Foreword to the fourth edition

It is seven years since the third edition of *A Guide to Teaching Practice* was published and we are indebted to Routledge for the opportunity of updating the text with a fourth edition. Keith Morrison joins Louis Cohen and Lawrence Manion as co-author to map the dramatic changes that have taken place since 1989 to the aims, content, pedagogy, evaluation and assessment of teaching and learning. The book has been comprehensively rewritten, with inclusion of several major new topics:

Some perspectives on teaching and learning,
Preparation and planning,
Beginning curriculum planning,
Practising teaching – primary teaching, secondary teaching,
Mixed-ability teaching,
Language in the classroom,
Equal opportunities,
Management and control in the classroom,
The classroom environment and situational factors,
Assessment, record-keeping and records of achievement.

The fourth edition also includes outlines and/or discussion of:

- 1 The Education Reform Act of 1988.
- 2 The national curriculum of England and Wales.
- 3 The rise of local management of schools.
- 4 The growth of managerialism in education.
- 5 The context of curriculum planning within a whole-school framework.
- 6 The increased emphasis on quality-assurance and quality-control mechanisms.
- 7 The politicisation of education and the intervention of a centralist government.
- 8 The growing numbers and types of educational innovations.
- 9 The rise of consumerism and quasi-market models of education.
- 10 The return of an extended version of a back-to-basics curriculum.

- 11 The strengthening of the relationship between education and the economy.
- 12 The growing concern for school effectiveness.
- 13 The development of diversity in educational provision and its impact on preparation for teaching.
- 14 The rise of competency-driven views of curriculum design, development, content and assessment.
- 15 The impact of information technology on flexible learning, resource-based learning and student-centred learning.
- 16 The extent of assessment-driven curricula and reforms in assessments and examinations.
- 17 The development of new initiatives in education such as: the rise of records of achievement, schools and industry links, vocational qualifications, modular curricula, subject-specialist teaching in primary schools, alterations to management structures in secondary schools, cross-curricular issues and collegial planning in secondary schools.
- 18 Changes to the purposes, contents, assessment and management of courses of initial teacher education.
- 19 The development of school-based training and partnership models of initial teacher education.
- 20 The shrinking role of local education authorities and the reduction of teacher autonomy and decision-making.
- 21 The changing nature of teacher induction and mentoring.

We should like to think that the comprehensive updating of the fourth edition will ensure that *A Guide to Teaching Practice* continues to be a major, standard text on preparing student teachers to work in contemporary classrooms.

Louis Cohen Ph.D., D.Litt. is Emeritus Professor of Education at Loughborough University. Lawrence Manion Ph.D. is former Principal Lecturer in Music at Didsbury School of Education, Manchester Metropolitan University. Keith Morrison Ph.D. is Senior Lecturer in Education in the School of Education at Durham University.

Part I Some perspectives on teaching and learning

1	The politicisation of education	3
2	Information technology and changes in teaching and learning	14
3	Action planning in teaching and learning	17
4	The impact of school-based initial teacher education	20
	<i>The significance of competence-driven courses and assessment</i>	20
5	An overview of the national curriculum of England and Wales	32

Part II Preparation and planning

	Introduction	39
6	The preliminary visit	43
	<i>The purpose of the preliminary visit</i>	43
	<i>What to look for and what information to collect</i>	43
	<i>Understanding rules and routines</i>	49
	<i>Particular information to record</i>	53
7	Aims and objectives	57
	<i>Terminology</i>	57
	<i>Some characteristics of aims</i>	59
	<i>Two kinds of objectives: (1) behavioural and (2) non-behavioural</i>	60
	<i>Some characteristics of behavioural objectives</i>	63
	<i>The student teacher and behavioural objectives</i>	66
	<i>Non-behavioural objectives</i>	69

