# PREFACE

---

Why was this book written? At a time when so many excellent, extensive, and beautifully illustrated texts flood the book stores, why offer another one? The reasons are fairly simple and rather unsophisticated. In our collective 30 some-odd years of teaching all kinds of students, we have become convinced that most texts fail their purpose because they overshoot the mark.

Anyone coming into contact with these students year after year cannot fail to appreciate the burden under which they operate. If they are to graduate, they must learn an enormous amount of material on an exceptionally diverse series of subjects, each increasing in scope yearly. As any student can tell you, every faculty lecturer considers his/her particular topic absolutely essential for future graduates, and so the pile of required “essentials” grows and grows. This is a manifestly untenable approach to curriculum.

A second cruel observation arises from long years of questioning students: many of them are not really that interested in immunology! As exciting, dynamic and all-encompassing in its passion as we practitioners of immunology find it to be, the students have many other interests and concerns, one of which is to pass the five or six other subjects usually taken simultaneously with immunology.

This book was therefore conceived along the lines of the noted architect Mies van der Rohe's dictum, "less is more." We have devised this text to present the bare essentials of immunology in a palatable form that will enable most students to grasp the essential principles of immunology sufficiently to pass their course. For those developing a deeper interest in the field, numerous advanced and more complete texts exist to further their interests.

The book follows the outlines of most immunology courses and is divided into chapters that approximate the length of an average lecture reading assignment. A short introduction setting the stage precedes each chapter, the end of each chapter contains a summary, and a series of study questions appears at the very end. The questions are designed to enable students to evaluate their own progress and comprehension; the appended answers are meant as a further learning experience. As new terms or concepts are introduced, they are italicized and defined for easy recognition and recall.

It is our hope that students using this text will avoid that choking sensation so common in a course in immunology and even conceive a curiosity about the subject that will lead to further study.

---

## **ACKNOWLEDGMENTS**

---

The authors are deeply indebted to a number of colleagues and students for valuable contributions to this text.

Dr. Demosthenes Pappagianis, University of California School of Medicine at Davis, contributed Chapter 20, which provides useful practical insights into the application of immunology to the prevention and therapy of infectious diseases.

Drs. Linda Werner and Jacqueline Maisonnave of the University of California School of Medicine at Davis and Drs. Geoffrey Sunshine, Peter Brodeur, and Lanny Rosenwasser of Tufts University School of Medicine were most helpful in reading and contributing valuable suggestions to portions of the text. A number of other colleagues reviewed portions of the text, and we are grateful for their criticisms and comments.

Finally, we applaud the forbearance of our wives, Joy and Thelma, who tolerated our constant whining during the writing of this book.

# **CONTENTS**

---

PREFACE .....	xix
ACKNOWLEDGMENTS .....	xxi
<b>CHAPTER 1: INTRODUCTION AND OVERVIEW</b>	
Introduction .....	1
Innate and Acquired Immunity .....	2
Immunogens and Antigens .....	3
Cells Involved in Acquired Immunity .....	4
B Lymphocytes .....	4
T Lymphocytes .....	4
Macrophages .....	5
Humoral and Cellular Immunity .....	5
Humoral Immunity .....	5
Cell-Mediated Immunity .....	7
Damaging Effects of the Immune Response .....	8
Hypersensitivity .....	8
Immediate Hypersensitivity .....	9
Delayed Hypersensitivity .....	10
Autoimmunity .....	10
Transplantation and Transfusion Reactions .....	10

Regulation of the Immune Response . . . . .	11
Transfer of Immunity . . . . .	11
Current Advances in Immunology . . . . .	11
<b>CHAPTER 2: ELEMENTS OF IMMUNITY</b>	
Introduction . . . . .	15
Innate or Natural Immunity . . . . .	15
Physiologic Barriers (Skin and Mucous Membranes) . . . . .	16
Phagocytosis . . . . .	17
Fever . . . . .	18
Biologically Active Substances . . . . .	18
Acquired Immunity . . . . .	19
Lymphatic Organs . . . . .	19
Primary Lymphoid Organs . . . . .	20
The Thymus Gland . . . . .	20
Bursa of Fabricius or Its Equivalent . . . . .	21
Secondary Lymphoid Organs . . . . .	22
The Spleen . . . . .	22
Lymph Nodes . . . . .	23
Circulation of Lymphocytes . . . . .	24
The Fate of Antigen After Penetration . . . . .	24
Summary . . . . .	27
References . . . . .	27
Review Questions . . . . .	28
Answers to Review Questions . . . . .	29
<b>CHAPTER 3: IMMUNOGENS AND ANTIGENS</b>	
Introduction . . . . .	31
Requirements for Immunogenicity . . . . .	32
Foreignness . . . . .	32
High Molecular Weight . . . . .	32
Chemical Complexity . . . . .	33
Haptens . . . . .	33
Thymus-Dependent and Thymus-Independent Antigens . . . . .	34
Antigenicity . . . . .	34
Major Classes of Antigens . . . . .	36
Binding of Antigen With Antibodies or Immunologically Competent Cells . . . . .	37
Cross-Reactivity . . . . .	37
Immunologic Adjuvants . . . . .	39

