

Windows Programming with Borland C++

COVERS THROUGH VERSION 4.0

- Learn to write clean, efficient Windows programs
- Teaches object-oriented concepts
- Filled with practical programming examples

Windows Programming with Borland C++

Covers through version 4.0

TABLE OF CONTENTS

Why This Book is for You	1
--------------------------------	---

Chapter 1: Introduction3

Windows from a Programmer's Point of View	4
Handles	6
Multitasking.....	7
Resources	8
Creating a Windows Program.....	10
Windows Tools	11
Programming Tips	12
Style	12
Borland C++ Extensions	13
Borland Style Dialogs.....	14
What Lies Ahead.....	14

Chapter 2: Constructing a Simple Windows Program17

Making the Directory	18
Creating the Dialog Box	18
Dialog Box Item Style	23
Setting the tab order	26
Editing the ATTRIB.H File	27
The <i>WinMain</i> procedure.....	28
The <i>attrib_dlg_proc</i> Function	31
The <i>do_set</i> and <i>do_get</i> Functions.....	34
The .DEF File	35
Putting it All Together (Borland 3.1 and Earlier)	35

Putting it All Together (Borland 4.0).....	36
Shortcuts	37
Smart Compiler, Dumb Windows	38
Summary	39
ATTRIB.CPP File	40
ATTRIB.H File	43
ATTRIB.RC File	44
ATTRIB.DEF File	45
MAKEFILE File	45
Interlude 1.....	46
NUMBER.CPP File	46
MAKEFILE File	49
Functions Introduced in this Chapter.....	50
Messages Introduced in this Chapter	55

Chapter 3: A More Complex Program57

Adding the Icon	58
Icon construction for the lazy	63
Putting the icon in the program	65
Disabling the System Menu's "Maximize" and "Resize"	65
Disabling the Check Boxes.....	66
Borland-Style Dialogs.....	68
Loading the proper library.....	72
Browsing Through the File System.....	73
Help	76
Creating a hypertext bitmap	78
The help project file	82
Adding the help file to the project (Borland 3.1 and earlier).....	84
Adding the help file to the project (Borland 4.0)	84
Viewing the .RTF file	86
Testing the help file	88
Connecting the help file to the program	89
Connecting the "Open" dialog's help button.....	90

TABLE OF CONTENTS

Summary	91
ATTRIB.CPP File	91
ATTRIB.H File	99
ATTRIB.RC File	100
ATTRIB Dialog	101
ATTRIB.ICO Icon	101
ATTRIB.DEF File	102
ATTRIB.RTF File	102
ATTRIB.HPJ File	107
MAKEFILE File	108
Interlude 2.....	109
MK_HELP.C File	109
MAKEFILE for MK_HELP	110
ATTRIB.CPP File	110
MAKEFILE for ATTRIB.....	113
Functions Introduced in this Chapter.....	115
Messages Introduced in this Chapter	119

Chapter 4: A Simple Calendar121

A Brief History of the Calendar	121
Calendar Calculations.....	123
Creating the Menu	124
Creating the Accelerators (Borland 3.1).....	128
Creating Menus with Borland 4.0.....	130
Completing the .RC file	131
Registering the Window Class	132
Painting the Calendar	135
Drawing the Calendar.....	136
Menu and Accelerator Commands	140
Printing	142
Printer Setup	146
Accelerator Issues.....	147
Hourglass Cursor.....	147

Summary	148
CAL.CPP File	148
CAL.H File	163
CAL Menu	165
CAL.HPJ File	165
DATE Dialog	166
CAL.RTF File	166
Calendar display program	167
Menu Items.....	167
Keyboard commands	167
MAKEFILE File	167
Functions Introduced in this Chapter.....	168
Messages Introduced in this Chapter	174

Chapter 5: Alarm Clock175

User Interface Design	175
Initialization Files.....	177
Storing the State.....	179
Handling the Timer.....	180
Handling the Ticking of the Clock.....	181
New Dialog Elements	184
Radio buttons	185
Check boxes.....	186
Borland-Style Buttons	187
Standard Mode Surprises	188
Summary.....	189
ALARM.CPP File	190
ALARM.H File	201
ALARM.RC File	201
WAIT_DLG Dialog	203
ASK_INFO Dialog	204
ALARM.ICO Icon	204
ALARM.DEF File	205

