# Preface

---

It is probably true that the UNIX† System V operating system has extensive documentation, since most things are written down somewhere. The problem is that an inexperienced user usually does not know where to look for a particular subject, and even when the requisite subject matter has been found, it is sometimes hard to understand.

This book sets out to lead the beginner by the hand, to show how to use System V in a simple fashion, and how to gain more information by reading the available documentation. For the user with some experience, this book shows how to use some of the more sophisticated programs provided on System V.

## Caveat

This book is not a substitute for the existing System V documentation — it is a supplement to it.

Before you dip into the body of this book, you are encouraged to read through the table of contents. Although reading the table of contents is not normally the first thing you might think of doing with a book, the table of contents in this book is arranged such that it represents an overview of the topics and materials discussed herein.

## Who Should Read This Book

This book is an introductory guide for users who are new to System V. Although the system and its myriad utilities are comprehensively documented, that documentation is mostly in the form of reference materials, ‘memory joggers’, and ‘cheat sheets’.

Additionally the commands for handling files, getting information, and processing text, tend to have short and sometimes cryptic names such as `ls`, `grep`, `rm`, and so on. The system itself, and its many utilities, are often terse in their interactions with users. This book provides a bridge for users who have never used System V before, to help them over the initial hurdles of learning this new and powerful computer tool.

---

† UNIX is a trademark of AT&T Bell Laboratories.

Readers with some experience of System V can gain a better understanding of the system and its extensive but sometimes cryptic documentation. Experienced users will probably find that the logical arrangement of subject matter in this book is useful.

Educators should find this book suitable for course material, either about System V itself, or when using System V as a vehicle for other topics.

We have tried to show not only the facilities, commands, and utilities of System V, but what they might be used for. We use the examples to illustrate how the various utilities can be applied to transform text files in useful ways. We illustrate using System V by successively introducing more of the system's capabilities on a chapter-by-chapter basis. Each set of new capabilities uses material which has gone before. This ordering of material is part of the philosophy behind System V: to build upon what went before.

We have also tried to show areas where the misspelling of a command or a filename, or the misuse of a command, might give rise to error responses from the system. Therefore, as you read through the examples, you will find many illustrations of the form:

If you do *this*, you will get *that* result, and here is a possible reason

We believe that this is a positive approach to learning a new system. Many beginners get discouraged when the results of a command are not what they expected, and they have no idea why, or what to do next. In this book we have tried to remedy that situation.

## Acknowledgements

There are many people we wish to thank for all their help.

- **Dual Systems** of Berkeley, California, sold us the computer system — a System 83/80 running System V — used to develop and check out the examples you will read in these pages.
- **Sun Microsystems** of Mountain View, California, provided the computer systems to format and print the camera-ready copy for this book.
- **Ken Greer** of the **Elan Computer Group**, Los Altos, California, provided use of his A. T. and T. 7300 system running System V, where we were able to cross check some of the examples.
- **Earl Stahl** acted as general purpose system wizard and troubleshooter.
- **J. D. Cloer** provided book-design, graphics advice, and aesthetics, while **Sean Browne** provided some last-minute crisis management.
- Most deserving of our thanks are the many friends and colleagues who encouraged us, proof-read for us, and corrected our blunders.

## Colophon

This book was completely typed and checked out using UNIX-based and System V-based computers.

The text was typed using the `vi` and `ex` editors which we discuss in chapters 7 and 8 — *The Visual Text Editor vi* and *The ex and ed Line Editors*.

The manuscript was formatted using the System V tools `pic` (for drawing pictures), `tbl` (for laying out tables), `eqn` (for describing mathematical equations), and device-independent `troff` (that did the actual page layout). We discuss these tools in chapters 9, 10, and 11 — *Document Preparation Using System V, Document Formatting Packages, and Typesetting with troff and nroff*.

Table of contents and index were generated by home-grown software packages.

The formatting tools were run on a Sun Microsystems Sun-2/120 system running Sun's version of the 4.2 BSD operating system. The camera-ready manuscript was printed on Sun Microsystems' LaserWriters.

