ABDEL-BARY, E M	Mansoura University, Egypt	150, 970
ABDEL-RAZIK, E A	Mansoura University, Egypt	970
ABELL, W R	E I Du Pont de Nemours & Co, USA	291
AJROLDI, G	Montedison SpA, Italy	1015
ALARI, G	Bozzetto Industrie Chimiche SpA, Italy	55
ANDERS, D	Hermann Berstorff GmbH, West Germany	722
ANGIOLETTI, A	Industrie Pirelli SpA, Italy	379
ARCOZZI, A	ANIC SpA, Italy	244
BAFFICO, R	Industrie Pirelli SpA, Italy	408
BALZANI, L	Montedison SpA, Italy	272
BARBATTINI, D	Firestone Europa SpA, Italy	472
BAREL, M	National College of Rubber Technology, London, UK	569
BARRUEL, P	Distugil SA, France	903
BASSI, A C	Intermarp, Italy	767
BELL, C L M	The Malaysian Rubber Producers' Research Association, UK	777
BERTELLI, G	Montedison SpA, Italy	924
BIGGI, A	ANIC SpA, Italy	244
BIRCHALL, J D	Imperial Chemical Industries Ltd, UK	133
BLAZIC, O	Industrie Pirelli SpA, Italy	638
BONOMI, G	Industrie Pirelli SpA, Italy	891
BORCA, B	Pirelli Furlanis AIG SpA, Italy	361
BOZZI, B	ITE, Industria Tecnica Everest, Italy	373
BOZZO, G M	Tecnomare SpA, Italy	408
BRANLARD, P	Distugil SA, France	828
BRIGGS, G J	Polysar International Ltd, Canada	627
BROWN, J H	Du Pont Co (UK) Ltd, UK	333
BRUZZONE, M	Assoreni, Italy	312
BUKHINA, M F	The Scientific Research Institute of the Rubber Industry - NIIRP, USSR	471
BULL, A L	Koninklijke - Shell Laboratorium, Holland	262
BURROUGHS, P	Du Pont (UK) Ltd, UK	484
CANIDIO, A	ANIC SpA, Italy	322
CANONICI, O	Italy	41
CANTONI, G	SIR Consorzio Industriale SpA, Italy	876
CAPPELLAZZO, G	Firestone Europa SpA, Italy	472
CARBONARO, A	Assoreni, Italy	312

IRC 79

**Proceedings
of the**

International Rubber Conference 1979

venice, october 3-6, 1979

Secretariat:

36, via San Vittore - 20123 Milano (Italy) - Phone: (02)432903

INTERNATIONAL RUBBER CONFERENCE 1979

EXECUTIVE COMMITTEE:

A. PINI (CHAIRMAN)
G. ALARI
B. BALDI
E. DE VINCENTIIS
E. LO SCALZO
S. ROMBOLOTTI

SCIENTIFIC COMMITTEE:

B. KOSCHATZKY (CHAIRMAN)
A. ANGIOLETTI
A. ARCOZZI
O. CANONICI
G. CECCATO
M. DE MALDE'
F. FERRE'
G. GIULIANI
C. MAZZA
L. PORRI
V. ZERBINI

SPONSORING BODIES:

AIRIEL

(Italian Association for the Research in the
Application of Elastomers) together with

ASSOGOMMA

(Italian Rubber Manufacturers' Association)

Contents

**THE PAPERS ARE PUBLISHED FOLLOWING THE SCHEDULE
OF SESSIONS OF IRC 79:**

	page
<i>General Papers</i>	15
Market forecasts a key to development of synthetic rubber industry <i>G P Cavallini (ANIC, Italy) and D Pagnini (Montedison, Italy)</i>	17
✓ Investigation of fluorocarbon rubbers Structural transformations under their processing <i>A A Dontsov, A V Chulyukina and S P Novitskaya (Scientific Research Institute of the Rubber Industry, USSR)</i>	29
✓ The technology of materials and manufacturing processes as an aid in overcoming oil shortage problems <i>O Canonici (Italy)</i>	41
Shelf storage of uncured compounds: survey of different secondary accelerators and their influence on the storage stability <i>G Alari, D Forlani and E Mignanelli (Bozzetto Industrie Chimiche, Italy)</i>	55
About fracture mechanics of rubber <i>V. N. Poturaev (Ukrainian Academy of Sciences, USSR)</i>	65
Butyl rubber – Halogenation mechanisms <i>A Van Tongerlo and R Vukov (Polysar International, Canada)</i>	70
Influence of environmental factors on interply adhesion <i>K M Davies (Monsanto Europe S A, Belgium)</i>	80