TABLE OF CONTENTS

MAKEFILE File	205
Functions Introduced in this Chapter.....	206
Messages Introduced in this Chapter	208

Chapter 6: Bitmap Viewer.....209

Bitmap File Format	209
Global Memory	211
The <i>GlobalMemoryData</i> Class.....	212
<i>GlobalMemoryData::GlobalMemoryData</i> (constructor)	213
<i>GlobalMemoryData::ptr</i>	213
<i>GlobalMemoryData::GlobalMemoryData</i> (destructor)	214
<i>GlobalMemoryData::size</i>	214
Reading the Bitmap	214
Dissecting the Bitmap with <i>lock_bitmap</i>	216
<i>unlock_bitmap</i>	219
Printing a Bitmap	223
Handling Functions with a Large Number of Parameters.....	226
The Clipboard.....	227
The <i>clipboard</i> Class	227
Copying Data to the Clipboard	228
Getting Data from the Clipboard.....	229
Writing the Bitmap.....	230
Setting Up the Menu	232
Displaying Information About the Bitmap.....	233
Summary.....	233
BMP.CPP File	234
CLIP.CPP File	257
BMP.H File	261
CLIP.H File	261
BMP.RC File	263
BMP Menu	265
INFO_DLG Dialog	266
FILE_DLG Dialog	267

WINDOWS PROGRAMMING IN C++

BMP.ICO Icon	267
BMP.DEF File	267
BMP.HPJ File	268
BMP.RTF File	268
MAKEFILE File	272
Functions Introduced in this Chapter.....	273

Chapter 7: DDE Communications279

DDE Protocols.....	279
DDE Communications.....	280
Getting data from the server using a cold link	281
Hot link	281
Warm link	282
Sending commands	283
Terminating the connection	284
The DDE Class	284
Implementing the Class.....	285
Handling the Window Messages.....	289
Getting Data from the Server	290
Waiting Around	293
Getting the Server to Execute a Command	294
Closing the Connection.....	295
The ADD_PROG Program	296
How ADD_PROG Works.....	297
Getting a list of program groups.....	298
Combo boxes.....	299
Terminating the conversation	300
Getting the project name	300
Installing the new items	301
Summary.....	301
ADD_PROG.CPP File	302
DDE_CLASS.CPP File	312
ADD_PROG.H File	322

DDE_CLASS.H File	323
ADD_PROG.RC File	324
ADD_DLG Dialog	325
ADD_ICON Icon.....	326
ADD_PROG.DEF File	326
MAKEFILE File	326
Messages Introduced in this Chapter	327

Chapter 8: Setup Program331

What to Install and Where to Put it	331
Where to Put the File	333
Version Checking and File Copying.....	335
Communicating with PROGMAN	337
<i>CreateGroup</i> (GroupName [,GroupFile])	337
<i>ShowGroup</i> (GroupName, ShowFlag)	338
<i>DeleteGroup</i> (GroupName)	338
<i>Reload</i> (GroupName).....	338
<i>AddItem</i> (CmdLine [,Name [,IconPath[, IconIndex[, xPos, yPos[, DefDir[, HotKey [,fMinimize]]]]]])	339
<i>DeleteItem</i> (Name)	339
<i>ReplaceItem</i> (Name)	339
<i>ExitProgram</i> (Save).....	340
Setup interaction with PROGMAN.....	340
Finishing Up.....	341
Summary.....	341
SETUP.CPP File	341
SETUP.H File	350
SETUP.RC File	350
INSTALL_DLG Dialog	351
FILE_DLG Dialog	351
SETUP.DEF File	352
MAKEFILE File	352
Functions Introduced in this Chapter.....	353

