 <i>Performing a Kruskal-Wallis Test</i>	539	167
Exercise 1	541	170
Section 11.4		
Example 1 <i>The Spearman Rank Correlation Coefficient</i>	544	171
Exercise 3	546	174
Technology Lab <i>Air Conditioner Performance and Price</i>	549	175

Getting Started with MINITAB

► Using MINITAB Files

MINITAB is a Windows-based Statistical software package. It is very easy to use, and can perform many statistical analyses. When you first open MINITAB, the screen is divided into two parts. The top half is called the Session Window. The results of the statistical analyses are often displayed in the Session Window. The bottom half of the screen is the Data Window. It is called a Worksheet and will contain the data.

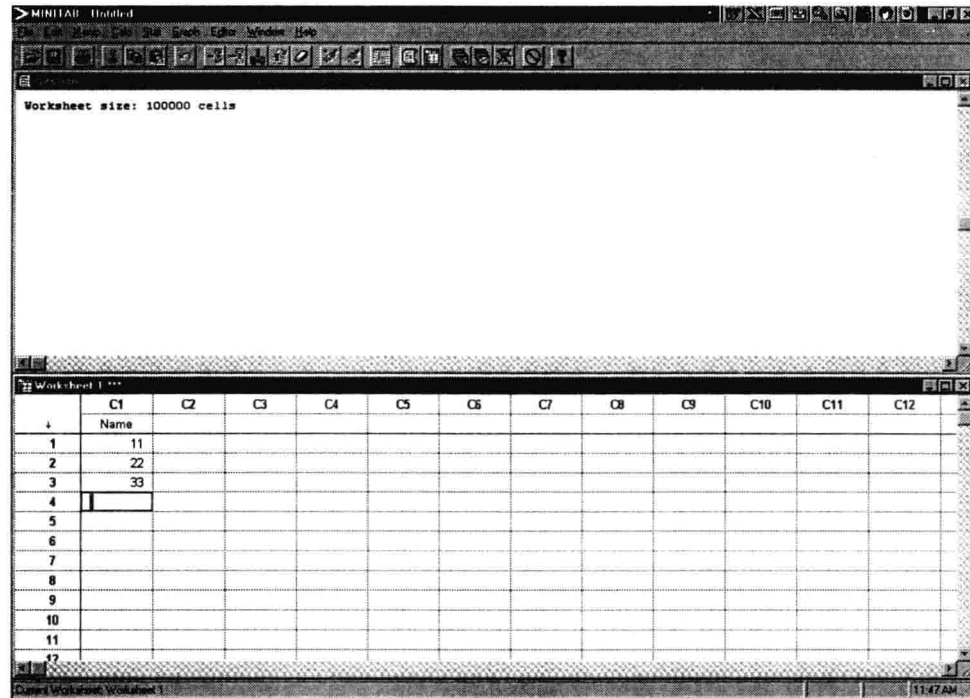

The data will either be entered directly into the Worksheet, or saved worksheets can be opened and used.

▶ Entering Data into the Data Window

To enter the data into the Data Window, you must first click on the bottom half of the screen to make the Data Window active. You can tell which half of the screen is active by the blue bar going across the screen. In the previous picture, notice that the blue bar is in the middle of the screen, highlighting **Worksheet 1**. This indicates that the Data Window is active. The bar will be gray if the Window is not active. (Notice the Session Window bar is gray.)

In MINITAB, the columns are referred to as C1, C2, etc. Notice that there is an empty cell directly below each heading C1, C2, etc. This cell is for a column name. Column names are optional because you can refer to a column as C1 or C2, but a name helps to describe the data contained in a column. Enter the data beginning in cell 1. Notice that the cell numbers are located in the leftmost column of the worksheet.