Summary . . . . .	40
References . . . . .	40
Review Questions . . . . .	41
Answers to Review Questions . . . . .	42

## CHAPTER 4: ANTIBODY STRUCTURE

Introduction . . . . .	43
Isolation and Characterization . . . . .	44
Structure of Light and Heavy Chains . . . . .	45
Domains . . . . .	47
Hinge Region . . . . .	48
Variable Region . . . . .	49
Immunoglobulin Variants . . . . .	51
Classes of Immunoglobulins . . . . .	51
Structural Features of IgG . . . . .	52
Structural Features of IgM . . . . .	52
Structural Features of IgA . . . . .	53
Structural Features of IgD . . . . .	55
Structural Features of IgE . . . . .	55
Allotypes . . . . .	55
Idiotypes . . . . .	56
Summary . . . . .	57
References . . . . .	58
Review Questions . . . . .	58
Answers to Review Questions . . . . .	60

## CHAPTER 5: BIOLOGICAL PROPERTIES OF IMMUNOGLOBULINS

Introduction . . . . .	61
Biological Properties of IgG . . . . .	62
Agglutination and Formation of Precipitate . . . . .	64
Passage Through the Placenta . . . . .	64
Opsonization . . . . .	65
Antibody-Dependent, Cell-Mediated Cytotoxicity (ADCC) . . . . .	66
Activation of Complement . . . . .	66
Neutralization of Toxin . . . . .	66
Immobilization of Bacteria . . . . .	66
Neutralization of Viruses . . . . .	67
Summary . . . . .	67

Biological Properties of IgM .....	67
Agglutination .....	67
Isohemagglutinins .....	68
Activation of Complement .....	68
Biological Properties of IgA .....	69
Role in Mucosal Infections .....	69
Bactericidal Activity .....	70
Anti-Viral Activity .....	70
Biological Properties of IgE .....	70
Importance in Hypersensitivity Reactions .....	70
Biological Properties of IgD .....	71
Summary .....	71
References .....	72
Review Questions .....	72
Answers to Review Questions .....	73

## CHAPTER 6: THE GENETIC BASIS OF ANTIBODY STRUCTURE

Introduction .....	75
Genes Involved in the Synthesis of Immunoglobulin Chains .....	76
$\kappa$ -Chain .....	76
$\lambda$ -Chain .....	78
Heavy Chains .....	78
Antibody Diversity .....	80
Multiple V Genes in the Germline .....	80
Recombination With J and D Regions .....	80
Imprecise Recombinations .....	80
Random Assortment of H and L Chains .....	81
Somatic Cell Mutation .....	81
Allelic Exclusion .....	81
Class or Isotype Switching .....	82
Summary .....	84
References .....	84
Review Questions .....	85
Answers to Review Questions .....	87

## CHAPTER 7: ANTIGEN-ANTIBODY INTERACTIONS

Introduction .....	89
Primary Interactions Between Antibody and Antigen .....	92
Affinity and Avidity .....	93

Secondary Interactions Between Antibody and Antigen . . . . .	93
Agglutination Reactions . . . . .	93
Titer . . . . .	94
Prozone . . . . .	96
Zeta Potential . . . . .	97
The Coombs' Test . . . . .	97
Passive Agglutination . . . . .	99
Precipitation Reactions . . . . .	100
The Precipitin Reaction . . . . .	100
Precipitation Reactions in Gels . . . . .	101
Patterns of Identity . . . . .	102
Patterns of Non-Identity . . . . .	103
Patterns of Partial Identity . . . . .	103
Radial Immunodiffusion . . . . .	103
Immunoelectrophoresis . . . . .	104
Immunoassays . . . . .	105
The Farr Technique . . . . .	105
The Anti-Immunoglobulin Procedure . . . . .	107
Solid Phase Immunoassays . . . . .	108
ELISA—Enzyme-Linked Immunosorbent Assay . . . . .	109
Radioallergosorbent (RAST) Test . . . . .	110
Immunofluorescence . . . . .	111
Direct Immunofluorescence . . . . .	111
Indirect Immunofluorescence . . . . .	111
Immunoabsorption and Immunoadsorption . . . . .	111
Monoclonal Antibodies . . . . .	112
Summary . . . . .	115
References . . . . .	116
Review Questions . . . . .	117
Answers to Review Questions . . . . .	119

