How to Use This Guide

Student Guide

- The pages of this Student Guide are divided into two sections: a reduced foil and a set of student notes.
- Your instructor will project the foil during class. The student notes provide additional notes to accompany the foil.

Lab Workbook

- In addition to the Student Guide, you are supplied with a Lab Workbook.
- The Lab Workbook includes a complete set of lab instructions and solutions for each lab.

Each module usually includes at least one lab. The lab name and number in the Student Guide correspond to the same lab name and number in the Lab Workbook.

ICONS

Reference — Additional references are available for the current topic, either in the SYBASE documentation, or other documentation..

Backward Reference - This topic was covered previously in the course materials.

Forward Reference - This topic is covered later in the course materials.

Steps — This is a series of steps that allow you to complete a task.

Tips — This piece of information provides a suggestion for completing a task, or provides additional background information.

Warning — This piece of information is important, and not adhering to it may cause you to run into some problems.

Calculation - These calculations are done by hand.

Remember - Remember to do this step. Otherwise, the task may not complete as originally planned.

Trade-off - There are benefits and costs when taking this action.

System Procedure - This is a SYBASE-provided system procedure.

Monitoring Tools - Use a monitoring tool (described in the text) to complete the task.

We Want to Hear From You!

Feedback

Sybase welcomes your feedback on our course materials. This includes corrections as well as suggestions for improvements.

Please mark typographical errors, formatting errors, errors of fact, or areas that need clarification and send copies of those pages to the Sybase Learning Products Group (LPG).

Be sure to include your name, phone number, address and/or email address so that we can reach you should we need clarification about your concerns.

Course Overview

System 11 Fast Track to SQL Server

Version 1.0

©1996 Sybase, Inc.

The Architecture for Change™

System 11 Fast Track to SQL Server Objective

Learn and practice the skills for developing an application for SQL Server using Transact-SQL, in a client/server environment

Course Roadmap

UNIT 1

Introduction to SQL Server

- Module 1 Introduction to SQL Server
- Module 2 What SQL Server Can Do For You
- Module 3 Relational Database Concepts
- Module 4 Accessing the SQL Server

UNIT 2

Creating Tables and Database Integrity

- Module 5 Simple Table Creation
- Module 6 Other Ways to Create Tables
- Module 7 Create Table with Data and Referential Integrity
- Module 8 Data Integrity and Rules, Defaults and Indexes

UNIT 3

Manipulating and Modifying Data

- Module 9 Modifying Data
- Module 10 Manipulating Data

Course Roadmap

(continued)

UNIT 4

Programming SQL Server

Module 11 Introduction to Programming SQL Server Using Transact-SQ:

Module 12 Transaction Management

Module 13 Cursors

Module 14 Stored Procedures

Module 15 Triggers

Module 16 Overview of Server Administration Tasks

Know Your Manuals

- The complete set of SQL Server documentation consists of:
 - SQL Server Reference Manual, Volume 1: Commands, Functions, Topics
 - SQL Server Reference Manual, Volume 2: System Procedures and Catalog Stored Procedures
 - SQL Server Reference Supplement
 - SQL Server System Administration Guide
 - Transact-SQL User's Guide
 - SQL Server Performance and Tuning Guide
 - SQL Server Troubleshooting Guide
 - SQL Server Security Administration Guide
 - SQL Server Security Features User's Guide
 - What's New in SYBASE SQL Server Release 11.0?
 - Release Bulletins
- Get to know the manuals
 - Use your copies of the SQL Server Reference Manual, Volumes 1 and 2
 - Always read the Release Bulletins for late-breaking tips

Unit I

Introduction to SQL Server

Course Map

Unit I: Introduction to SQL Server

- 1. Introduction to SQL Server**
- 2. What SQL Server Can Do For You**
- 3. Relational Database Concepts**
- 4. Accessing the SQL Server**

Unit II: Creating Tables and Database Integrity

- 5. Simple Table Creation**
- 6. Other Ways to Create Tables**
- 7. Create Table with Data and Referential Integrity**
- 8. Data Integrity and Rules, Defaults and Indexes**

Unit III: Manipulating and Modifying Data

- 9. Modifying Data**
- 10. Manipulating Data**

Unit IV: Programming SQL Server

- 11. Introduction to Programming SQL Server Using Transact-SQL**
- 12. Transaction Management**
- 13. Cursors**
- 14. Stored Procedures**
- 15. Trigger**

Unit V: Introduction to Server Administration

- 16. Overview of Server Administration Tasks**

Course Roadmap	2
Know Your Manuals	4

UNIT I Introduction to SQL Server

Module 1

Overview of Client/Server Architecture

Module Overview	1-1
What is a Client and Server?	1-2
Client/Server Database Systems	1-3
Client/Server Hardware Components	1-5
Monolithic and Distributed Applications	1-6
Sybase Client/Server Architecture.	1-7
Flexibility in Client Applications	1-8
Open Client	1-9
Open Server	1-10
Enterprise Client/Server Computing	1-11
Benefits of Enterprise Client/Server	1-12
Sybase Products	1-13
Summary	1-15

Module 2

What SQL Server Can Do For You

Module Overview	2-1
SYBASE SQL Server	2-2
Components of SQL Server	2-3
Manages User Connections	2-4
Built Around Network Environment	2-5
Programmable with Transact-SQL	2-6
Manages and Accesses Many Databases	2-7