# Contents

<b>Preface</b> .....	<b>xxiii</b>
<b>Chapter 1 Introduction</b> .....	<b>1</b>
1.1. UNIX System V Documentation .....	4
1.2. Evolution of the UNIX System .....	5
1.3. Conventions .....	7
1.4. How This Book Is Organized .....	8
<b>Chapter 2 Getting Started on UNIX System V</b> .....	<b>11</b>
2.1. User Names and Passwords .....	11
2.2. Signing On to the UNIX System .....	12
The UNIX System Prompt .....	14
Notes and Cautions on Login .....	15
Initial Password .....	15
Login Messages from the UNIX System .....	15
2.3. Correcting Typing Mistakes .....	16
The Erase Character .....	17
The Line Kill Character .....	18
Changing the Erase and Kill Characters with <b>stty</b> .....	19
2.4. Some Simple Commands .....	20
2.5. Format of UNIX System Commands .....	21
Arguments to commands .....	22

Quoting Arguments to Commands .....	23
2.6. Changing Your Password with <b>passwd</b> .....	24
2.7. The Shell's Use of Special Characters .....	25
Halting Output Temporarily .....	26
Stopping a Command .....	26
2.8. Signing Off .....	27
2.9. How to Read the UNIX System Manuals .....	27
Print Manual Sections with <b>man</b> .....	31
Table of contents and the Permuted Index .....	31
2.10. Summary .....	33
<b>Chapter 3 Directories and Files</b> .....	<b>35</b>
3.1. Print Current or Working Directory with <b>pwd</b> .....	36
3.2. List Directory Contents with <b>ls</b> .....	37
3.3. Changing Working Directory with <b>cd</b> .....	44
Notes and Cautions on Changing Directory .....	46
3.4. Full Pathnames and Relative Pathnames .....	47
3.5. Rules for Names of Files and Directories .....	49
File Naming Conventions .....	50
3.6. Looking at the Contents of a File with <b>cat</b> .....	51
3.7. Looking at the contents of a file with <b>pg</b> .....	53
3.8. Looking at the End of a File with <b>tail</b> .....	53
3.9. Determining the Type of a File with <b>file</b> .....	54
3.10. Creating User Directories with <b>mkdir</b> .....	55
3.11. Copying Files with <b>cp</b> .....	61
3.12. Moving and Renaming Files with <b>mv</b> .....	63
3.13. Removing Files with <b>rm</b> .....	69
3.14. Deleting Directories with <b>rmdir</b> .....	71
3.15. Wild-card Characters or Metacharacters .....	71
Match any Single Character with <b>?</b> .....	72
Match String of Characters with <b>*</b> .....	73

Classes of Characters with [ and ] and - .....	75
3.16. Non-Printing Characters in Filenames .....	78
3.17. Ownership and Protection .....	79
Changing Permissions with <b>chmod</b> .....	82
Initial Permissions — the User Mask .....	87
3.18. Summary .....	88
<b>Chapter 4 Processes and Standard Files</b> .....	<b>89</b>
4.1. Redirecting the Standard Output .....	90
Redirecting and Appending the Standard Output .....	91
4.2. Redirecting the Standard Input .....	91
4.3. Notes and Cautions on Redirection .....	93
4.4. Creating a File the Easy Way with <b>cat</b> .....	93
4.5. Connecting Commands with Pipelines .....	95
Filters .....	97
4.6. To See and to Save with <b>tee</b> .....	98
4.7. Diagnostic Output .....	98
4.8. Background Processing .....	100
Finding out What is Going On with <b>ps</b> .....	102
Running Low Priority Commands with <b>nice</b> .....	105
Immunity from Disconnects with <b>nohup</b> .....	106
Stopping Background Processes with <b>kill</b> .....	107
4.9. Summary .....	107
<b>Chapter 5 User to User Communication</b> .....	<b>109</b>
5.1. Sending Messages with <b>write</b> .....	109
5.2. Controlling Messages with <b>mesg</b> .....	114
5.3. The Electronic Mail System using <b>mail</b> .....	115
Sending Mail .....	116
Reading Your Mail .....	118
Forwarding Mail to other Users .....	122