New materials for compounding

91

Curing fluoroelastomers with bisphenols for optimum properties

93

*J B Finlay, A L Moran and A L Logothetis
(E I Du Pont de Nemours & Co, USA)*

Chemical modification of the surface of carbon black with the aid of the sulphurating agents and its influence on the process of reinforcing on the amorphous polyenes

101

*M Gajewski (Technical University, Radom, Poland);
H Jankowska, A Swiatkowski and S Zietek (Military Technical Academy, Warsaw, Poland)*

New and versatile reinforcing phenolic resins for the rubber industry

111

H Fries, E Esch and T Kempermann (Bayer AG, West Germany)

Grafted Clay - A new mineral filler with improved technical characteristics

132

M Moncel (Blancs Minéraux de Paris, France)

Research on a new reinforcing white filler for rubber

133

J Hutchinson and J D Birchall (Imperial Chemical Industries Limited, UK)

Δ Controlled viscoelasticity by natural rubber modification
I R Gelling and J F Smith (Malaysian Rubber Producers' Research Association, UK)

140

Effect of some thiadiazole derivatives as accelerators for polychloroprene

150

*E M Abdel-Bary (Mansoura University, Egypt); N A Ghanem,
A A Yehia and A F Younan (National Research Centre, Cairo, Egypt)*

Latex technology and applications

159

Δ Developments in the heat sensitisation of NR latex compounds
A D T Gorton and T D Pendle (Malaysian Rubber Producers' Research Association, UK)

161

Strength of elastomer materials

O Shepelev and M Shepelev (Israelatex Ltd, Israel)

175

Δ Properties of peroxidated latices and films based on them
*S E Shvetsov, V V Chernaya and V L Kuznetsov
(Research Institute of Rubber/Latex Goods, USSR)*

194

	page
Compositions for treatment of soil on the basis of synthetic latex <i>O Lerner, F Lerner and M Shepelev (Isralatex Ltd, Israel)</i>	195
The influence of auxiliary compounding ingredients on the vulcanisation of latex compounds <i>T Sweeney (Vulnax International Ltd, UK)</i>	201
Adsorption of sodium dodecyl sulphate on natural rubber latex particles and determination of specific surface area of the particles <i>S F Chen (Rubber Research Institute of Malaysia, Malaysia)</i>	215
<i>Developments at the interface between rubber and plastics</i>	227
Morphology and mechanical properties of new elastoplastics based on alternated polyesteramide <i>G della Fortuna, A Melis, G Perego, R Vitali and L Zotteri (Assoreni, Italy)</i>	229
✓ Elastoplastic materials based on regularly alternated polyesteramides: properties, processing and applications <i>A Arcozzi, A Biggi, G Da Re (ANIC, Italy) and L Zotteri (Assoreni, Italy)</i>	244
Chlorinated polyethylene - advantages of its application in the elastomer sector <i>E Rohde (Bayer AG, West Germany)</i>	254
Thermoplastic elastomers, the utilisation of structural parameters in application developments <i>A L Bull and K van Henten (Koninklijke/Shell Laboratorium, Netherlands)</i>	262
Composition and properties of thermoplastic polyolefin rubbers <i>S Danesi and L Balzani (Montedison, Italy)</i>	272
Thermoplastic rubber <i>H Daalmans (DSM, Netherlands)</i>	281
<i>New elastomers</i>	289
Ethylene-acrylic rubber technical developments <i>R M Murray, W R Abell and J F Hagman (E I Du Pont de Nemours & Co, USA)</i>	291

	page
Tensile properties of polyurethane-elastomers based on hydroxyl terminated polybutadienes <i>M A Hadhoud</i> (Cairo Military Technical College, Egypt)	301
Trans butadiene-piperylene elastomers - preparation and structural properties <i>A Carbonaro, L Gargani, E Sorta and M Bruzzone</i> (Assoreni, Italy)	312
Trans butadiene-piperylene elastomers - properties and applications <i>E Lauretti, G Santarelli, A Canidio (ANIC, Italy) and L Gargani</i> (Assoreni, Italy)	322
Fluorocarbon elastomers for high temperature and chemical sealing applications <i>J H Brown (Du Pont Co Ltd, UK)</i>	333
Current applications of polynorbornene elastomers <i>P Le Delliou (CdF Chimie, France) and V Massara</i> (Massara, Italy)	349

