Learned Information Ltd.,
Besselsleigh Road, Abingdon,
Oxford, England.

Preface

- (1) The EUSIDIC DATABASE GUIDE is an international directory with a European emphasis. It lists every database reported as being available, or potentially available, to the public, regardless of geographical origin. It lists all reported European operations, whether on-line or in batch mode, and all reported non-European on-line operations networked to Europe. Some other non-European services are also incorporated.
- (2) The number of unique entries has developed as follows:

	<i>Databases in Europe</i>			<i>EUSIDIC DATABASE GUIDE</i>			
	1975	1976	1977	1978	1979	1980	1983
bibliographic files	335	337	422	533	565	654	762
data banks	51	149	268	568	715	755	1083
all databases	386	486	690	1101	1280	1409	1845
suppliers, vendors, networkers, brokers	284	365	510	777	859	903	983
total no. of entries	670	851	1200	1878	2139	2312	2828

- (3) The body of this publication is a printout of Eusidic's European Scientific Information Referral working-group (EUSIREF). The tape corresponding to this printout is available through Eusidic.
- (4) The production of the Eusidic Database Guide is now automated as much as possible, and the work is distributed between European organizations. The compilation of information is done at the Royal Institute of Technology in Stockholm, and the computerization is carried out at the Institut für Maschinelle Dokumentation in Graz (coordinated by Eva Bertha).
- (5) Last year, all entries of the guide were sent out for checking to the organizations listed. I would like to thank them all for the help they have given in returning the corrected entries, and for the interest they have shown. A special thanks goes to the members of EUSIREF who have helped in tracing the organizations, and making them reply to our questionnaire.

I would also like to thank all other members of the information community who contributed to the content. Without this help, this Guide would have been impossible to prepare, and I appeal to all of the Associations and the community to assist us, and thereby yourselves, by supplying corrections and additions.

Please write to:

EUSIDIC DATABASE GUIDE

Malin Edström
Chairman, EUSIREF

Introduction

(0) The EUSIDIC DATABASE GUIDE is intended to be a comprehensive list. All relevant details are listed under the name of the appropriate organization (producers, vendors, network operators, etc.).

(1) The Guide consists of five sections; the main entry and five indexes.

— ORGANIZATIONS, giving all available information about the organizations listed in the Guide, including;

- Full and abbreviated names of the organization and division
- Telephone number, telex number, and contact name
- Any restrictions on the service offered
- Any cooperating organizations or agents
- Names of databases produced, with a full description of each
- Names of databases operated, with the mode of operation
- Network connections
- Computer centres

The main entry for the organization is the name in English, if available; if not available, the name is in the original language.

Whenever a cooperating organization has its own entry elsewhere in the Guide, only its name is given; otherwise, the address is indicated as well.

Databases are fully described under the entry for the producer.

— INDEX TO ORGANIZATIONS is a list of the names and abbreviated names, in both English and the original language, of all organizations, cooperating organizations and agents. The index refers back to the main list of organizations.

— INDEX TO DATABASES lists all databases found in the Guide, under both full and abbreviated names.

Abbreviated names will only refer the user to the organization producing or operating the database; additional information on the time coverage, and the organization running it, is given against the full name.

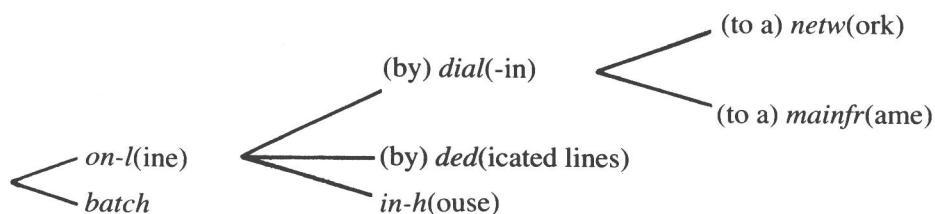

— SUBJECT INDEX TO DATABASES AND ORGANIZATIONS lists all databases under the appropriate heading or headings. Organizations producing databases are also included here, classified by the subject areas of the databases that they produce. Entries in boldface indicate databases, and those in ordinary type indicate organizations.

— INDEX TO NETWORKS lists all networks referred to in the Guide, and gives references to organizations operating, or being connect to, a network.

— GEOGRAPHICAL INDEX lists all the organizations in the Guide by country.

(2) The classification of the databases uses very broad terms, and generally only one is used. Additional index-terms, provided by the producer, may be given in the database description. In other cases, the database content may be inferred from the name, or from other remarks given.

- (3) The following modes of operation are distinguished. The abbreviations in parentheses are those used in the Guide.

In addition, a distinction is made between retrospective (retr) and current-awareness (curr) searching, and between private operations (priv) and all others (unmarked). Data banks should be considered to be retrospective, unless otherwise stated.

Whenever possible, the most specific mode of operation is given; a less-specific indication is only used in the case of uncertainty or transition.

- (4) A distinction has been made between bibliographic databases and data banks containing information; the latter are distinguished by the note “data bank” (in italics) after the name.

Contents

PREFACE iv

INTRODUCTION v

ORGANIZATIONS 1

Listed alphabetically, with full information and details of databases produced or operated

INDEX TO ORGANIZATIONS 139

Alphabetical list of databases showing database producers and operators, cross-referenced to the entry number in the main list of organizations

SUBJECT INDEX TO DATABASES AND ORGANIZATIONS 156

Under each subject heading, an alphabetical list of relevant databases and organizations is given, cross-referenced to the entry number in the main list of organizations

Aerospace	General	Patents
Agriculture	Geography	Petroleum
Art	Glass	Philosophy
Biology	History	Physics
Business	Information	Printing
Ceramics	Law	Public Administration
Chemistry	Linguistics	Religion
Civil Engineering	Literature	Sea
Demography	Mathematics	Social Sciences
Documentation	Mechanical Engineering	Space
Earth	Medicine	Sports
Economics	Metals	Telecommunications
Education	Music	Textiles
Electrical Engineering	Nucleonics	Trade Marks
Energy	Packaging	Transport
Environment	Paper	Wood

INDEX TO NETWORKS 195

Lists all the networks referred to in the Guide, with names of organizations and countries

GEOGRAPHICAL INDEX 202

Lists by country all the organizations in the Guide

INDEX TO DATABASES 210

Lists all databases found in the Guide, under both full and abbreviated names

Organizations

Listed here in alphabetical order are over 900 database producers and operators. The information given includes (where available): Full and abbreviated name of organization and division; Telephone and telex numbers and contact person; Restrictions for service; Cooperating organizations, agents etc.; Databases originated with full description; Databases operated with mode of operation; Network connection; Computer centre(s).

For a full alphabetical listing of organizations, abbreviations, original language names, cooperating organizations and agents, see Index to Organizations (p. 139).

Eusidic organizations and their services are identified by an asterisk.

1 Accent on Information Inc

parent org.: Cheever Publishing
PO Box 700; Bloomington IL61701; USA
telephone: (309) 3782961
contact: Cheever RC
availability: Europe excluded
originates and operates:
Accent data bank
subject: MEDICINE
remarks: aids for the handicapped
available: 1956 -
cumulative size: 5.200 items

2 Administration Management Agency

(Sorifu Gyosei Kanri Cho)