Exiting from <b>mail</b> .....	123
Options to the <b>mail</b> Command .....	124
5.4. The Electronic Mail System using <b>mailx</b> .....	125
Sending mail with <b>mailx</b> .....	125
Reading mail with <b>mailx</b> .....	127
5.5. Keeping an Engagement Diary with <b>calendar</b> .....	129
5.6. Timed Delivery Messages with <b>at</b> .....	131
Looking at requested <b>at</b> jobs .....	136
Cancelling requests scheduled with <b>at</b> .....	136
5.7. Reading current events with <b>news</b> .....	137
Adding a news item .....	138
5.8. Summary .....	139
<b>Chapter 6 Text Manipulation</b> .....	<b>141</b>
6.1. Printing a File .....	142
The Line Printer Spooler — <b>lp</b> .....	142
Preparing a File for Printing with <b>pr</b> .....	143
6.2. Splitting a File Apart with <b>split</b> .....	146
6.3. Sorting Text Files with <b>sort</b> .....	148
Sorting into Alphabetical Order .....	148
Sorting Into Numerical Order .....	149
Saving Sorted Output .....	153
Merging Already Sorted Files .....	154
Duplicated Lines in Sorted Files .....	156
Field Separators for Sorting .....	157
6.4. Counting Things in a File with <b>wc</b> .....	158
6.5. Finding Text Patterns in a File with <b>grep</b> .....	160
Searching for Character Strings .....	160
Inverting the Search with the <b>v</b> Option .....	162
Regular Expressions in Text Patterns .....	163
Match Beginning and End of Line with <b>^</b> and <b>\$</b> .....	163

Match Any Character with <code>.</code> .....	164
Character Classes with <code>[</code> and <code>]</code> and <code>-</code> .....	165
Closures — Repeated Pattern Matches .....	166
Subsets of Regular Expressions .....	167
Examples of Regular Expressions .....	167
Other Options to <code>grep</code> .....	169
6.6. Fast Searching for Fixed Strings with <code>fgrep</code> .....	170
6.7. Finding Full Regular Expressions with <code>egrep</code> .....	171
✓ 6.8. Replacing Character Strings with <code>sed</code> .....	171
✓ 6.9. Translating Characters with <code>tr</code> .....	173
6.10. Rearranging Files with <code>cut</code> and <code>paste</code> .....	175
Cutting Out Columns with <code>cut</code> .....	176
Cutting Out Fields with <code>cut</code> .....	177
Joining Lines using <code>paste</code> .....	178
Using <code>cut</code> and <code>paste</code> in a Pipeline .....	179
6.11. The <code>pr</code> Command Revisited .....	180
Multi Column Printing with <code>pr</code> .....	180
Printing Files in Columns using <code>pr</code> .....	182
Joining Lines using <code>pr</code> .....	183
Viewing a File with <code>pr</code> .....	184
✓ 6.12. Tracking Differences Between Files with <code>diff</code> .....	185
Tracking Differences with <code>bdiff</code> .....	191
Displaying Differences with <code>sdiff</code> .....	191
6.13. Comparing Files with <code>cmp</code> .....	194
6.14. Finding Commonality Between Files with <code>comm</code> .....	195
6.15. Summary .....	197
<b>Chapter 7 The Visual Text Editor <code>vi</code></b> .....	<b>199</b>
7.1. The <code>vi</code> Text Editor .....	200
7.2. Calling up <code>vi</code> .....	201
Recovery from system Crashes .....	203