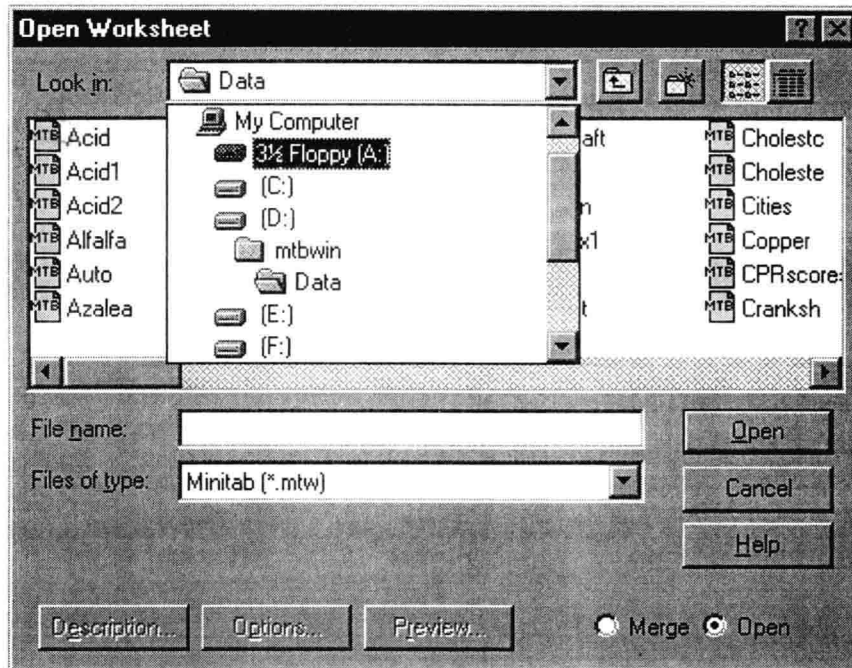

► Opening Saved Worksheets

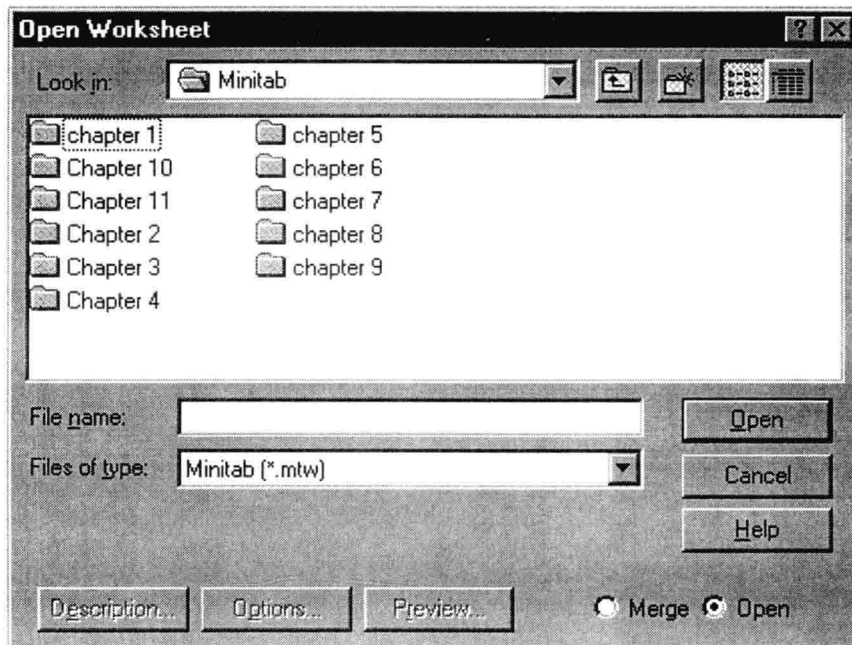

Many of the worksheets that you will be using are saved on the enclosed data disk. To open a saved worksheet, click on **File → Open Worksheet**. The following screen will appear.

