Membranes in Clean Technologies

Theory and Practice

Volume 1

**WILEY-
VCH**

WILEY-VCH Verlag GmbH & Co. KGaA

The Authors

Prof. Andrzej Koltuniewicz

Wroclaw Univ. of Technology
Chemistry Department
Norwida str. 4 /6
50-373 Wroclaw
Poland

Prof. Enrico Drioli

University of Calabria
Inst. on Membrane Technology
Via P. Bucci 17 /C
087030 Rende (CS)
Italy

All books published by Wiley-VCH are carefully produced. Nevertheless, authors, editors, and publisher do not warrant the information contained in these books, including this book, to be free of errors. Readers are advised to keep in mind that statements, data, illustrations, procedural details or other items may inadvertently be inaccurate.

Contents

Volume 1

1	Development of Clean Technology Concept	1
1.1	The Evolution from Local to Global Environmental Policy	1
1.2	Proactive Strategies Contra End-of-Pipe Technologies	2
1.3	Cleaner Production Concept	3
1.4	Sustainable Chemistry Concept	4
1.5	Earlier Concepts of Sustainable Development	5
1.6	The Principles of Sustainable Development	6
1.7	Clean Technologies	8
1.8	Importance of Membranes in Clean Technologies	11
	References	12
I	Engineering of Membrane Processes	17
2	Theory of Membrane Separation Processes	19
2.1	Separation of Mixtures and Mass Transport in Membranes	19
2.2	Nonequilibrium Thermodynamics Model	23
2.3	Solution–Diffusion Model	24
2.4	Knudsen Diffusion Model	26
2.5	Viscous Flow Model	27
2.6	Concentration Polarization Model	28
	References	30
3	Membranes	31
3.1	Polymer Membranes	31
3.2	Polymer Modifications	32
3.2.1	Physical Modifications	32
3.2.2	Chemical Modifications	34
3.2.3	Polymer Blending	37

3.2.4	Pore-Filling Membranes	38
3.3	Inorganic Membranes	38
3.3.1	Sol–Gel Technique	39
3.3.2	Chemical Vapor Deposition	39
3.3.3	Zeolite Membranes	40
3.3.4	Carbon Membranes	41
3.3.5	Metal Membranes	42
3.4	Hybrid Organic–Inorganic Membranes	42
3.5	Supported Liquid Membranes	43
3.6	Membranes with Facilitated Transport	43
	References	44
4	Membrane Processes	51
4.1	Reverse Osmosis	51
4.1.1	Reverse Osmosis Theory	51
4.1.2	Effect of Concentration Polarization on the RO Process	54
4.1.3	RO Membranes	56
4.1.4	RO Modules	58
4.1.5	RO Market and Applications	58
4.2	Nanofiltration	63
4.2.1	NF Models	63
4.2.2	Rejection of Neutral Species by Size	64
4.2.3	Rejection of Charged Species	64
4.2.4	NF Membranes	65
4.2.5	NF Applications	66
4.3	Ultrafiltration	77
4.3.1	UF Theory	77
4.3.2	Limiting Flux Phenomenon	78
4.3.3	Osmotic Model	78
4.3.4	Gel Model	79
4.3.5	UF Membranes	80
4.3.6	UF Membrane Fouling	80
4.3.7	UF Applications	80
4.4	Microfiltration	84
4.4.1	MF Theory	84
4.4.2	Constant Pressure Filtration Model	85
4.4.3	Complete Pore Blocking Mechanism	85
4.4.4	Standard Mechanism of Pore Blocking	86
4.4.5	Transient Mechanism of Pore Blocking	86
4.4.6	Cake Filtration	87
4.4.7	MF Flux Enhancement	87
4.4.8	MF Applications	88
4.5	Dialysis	92
4.5.1	Dialysis Theory	93
4.5.2	DD Membranes	96

4.5.3	DD Applications	97
4.6	Electrodialysis	98
4.6.1	ED Theory	100
4.6.2	ED Membranes	101
4.6.3	ED Membrane Fouling	101
4.6.4	ED Applications	102
4.7	Pervaporation	104
4.7.1	PV Theory	104
4.7.2	PV Separation	110
4.7.3	PV Membranes	112
4.7.4	PV Applications	114
4.8	Gas Separation	123
4.8.1	GS Theory	124
4.8.2	GS Membranes Types	125
4.8.3	GS Applications	131
4.9	Vapor Permeation	133
4.9.1	VP Membranes	133
4.10	Liquid Membranes	137
4.11	Membrane Contactors	139
4.11.1	Membrane Affinity Separation	141
	References	147

II Membranes in Clean Industry 199

5 Water Industry 201

5.1	Water Management	201
5.1.1	Scarcity of Water Resources	201
5.1.2	Integrated Water Resources Management	203
5.1.3	Wastewater Reduction by Optimal Designing of Plants	205
5.1.4	The Role of Membranes in Water Management	206
5.2	Ultrapure Water Production	208
5.2.1	Membrane Processes for Ultrapure Water Production	209
5.3	Water Treatment	214
5.3.1	Conventional Methods of Water Treatment	214
5.3.2	Membrane Technologies in Water Treatment	215
5.3.3	Fouling of Membranes for Water Treatment	224
5.4	Water Sanitation	226
5.4.1	Conventional Methods of Water Sanitation	226
5.4.2	Membranes for Water Sanitation	226
5.4.3	Case Studies on Membrane Separations of Microorganisms from Water	229
5.5	Water Softening	234
5.5.1	Conventional Water Softening	234
5.5.2	Water Softening with Membranes	235