7.3. Getting out of <b>vi</b> .....	204
7.4. Command Structure .....	204
7.5. Accessing <b>ex</b> Commands .....	205
7.6. Basic Cursor Movements .....	205
7.7. Changing the Window .....	209
7.8. The <b>undo</b> and <b>.</b> Commands .....	211
7.9. Simple Text Additions, Changes, and Deletions .....	211
Deleting Text with <b>x</b> and <b>X</b> .....	212
Replacing Characters with <b>r</b> and <b>R</b> .....	213
Entering new text with <b>a</b> , <b>i</b> , and <b>s</b> .....	215
7.10. Creating a New File .....	218
7.11. Setting Editor Options .....	219
The <b>wrapmargin</b> Option .....	220
The <b>beautify</b> Option .....	220
The <b>autoindent</b> and <b>shiftwidth</b> Options .....	221
The <b>showmatch</b> Option .....	222
7.12. Dealing with Words .....	222
Cursor Positioning over Words .....	222
Operating on Words .....	224
Deleting Words .....	224
Changing Words .....	226
7.13. Dealing with Sentences and Paragraphs .....	228
Deleting Sentences and Paragraphs .....	229
Changing Sentences and Paragraphs .....	230
7.14. Dealing with Lines of Text .....	230
Moving to Specific Characters or Columns .....	230
Changing and Deleting Parts of Lines .....	232
7.15. Operating on Whole Lines .....	234
Joining Lines Together .....	235
7.16. Line Numbers, Search Strings and Marking .....	235
Search Strings .....	238

Position Markers .....	239
7.17. Cut and Paste and Copy Operations .....	241
Moving Text with <b>delete</b> and <b>put</b> .....	241
Character Transposition .....	243
Copying Text with <b>yank</b> and <b>put</b> .....	243
Named Buffers .....	246
7.18. Accessing <b>ex</b> from within <b>vi</b> .....	246
7.19. Accessing UNIX System V commands from within <b>vi</b> .....	247
7.20. Summary .....	248
<b>Chapter 8 The <b>ex</b> and <b>ed</b> Line Editors</b> .....	<b>249</b>
8.1. Getting Started with <b>ed</b> .....	250
8.2. Getting Started with <b>ex</b> .....	252
8.3. Running System V Commands from inside the Editors .....	253
Running System commands from <b>ed</b> .....	253
Running System commands from <b>ex</b> .....	255
8.4. Setting <b>ex</b> Options .....	255
<b>ex</b> Editor Profile .....	257
8.5. Getting Out of the Editor .....	257
Quitting <b>ed</b> with <b>q</b> .....	258
Quitting <b>ex</b> with <b>q</b> .....	259
8.6. Format of Editor Commands .....	260
Line Addressing .....	261
The Current Line in the Buffer .....	261
The Last Line in the Buffer .....	261
Line Numbers .....	262
Line Zero in the Buffer .....	262
Text Patterns .....	262
The Remembered Pattern .....	263
Marking Lines .....	263
Line Addressing Expressions .....	263

8.7. Displaying the Contents of the Buffer .....	264
Displaying the Buffer with <b>ed</b> .....	264
Stepping Forward and Backward in the Buffer .....	266
Showing a Line Number .....	266
Displaying the Buffer with <b>ex</b> .....	267
8.8. The <b>undo</b> command .....	268
8.9. Adding New Text with <b>a</b> and <b>i</b> .....	269
Adding New Text in <b>ed</b> .....	269
Possible Problems When Inserting New Text .....	271
Adding New Text in <b>ex</b> .....	271
8.10. Deleting Lines with <b>d</b> .....	272
Deleting Lines using <b>ed</b> .....	272
Deleting Lines using <b>ex</b> .....	273
8.11. Changing Whole Lines with <b>c</b> .....	274
Changing Lines using <b>ed</b> .....	274
Changing Lines using <b>ex</b> .....	274
8.12. Global Commands .....	275
Global Commands in <b>ed</b> .....	276
Global commands in <b>ex</b> .....	278
8.13. Text Searching, and Substitution using <b>s</b> .....	279
Search and Substitution in <b>ed</b> .....	279
Global Substitution .....	280
The Remembered Text .....	283
Grouping Regular Expressions in the <b>s</b> Command .....	283
Some Notes on Searching and Substitution .....	284
Search and Substitution in <b>ex</b> .....	285
The <b>ignorecase</b> Option .....	289
The <b>magic</b> Option .....	290
The <b>wraps</b> Option .....	291
8.14. Reading, Writing, and Editing Files .....	291
Read a File using <b>ed</b> .....	292