Chapter 9: Improved Calendar	355
Storing the Calendar Annotations.....	356
Reading the calendar file.....	357
Displaying the annotation.....	358
Writing the calendar information	359
Handling the Current Day	360
Selecting the current day by using the keyboard	361
Positioning with the mouse.....	363
Copying Data to the Clipboard	364
Metafile High Jinks.....	365
Summary.....	370
CAL.CPP File	370
CAL.H File	403
CAL.RC File	404
CAL Menu.....	406
INFO_DIALOG Dialog	406
DATE_DIALOG Dialog	407
CAL.ICO Icon	408
CAL.DEF File	408
CAL.HPJ File.....	408
CAL.RTF File.....	409
Calendar display program	409
Menu Items.....	409
Keyboard commands.....	410
MAKEFILE File	410
Functions Introduced in this Chapter.....	411
Messages Introduced in this Chapter	412
 Chapter 10: OLE Server.....	 413
OLE Server Overview	413
The Calendar Overview	414
Registering the OLE Server	415
Viewing the registration database	415

TABLE OF CONTENTS

Registering the calendar application	417
Server Initialization	417
OLESERVER structure	419
Open callback function	420
Create callback procedure	421
CreateFromTemplate callback function	421
Edit callback functions	422
Exit callback function	423
Release callback procedure	423
OLESERVERDOC Callbacks	424
Save callback function	425
Close callback function	425
SetHostNames callback function	426
SetDocDimensions callback function	426
GetObject callback function	427
Release callback procedure	427
SetColorScheme callback function	427
Execute callback function	428
OLEOBJECT Structure	428
QueryProtocol callback function	429
Release callback function	429
Show callback function	430
DoVerb callback function	430
GetData callback function	431
SetData callback function	432
SetTargetDevice callback function	433
SetBounds callback function	433
EnumFormats callback function	433
SetColorScheme callback function	434
Getting Data	434
get_native function	435
get_metafile function	435
get_object_link function	436
get_owner_link function	438

WINDOWS PROGRAMMING IN C++

Debugging.....	438
Changes in Other Routines.....	439
<i>WinMain</i> function	439
<i>MainWinProc</i> function changes.....	441
<i>do_update</i> function.....	442
<i>paint_cal</i> function	442
Summary.....	443
CAL.CPP File	443
Remaining Support Files	476
Functions Introduced in this Chapter.....	477

Chapter 11: Fonts479

Choosing a Font.....	483
Painting the Screen.....	488
Summary.....	490
FONT.CPP File	490
FONT.H File	502
FONT.RC File	502
FONT Menu.....	504
FONT.ICO File	504
FONT.DEF File	505
FONT.HPJ File	505
FONT.RTF File	506
Font exploration program	506
Menu Items.....	506
MAKEFILE File	507
Functions Introduce in this Chapter.....	508

Chapter 12: Custom Controls.....511

Spin Button	512
Implementing a Custom Class	513
<i>ListClasses</i> Function	513

TABLE OF CONTENTS

The Mysterious Case of the Disappearing Function	516
<i>spin_info</i> Function	517
<i>spin_edit</i> Function.....	520
<i>spin_edit_dlg</i> Function.....	523
<i>spin_flags_to_str</i> Function	524
<i>spin_button_proc</i> Function	525
Installing the Library.....	527
Debugging a DLL	528
Stuck libraries	529
The importance of the “export”	529
Testing the Spin Button	530
Where You Go from Here.....	531
SPIN.CPP File	531
SPIN.H File	543
SPIN-I.H File	543
SPIN.RC File	544
EDIT_DIALOG Dialog	546
TOOL_BITMAP Bitmap	546
TOOL_CURSOR Cursor	546
STEST.CPP File	547
STEST.H File	550
STEST.RC File	550
MAIN_DIALOG Dialog	550
MAKEFILE File	551

WHY THIS BOOK IS FOR YOU

Windows Programming with Borland C++: Covers through version 4.0
This is a valuable tool for both beginning and experienced programmers. The pages of this book include tips and discussions on such Windows programming topics as

- ◆ Designing dialog boxes
- ◆ Global memory management
- ◆ Multitasking
- ◆ Object Linking and Embedding (OLE)
- ◆ Dynamic Data Exchange (DDE)
- ◆ Using fonts
- ◆ Graphical user interface (GUI)

This book provides the techniques and coding necessary to produce simple programs, and then amplifies that discussion to present more complex programs. *Windows Programming with Borland C++* includes complete program listings for producing a calendar and an alarm clock, while introducing you to valuable ways to customize your Windows programs.

Programming Windows is not a simple task. However, the discussions and sample code presented in this book certainly will enhance your enjoyment of Windows programming while making your programs shine with a professional touch.