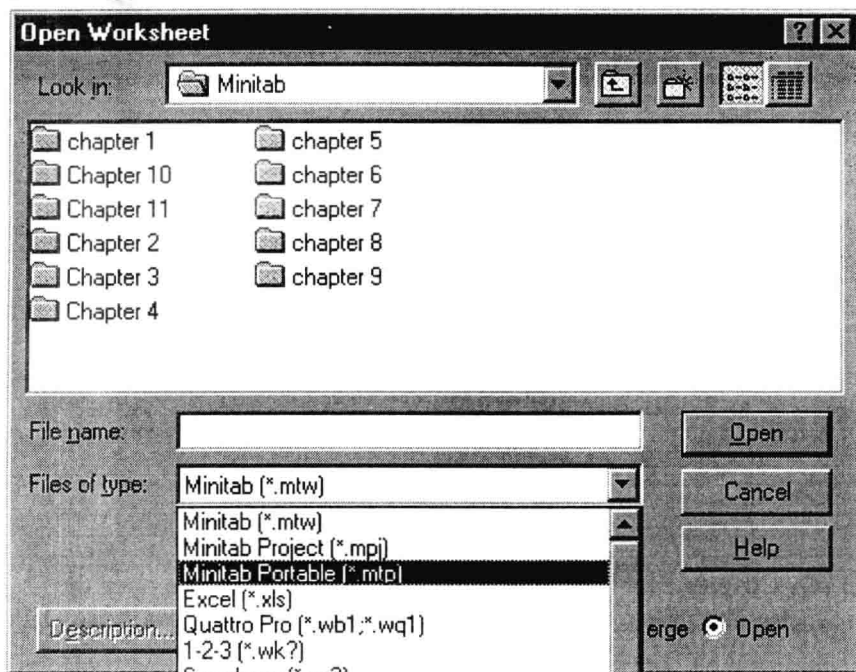

First, you must tell MINITAB where the data files are located. Since the data files are located on the data disk, you must tell MINITAB to **Look In** the 3 1/2" Floppy (A:). To do this, click on the down arrow to the right of the top input field and select the floppy drive by double-clicking on it.

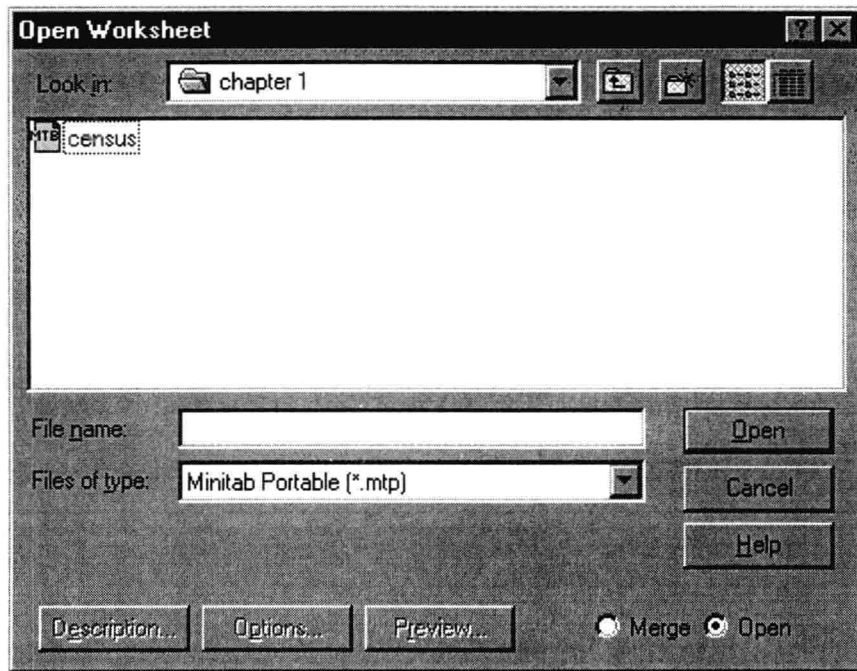

When you do this, you should see three folders listed. Select the MINITAB folder with a double-click. Now you should see a folder for each of the eleven chapters of the book.