	<i>The debate surrounding the use of behavioural objectives</i>	70
	<i>Identifying and writing objectives</i>	72
	<i>Objectives in individualised learning</i>	75
	<i>Conclusion – some suggestions</i>	76
8	Beginning curriculum planning	77
	<i>The context and levels of planning</i>	77
	<i>The elements of planning</i>	81
	<i>Characteristics of the curriculum</i>	82
	<i>Staging curriculum planning</i>	90
	<i>What to include in a scheme of work</i>	94
	<i>Subject-based and topic-based approaches to the primary curriculum</i>	95
	<i>An approach to planning a scheme of work</i>	97
	<i>Evaluation, self-evaluation and review</i>	120
	<i>Evaluation of achievement of overall aims for the teaching practice</i>	124
	<i>Evaluation of achievement of the schemes of work</i>	125
	<i>Weekly and daily evaluations</i>	126
	<i>Evaluation of specific lessons</i>	127
	 Part III Practising teaching	
9	Primary teaching	139
	<i>Introduction</i>	139
	<i>Classroom organisation</i>	150
	<i>Some organisational concepts in primary education</i>	164
	<i>Teaching and learning styles in primary classrooms</i>	175
10	Secondary teaching	186
	<i>Some requisites of a secondary school student teacher</i>	186
	<i>First meeting(s) with one's classes</i>	189
	<i>Lesson presentation skills</i>	193
	<i>Teaching styles</i>	196
	<i>Some relevant research findings</i>	198
11	Mixed-ability teaching	202
	<i>The case for mixed-ability teaching</i>	202

Part I

Some perspectives on teaching and learning

Education is context-specific and context-dependent. Context refers to the settings or surroundings in which education takes place. A student teacher is faced with the exciting but challenging task of assimilating a variety of contexts very rapidly when embarking upon teaching practice, whether during a course of initial teacher pre-service education or as a newly qualified teacher entering a first appointment in a school. These contexts vary from the very broad and general macro-contexts at a societal level to the very specific micro-contexts of a particular individual in a particular school, class and lesson. The prospect can be daunting, as we see in some student teachers' concern for short-term survival in a new classroom. The thrust of this book is to support students in their initial teaching experiences – the micro-contexts of everyday life in classrooms. However, localised education is set in broader contexts of society. This part of the book sets the contemporary scene for daily teaching and learning in these broader contexts. It also describes some of the major themes of education in the last decade.

The convention used in discussions here and throughout the book will be to refer to students in initial teacher education as 'student teachers' and to children and young adults attending school as 'students'.

The politicisation of education

Education has been the subject of increasing political debate for two decades. It is hard to understate the effects of a *dirigiste*, interventionist government dominated by the Thatcherite agenda of introducing market principles into education.

The economic aspect of government policy affects funding issues for education. Since the 1988 Education Act¹ there has been a clear market ideology in education that embraces: *competition, consumerism, individualism, choice, diversity*,² *privatisation, quality control, efficiency and information*.³ These features include:

- A common national curriculum, coupled with formal assessment at ages 7, 11, 14 and 16 to enable schools to be compared to each other in 'league tables' of test results; schools themselves organise their 'delivery' of the national curriculum.⁴
- The abandoning of ceiling numbers for schools, together with 'open enrolment' (i.e. no catchment areas), designed to enable 'good' schools ('magnet schools') to flourish and 'poor' schools ('sink schools') to close – though, in fact, Brighouse and Tomlinson⁵ indicate that 'sink' schools do not close, they are simply starved of resources for improvement because of the *per capita* funding formula. In this respect Apple⁶ argues that schools become locators of social class. Indeed Tomlinson⁷ points out that it is perhaps an irony that many 'good' schools do not wish to expand simply because their existing size has contributed to their success.
- The increased number of types of schools available for 'consumers', for example 'grant maintained schools' (those schools that have opted out of local authority control); city technology colleges (whose funding was originally intended to be derived from industry); and sixth form colleges (which compete with comprehensive schools and colleges of further education for recruitment).
- The delegation of budgetary control away from local education authorities (LEAs) and into schools (i.e. local management of schools – LMS).