5.6	Water Denitrification	238
5.6.1	Sources of Nitrates	238
5.6.2	Membrane Denitrification	240
5.6.3	Biological Denitrification	242
5.6.4	Chemical Denitrification Processes	253
5.7	Sulfates Removal	256
5.7.1	Sulfate Characteristic	256
5.7.2	Conventional Methods of Sulfates Removal	257
5.7.3	Membranes for Sulfates Removal	259
5.8	Phosphorus Removal	260
5.8.1	Phosphorus Characteristic	260
5.8.2	Conventional Methods of Phosphorus Removal	261
5.8.3	Biological Methods of Phosphorus Removal	262
5.8.4	Membranes for Phosphorus Removal	262
5.9	Fluoride Removal	266
5.9.1	Fluoride Characteristic	266
5.9.2	Conventional Methods of Fluoride Removal	267
5.9.3	Membrane Processes for Fluoride Removal	268
5.10	Removal of Natural Organic Pollutants from Water	270
5.10.1	Characteristic of Organic Pollutants	270
5.10.2	Conventional Methods of Organic Pollutants Removal	274
5.10.3	Membrane Separation of Organic Pollutants	275
5.10.4	Case Studies on Membrane Separations of Organic Substances from Water	277
5.11	Biocides Removal	283
5.11.1	Biocides Characteristic	283
5.11.2	Conventional Methods of Biocides Removal	286
5.11.3	Membrane Filtration for Biocides Removal	286
5.11.4	Case Studies on Membrane Filtration for Biocides Removal	287
5.12	Membranes for Wastewater Reuse	292
5.12.1	Membranes for Enhancement Wastewater Treatment	292
5.12.2	Membrane Processes for the Recovery and Reuse of Wastewater	293
5.12.3	Membrane Bioreactors for Wastewater Treatment	297
5.12.4	Membranes for Agricultural Wastewaters Treatment	299
5.13	Membranes for Water Recovery and Reuse	301
5.13.1	Water Desalination	301
5.13.2	Surface Water Recovery with Membranes	303
5.13.3	Groundwater Recovery with Membranes	307
5.13.4	Membranes for Water Recovery from Wetlands	308
5.14	Remediation of Contaminated Soils	309
5.14.1	Sources of Toxic Substances in the Soil	309
5.14.2	Conventional Soil Detoxification Technologies	312
5.14.3	Membranes for Soil Detoxification	315
5.15	Membrane Fouling in Water Technologies	317

5.15.1	Fouling on Nanofiltration Membranes	317
5.15.2	Fouling on MF and UF Membranes	320
5.15.3	Fouling on IX Membranes	322
	References	323
6	Textile Industry	353
6.1	Water Consumption in Textile Industry	353
6.2	Water Management in Textile Industry	356
6.3	Conventional Processes for Water Purification and Reuse in Textile Industry	357
6.4	Membrane Processes for Water Purification and Reuse in Textile Industry	359
6.4.1	Microfiltration in Textile Industry	360
6.4.2	Ultrafiltration in Textile Industry	360
6.4.3	Nanofiltration in Textile Industry	360
6.4.4	Reverse Osmosis in Textile Industry	362
6.5	Membrane-Based Hybrid Processes for Water Purification and Reuse	363
6.5.1	Reverse Osmosis with Ultrafiltration and Ozonation for Water Purification and Reuse	363
6.5.2	Nanofiltration with Ozonation after Biological Treatment	364
6.5.3	Precipitation, Activated Carbon, Evaporation RO for Water Purification and Reuse	365
6.5.4	Coagulation with Ultrafiltration and Ozonation	367
6.5.5	Coagulation Nanofiltration	367
	References	368
7	Tannery Industry	371
7.1	Water Consumption in Tannery Industry	371
7.2	Chemicals Used in the Tanning Processing	371
7.3	Characterization of Leather Processing	372
7.4	Conventional Wastewater Treatment in Tanneries	377
7.5	Membrane Application for Recovery and Reuse of Water from Tanneries	379
7.5.1	UF in Soaking Step 1	381
7.5.2	UF in Unhairing Step	381
7.5.3	UF in the Delimiting Bating Step	382
7.5.4	UF in Degreasing Step	383
7.5.5	RO in Pickling Baths	383
7.5.6	UF and NF in Tanning Exhausted Baths	384
7.5.7	RO in Dyeing Step	385
7.5.8	RO for Water Recovery from Treated Tannery Wastewater	385
7.5.9	RO for Recovery of the Salts from Filter Pressing	386
7.5.10	Membrane Bioreactors for Treatment of Tannery Effluents	387