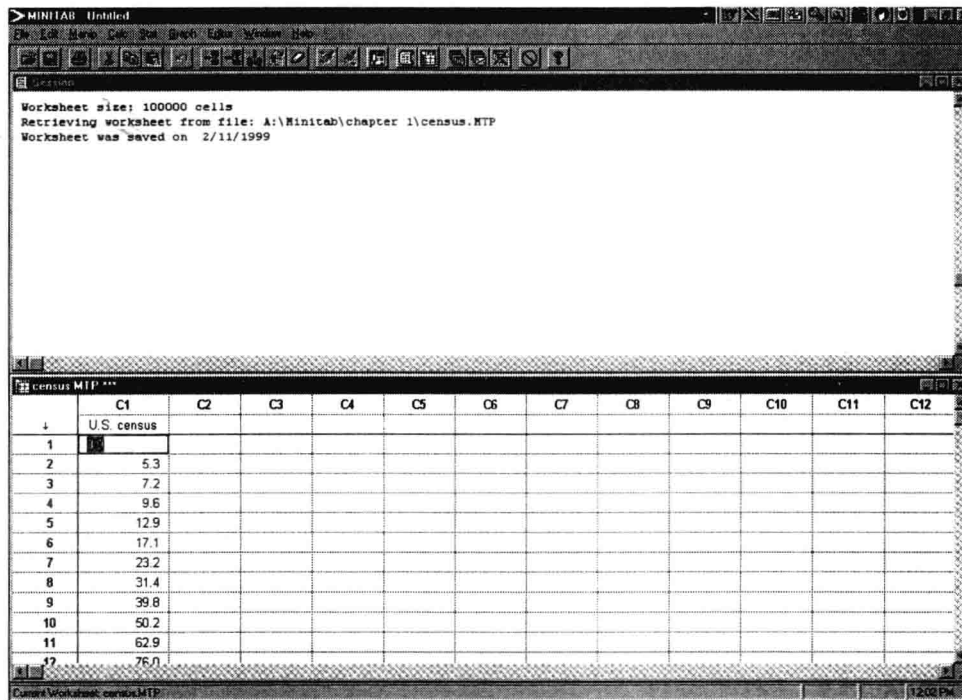

All data files are saved as MINITAB Portable worksheets and have the extension **.mtp**. Click on the down arrow for the field called **Files of type** and select **Minitab Portable (*.mtp)**.

Now, select the folder called **chapter 1** (by double-clicking) and you should see all the MINITAB worksheets for Chapter 1.

As you can see, Chapter 1 has only one worksheet saved to disk. To open the worksheet **census**, double-click on it and the worksheet should appear in the Data Window.

You are now ready to begin analyzing the data and learning more about MINITAB.

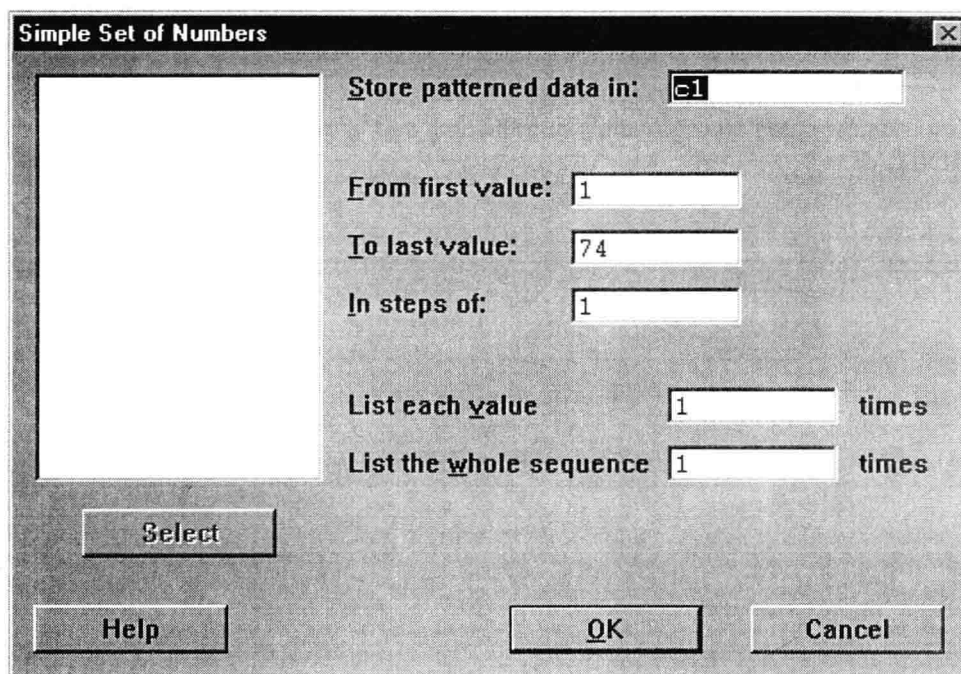

Introduction to Statistics

CHAPTER

1

► Technology Lab (pg. 22-23) Generating Random Numbers

1. To select 8 numbers randomly from the numbers 1 to 74, first store the numbers 1 to 74 in C1. Click on **Calc** → **Make Patterned Data** → **Simple Set of Numbers**. You should **Store patterned data in C1**. The numbers will begin **From the first value 1** and go **To last value 74** **In steps of 1**.

Click on **OK** and the numbers 1 to 74 should be in C1 of the Data Window.