Write a File using <b>ed</b> .....	292
Enter New File using <b>ed</b> .....	293
The Remembered File in <b>ed</b> .....	294
Read a File using <b>ex</b> .....	295
Write the Buffer using <b>ex</b> .....	296
Editing a New File using <b>ex</b> .....	297
Editing Multiple Files using <b>ex</b> .....	298
The Remembered and Alternate Files in <b>ex</b> .....	299
8.15. Cut and Paste Operations .....	300
Cut and Paste with <b>ed</b> .....	300
Moving Lines in <b>ed</b> .....	300
Copying Lines in <b>ed</b> .....	302
Marking Lines in <b>ed</b> .....	302
Joining Lines in <b>ed</b> .....	303
Cut and Paste Operations in <b>ex</b> .....	304
Joining Lines in <b>ex</b> .....	304
Copying Text in <b>ex</b> with <b>yank</b> and <b>put</b> .....	305
Transposing Lines in <b>ex</b> with <b>delete</b> and <b>put</b> .....	307
8.16. Extra Goodies in <b>ex</b> .....	308
Open and Visual Modes .....	309
Recovery from System Crashes .....	309
Different Versions of <b>ex</b> .....	310
8.17. Summary .....	310
<b>Chapter 9 Document Preparation Using System V</b> .....	<b>311</b>
9.1. Document Formatters — What They Are .....	312
9.2. Getting Started with <b>troff</b> .....	312
9.3. Using <b>troff</b> with Preprocessors .....	315
9.4. Macro Packages — What They Are .....	316
9.5. Using <b>troff</b> with the <b>-mm</b> Macro Package .....	318
Style Parameters for the <b>-mm</b> Macro Package .....	319

9.6. Text Structures — Paragraphs and Such .....	319
9.7. Text Structures — Lists .....	322
Initializing a List .....	322
Automatically Numbered Lists .....	323
Bullet Lists .....	325
Dashed Lists .....	326
Marked Lists .....	326
Reference Lists .....	327
Variable Lists .....	327
Nested Lists .....	328
More on List Items .....	329
List Items Without Tags .....	330
The End of List Macro .....	330
9.8. Text Structures — Footnotes .....	331
9.9. Numbered Headings .....	332
9.10. Text Structures — Displays and Such .....	333
Static Displays .....	334
Floating Displays .....	335
Laying Out Tables .....	335
Equation Displays .....	336
Describing Pictures .....	337
9.11. Formatting Text in Two Columns .....	337
9.12. Changing Fonts and Sizes of Text .....	339
Changing Fonts .....	339
Changing Sizes .....	341
Accent Marks .....	342
9.13. Basic Ideas of Typography .....	343
Point Size and Leading .....	343
Punctuation Marks .....	343
Quote Signs .....	343
Dashes .....	344

9.14. Summary .....	344
<b>Chapter 10 Document Formatting Packages .....</b>	<b>345</b>
10.1. Tabular Layout with <b>tbl</b> .....	345
Basic Concepts of <b>tbl</b> .....	346
Numerically Aligned Columns .....	349
Tables with Headings .....	350
Tables with Spanned Headings .....	351
Tables Enclosed in Boxes .....	352
Drawing Lines in Tables .....	354
Enclosing Everything In A Table In Boxes .....	355
Flowing Text Blocks in a Column .....	356
Modifying the Format of Columns .....	357
Changing the Format of a Table .....	358
10.2. Mathematical Equations with <b>eqn</b> .....	360
Getting Started with <b>eqn</b> .....	361
Subscripts and Superscripts .....	362
Fractions .....	362
Grouping Compound Expressions with Braces .....	362
Square Roots .....	363
Big Parentheses, Braces and Brackets .....	363
Summations and Integrals .....	363
Mathematical and Greek Characters .....	364
In Line Equations .....	364
10.3. The <b>pic</b> Graphics Description Language .....	365
Basics of <b>pic</b> .....	365
Basic Layout of a Picture .....	366
Objects Available in <b>pic</b> .....	366
Positioning Objects Using <b>pic</b> .....	367
Referencing Objects .....	367
<b>pic</b> Macros .....	368