New articles and applications 359

Flexible structures for water control <i>B Borca and U Delle Piane (Pirelli Furlanis AIG, Italy)</i>	361
Applications of elastoplastics in waterproofing sector <i>B Bozzi (Industria Tecnica Everest, Italy)</i>	373
Rubber absorber for solar panels <i>A Angioletti (Industrie Pirelli, Italy)</i>	379
Innovations in low-strength conveyor belt reinforcement <i>G Verbauwheide (N V Bekaert S A, Belgium)</i>	396
The use of rubberized sheeting as partitions for submerged tanks utilized for off-shore oil fields <i>R Baffico and S Di Lucrezia (Industrie Pirelli, Italy)</i> <i>G M Bozzo and D Faso (Tecnomare, Italy)</i>	408

Testing 427

Study on methods using Monsanto rheometer, Wallace-Shawbury curemeter and Wallace plastimeter for assessment of the curing characteristics of natural rubber <i>S Kartowardoyo (Balai Penelitian Perkebunan Bogor, Indonesia)</i>	429
--	-----

	page
✓ The measurement of dynamic mechanical properties of elastomers with a computerized torsional pendulum <i>M Seeger (Brabender OHG, West Germany)</i>	442
Fuels of to-day and fuels of the future in automobile: applicability limits of nitrile rubbers used for technical articles in contact with fuel <i>S Piazza, G Santarelli (ANIC, Italy) and L Passarini (Assoreni, Italy)</i>	451
Designing light colored EPDM compounds for microwave vulcanization <i>G Stella (Essochem Europe Inc, Belgium)</i>	461
Method for rapid determination of the rubber tendency to cristallize under compression <i>M F Bukhina, O V Nikitin and A M Kucherskii (Scientific Research Institute of the Rubber Industry, Moscow, USSR)</i>	471
Analysis of cured compounds by thermogravimetry <i>G Rugo, D Barbattini, G Cappellazzo and M Poponessi (Firestone Europa, Italy)</i>	472
Applications of thermo-analytical methods in the rubber industry <i>P Burroughs (Du Pont Co Ltd, UK)</i>	484
 <i>Control of processing</i>	 499
Computer based tread extruder control systems help the rubber industry to produce more efficiently <i>L Lissner and P Pianosi (Measurex, Italy)</i>	501
✕ Application of viscoelastic analysis to rubber processing in a continuous mode <i>W A Rapetski (Farrel Co, USA)</i>	518
✕ Processability and molecular structure: two interesting examples <i>P Scaglione and A Morazzoni (SIR Consorzio Industriale, Italy)</i>	535
Quantitative carbon black dispersion analysts <i>W M Hess, V E Chirico and P C Vegvari (Cities Service, USA)</i>	549
✕ Influence of carbon black on processability of rubber stocks. V extrusion <i>G R Cotten (Cabot Corporation, USA)</i>	550
✕ Characterization of carbon blacks by performance - related physical chemical tests <i>G Kraus, P H Johnson and H E Railsback (Phillips Petroleum Co, USA) and A Portolani (Phillips Carbon Black Italiana, Italy)</i>	559

	page
A study of pressure losses and heat transfer in the injection moulding of white-filled styrene butadiene rubber compounds <i>K Palit and M Barel (National College of Rubber Technology, UK)</i>	569
✓ Influence of mixing parameters on processing safety <i>A Van Meerbeek and E R Rodger (Monsanto Europe Technical Center, Belgium)</i>	586
Tyres	597
Migration of plasticizers between different compounds <i>A Morando, L Migliarini and G Tavazza (Industrie Pirelli, Italy)</i>	599
Polyisoprene molecular structure effect on tyre rubber vulcanizate properties <i>L V Masagutova, L E Poluektova, N I Troizkaya, V A Sapronov, V F Evstratov, V G Zhakova (Tyre Research Institute, USSR)</i>	615
The utility of labile crosslinked SBR in radial tires <i>G J Briggs, J M Holmes and Y K Wei (Polysar International, Canada)</i>	627
The fatigue of tyres <i>O Blazic, A Chiesa and G Ghilardi (Industrie Pirelli, Italy)</i>	638
The Dunlop tyre dynamics machine <i>D J Osborne (Dunlop Ltd, UK)</i>	648
✓ High temperature flex fatigue resistance of tread vulcanizates based on blends of polybutadiene with NR and SBR <i>C K Das and W Millns (Indian Rubber Manufacturers' Research Association, India)</i>	658
Failure and fatigue of the rubber to brass bond <i>A A Hassan and C Hepburn (Loughborough University of Technology, UK)</i>	668
Improving quality and efficiency of military tires for low life cycle costing <i>S Kyriakides (Chem-Pro Manufacturing Company Inc, USA)</i>	684
Equipment	695
The influence of residual stresses in elastomeric seals under high strain <i>G Medri, P G Molari and A Strozzi (Istituto di Meccanica Applicata alle Macchine, Bologna, Italy)</i>	697*