## CHAPTER 8: COMPLEMENT

Introduction . . . . .	121
The Complement Fixation Test . . . . .	122
The Complement System . . . . .	124
The Classical Complement Pathway . . . . .	124
Activation of C1 . . . . .	124
Activation of C4 . . . . .	124
Activation of C2 . . . . .	126

Activation of C3 . . . . .	126
Activation of C5, C6, and C7 . . . . .	126
Activation of C8 and C9 . . . . .	126
The Alternative Complement Pathway . . . . .	127
Biological Activity of the Components of Complement . . . . .	129
Anaphylatoxins . . . . .	129
Chemotaxins . . . . .	129
Immune Adherence . . . . .	129
Opsonization . . . . .	130
Regulation of Complement Activation . . . . .	130
Complement Deficiency . . . . .	131
Summary . . . . .	131
References . . . . .	132
Review Questions . . . . .	132
Answers to Review Questions . . . . .	133

## CHAPTER 9: THE CELLULAR BASIS OF THE IMMUNE RESPONSE

Introduction . . . . .	135
Cells Involved in the Immune Response . . . . .	136
Ontogeny of the B Lymphocyte . . . . .	138
B-Cell Markers . . . . .	140
Surface Immunoglobulin (sIg) . . . . .	140
Fc Receptors (FcR) . . . . .	140
C3 Receptors . . . . .	141
EBV Receptors . . . . .	141
Ia and DR Antigens . . . . .	141
Ontogeny of the T Lymphocyte . . . . .	141
T-Cell Markers . . . . .	143
Humans . . . . .	143
T-11 . . . . .	143
T4 and T8 . . . . .	144
Ti . . . . .	144
T3 . . . . .	144
TdT . . . . .	144
Mice . . . . .	145
Functional Markers . . . . .	145
Mitogens and Lectins . . . . .	145
Cells That Process and Present Antigen . . . . .	146
Summary . . . . .	147

References . . . . .	148
Review Questions . . . . .	148
Answers to Review Questions . . . . .	150

## CHAPTER 10: TRIGGERING THE IMMUNE RESPONSE

Introduction . . . . .	153
Kinetics of the Immune Response . . . . .	154
Secondary Response . . . . .	154
Cellular Cooperation in the Immune Response . . . . .	156
Three Types of Cells Are Involved in the Immune Response . . . . .	156
The Carrier Effect . . . . .	156
Cell Cooperation Model for Triggering of T and B Cells . . . . .	159
T-Independent Responses . . . . .	164
Summary . . . . .	165
References . . . . .	165
Review Questions . . . . .	166
Answers to Review Questions . . . . .	168

## CHAPTER 11: GENETIC CONTROL OF THE IMMUNE RESPONSE

Introduction . . . . .	169
General Features . . . . .	170
Organization and Structure of the Major Histocompatibility Complex . . . . .	171
Class I Antigens . . . . .	173
Class II Antigens . . . . .	173
Class III Antigens . . . . .	174
Role of MHC in Control of the Immune Response . . . . .	174
Restriction by Class II MHC Molecules . . . . .	174
Possible Explanations for Non-Responder Status . . . . .	176
Failure of the Ia Molecule and the Processed Antigen to Associate .	176
Absence of Appropriate T Cells . . . . .	177
Restriction by Class I MHC Molecules . . . . .	177
The Nature of the Recognition System in Responses Restricted by the Class I MHC . . . . .	177
Role of Responses Restricted by the MHC in Immunity . . . . .	178
Association of Disease With MHC Type . . . . .	180
Possible Explanations of Association of Disease With the MHC .	180
Summary . . . . .	181
References . . . . .	182

Review Questions . . . . .	183
Answers to Review Questions . . . . .	185
<b>CHAPTER 12: IMMUNOLOGIC DISORDERS</b>	
Introduction . . . . .	187
Immune Deficiency Disorders . . . . .	188
Primary Immunodeficiency Diseases . . . . .	189
Immunodeficiency Diseases Associated With B Cells or Antibody . . . . .	189
X-Linked Hypogammaglobulinemia . . . . .	190
Transient Hypogammaglobulinemia . . . . .	190
Common Variable Hypogammaglobulinemia . . . . .	191
Selective Immunoglobulin Deficiencies . . . . .	192
Immunodeficiency Disorders Associated With T Cells . . . . .	192
Congenital Thymic Aplasia (DiGeorge Syndrome) . . . . .	192
Chronic Mucocutaneous Candidiasis . . . . .	193
Severe Combined Immunodeficiency Diseases . . . . .	194
Phagocytic Dysfunctions . . . . .	195
Diseases Due to Abnormalities in the Complement System . . . . .	196
Clq,r,s Deficiencies . . . . .	196
C4 Deficiency . . . . .	197
C2 Deficiency . . . . .	197
C3 Deficiency . . . . .	197
C5–C8 Deficiencies . . . . .	197
C9 Deficiency . . . . .	197
Secondary Immunodeficiency Diseases . . . . .	197
Acquired Immunodeficiency Syndrome (AIDS) . . . . .	198
Gammopathies . . . . .	198
Summary . . . . .	200
References . . . . .	200
Review Questions . . . . .	201
Answers to Review Questions . . . . .	202
<b>CHAPTER 13: HYPERSENSITIVITY REACTIONS</b>	
Introduction . . . . .	205
Type I—Anaphylactic Sensitivity . . . . .	206
Sensitization Phase . . . . .	207
Activation Phase . . . . .	208
Effector Phase . . . . .	211
Histamine . . . . .	211
Serotonin . . . . .	212

Eosinophilic Chemotactic Factor of Anaphylaxis (ECF-A) . . . . .	212
Heparin . . . . .	212
Slow-Reacting Substance of Anaphylaxis . . . . .	212
Platelet-Activating Factor . . . . .	213
Clinical Aspects of Type I Hypersensitivity . . . . .	213
Intervention . . . . .	215
Environmental Intervention . . . . .	215
Pharmacologic Intervention . . . . .	215
Immunologic Intervention . . . . .	215
Modified Allergens . . . . .	217
Type II—Cytotoxic Reactions . . . . .	217
Introduction . . . . .	217
Transfusion Reactions . . . . .	217
Rh Incompatibility Reaction . . . . .	218
Autoimmune Hemolytic Anemia . . . . .	218
Drug-Induced Reactions . . . . .	219
Type III—Immune Complex Reactions . . . . .	219
Introduction . . . . .	219
The Arthus Reaction . . . . .	220
Serum Sickness . . . . .	221
Infection-Associated Immune Complex Disease . . . . .	224
Occupational Diseases . . . . .	226

References . . . . .	227
Review Questions . . . . .	228
Answers to Review Questions . . . . .	231

## CHAPTER 14: DELAYED TYPE HYPERSENSITIVITY: T-CELL-MEDIATED IMMUNITY

Introduction . . . . .	235
General Characteristics . . . . .	236
Induction . . . . .	236
Gross Appearance and Histology . . . . .	236
Mechanism of CMI . . . . .	237
Presentation of Antigen . . . . .	238
Release of Lymphokines . . . . .	239
Macrophage Chemotactic Factor . . . . .	239
Migration Inhibiting Factor (MIF) . . . . .	239
Macrophage Activating Factor (MAF) . . . . .	240

Lymphotoxin . . . . .	241
Interleukin-2 (IL-2) . . . . .	241
Consequences of CMI . . . . .	242
Variants of DTH . . . . .	242
Contact Sensitivity . . . . .	243
Allograft Reaction . . . . .	244
Graft Versus Host Reaction . . . . .	244
Cutaneous Basophil Hypersensitivity (CBH) . . . . .	245
Summary . . . . .	246
References . . . . .	247
Review Questions . . . . .	247
Answers to Review Questions . . . . .	249

## CHAPTER 15: CONTROL MECHANISMS IN THE IMMUNE RESPONSE

Introduction . . . . .	251
Regulation by Antigen . . . . .	252
Regulation by Antibody . . . . .	252
Immunologic Tolerance Mediated by Antigen . . . . .	252
Experimental Conditions for Induction of Tolerance . . . . .	255
Role of Accessory Cells in Tolerance . . . . .	256
Roles of T and B Lymphocytes in Tolerance . . . . .	256
Mechanisms of Immunologic Tolerance . . . . .	258
Mechanisms of Unresponsiveness in B Cells . . . . .	258
Clonal Abortion . . . . .	258
Clonal Deletion by Receptor Blockade . . . . .	259
Mechanisms of Induction of Tolerance in T Cells . . . . .	259
Clonal Abortion . . . . .	259
Clonal Deletion . . . . .	260
Suppressor T Cells . . . . .	260
Summary . . . . .	261
References . . . . .	262
Review Questions . . . . .	262
Answers to Review Questions . . . . .	264

## CHAPTER 16: AUTOIMMUNITY

Introduction . . . . .	267
Examples of Autoimmune Disease . . . . .	268
Antibody-Mediated Autoimmune Diseases . . . . .	268
Autoimmune Hemolytic Anemia . . . . .	268
Myasthenia Gravis . . . . .	269
